MAGNA RESOURCES LTD.

An exploration stage enterprise

Notes to the condensed consolidated interim financial statements

For the six months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars - unaudited)

1. Nature of operations

The Company was incorporated on June 5, 2006 under the laws of British Columbia and is listed on the Canadian National Stock Exchange ("CNSX") under the symbol "MNA". The Company's principal business activity is the acquisition and exploration of mineral properties.

The head office and principal address of the Company is located at 221 Union Street, Suite 219, Vancouver, British Columbia, Canada, V6A 0B4. The Company's registered and records office address is 1066 West Hastings Street, Suite 2610, Vancouver, British Columbia, Canada, V6E 3X1.

2. Business acquisition

On January 19, 2012, the Company acquired an additional 50% interest in American Potash LLC ("American Potash") through a purchase agreement ("Purchase Agreement") with Confederation Minerals Ltd. ("Confederation"). As a result of this purchase, the Company owns 100% interest in American Potash. The total consideration is comprised of 22,420,000 common shares of the Company at a price of \$0.20 per share and 2,400,000 common share purchase warrants totalling to \$4,480,000. The common shares issued were valued using the share price of the Company on January 19, 2012. Any goodwill recognized on acquisition is attributed to the expected value of the potash properties held by American Potash and is included in mineral property and deferred exploration costs. The Purchase Agreement was accounted for as a business combination under the acquisition method of accounting. The allocation of the purchase price to acquired assets and liabilities is based on fair value assessed for each of the individual acquired assets and liabilities. The purchase price allocation is as follows:

Fair value of Net Assets Acquired	\$
Cash and cash equivalent	1,900
Prepaid expenses	5,071
Trade and other payables	(84,512)
Mineral property and deferred exploration costs	4,851,086
Loans	(293,545)
Total net assets acquired	4,480,000
Consideration	
Common shares and warrants issued, being the total purchase price	4,480,000

3. Significant accounting policies and basis of preparation

The condensed consolidated interim financial statements of the Company for the six months ended January 31, 2012 were authorized for issue in accordance with a resolution of the directors on March 30, 2012.

The Company prepares its financial statements in accordance with Canadian generally accepted accounting principles as set out in Part I of the Handbook of the Canadian Institute of Chartered Accountants ("CICA Handbook"). In 2010, the CICA Handbook was revised to incorporate International Financial Reporting Standards, and require publicly accountable enterprises to apply such standards effective for years beginning on or after January 1, 2011. Accordingly, the Company reports on this basis in these interim consolidated financial statements. In the financial statements, the term "Canadian GAAP" refers to Canadian GAAP before the adoption of IFRS.

MAGNA RESOURCES LTD.

An exploration stage enterprise

Notes to the condensed consolidated interim financial statements

For the six months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars - unaudited)

3. Significant accounting policies and basis of preparation (cont'd)

These condensed consolidated interim financial statements have been prepared in accordance with IFRS applicable to the preparation of interim financial statements, including International Accounting Standard ("IAS") 34 Interim Financial Reporting and IFRS 1 First-time adoption of International Financial Reporting ("IFRS 1"). The Company has consistently applied the same accounting policies throughout all periods presented, as if these policies had always been in effect. Note 13 discloses the impact of the transition to IFRS on the Company's reported financial position, financial performance and cash flows, including the nature and effect of significant changes in accounting policies from those used in the Company's consolidated financial statements for the year ended July 31, 2011.

The policies applied in these condensed consolidated interim financial statements are based on IFRS issued and outstanding as of March 30, 2012, the date the Board of Directors approved the statements. Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ending July 31, 2012 could result in restatement of these interim consolidated financial statements, including the transition adjustments recognized on change-over to IFRS.

The condensed consolidated interim financial statements should be read in conjunction with the Company's Canadian GAAP annual audited financial statements for the year ended July 31, 2011 and the explanation of how the transition to IFRS has affected the reported consolidated balance sheets, statements of operations and cash flows of the Company provided in Note 13.

Basis of preparation

The condensed consolidated interim financial statements of the Company have been prepared on an accrual basis and are on historical costs basis, except for certain financial instruments which are measured at fair value. The condensed consolidated financial interim statements are presented in Canadian dollars unless otherwise noted.

