

Western Uranium Corporation Announces Start of Manufacture of Second Ablation Production Unit

November 09 2015

FOR IMMEDIATE RELEASE

Toronto, Ontario and Nucla, Colorado – Western Uranium Corporation (CSE 'WUC') ('Western' or the 'Company') is pleased to announce that engineering design of the second Ablation Production Unit has been completed. Construction of the second Ablation Production Unit has started and is expected to be completed in Q1 2016. The Unit is being built at the facilities of Western near Nucla, Colorado and will be moved to the Sunday Mine Complex after completion. Production from two Ablation Production Units is expected to occur in Q2 2016.

COMMENTS OF GEORGE GLASIER, President & CEO of Western Uranium

GEORGE GLASIER, President & CEO of Western, commented: 'We are pleased to begin work on the manufacture of the second Ablation Production Unit. Adjustments and refinements to the equipment have been made by Western to further enhance the operation of the units which will significantly advance and expand the capacity of production of economically recoverable resources at lower cut-off grades.'

About Western Uranium Corporation

Western Uranium Corporation is a Colorado based uranium company focused on near production of uranium and vanadium in the western United States.
