SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

Sparrow Ventures Corp. (the "Company") is a natural resource company currently engaged in the acquisition, exploration and development of mineral properties. It presently holds, or has the right to acquire a 60% interest in the Nebocat and RIM properties (the "Properties") located in the Yukon. In addition to the Company's ongoing work program on the Properties, it continues to actively evaluate new potential projects. The Company is listed for trading on the TSX Venture Exchange under the symbol SPW.

This management's discussion and analysis ("MD&A") reports on the operating results and financial condition of the Company for the three and six months ended July 31, 2011 and is prepared as of September 16, 2011, in accordance with International Financial Reporting Standards ("IFRS"). The MD&A should be read in conjunction with the Company's unaudited condensed interim financial statements and related notes for the three and six months ended July 31, 2011 and 2010, which were prepared in accordance with IFRS and audited financial statements for the year ended January 31, 2011, which were prepared in accordance with Canadian generally accepted accounting principles ("GAAP").

All dollar amounts referred to in this MD&A are expressed in Canadian dollars except where indicated otherwise.

Cautionary Note Regarding Forward-Looking Information

This document may contain "forward-looking information" within the meaning of Canadian securities legislation ("forward-looking statements"). These forward-looking statements are made as of the date of this document and Company does not intend, and does not assume any obligation, to update these forward-looking statements, except as required under applicable securities legislation.

Forward-looking statements relate to future events or future performance and reflect Company management's expectations or beliefs regarding future events and include, but are not limited to, statements with respect to the timing and implementation of the proposed transaction with Far West, estimation of mineral reserves and mineral resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital expenditures, success of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative of these terms or comparable terminology. In this document, certain forward-looking statements are identified by words including "may", "future", "expected", "intends" and "estimates". By their very nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of resources; possible variations in ore reserves, grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; as well as those factors detailed from time to time in the Company's interim and annual financial statements and management's discussion and analysis of those statements, all of which are filed and available for review under the Company's profile on SEDAR at www.sedar.com. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. The Company provides no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

Mineral Properties

The Nebocat and RIM Properties

The Company entered into an option agreement dated May 26, 2010 with Full Metal Minerals Ltd. ("Full Metal") pursuant to which the Company may earn a 60-per-cent interest in the Properties by incurring exploration expenditure totaling \$3,000,000 (\$200,000 in the first year), making cash payments to Full Metal totaling \$150,000 (\$25,000 upon agreement (paid) and \$25,000 in the first year) and issuing 400,000 common shares of the Company to Full Metal (100,000 upon agreement (issued) and 100,000 in the first year) over a period of four years.

Following the exercise of the option by the Company, the Company and Full Metal will continue the exploration and development of the Properties under a joint venture, with Sparrow acting as the operator in respect of the Properties. The Properties are subject to Net Smelter Royalty of 2%.

The Properties are located within a 90-kilometre-long belt of massive-sulphide occurrences, located south of the community of Ross River, Yukon. Multiple occurrences of sphalerite, galena, pyrite and barite massive-sulphide mineralization have been identified on the properties.

During the six months ended July 31, 2011, the Company terminated its option agreement with Full Metal and wrote-off all acquisition costs of \$87,531.

Risk Factors

The Company is in the business of acquiring, exploring and, if warranted, developing and exploiting natural resource properties. Due to the nature of the Company's business and the present stage of exploration of its resource properties (which are primarily early stage exploration properties with no known resources or reserves that have not been explored by modern methods), the following risk factors, among others, will apply:

Mining Industry is Intensely Competitive: The Company's business of the acquisition, exploration and development of mineral properties is intensely competitive. The Company may be at a competitive disadvantage in acquiring additional mining properties because it must compete with other individuals and companies, many of which have greater financial resources, operational experience and technical capabilities than the Company. Increased competition could adversely affect the Company's ability to attract necessary capital funding or acquire suitable producing properties or prospects for mineral exploration in the future.

Resource Exploration and Development is Generally a Speculative Business: Resource exploration and development is a speculative business and involves a high degree of risk, including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but from finding mineral deposits which, though present, are insufficient in size to return a profit from production. The marketability of natural resources that may be acquired or discovered by the Company will be affected by numerous factors beyond the control of the Company. These factors include market fluctuations, the proximity and capacity of natural resource markets, government regulations, including regulations relating to prices, taxes, royalties, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital. The great majority of exploration projects do not result in the discovery of commercially mineable deposits of ore.

