

SILVER PHOENIX RESOURCES INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS FOR THE YEAR ENDED DECEMBER 31, 2015

The following discussion and analysis (the "MD&A") of the financial condition and results of operations of Silver Phoenix Resources Inc. (the "Company" or "Silver Phoenix") should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2015, and the notes thereto. The financial statements have been prepared in accordance with International Financial Reporting Standards (the "IFRS") issued by the International Accounting Standards Board (the "IASB").

All monetary amounts are in Canadian dollars unless otherwise specified. The effective date of this MD&A is April 28, 2016. Additional information relating to the Company is available on SEDAR at www.sedar.com

Forward-Looking Information

Forward-looking statements relate to future events or future performance and reflect management's expectations or beliefs regarding future events and include, but are not limited to, statements with respect to the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital expenditures, success of mining operations, environmental risks, permitting risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative of these terms or comparable terminology. By their very nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of resources; possible variations in ore reserves, grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; as well as those factors detailed from time to time in the Company's interim and annual financial statements which are filed and available for review on SEDAR at www.sedar.com. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended.

There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

Nature of Business

Silver Phoenix is an exploration stage company engaged in acquiring, exploring and developing mineral properties, principally located in British Columbia, Canada. The Company has no mineral producing properties, and thus, has no revenues from any mineral properties.

Current Status

The level of the Company's future operations will be determined by the availability of capital resources, which will be derived from the issuance of special warrants and future financings.

The Company has incurred recurring losses since its inception, and had an accumulated deficit of \$1,636,812 as at December 31, 2015 which has been funded primarily by the issuance of shares. The Company has no source of operating cash flows and expects to incur further losses in the exploration and development of its mineral properties. The Company's ability to continue its operations, exploration programs and to realize assets at their carrying values is dependent upon obtaining additional financing or maintaining continued support from its shareholders and creditors, and generating profitable operations in the future.

The operations to date have consisted of initial organizational costs and commencement of exploration. Included in these costs were management fees accrued to the President and director of \$84,000 and Chief Financial Officer of \$30,000 for the period ended December 31, 2015.

On March 18, 2015, the Company completed a non-brokered private placement of 333,333 units at a price of \$0.075 per unit. Each unit consists of one common share and one share purchase warrant (the "warrant") of the Company. Each warrant will entitle the holder to purchase one additional common share of the Company at \$0.10 per warrant share for two years.

On May 28, 2015, the Company completed a flow-through private placement of 2,500,000 flow-through units (the "units") at \$0.10 per Unit for an aggregate of \$250,000. Each unit consists of one flow-through common share and one non-flow-through common share purchase warrant (the "warrant"). Each warrant will entitle the holder to purchase one non-flow-through common shares of the Company at \$0.15 per share for a period of two years.

Exploration Project

The Company has acquired 100% interest in four properties, the Big Showing Property, the Waverly Tangier Property, the River Jordan Property, and the Tolstoi and Lickens Properties.

Big Showing Property

On February 14, 2003, the Company entered into an agreement to acquire a 100% interest in the Big Showing Property for mineral claims for a total area of 1,000 hectares in the Revelstoke Mining Division of British Columbia. The Company acquired 90% of the property from the President and director of the Company and 10% from an individual who became a director of the Company November 1, 2006.

For payment of the property, the Company agreed to issue 750,000 common shares of the Company on the date of the agreement (issued), to pay \$35,000 in cash by April 30, 2007 (paid), to issue 1,000,000 common shares of the Company within 30 business days of the date on which the Company receives a technical report disclosing an indicated mineral resource of 5,000,000 ounces of contained silver equivalent on the claims, and to issue a further 1,583,333 common shares within 30 business days of the date on which the Company receives a positive pre-feasibility study on the claims.