Consolidation

The condensed consolidated interim financial statements include the accounts of the Company and its controlled entities. Details of controlled entities are as follows:

	Country of incorporation	Percentage owned*	
		January 31, 2012	January 31, 2011
American Potash LLC	U.S.	100%	50%

*Percentage of voting power is in proportion to ownership.

All inter-company balances, transactions and unrealized gains and losses from intercompany transactions are eliminated on consolidation.

Significant accounting judgments, estimates and assumptions

The preparation of the Company's condensed consolidated interim financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the condensed consolidated interim financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of

MAGNA RESOURCES LTD.

An exploration stage enterprise

Notes to the condensed consolidated interim financial statements

For the six months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars - unaudited)

3. Significant accounting policies and basis of preparation (cont'd)

future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

Areas requiring a significant degree of estimation and judgment relate to the recoverability of the carrying value of exploration and evaluation assets and fair value measurements for financial instruments and share-based payments and other equity-based payments. Actual results may differ from those estimates and judgments.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the condensed consolidated interim financial statements within the next financial year are discussed below:

Foreign currency translation

The functional currency of each of the Company's entities is measured using the currency of the primary economic environment in which that entity operates. The condensed consolidated interim financial statements are presented in Canadian dollars which is the parent company's functional currency. The functional currency of the Company is Canadian dollars and the functional currency of its controlled entity is US dollars.

Transactions and balances:

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the period-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Exchange differences arising on the translation of monetary items or on settlement of monetary items are recognized in the statement of loss in the period in which they arise.

The financial statements of entities that have a functional currency different from that of the parent Company ("foreign operations") are translated into Canadian dollars as follows: assets and liabilities – at the closing rate at the date of the statement of financial position, and income and expenses – at the average rate of the period (as this is considered a reasonable approximation to actual rates). All resulting changes are recognized in other comprehensive income as cumulative translation adjustments.

Exploration and evaluation assets

Exploration and evaluation expenditures relating to mineral properties include the costs of acquiring licenses, costs associated with exploration and evaluation activity, and the fair value (at acquisition date) of exploration and evaluation assets. Exploration and evaluation expenditures are capitalized. Costs incurred before the Company has obtained the legal rights to explore an area are recognized in profit or loss.

Exploration and evaluation assets are assessed for impairment when events and circumstances suggest that the carrying amount exceeds the recoverable amount.

MAGNA RESOURCES LTD.

An exploration stage enterprise

Notes to the condensed consolidated interim financial statements

For the six months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars - unaudited)

3. Significant accounting policies and basis of preparation (cont'd)

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified to mining property and development assets within property, plant and equipment.

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

Share-based payments

The Company operates an employee stock option plan. Share-based payments to employees are measured at the fair value of the instruments issued and amortized over the relevant vesting periods. Share-based payments to non-employees are measured at the fair value of goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The fair value of options is determined using a Black-Scholes pricing model. The number of shares and options expected to vest is reviewed and adjusted at the end of each reporting period such that the amount recognized for services received as consideration for the equity instruments granted shall be based on the number of equity instruments that eventually vest.

Financial instruments**Financial Assets**

Financial assets are classified based on the purpose for which the asset was acquired. All transactions related to financial instruments are recorded on a trade date basis. There are no financial assets designated as fair value through profit or loss ("FVTPL"), held to maturity, or available for sale. The Company's accounting policy for the remaining category is as follows:

Loans and Receivables

These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, or on demand. They are initially recognized at fair value plus transaction costs that are directly attributable to their acquisition or issue and subsequently carried at amortized cost, using the effective interest rate method, less any impairment losses. Amortized cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs.

Gains and losses are recognized in the profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Impairment on Financial Assets

At each reporting date the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired, if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

MAGNA RESOURCES LTD.

An exploration stage enterprise

Notes to the condensed consolidated interim financial statements

For the six months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars - unaudited)

3. Significant accounting policies and basis of preparation (cont'd)**Financial Liabilities**

Financial liabilities are classified as other financial liabilities, based on the purpose for which the liability was incurred, and comprise of trade payables and accrued liabilities. These liabilities are initially recognized at fair value net of any transaction costs directly attributable to the issuance of the instrument and subsequently carried at amortized cost using the effective interest rate method. This ensures that any interest expense over the period to repayment is at a constant rate on the balance of the liability carried in the statement of financial position. Interest expense in this context includes initial transaction costs and premiums payable on redemption, as well as any interest or coupon payable while the liability is outstanding. The Company has no financial liabilities designated upon initial recognition as at FVTPL, or held for trading.