Fluctuation of Metal Prices: Even if commercial quantities of mineral deposits are discovered by the Company, there is no guarantee that a profitable market will exist for the sale of the metals produced. Factors beyond the control of the

SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

Company may affect the marketability of any substances discovered. The prices of various metals have experienced significant movement over short periods of time, and are affected by numerous factors beyond the control of the Company, including international economic and political trends, expectations of inflation, currency exchange fluctuations, interest rates and global or regional consumption patterns, speculative activities and increased production due to improved mining and production methods. The supply of and demand for metals are affected by various factors, including political events, economic conditions and production costs in major producing regions. There can be no assurance that the price of any mineral deposit will be such that any of its mineral properties could be mined at a profit.

Permits and Licenses: The operations of the Company will require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration, development and mining operations at its projects, on reasonable terms or at all. Delays or a failure to obtain such licenses and permits or a failure to comply with the terms of any such licenses and permits that the Company does obtain, could have a material adverse effect on the Company.

No Assurance of Profitability: The Company has no history of earnings and, due to the nature of its proposed business, there can be no assurance that the Company will ever be profitable. The Company has not paid dividends on its shares since incorporation and does not anticipate doing so in the foreseeable future. The only present source of funds available to the Company is from the sale of its common shares or, possibly, the sale or optioning of a portion of its interest in its mineral properties. Even if the results of exploration are encouraging, the Company may not have sufficient funds to conduct the further exploration that may be necessary to determine whether or not a commercially mineable deposit exists. While the Company may generate additional working capital through further equity offerings or through the sale or possible syndication of its properties, there can be no assurance that any such funds will be available on favourable terms, or at all. At present, it is impossible to determine what amounts of additional funds, if any, may be required. Failure to raise such additional capital could put the continued viability of the Company at risk.

Financial statements have been prepared assuming the Company will continue on a going concern basis: The financial statements have been prepared on the basis that it will continue as a going concern. At July 31, 2011, the Company had working capital of \$276,763 as compared to working capital of \$368,008 as at January 31, 2011. Management has estimated that the Company has adequate funds from existing working capital to meet its obligations for the next twelve months. If the Company is unable to obtain adequate additional financing, it may be required to curtail operations and exploration activities. Furthermore, failure to continue as a going concern would require that the Company's assets and liabilities be restated on a liquidation basis which would likely differ significantly from their going concern assumption carrying values.

Uninsured or Uninsurable Risks: Exploration, development and mining operations involve various hazards, including environmental hazards, industrial accidents, metallurgical and other processing problems, unusual or unexpected rock formations, structural cave-ins or slides, flooding, fires, metal losses and periodic interruptions due to inclement or hazardous weather conditions. These risks could result in damage to or destruction of mineral properties, facilities or other property, personal injury, environmental damage, delays in operations, increased cost of operations, monetary losses and possible legal liability. The Company may not be able to obtain insurance to cover these risks at economically feasible premiums or at all. The Company may elect not to insure where premium costs are disproportionate to the Company's perception of the relevant risks. The payment of such insurance premiums and of such liabilities would reduce the funds available for exploration and production activities.

Government Regulation: Any exploration, development or mining operations carried on by the Company will be subject to government legislation, policies and controls relating to prospecting, development, production, environmental protection, mining taxes and labour standards. In addition, the profitability of any mining prospect is affected by the market for precious and/or base metals which is influenced by many factors including changing production costs, the

SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

supply and demand for metals, the rate of inflation, the inventory of metal producing corporations, the political environment and changes in international investment patterns.

Environmental Restrictions: The activities of the Company are subject to environmental regulations promulgated by government agencies in different countries from time to time. Environmental legislation generally provides for restrictions and prohibitions on spills, releases or emissions into the air, discharges into water, management of waste, management of hazardous substances, protection of natural resources, antiquities and endangered species and reclamation of lands disturbed by mining operations. Certain types of operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a manner which means stricter standards, and enforcement, fines and penalties for non-compliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations.

