Notes to the condensed interim financial statements

(Unaudited)

1. Nature of operations and continuance of operations

Canadian Orebodies Inc. (the "Company") was incorporated pursuant to the provision of the Business Corporations Act (of Alberta) on January 28, 2008 ("inception date"). On July 21, 2008, the Company was authorized to continue its operations from the jurisdiction of Alberta to Ontario. Its principal business activity is the exploration of mineral properties. The address of the Company's registered office is Suite 301 – 141 Adelaide Street West, Toronto, Ontario M5H 3L5. The Company is in the process of exploring its mineral properties and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of the amount shown for mineral properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete exploration and development, and upon future profitable production or proceeds from disposition of such properties.

The accompanying condensed interim financial statements have been prepared on the basis of a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. The Company is currently in the exploration stage and has not commenced commercial operations. As at the date of issue of these interim financial statements, the Company has an accumulated deficit of \$7,231,403 and is not yet generating operating cash flows.

Continuation of the Company as a going concern is dependent upon obtaining additional capital. The interim financial statements do not include any adjustments relating to the realization of assets and liquidation of liabilities that might be necessary should the Company be unable to continue as a going concern. Although successful resolution of these uncertainties is not assured, management is of the opinion that additional capital can be raised.

2. Basis of presentation

These condensed financial statements have been prepared on a historical cost basis except for the revaluation of certain financial instruments. In addition, these condensed financial statements have been prepared using the accrual basis of accounting except for cash flow information.

In the preparation of these condensed financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of expenses during the period. Actual results could differ from these estimates.

3. Significant accounting policies

These condensed interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). Accordingly, they do not include all of the information required for full annual financial statements and should be read in conjunction with the financial statements for the year ended January 31, 2012. The accounting policies adopted are consistent with those of the previous financial year and the corresponding interim reporting period. Furthermore the information on accounting standards effective in future periods and not yet adopted remains unchanged from that disclosed in the annual financial statements.

The condensed financial statements were approved by the Board of Directors on December 13, 2012

7. Share Options

The Company has a Share Option Plan (the "Plan") under which it is authorized to grant options to purchase common shares of the Company to directors, senior officers, employees and/or consultants of the Company. The aggregate number of shares of the Company which may be issued and sold under the Plan will not exceed 10% of the total number of common shares issued and outstanding from time to time. Share options are granted with a maximum term of five years with vesting requirements at the discretion of the Board of Directors.

The Company records a charge to the statement of loss and comprehensive loss using the Black-Scholes fair valuation option pricing model with respect to a share option grant. The valuation is dependent on a number of estimates, including the risk free interest rate, the level of share volatility, together with an estimate of the level of forfeiture. The level of share volatility is calculated with reference to the historic traded daily closing share price at the date of issue. Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable measure of the fair value of the Company's share purchase options.

10. Related Party Transactions

- a) The financial statements include balances and transactions with directors and/or officers of the Company and/or corporations related to or controlled by them. These transactions are measured and recorded at their exchange amounts, being the amounts agreed to by the related parties.

Nine months ended October 31,	2012	2011
Professional and consulting fees	\$ 49,500	\$ 40,500

- b) During the nine months ended October 31, 2012, 1,500,000 (2011: 900,000) share options were granted to directors and officers.
- c) The Company has a loan from 695202 Ontario Limited, a corporation managed by a director, in the amount of \$233,035 and is due as at October 31, 2012. The loan is interest free, unsecured and no repayment terms exist.

11. Deferred Premium on Flow-through Shares

The premium paid for flow-through shares in excess of the market value of the shares without the flow-through features is initially recognized as a liability. The liability is reduced and the reduction of premium liability is recorded in loss from operations on a pro-rata basis based on the corresponding eligible expenditures that have been incurred when it is the Company's intention to file the appropriate renunciation forms with the Canadian taxation authorities. Accordingly, during the nine months ended October 31, 2012, \$Nil (2011 - \$Nil) was deferred and \$274,000 (2011 - \$Nil) was recognized as income in the statement of operations.

12. Capital risk management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The properties in which the Company currently has an interest are in the exploration stage; as such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the nine months ended October 31, 2012. The Company is not subject to externally imposed capital requirements.

Financial risk Factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

(a) Credit risk

The Company's credit risk is primarily attributable to accounts receivable. The Company has no significant concentration of credit risk arising from operations. Management believes that the credit risk concentration with respect to financial instruments included in accounts receivable is remote.

(b) Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at October 31, 2012, the Company has working capital of \$1,212,503. The Company had a cash balance of \$1,341,036 (January 31, 2012: \$1,686,740) to settle current liabilities of \$816,925 (January 31, 2012: \$474,212). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

12. Capital risk management - continued

(c) Market risk

(i) Interest rate risk

The Company has cash balances and no interest-bearing debt. Interest rate risk is remote.

(ii) Price risk

The Company is indirectly exposed to price risk with respect to the price of base metals. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company. Price risk is remote since the Company is not a producing entity.

Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

(d) Fair Value

The fair values of the Company's cash and cash equivalents, accounts receivable and accounts payables approximate their carrying values because of the short term-nature of these instruments.

(e) Sensitivity analysis

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a twelve month period.

The Company's investments in public companies are sensitive to a plus or minus 50% change in Canadian equity prices which would affect comprehensive income (loss) by approximately \$134,000.
