FOR IMMEDIATE RELEASE

MATICA FURTHER EXPANDS LAND POSITION IN BUCKINGHAM

May 6, 2014 – Toronto, Ontario – Matica Resources Inc. (GRF) (“Matica” or the “Company”) is pleased to announce that the Company has signed an agreement with Galaxy Graphite (TSX.V;GXY) to acquire an additional land position in Buckingham Quebec. With this new additional graphite property, Matica will have a total land package of 44 claims in the Buckingham area.

Galaxy Graphite reported that the graphite property in Buckingham comprises two former producing mines, located just east of Buckingham, QC. They are located in the highly prospective Central Metasedimentary Belt of the Grenville geological province, host to many active graphite projects. The host rocks for both deposits are graphitic crystalline marbles, similar to the host stratigraphy at Timcal’s Lac des Iles graphite mine, currently Canada’s only producing graphite mine.

The Company has signed an option agreement with Galaxy Graphite (TSX.V;GXY) to acquire 100 per cent interest in graphite claims located east of Ottawa/Gatineau near Matica’s existing property. This additional new property is comprised of 22 mining claims totaling 1324 hectares. To exercise the option and earn 100 per cent interest in the Property the company must deliver 300,000 shares of Company common stock.

About Matica Graphite

Matica is a junior exploration company with projects in Buckingham Quebec. Buckingham is a historic graphite producing area which has been the scene of renewed exploration activity. The Company has also signed an LOI for, and is reviewing, a graphite property in Nevada. Matica trades on the CSE under the symbol GRF. For more information on Matica Graphite visit the website at Maticagraphite.com.