Trade and other payables represent liabilities for goods and services provided to the Company prior to the end of the period which are unpaid. Trade payable amounts are unsecured and are usually paid within 30 days of recognition.

The Company has classified its cash and cash equivalents, accounts and other receivables and reclamation bonds as loans and receivables. Trade payables and accrued liabilities are classified as other financial liabilities.

Impairment of long lived assets

Long lived assets are tested for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. An impairment loss is recognized whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are recognized in the statement of loss.

The recoverable amount is the greater of an asset's fair value less cost to sell and its value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is only reversed if there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks and, other highly liquid investments with original maturities up to one year that can be redeemed at any time without penalty.

Income taxCurrent income tax:

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date, in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognized directly in other comprehensive income or equity is recognized in other comprehensive income or equity. Management periodically evaluates positions taken in the tax returns

MAGNA RESOURCES LTD.

An exploration stage enterprise

Notes to the condensed consolidated interim financial statements

For the six months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars - unaudited)

3. Significant accounting policies and basis of preparation (cont'd)

with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax:

Deferred income tax is accounted for by providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred income taxes is not recognized for temporary differences related to the initial recognition of the assets or liabilities that affect neither accounting nor taxable profit nor investments in subsidiaries, associates and interests in joint ventures to the extent it is probable that they will not reverse in the foreseeable future. The amount of deferred income tax provided is based on the expected manner and expected date of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date. A deferred income tax asset is recognized only to the extent that it is probable that future taxable amounts will be available against which the asset can be utilized.

Earnings (loss) per share

Basic earnings (loss) per share is computed by dividing net earnings (loss) available to common shareholders by the weighted average number of shares outstanding during the reporting period. Diluted earnings (loss) per share is computed similar to basic earnings (loss) per share except that the weighted average shares outstanding are increased to include additional shares for the assumed exercise of stock options and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from the exercise of such instruments were used to acquire common shares at the average market price during the reporting period.

Related party transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

Restoration and environmental obligations

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of long-term assets, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future restoration cost estimates arising from the decommissioning of plant and other site preparation work is capitalized along with a corresponding increase in the restoration provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. The restoration asset will be depreciated on the same basis as other mining assets.

Changes in the net present value, excluding changes in the Company's estimates of reclamation costs, are charged to profit and loss for the period.

Notes to the condensed consolidated interim financial statements

For the six months ended January 31, 2012 and 2011

(Expressed in Canadian Dollars - unaudited)

3. Significant accounting policies and basis of preparation (cont'd)**Accounting standards issued but not yet effective*****New standard IFRS 9 "Financial Instruments"***

This new standard is a partial replacement of IAS 39 "Financial Instruments: Recognition and Measurement". This new standard is effective for annual periods beginning on or after January 1, 2015. The Company is currently evaluating the impact the final standard is expected to have on its consolidated financial statements.

IFRS 10 "Consolidated Financial Statements"

IFRS 10 *Consolidated Financial Statements* establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. This standard (i) requires a parent entity (an entity that controls one or more other entities) to present consolidated financial statements; (ii) defines the principle of control, and establishes control as the basis for consolidation; (iii) sets out how to apply the principle of control to identify whether an investor controls an investee and therefore must consolidate the investee; and (iv) sets out the accounting requirements for the preparation of consolidated financial statements. IFRS 10 supersedes IAS 27 *Consolidated and Separate Financial Statements* and SIC-12 *Consolidation- Special Purpose Entities* and is effective for annual periods beginning on or after January 1, 2013, with early application permitted. The Company is currently evaluating the impact the final standard is expected to have on its consolidated financial statements.

IFRS 11 "Joint Arrangements"

IFRS 11 *Joint Arrangements* establishes the core principle that a party to a joint arrangement determines the type of joint arrangement in which it is involved by assessing its rights and obligations and accounts for those rights and obligations in accordance with that type of joint arrangement. This standard is effective for annual periods beginning on or after January 1, 2013, with early application permitted. The Company is currently evaluating the impact the final standard is expected to have on its consolidated financial statements.

IFRS 12 "Disclosure of Involvements with Other Entities"

IFRS 12 *Disclosure of Involvement with other Entities* requires the disclosure of information that enables users of financial statements to evaluate the nature of, and risks associated with, its interests in other entities and the effects of those interests on its financial position, financial performance and cash flows. This standard is effective for annual periods beginning on or after January 1, 2013, with early application permitted. The Company is currently evaluating the impact the final standard is expected to have on its consolidated financial statements.