Dependence Upon Others and Key Personnel: The success of the Company's operations will depend upon numerous factors, many of which are beyond the Company's control, including (i) the ability to design and carry out appropriate exploration programs on its mineral properties; (ii) the ability to produce minerals from any mineral deposits that may be located; (iii) the ability to attract and retain additional key personnel in exploration, marketing, mine development and finance; and (iv) the ability and the operating resources to develop and maintain the properties held by the Company. These and other factors will require the use of outside suppliers as well as the talents and efforts of the Company and its consultants and employees. There can be no assurance of success with any or all of these factors on which the Company's operations will depend, or that the Company will be successful in finding and retaining the necessary employees, personnel and/or consultants in order to be able to successfully carry out such activities. This is especially true as the competition for qualified geological, technical and mining personnel and consultants is particularly intense in the current marketplace.

Share Price Volatility: During the past year, worldwide securities markets, particularly those in the United States and Canada have experienced a high level of price and volume volatility, and the market price of securities of many companies, particularly those considered exploration or development stage companies, have experienced unprecedented declines in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. Most significantly, the share prices of junior natural resource companies have experienced an unprecedented decline in value and there has been a significant decline in the number of buyers willing to purchase such securities. In addition, significantly higher redemptions by holders of mutual funds has forced many of such funds (including those holding the Company's securities) to sell such securities at any price. As a consequence, despite the Company's past success in securing significant equity financing, market forces may render it difficult or impossible for the Company to secure places to purchase new share issues at a price which will not lead to severe dilution to existing shareholders, or at all. Therefore, there can be no assurance that significant fluctuations in the trading price of the Company's common shares will not occur, or that such fluctuations will not materially adversely impact on the Company's ability to raise equity funding without significant dilution to its existing shareholders, or at all.

Financing Risks: The Company has limited financial resources, has no source of operating cash flow and has no assurance that additional funding will be available to it for further exploration and development of its projects or to fulfil its obligations under any applicable agreements. Although the Company has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that it will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of its projects with the possible loss of such properties.

SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

Insufficient Financial Resources: The Company does not presently have sufficient financial resources to undertake by itself the exploration and development of all of its planned exploration and development programs. Future property acquisitions and the development of the Company's properties will therefore depend upon the Company's ability to obtain financing through the joint venturing of projects, private placement financing, public financing, short or long-term borrowings or other means. There is no assurance that the Company will be successful in obtaining the required financing. Failure to raise the required funds could result in the Company losing, or being required to dispose of, its interest in its properties. In particular, failure by the Company to raise the funding necessary to maintain in good standing its various option agreements could result in the loss of its rights to such properties.

Dilution to the Company's existing shareholders: The Company will require additional equity financing be raised in the future. The Company may issue securities on less than favourable terms to raise sufficient capital to fund its business plan. Any transaction involving the issuance of equity securities or securities convertible into common shares would result in dilution, possibly substantial, to present and prospective holders of common shares.

Surface Rights and Access: Although the Company acquires the rights to some or all of the minerals in the ground subject to the tenures that it acquires, or has a right to acquire, in most cases it does not thereby acquire any rights to, or ownership of, the surface to the areas covered by its mineral tenures. In such cases, applicable mining laws usually provide for rights of access to the surface for the purpose of carrying on mining activities, however, the enforcement of such rights can be costly and time consuming. In areas where there are no existing surface rights holders, this does not usually cause a problem, as there are no impediments to surface access. However, in areas where there are local populations or land owners, it is necessary, as a practical matter, to negotiate surface access. There can be no guarantee that, despite having the right at law to access the surface and carry on mining activities, the Company will be able to negotiate a satisfactory agreement with any such existing landowners/occupiers for such access, and therefore it may be unable to carry out mining activities. In addition, in circumstances where such access is denied, or no agreement can be reached, the Company may need to rely on the assistance of local officials or the courts in such jurisdictions.

Title: Although the Company has taken steps to verify the title to the mineral properties in which it has or has a right to acquire an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee title (whether of the Company or of any underlying vendor(s) from whom the Company may be acquiring its interest). Title to mineral properties may be subject to unregistered prior agreements or transfers, and may also be affected by undetected defects or the rights of indigenous peoples.

