

EV Minerals Announces Closing of First Tranche of Private Placement

TORONTO, ONTARIO – September 3, 2024 – [EV Minerals Corporation](#) (the "Company" or "EV Minerals") (**CSE: EVM** and **FSE: RLC**) is pleased to announce that, further to its press release of August 15, 2024, the Company has completed the first tranche of its non-brokered private placement financing through the issuance of 22,230,481 common shares (each, a "Common Share") in the capital of the Company at a price of \$0.017 per Common Share for gross proceeds of \$377,918.18 (the "Offering"). Gross proceeds raised from the Offering will be used for corporate strategy, working capital and general corporate purposes.

All securities issued in connection with the Offering are subject to a hold period of four months plus a day from the date of issuance and the resale rules of applicable securities legislation.

This press release does not constitute an offer to sell or a solicitation of an offer to buy the securities in the United States. The securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act") or any state securities laws and may not be offered or sold within the United States or to U.S. Persons as defined under applicable United States securities laws unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.

About EV Minerals Corporation

EV Minerals Corporation is a Canadian exploration company focused on mineral exploration and development. The current focus is the EV Nickel Project, host of the nickel-copper-cobalt McNickel deposit. The Project is comprised of 32 mineral claims covering approximately 1,792 hectares located in the Saguenay area, the Province of Quebec. This deposit is reputed containing a historical resource of 5.585 million tonnes with grades of 0.21% Ni, 0.11% Cu and 0.03% Co (NI 43-101 non-compliant resource), which is to be re-evaluated with the consideration of using either bioleaching or acid leaching and electrowinning for nickel, cobalt and copper recovery.