IFRS 13 "Fair Value Measurement"

IFRS 13 *Fair Value Measurement* defines fair value, sets out in a single IFRS a framework for measuring fair value and requires disclosures about fair value measurements. IFRS 13 applies when another IFRS requires or permits fair value measurements or disclosures about fair value measurements (and measurements, such as fair value less costs to sell, based on fair value or disclosures about those measurements), except for: share-based payment transactions within the scope of IFRS 2 *Share-based Payment*; leasing transactions within the scope of IAS 17 *Leases*; measurements that have some similarities to fair value but that are not fair value, such as net realizable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of Assets*. This standard is effective for annual periods beginning on or after January 1, 2013, with early application permitted. The Company is currently evaluating the impact the final standard is expected to have on its consolidated financial statements.

Green River Potash Project

Utah potash prospects

American Potash holds an option agreement with Sweetwater River Resources LLC ("Sweetwater"), John Glasscock and Kent Ausburn (the "Sweetwater Option Agreement") (collectively called the "Optionors"), to acquire pending applications to the United States Bureau of Land Management ("BLM") for Utah property for exploration permits, together with all permits and other rights issued pursuant to the applications, to allow for the exploration of potash prospects in Utah.

Under the Sweetwater Option Agreement, American Potash possesses exclusive priority application rights for 31 potash exploration permits covering approximately 25,495 hectares (63,000 acres) (255 sq. km.) of land in the Paradox Basin, Utah (the "Green River Potash Project"). 9,729 hectares (24,040 acres) (97 sq. km.) of the total 25,495 hectares are within a proposed Known Potash Lease Area ("KPLA"), which may become available only under a separate competitive bidding process. KPLA boundaries are currently under review and until such time that they are defined, the size of the final area of interest remains uncertain.

The Sweetwater Option Agreement entitles American Potash to acquire a 100% interest in permits, subject to a 2% royalty to the Optionors which may be bought back for \$2,000,000 USD. The option may be exercised by having Confederation and the Company each to pay a total of \$270,000 USD and each to issue in aggregate, 4,000,000 shares to the Optionors upon receiving grant of permits for Utah property of not less than 25,000 acres (the "Grant Date"). The Company's payment and share issuance obligations under the agreement are as follow:

- \$70,000 USD upon signing the option agreement (paid);
- 400,000 common shares of the Company on the Grant Date;
- \$50,000 USD cash and 1,200,000 common shares of the Company on or before the first anniversary of the Grant Date;
- \$50,000 USD cash and 1,200,000 common shares of the Company on or before the second anniversary of the Grant Date;
- \$50,000 USD cash and 1,200,000 common shares of the Company on or before the third anniversary of the Grant Date; and
- \$50,000 USD cash on or before the fourth anniversary of the Grant Date.

The option period is the earlier of the fourth anniversary of the Grant Date or December 31, 2018.

The Company will pay a finder's fee in connection with this acquisition. The fee will be US \$7,000 and 40,000 common shares of the Company, payable on the Grant Date, and thereafter 10% of the cash and stock payments made under the option agreement, payable as and when such payments are made.

In addition, American Potash has eleven non-contiguous Utah State trust land potash lease units in the potash-bearing Paradox Basin in Grand County, Utah. The eleven lease units total 2,853 hectares (7,050 acres) and are all within the border of a large block of contiguous BLM potash prospecting permit applications held exclusively by American Potash, separated into contiguous north and south blocks by a proposed BLM Known Potash Lease Area.

5. Mineral properties and marketable securities (cont'd)**Potassium prospects**

American Potash LLC has submitted Potassium Prospecting Applications in respect of an additional 912 hectares (2,253.95 acres) of BLM land contiguous to its existing applications in Utah.

Lithium placer mining claims

In July, 2011 American Potash acquired 160 Federal lithium placer mining claims totally 1,295 hectares (3,200 acres) in northwestern Paradox Basin, southeast Utah, USA. These claims are located on BLM administered Federal lands and are staked over a portion of existing American Potash BLM pending potash prospecting permit areas.

In August, 2011, the Company acquired 46.7 line-km (28 line-miles) of historic 2-D seismic data covering the approximate area of three proposed and three historic exploration well locations at its Green River Potash Project in the Paradox Basin of southeast Utah.