Acquisition of Mineral Concessions under Agreements: The agreement pursuant to which the Company has the right to acquire a number of its properties provide that the Company must make a series of cash payments and/or share issuances over certain time periods, expend certain minimum amounts on the exploration of the properties or contribute its share of ongoing expenditures. The Company does not presently have the financial resources required to complete all expenditure obligations under its property acquisition agreement over their full term. Failure by the Company to make such payments, issue such shares or make such expenditures in a timely fashion may result in the Company losing its interest in such properties. There can be no assurance that the Company will have, or be able to obtain, the necessary financial resources to be able to maintain all of its property agreements in good standing, or to be able to comply with all of its obligations thereunder, with the result that the Company could forfeit its interest in one or more of its mineral properties.

SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

Summary of Quarterly Information

Selected financial information from continuing operations for the most recent eight quarters (unaudited). The Q1 and Q2 2012 and four preceding quarter results presented in the table below were prepared in accordance with IFRS. The two quarters ending with Q4 2010 were prepared in accordance with Canadian GAAP:

Quarter ended	Interest Income	Income (Loss)	Earnings (Loss) per share
	\$	\$	\$
July 31, 2011	701	(64,272)	(0.01)
April 30, 2011	884	(138,562)	(0.01)
January 31, 2011	1,146	(57,096)	(0.004)
October 31, 2010	1,244	(35,283)	(0.003)
July 31, 2010	840	(69,240)	(0.005)
April 30, 2010	624	(27,276)	(0.002)
January 31, 2010	393	(18,539)	(0.001)
October 31, 2009	464	(230,879)	(0.02)

There are no general trends regarding the Company's quarterly results and the variation seen over the quarters. The variation during the quarter ended October 31, 2009 was primarily attributable to capitalized deferred costs of \$206,296 charged to operations as a result of the termination of a proposed asset acquisition. The Company wrote-off exploration and evaluation assets of \$87,531 which had a material effect on the quarterly results for the quarter ended April 30, 2011.

Results of Operations

The following discussion of the financial condition, changes in financial condition and results of operations of the Company for the three and six months ended July 31, 2011 and 2010 should be read in conjunction with the unaudited condensed interim financial statements of the Company and related notes as at and for the three and six months ended July 31, 2011 and 2010:

Three months ended July 31, 2011 compared with three months ended July 31, 2010

During the three months ended July 31, 2011, the Company reported a net loss of \$64,272 or \$0.01 per share as compared to a net loss of \$69,240 or \$0.005 per share during the same period in the prior fiscal year, representing a decrease in loss of \$4,968. The decrease in loss was primarily attributable to a decrease in general and administrative expenses of \$5,107 offset by a decrease in interest income of \$139.

General and administrative expenses decreased by \$5,107 as a result of decreases in consulting fees of \$1,043, accounting, audit and legal fees of \$39,309 and transfer agent and shareholder information of \$641 offset by increases in amortization of \$188, bank charges and interest of \$91, management fees of \$3,000, office, rent and administration of \$7,006, project evaluation of \$900, regulatory fees of \$1,370, share-based payments of \$20,826 and travel and promotion of \$2,505.

Office, rent and administration increased by \$7,006 as a result of an increase in rent and administrative fees paid to related companies from \$1,500 per month to \$3,600 per month effective October 1, 2010 and to \$5,500 per month effective June 1, 2011.

SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

The increase in management fees by \$3,000 was a result of fees paid to a director and an officer of the Company in the amount of \$1,000 per month effective October 1, 2010. No management fees were paid during the same period in the prior fiscal year.

The decreases in accounting, audit and legal fees by \$39,309 resulted primarily from deferred costs charged to operations during the quarter in the prior fiscal year due to the termination of the Company's proposed asset acquisition.

During the three months ended July 31, 2011, the Company recorded share-based payments of \$20,826 for stock options vested during the period. No share-based payments were recorded during the same period in the prior fiscal year.

Six months ended July 31, 2011 compared with six months ended July 31, 2010

During the six months ended July 31, 2011, the Company reported a net loss of \$202,834 or \$0.02 per share as compared to a net loss of \$96,516 or \$0.01 per share during the same period in the prior fiscal year, representing an increase in loss of \$106,318. The increase in loss was primarily attributable to an increase in general and administrative expenses of \$18,908 and a write-off of exploration and evaluation assets of \$87,531 offset by an increase in interest income of \$121.