The Big Showing Property covers three separate deposits of sulphide mineralization called 1) Big Showing (formerly the Ruby Silver Showing); 2) Scout Showing and 3) Mammoth Showing. Mineralization consists of disseminations, blebs and aggregate of Pb-Zn-Ag sulphides hosted by silicified, iron-rich carbonate rocks within carbonaceous pelite and meta-volcanic rocks belonging to the Lower

Paleozoic Hardeau Group. The deposits are thought to be structurally modified, stratiform in character, possibly SEDEX in origin. During the 2009 fiscal year, the Company completed an airborne survey for the Big Showing project. The cost for the airborne survey was \$18,950. The work program planned for 2013 is subject to financing.

As at December 31, 2015, the Company had \$82,502 of cumulative acquisition and exploration costs related to the Big Showing project.

Waverley Tangier Property

On March 15, 2004, the Company entered into an agreement to acquire a 100% interest in the Waverley Tangier Property for mineral claims for a total area of 5,675 hectares in the Revelstoke Mining Division of British Columbia. The Company acquired 90% of the property from the President and director of the Company and 10% from an individual who became a director of the Company on November 1, 2006.

The Company agreed to issue 750,000 common shares of the Company on the date of the agreement (issued), to pay \$35,000 in cash (paid in August 2007), to issue 1,000,000 common shares of the Company within 30 business days of the date on which the Company receives a technical report disclosing an indicated mineral resource of 5,000,000 ounces of contained silver equivalent on the claims, and to issue a further 1,583,333 common shares within 30 business days of the date on which the Company receives a positive pre-feasibility study on the claims. To date, the Company has not received an NI43-101 compliant report disclosing any indicated mineral resources or a positive pre-feasibility study on the claims, and therefore, the Company has not issued any common shares pursuant to these clauses.

The Waverley Tangier Property consists of two principle old mine workings: The Waverley which occur on the Tangier Claim (388305), and the Tangier, which occur on Waverley Claim (388306) and is situated at the head of the Sorcerer Creek, about 1 km below summit flats separating that creek from the head of Tangier Creek. Stratabound mineral occurrences in the project area are two main types: massive sulfide vein and carbonate replacement deposits. The Waverley and Tangier mineralization is similar to Polymetallic Manto-Type Replacement Deposits such as in the Midway of northern BC and Bluebell in southeast BC.

As at December 31, 2015, the Company had \$86,623 of cumulative acquisition and exploration costs related to the Waverley Tangier project.

Armadillo Option

Pursuant to the amended and restated option and royalty agreement (the "Option Agreement") dated February 25, 2009 with Armadillo Resources Ltd. ("Armadillo"), the Company granted Armadillo a 60% interest in the Waverley-Tangier property (the "Property") located in the Revelstoke Mining Division of British Columbia. Armadillo agreed to pay to the Company \$350,000 in cash, to incur \$3,000,000 in exploration expenditures and to issue 625,000 common shares of Armadillo to the Company as follows:

	Cash	Exploration Expenditures	Shares
Before March 31, 2009 (received)	\$ 75,000	\$.	175,000
Before March 30, 2010 (received)	75,000	200,000	150,000
Before March 30, 2011 (received except \$50,000 cash)	100,000	300,000	150,000
Before March 30, 2012 (not received)	100,000	1,000,000	150,000
Before March 30, 2013 (not incurred)	.	1,500,000	.
	<u>\$ 350,000</u>	<u>\$ 3,000,000</u>	<u>625,000</u>

On February 28, 2013, the Company terminated the Option Agreement and entered into a Settlement Agreement with Armadillo given that Armadillo was in breach of the terms of the Option Agreement. Under the terms of the Settlement Agreement, Armadillo acknowledged that it has no interest in the

Waverley-Tangier Property and that it has no right to re-instate the option to acquire an interest in the Waverley-Tangier Property. As part of the Settlement Agreement, the Company was to receive title to certain equipment relating to the Waverley-Tangier Property, including rock saws, blades, a storage container, a bridge and a rail car flatbed, as well as a cash payment. As at December 31, 2015, the Company has not received title to the equipment or the cash payment of \$7,000.