The write-off of exploration and evaluation assets of \$87,531 resulted from the Company's decision not to pursue its option agreement to acquire a 60% interest in the Nebocat and Rim properties.

General and administrative expenses increased by \$18,908 as a result of increases in amortization of \$332, bank charges and interest of \$85, consulting fees of \$2,633, management fees of \$6,000, office, rent and administration of \$13,824, project evaluation of \$900, regulatory fees of \$8,620, share-based payments of \$24,636 and travel and promotion of \$12,873 offset by decreases in accounting, audit and legal fees of \$50,808 and transfer agent and shareholder information of \$187.

Office, rent and administration increased by \$13,824 as a result of an increase in rent and administrative fees paid to related companies from \$1,500 per month to \$3,600 per month effective October 1, 2010 and to \$5,500 per month effective June 1, 2011.

The increase in consulting fees by \$2,633 and travel and promotion of \$12,873 resulted from increased corporate activities.

The increase in management fees by \$6,000 was a result of fees paid to a director and an officer of the Company in the amount of \$1,000 per month effective October 1, 2010. No management fees were paid during the same period in the prior fiscal year.

The decreases in accounting, audit and legal fees by \$50,808 resulted primarily from deferred costs charged to operations during the period in the prior fiscal year due to the termination of the Company's proposed asset acquisition.

During the six months ended July 31, 2011, the Company recorded share-based payments of \$24,636 for stock options vested during the period. No stock-based compensation was recorded during the same period in the prior fiscal year.

SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

Liquidity and Capital Resources

As at July 31, 2011, the Company reported working capital of \$276,763 as compared to working capital of \$368,008 as at January 31, 2011, representing a decrease in working capital of \$91,245. Cash on hand increased by \$201,215 from \$70,290 at January 31, 2011 to \$271,505 at July 31, 2011. The increase in cash resulted mainly from proceeds of \$300,000 from redemption of short-term investments offset by cash used for operations of \$97,875 and purchase of equipment of \$910.

Current assets, excluding cash, at July 31, 2011 consisted of HST recoverable of \$7,944 and prepaid expenses and deposits of \$1,500 as compared to short-term investments of \$300,000, interest receivable of \$1,849, HST recoverable of \$8,091 and prepaid expenses and deposits of \$1,500 at January 31, 2011.

As of the date of this MD&A, financing for the Company's operations is also potentially available through the exercise of 865,000 stock options exercisable at a price of \$0.10 per share which expire on May 26, 2018, 75,000 stock options exercisable at a price of \$0.11 per share which expire on August 31, 2020, 105,625 stock options exercisable at a price of \$0.12 per share which expire on October 7, 2020 and 123,750 stock options exercisable at a price of \$0.11 per share which expire on May 27, 2021. However, there can be no assurance that any of these outstanding convertible securities will be exercised, particularly if the trading price of the common shares on the TSX Venture Exchange does not exceed, by an material amount and for a reasonable period, the exercise price of such convertible securities at some time prior to their expiry dates.

The Company believes that it has sufficient funds to continue its anticipated ongoing operations through the next twelve months. However, if the Company's plans change (as, for example, if it determines to acquire additional properties or accelerate its presently contemplated work programs) or its current assumptions change or prove inaccurate, the Company may be required to seek additional financing through the issuance of shares or disposing of interests in its mineral properties (by options, joint ventures or outright sales).

Summary of Outstanding Share Data

The Company is authorized to issue an unlimited number of common shares. As at September 16, 2011, there were 13,590,500 shares issued and outstanding.

The following stock options and charitable options were outstanding as at September 16, 2011:

Number of shares	Exercise price per share	Expiry date	Exercisable
865,000	\$0.10	May 26, 2018	865,000
100,000	\$0.11	August 31, 2020	75,000
169,000	\$0.12	October 7, 2020	105,625
330,000	\$0.11	May 27, 2021	123,750
1,464,000			1,169,375

SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

Transaction with Related Parties

During the three and six months ended July 31, 2011, the Company has entered into certain transactions with related parties. These transactions are in the normal course of business operations and are measured at the exchange amount, which is the amount of consideration established and agreed upon by the related parties.

A description of the related party transactions is as follows:

Name and Relationship to Company	Transaction	Three months ended July 31,		Six months ended July 31,	
		2011	2010	2011	2010
		\$	\$	\$	\$
Marc Morin, Director, President & CEO	Management fees	3,000	-	6,000	-
Remstar Resources Ltd., a company with a common director and a common officer ⁽³⁾	Office, rent and administration ⁽¹⁾	11,100	2,250	18,800	4,500
Ultra Lithium Inc., a company with common directors and officers	Rent ⁽²⁾	3,900	2,250	7,800	4,500

⁽¹⁾ The Company entered into a month-to-month arrangement for the rental of office premises and the provision of accounting, financial reporting and administrative services with Remstar Resources Ltd., a public company related by a common director and a common officer.

⁽²⁾ The Company entered into a month-to-month arrangement for the rental of office premises with Ultra Lithium Inc., a public company related by a common director and a common officer.

⁽³⁾ Included in prepaid expenses is a rent deposit of \$1,500 (January 31, 2011 - \$1,500) paid to a company having a director and an officer in common.

Critical Accounting Estimates

The preparation of the Company's financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

Areas requiring a significant degree of estimation and judgment relate to the recoverability of the carrying value of exploration and evaluation assets, fair value measurements for financial instruments and share-based payments and other equity-based payments and the estimated useful life and recoverability of equipment. Actual results may differ from those estimates and judgments.

SPARROW VENTURES CORP.

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

Changes in Accounting Policies

Adoption of International Financial Reporting Standards ("IFRS")

The condensed interim financial statements of the Company have been prepared in accordance with International Accounting Standards ("IAS") 34, "Interim Financial Reporting" and IFRS 1, "First time adoption of International Financial Reporting Standards ("IFRS")" using accounting policies consistent with IFRS as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the IFRS Interpretations Committee ("IFRIC").

The condensed interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the audited annual financial statements of the Company as at and for the year ended January 31, 2011 prepared in accordance with Canadian Generally Accepted Accounting Principles ("GAAP"). The basis of presentation of these condensed interim financial statements is different to that of the Company's most recent annual financial statements due to the first time adoption of IFRS.

The impact of the conversion from GAAP to IFRS is explained in note 10 of the condensed interim financial statements of the Company. Note 10 includes reconciliations of the Company's condensed interim statements of financial position and statements of loss and comprehensive loss for comparative periods prepared in accordance with GAAP and as previously reported to those prepared and reported in these unaudited condensed interim financial statements in accordance with IFRS.

Recent Accounting Pronouncements

The following IFRS standards have been recently issued by the International Accounting Standards Board ("IASB"): IFRS 9 Financial Instruments, IFRS 10 Financial Statements and IFRS 13 Fair Value Measurement. The Company is assessing the impact of these new standards, but does not expect them to have a significant effect on the financial statements.

(a) Amendments to IFRS 7, Financial Instruments: Disclosures

IFRS 7 Financial Instruments: Disclosures ("IFRS 7") was amended by the IASB in October 2010 and provides guidance on identifying transfers of financial assets and continuing involvement in transferred assets for disclosure purposes. The amendments introduce new disclosure requirements for transfers of financial assets including disclosures for financial assets that are not derecognized in their entirety, and for financial assets that are derecognized in their entirety but for which continuing involvement is retained. The amendments are effective for annual periods beginning on or after July 1, 2011.

(b) IFRS 9, Financial Instruments

IFRS 9, Financial Instruments ("IFRS 9") was issued by the IASB on November 12, 2009, and will replace IAS 39, Financial Instruments: Recognition and Measurement ("IAS 39"). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized costs or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2013. The Company is currently evaluating the impact of IFRS 9 on its financial statements.

Three and Six Months Ended July 31, 2011

(c) IFRS 10, Financial Statements

IFRS 10 Financial Statements ("IFRS 10") provides a single model to be applied in the control analysis for all investees, including entities that currently are SPEs in the scope of SIC-12. In addition, the consolidation procedures are carried forward substantially unmodified from IAS 27 (2008). The Company intends to adopt IFRS 10 in its financial statements for the annual period beginning on February 1, 2013.