River Jordan Property

On March 16, 2006, the Company entered into an agreement to acquire a 100% interest in the River Jordan Property for mineral claims for a total area of 649 hectares in the Revelstoke Mining Division of British Columbia. The Company acquired 90% of the property from the President and director of the Company and 10% from an individual who became a director of the Company on November 1, 2006.

The Company agreed to pay \$35,000 in cash by April 30, 2007 (paid), to issue 750,000 common shares (issued in June 2007) of the Company, to issue 1,000,000 common shares of the Company within 30 business days of the date on which the Company receives a technical report disclosing an indicated mineral resource of 5,000,000 ounces of contained silver equivalent on the claims, and to issue a further 1,583,333 common shares within 30 business days of the date on which the Company receives a positive pre-feasibility study on the claims. To date, the Company has not received an NI43-101 compliant report disclosing any indicated mineral resources or a positive pre-feasibility study on the claims, and therefore, the Company has not issued any common shares pursuant to these clauses.

The River Jordan Property covers a sulphide deposit variously known as the River Jordan/Jordan River and the King Fissure Deposit which is a metamorphic rock . hosted massive sulphide deposit comprising Pb-Zn-Ag +/- Cu that has been variably described as a Broken Hill type and a sedimentary exhalative-type deposit. The deposit consists of a sulphide layer ranging up to 6 meters in thickness within calc-silicate gneiss. The property is located 19 km northwest of Revelstoke and covers Copeland Ridge between Copeland and Hiren Creek. Preliminary exploration was completed between August 8, 2008 and August 24, 2008 including geologic mapping, rock sampling and an orientation magnetometer survey, for an estimated cost of \$71,153. The Company evaluated initial results and recommends that further exploration be carried out on the property. The Phase 1 program was estimated to cost \$56,650. Management of the Company decided that it was prudent, more cost effective and more informative to do an airborne survey of the River Jordan project.

As at December 31, 2015, the Company had \$385,746 of cumulative acquisition and exploration costs related to the River Jordan project.

Tolstoi and Lickens Properties, Alaska, USA

On October 6, 2014, the Company entered into purchase agreement with Alaska Ventures Inc., a company controlled by the President of the Company, to acquire a 100% interest in two mineral property claim groups located in the Alaska Mining Division, USA known as the Tolstoi and Lichen properties by issuing 8,500,000 common shares. These shares were issued on October 16, 2014 and were valued at \$85,000 based upon the stock price on issuance.

As at December 31, 2015, the Company had \$109,812 of cumulative acquisition and exploration costs related to the Tolstoi and Lickens project.

Results of Operations

Silver Phoenix is a publicly traded Canadian exploration company with no mineral producing properties, and thus, does not have revenues from any mineral properties.

For the years ended December 31,	2015	2014
	\$	\$
Financial results:		
Net loss	(47,169)	(158,531)

Balance sheet date		
Cash	66,414	11,927
Exploration and evaluation assets	664,683	490,781
Total assets	749,651	516,006
Shareholders equity	(118,341)	(46,990)

For the Year Ended December 31, 2015

Net Loss and Operating Expenses

For the year ended December 31, 2015, the Company experienced a net loss of \$47,169 compared to a net loss of \$158,531 for the comparative period in 2014. The change was primarily due to the Company recognizing \$39,375 in other income during 2015 for amortization of the deferred flow-through premium liability and the recognition of \$62,780 in other income during 2015 for a recovery of legal expenses.

Total operating expenses for the year ended December 31, 2015 were \$150,149 compared to \$158,894 in 2014. The Company had a loss per share of \$0.00 as compared to a loss per share of \$0.02 in the same period in 2014.