(d) IFRS 13, Fair Value Measurement

IFRS 13, Fair Value Measurement ("IFRS 13") was issued by the IASB on May 12, 2011. The new standard converges IFRS and US GAAP on how to measure fair value and the related fair value disclosures. The new standard creates a single source of guidance for fair value measurements, where fair value is required or permitted under IFRS, by not changing how fair value is used but how it is measured. The focus will be on an exit price. IFRS 13 is effective for annual periods beginning on or after January 1, 2013, with early adoption permitted.

Financial Instruments and Other Instruments

(a) Fair value of financial instruments

The Company's financial instruments consist of cash, short-term investments, receivables, and accounts payable and accrued liabilities. Cash and short-term investments are classified as held-for-trading and accordingly carried at its fair value. Receivables are classified as loans and receivables and are carried at their amortized costs. Accounts payable and accrued liabilities are classified as other financial liabilities and are carried at their amortized cost.

The carrying value of the Company's financial assets and liabilities approximates their fair value due to the relatively short periods to maturity of these investments. Fair value estimates are made at a specific point in time based on relevant market information and information about financial instruments. These estimates are subjective and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments measured at fair value are classified into one of the three levels in the fair value hierarchy according to the relative reliability of the inputs used estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 Inputs that are not based on observable market data.

As at July 31, 2011 and January 31, 2011, the Company's cash and short-term investments were classified as Level 1.

(b) Financial instruments risk

The Company is exposed in varying degrees to a variety of financial instrument related to risks. The Board approves and monitors the risk management processes:

Management's Discussion & Analysis

Three and Six Months Ended July 31, 2011

(i) Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company is subject to credit risk on the cash balances at the bank, its short-term bank guaranteed investment certificates and amounts receivable. Cash and cash equivalents consisting of Guaranteed Investment Certificates ("GICs") have been invested with Schedule 1 banks or equivalents, with its cash held in Canadian based banking institutions, authorized under the Bank Act to accept deposits, which may be eligible for deposit insurance provided by the Canadian Deposit Insurance Corporation. The receivables consist primarily of GST/HST recoverable of \$7,944.

(ii) Liquidity risk

The Company's approach to managing liquidity is to ensure that it will have sufficient liquidity to settle obligations and liabilities when due. As at July 31, 2011, the Company had cash and short-term investments of \$271,505 to settle current liabilities of \$4,186 which mainly consisted of accounts payable that were considered short term and settled within 30 days. The Company believes that it has sufficient capital to meet its requirements for the next twelve months.

(iii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company's cash attract interest at floating rates and have maturities of 90 days or less. The Company's short-term investments are invested in GICs with greater than 90 day terms but not greater than one year. These GICs have a fixed interest rate for the term of the deposit. The interest on cash and GICs is typical of Canadian banking rates, which are low at present and the conservative investment strategy mitigates the risk of deterioration to the investment. A change of 100 basis points in the interest rates would not be material to the financial statements.

(c) Capital management

The Company manages its share capital as capital, which as at July 31, 2011 totalled \$997,098 (January 31, 2011 – \$997,098). The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern such that it can continue to provide returns for shareholders and benefits for other stakeholders. The management of the capital structure is based on the funds available to the Company in order to support the acquisition, exploration and development of mineral properties and to maintain the Company in good standing with the various regulatory authorities. In order to maintain or adjust its capital structure, the Company may issue new shares or debt or sell assets to settle liabilities.

To effectively manage the entity's capital requirements, the Company has in place a planning and budgeting process to help determine the funds required to ensure the Company has the appropriate liquidity to meet its objectives. The Company may issue new shares or seek debt financing to ensure that there is sufficient working capital to meet its short-term business requirements. The Company is not subject to externally imposed capital requirements.

There were no changes in the Company's management of capital during the six months ended July 31, 2011.

Internal Control over Financial Reporting

Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. The Chief Executive Officer and Chief Financial Officer have concluded that there has been no change in the Company's internal control over financial reporting during the period ended July 31, 2011 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting. As of July 31, 2011, the Company's internal control over financial reporting was effective.