Expenses

	December 31,	
	2015	2014
Auto and travel	4,148	5,667
Bank charges	436	178
Depreciation	336	463
Filing fees	9,765	9,264
Management fees	114,000	114,000
Office and miscellaneous	968	1,612
Professional fees	12,000	18,662
Promotion	3,562	3,833
Telephone and utilities	1,788	1,494
Transfer agent	3,146	3,721
Total	(150,149)	(158,894)

Management fees of \$114,000 (2014 - \$114,000) were accrued to the directors and officers of the Company, including day to day administration for the Company, and overseeing regulatory filings and requirements. Professional fees of \$12,000 (2014 - \$18,662) were incurred for accounting, audit and legal fees.

Fourth Quarter

No significant items or events occurred in the fourth quarter of 2014 that would affect the Company's financial position, cash flows or results of operations. During the fourth quarter, the Company reported a net gain of \$65,095 compared to net loss of \$44,475 in the fourth quarter of 2014.

During the fourth quarter, the Company recorded amortization on the flow through share premium liability to other income based on amount of expenditures incurred and renounced at December 31, 2015. During the fourth quarter of 2015, a vendor agreed to reduce the amount owed to them for past legal services. As a result, the Company reduced the amount in accounts payable and accrued liabilities and recorded an expense recovery of \$62,780, which is included in other items on the statement of comprehensive loss.

Summary of Quarterly Results

The following table sets forth selected results of operation for the Company's eight most recently completed quarters.

Quarter Ended	Revenues	Net loss	Loss per share
December 31, 2015	\$Nil	\$65,095	\$0.00
September 30, 2015	\$Nil	(\$39,494)	(\$0.00)
June 30, 2015	\$Nil	(\$37,963)	(\$0.00)
March 31, 2015	\$Nil	(\$34,807)	(\$0.00)
December 31, 2014	\$Nil	(\$44,475)	(\$0.01)
September 30, 2014	\$Nil	(\$39,343)	(\$0.01)
June 30, 2014	\$Nil	(\$32,643)	(\$0.00)
March 31, 2014	\$Nil	(\$42,070)	(\$0.01)

Quarterly results will vary in accordance with the Company's exploration and financing activities.

Mineral exploration is typically a seasonal business, and accordingly, the Company's operating expenses and cash requirements will fluctuate depending upon the season and the level of activity. The Company's primary source of funding is through the issuance of share capital. When the capital markets are depressed, the Company's activity level normally declines accordingly. As capital markets strengthen and the Company is able to secure equity financing with favorable terms, the Company's activity levels and the size and scope of planned exploration projects will typically increase

Selected Annual Information

The following financial data is derived from the Company's audited financial statements for the years ended December 31, 2015, 2014 and 2013.

	2015	2014	2013
	\$	\$	\$
Total Revenue	Nil	Nil	Nil
Net loss for the year	47,169	158,531	206,286
Basic and diluted loss per share	0.00	0.02	0.03
Total Assets	749,651	516,006	444,851
Total long-term debt	Nil	Nil	Nil
Cash dividend per share	Nil	Nil	Nil

During the year ended December 31, 2015, the Company had no revenues and had a net loss of \$47,169 (2014 - \$158,531). The change was due to portion of the flow through share premium liability being amortized to other income based on amount of expenditures incurred and renounced at December 31, 2015 and an expense recovery of \$62,780 recorded in 2015 for legal fees.

During the year, the Company expended \$883 (2014 - \$9,566) in exploration and evaluation costs on the Waverly Tangier Property, \$Nil (2014-Nil) on the Big Showing Property, \$155,200 (2014 - \$Nil) on the River Jordan Property and \$17,819 (2014 - \$6,993) on the Tolstoi/Lickens Properties. Total capitalized costs for exploration and evaluation assets were \$173,902 (2014 - \$16,559).

	December 31, 2015 \$	December 31, 2014 \$
Cash used in operating activities	(46,611)	(18,496)

Cash provided by financing activities	275,000	-
Change in cash	<u>54,487</u>	<u>(25,195)</u>

Liquidity

	December 31, 2015 \$	December 31, 2014 \$
Working capital deficiency	557,430	549,195
Deficit	1,636,812	1,589,643
Cash	66,414	11,927
Current assets	73,880	13,801
Current liabilities	<u>631,310</u>	<u>562,996</u>

Capital Resources

Since incorporation, the Company's capital resources have been limited. The Company has had to rely upon the sale of equity securities for the cash required for capital acquisitions, exploration and development, and administration.

The Company does not have any commitments for material capital expenditures and none are presently contemplated other than as disclosed above normal operating requirements. The Company may require funds in order to fund exploration programs on the Big Showing Property, the Waverly Tangier Property, the River Jordan Property, and the Tolstoi and Lickens Properties, and as a result, the Company will have to continue to rely on equity and debt financing in the future. There can be no assurance that financing, whether debt or equity, will always be available to the Company in the amount required at any particular time or for any particular period or, if available, that it can be obtained on terms satisfactory to the Company.

Risks and Uncertainties

The Company has no history of profitable operations and its present business is at an early stage. As such, the Company is subject to many risks common to such enterprises, including under-capitalization, cash shortages and limitations with respect to personnel, financial and other resources and the lack of revenues. There is no assurance that the Company will be successful in achieving a return on shareholders' investment and the likelihood of success must be considered in light of its early stage of operations.

The Company has no source of operating cash flow and no assurance that additional funding will be available to it for further exploration and development of its projects when required. Although the Company has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain such additional financing could result in the delay or indefinite postponement of further exploration and development of its properties.

Recent degradation of the market conditions for the financing of equity and/or debt for mineral exploration and development companies has created additional uncertainty for future financing of the acquisition or development of the Company's projects.

Mineral exploration is a speculative venture. There is no certainty that the money spent on exploration and development will result in the discovery of an economic ore body. There is no assurance that the Company's exploration activities will result in any discoveries of commercial bodies of ore. The long-term profitability of the Company's operations will in part be related to the success of its exploration programs, which may be affected by a number of factors that are beyond the control of the Company.

The mineral industry is intensely competitive in all its phases. The Company competes with many other mineral exploration companies who have greater financial resources and technical capacity.

The market price of precious metals and other minerals is volatile and cannot be controlled.

The Company is very dependent upon the personal efforts and commitment of its existing management. To the extent that management's services would be unavailable for any reason, a disruption to the operations of the Company could result, and other persons would be required to manage and operate the Company.

The Company's directors and officers serve as directors or officers, or may be associated with other reporting companies or have significant shareholdings in other public companies. To the extent that such other companies may participate in business or asset acquisitions, dispositions, or ventures in which the Company may participate, the directors and officers of the Company may have a conflict of interest in negotiating and concluding terms respecting the transaction.

Off-Balance Sheet Arrangements

The Company has not entered into any material off-balance sheet arrangements such as guarantee contracts, contingent interests in assets transferred to unconsolidated entities, derivative instrument obligations, or with respect to any obligations under a variable interest entity arrangement.

Related Party Transactions

The following is a summary of transactions with related parties of the Company for the years ended December 31, 2015 and 2014:

	2015	2014
	\$	\$
Management fees for the President	84,000	84,000
Management fees for the Chief Financial Officer	30,000	30,000
Shares issued for exploration and evaluation assets acquisition costs to a company controlled by the President	-	85,000

The Company has identified its President and Chief Financial Officer as its key management personnel. No post-employment benefits, other long-term benefits or termination benefits were incurred during the years ended December 31, 2015 and 2014.

The following is a summary of balances payable to related parties of the company as at December 31, 2015 and 2014:

	2015	2014
	\$	\$
Amounts payable to President	368,765	278,108
Amounts payable to Chief Financial Officer	117,500	87,500
Total	486,265	365,608

These amounts are included in accounts payable and accrued liabilities as at December 31, 2015 and 2014, and are non-interest bearing and due on demand.

Commitments

- a) The Company is committed to a management services agreement with the President and director of the Company. The agreement requires payments of \$84,000 per year. This contract is payable monthly and may be terminated by both parties by giving one month's notice.
- b) The Company is committed to a management services agreement with the Chief Financial Officer of the Company. The agreement requires payments of \$30,000 per year. This contract is payable monthly and may be terminated by both parties by giving one month's notice.
- c) The Company is obligated to make certain payments and issue shares as described in Note 7 in connection with acquisition of its mineral properties.

Critical Accounting Policies and Estimates

The details of Silver Phoenix's accounting policies are presented in Note 4 of the financial statements for the year ended December 31, 2015. These policies are considered by management to be essential to understanding the processes and reasoning that go into the preparation of the Company's financial statements and the uncertainties that could have a bearing on its financial results.

New Accounting Standards

New accounting standards adopted effective January 1, 2015

- i. IAS 1 Presentation of Financial Statements - In December 2014, the IASB issued an amendment to address perceived impediments to preparers exercising their judgment in presenting their financial reports. The changes clarify that materiality considerations apply to all parts of the financial statements and the aggregation and disaggregation of line items within the financial statements.
- ii. IAS 16 *Property, Plant and Equipment* and IAS 36 *Intangible Assets* - In May 2014, the IASB issued amendments to IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets. The amendments clarify that the use of revenue-based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the asset. The amendments also clarify that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset. This presumption, however, can be rebutted in certain limited circumstances.

The adoption of the above new standards and the amendments to other standards did not have a significant impact on the Company's consolidated financial statements.

Future changes in accounting standards, which are not yet effective at December 31, 2015

Certain new standards, interpretations and amendments to existing standards have been issued by the International Accounting Standards Board (IASB) or the International Financial Reporting Interpretations Committee (IFRIC) that are mandatory for the Company's accounting periods beginning after January 1, 2015, or later periods. Some updates that are not applicable or are not consequential to the Company may have been excluded from the list below.

New accounting standards effective for annual periods on or after January 1, 2018:

- i. IFRS 9 . Financial Instruments . IFRS 9 was issued in November 2009 and contained requirements for financial assets. This standard addresses classification and measurement of financial assets and replaces the multiple category and measurement models in IAS 39 for debt instruments with a new mixed measurement model having only two categories: Amortized cost and fair value through profit or loss. IFRS 9 also replaces the models for measuring equity instruments and such instruments are either recognized at the fair value through profit or loss or at fair value through other comprehensive income. Where such equity instruments are measured at fair value through other comprehensive income, dividends are recognized in profit or loss to the extent not clearly representing a return of investment; however, others gains and losses (including impairments) associated with such instruments remain in accumulated other comprehensive income indefinitely.

Requirements for financial liabilities were added in October 2010 and they largely carried forward existing requirements in IAS 39, Financial Instruments . Recognition and Measurement, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss would generally be recorded in other comprehensive income.

IFRS 9 was subsequently amended in November 2013 to add new general hedge accounting requirements. The final version of IFRS 9 was issued in July 2014 and adds a new expected loss impairment model and amends the classification and measurement model for financial assets by adding a new fair value through other comprehensive income category for certain debt instruments and additional guidance on how to apply the business model and contractual cash flow characteristics. IFRS 9 is effective for annual periods beginning on or after January 1, 2018 with early adoption permitted.

New accounting standards effective for annual periods on or after January 1, 2019:

IFRS 16 . Leases - The standard is effective for annual periods beginning on or after January 1, 2019. Early adoption will be permitted, provided the Company has adopted IFRS 15. This standard sets out a new model for lease accounting.

The extent of the impact of adoption of these standards and interpretations on the financial statements of the Company has not been determined.

Management of Financial Risks

Fair values

The Company's financial instruments include cash, marketable securities and accounts payable. The carrying amounts of these financial instruments are a reasonable estimate of their fair values because of their current nature.

The following table summarizes the classification and values of the Company's financial instruments:

	December 31, 2015	December 31, 2014
	\$	\$
FVTPL (i)	66,414	11,927
Available-for-sale (ii)	1	1
Loans and receivables (iii)	10,140	10,140
financial liabilities (iv)	600,185	485,646

- (i) Cash
- (ii) Marketable securities
- (iii) Accounts payable
- (iv) Other financial liabilities

The Company classifies its fair value measurements in accordance with the three level fair value hierarchy as follows:

- Level 1 . Unadjusted quoted prices in active markets for identical assets or liabilities
- Level 2 . Inputs other than quoted prices that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices), and
- Level 3 . Inputs that are not based on observable market data

The following table sets forth the Company's financial assets measured at fair value by level within the fair value hierarchy as follows:

	Level 1	Level 2	Level 3	December 31, 2015
	\$	\$	\$	\$
Cash	66,414	-	-	66,414

Financial risk management objectives and policies

The Company's financial instruments include cash, marketable securities, reclamation bond and accounts payable. The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

(i) *Currency risk*

The Company's expenses are denominated in Canadian dollars. The Company's corporate office is based in Canada and current exposure to exchange rate fluctuations is minimal.

(ii) *Interest rate risk*

The Company is exposed to interest rate risk on the variable rate of interest earned on bank deposits. The fair value interest rate risk on bank deposits is insignificant as the deposits are short-term. The Company has not entered into any derivative instruments to manage interest rate fluctuations.

(iii) *Credit risk*

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. Financial instruments that potentially subject the Company to concentrations of credit risks consist principally of cash. To minimize the credit risk on cash the Company places the instrument with financial institution.

(v) *Liquidity risk*

In the management of liquidity risk of the Company, the Company maintains a balance between continuity of funding and exploration activity. The Company has a working capital deficiency and requires additional financing to meet its short-term obligations and to fund costs for the Company's projects and operations. The Company's accounts payable are generally due in terms ranging from 30 to 90 days.

(v) *Market risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, investment fluctuations, and commodity and equity prices. Market conditions will cause fluctuations in the fair values of financial assets classified as held-for-trading, available-for-sale and cause fluctuations in the fair value of future cash flows for assets or liabilities classified as held-to-maturity, loans or receivables and other financial liabilities. The Company is exposed to market risk in trading its investments, and unfavorable market conditions could result in dispositions of investments at less than favorable prices. The Company's investments are accounted for at estimated fair values and are sensitive to changes in market prices, such that changes in market prices result in a proportionate change in the carrying value of the Company's investments. The Company is not exposed to significant interest rate risk as the Company has no interest bearing debt. The Company's ability to raise capital to fund mineral resource exploration is subject to risks associated with fluctuations in mineral resource prices. Management closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Capital Management

The Company's objectives when managing capital are to identify, pursue and complete the exploration and development of mineral properties, to maintain financial strength, to protect its ability to meet its on-going liabilities, to continue as a going concern, to maintain creditworthiness and to maximize returns for shareholders over the long term. The Company does not have any externally imposed capital requirements to which it is subject. Capital of the Company comprises the items included in shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares.

The Company's investment policy is to invest its cash in financial instruments of high credit quality financial institutions with terms to maturity selected with regards to the expected timing of expenditures from continuing operations.

Management's Report on Internal Control Over Financing Reporting

In connection with National Instrument (NI) 52-109 (Certification of Disclosure in Issuer's Annual and Interim Filings) adopted in December 2008 by each of the securities commissions across Canada, the Chief Executive Officer and Chief Financial Officer of the Company will file a Venture Issuer Basic Certificate with respect to the financial information contained in the unaudited interim financial statements and the audited annual financial statements and respective accompanying Management's Discussion and Analysis. The Venture Issuer Basic Certification does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109.