During the six months ended January 31, 2012 the Company incurred \$176,837 in Utah property acquisition and deferred exploration expenditures.

	2012	2011	2010
Property Costs - American Potash			
Balance, beginning of year	\$ 275,754	\$ 134,816	\$ -
Property acquisition/deferred exploration expenditures	176,837	140,938	134,816
Purchase of Confederation Minerals 50% interest	4,480,000	-	-
Balance, end of period	\$ 4,932,591	\$ 275,754	\$ 134,816

Marketable securities

During the year ended July 31, 2011 the Company received as consideration a 50% proportionate interest in 353,450 common shares of Passport Potash Inc., pursuant to an amendment of the Sweetwater Option Agreement dated November 2, 2010 for a total of \$91,897. During the six months ended January 31, 2012, all the shares were redeemed for net proceeds of \$172,084. The Company's share, net of commission and foreign exchange (50%) was \$86,042. At July 31, 2011, the market value of 50% of the 353,450 common shares of Passport Potash Inc., being 176,725 shares held by the Company, was \$106,382 (2010 - \$Nil). During the six months ended January 31, 2012, the Company recorded a loss on disposition of the shares of \$25,654.

6. Share capital**Authorized**

Unlimited common shares without par value

Issued and outstanding

At January 31, 2012 there were 51,506,666 issued and fully paid common shares (July 31, 2011 – 22,420,000).

During the period ended January 31, 2012, The Company and Confederation signed a Purchase Agreement in respect of the acquisition by the Company of Confederation's 50% interest in American Potash.

(Expressed in Canadian Dollars - unaudited)

6. Share capital (cont'd)

Under the terms of the Purchase Agreement, the Company completed a 2 for 1 subdivision of its outstanding common shares, resulting in the Company having 22,420,000 common shares being issued and outstanding. The aggregate purchase price comprised 22,420,000 common shares of the Company at a price of \$0.20 per share and 2,400,000 common share purchase warrants totalling to \$4,480,000, which was allocated to share capital.

Concurrent with the purchase, Confederation subscribed for 6,666,666 common shares of the Company at \$0.30 per share for gross proceeds to the Company of \$2,000,000.

Share purchase warrants

The Company has 4,800,000 share purchase warrants outstanding, exercisable at a price of \$0.10 per share, expiring February 25, 2016.

	Number of Warrants	Weighted Average Exercise Price
Outstanding as at July 31, 2010	2,400,000	\$ 0.10
Issued	2,400,000	0.10
Outstanding as at January 31, 2012	4,800,000	\$ 0.10

In January 2012, the Company issued 2,400,000 common share purchase warrants pursuant to the Purchase Agreement with Confederation. Each warrant entitles Confederation to purchase a further common share at a price of \$0.10 until February 25, 2016.

Stock options

The Company has a stock option plan whereby the Company is authorized to grant options to executive officers and directors, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common shares of the Company. Under the plan, the exercise price of each option equals the market price of the Company's shares as calculated on the date of grant. The options can be granted for a maximum term of 5 years.

<u>Exercise price</u>	<u>Number of options</u>	<u>Expiry date</u>
\$ 0.125	1,715,000	June 8, 2014

7. Reserves**Stock option reserve**

The stock option reserve records items recognized as share-based payments until such time that the stock options are exercised, at which time the corresponding amount will be transferred to share capital.

7. Share capital (cont'd)**Warrant reserve**

The warrant reserve records items recognized as part of a unit financing until such time that the warrants are exercised, at which time the corresponding amount will be transferred to share capital.

8. Related party transactions

The following directors and/or senior officers transacted with the Company in the reporting period. The terms and conditions of the transactions with key management personnel and their related parties were no more favourable than those available, or which might reasonably be expected to be available, on similar transactions to non-key management personnel related entities on an arm's length basis.

The aggregate value of transactions and outstanding balances relating to key management personnel were as follows:

Paid	Six months ended January 31,	
	2012	2011
St. Cloud Mining (Rudy de Jonge) – Management Fees	\$ 30,000	\$ -
St. Cloud Mining – payable from Fiscal 2009	25,000	-
Alexander Peck – CFO Consulting fees	3,500	-
	<u>\$ 58,500</u>	<u>\$ -</u>

Payable As At	January 31, 2011	July 31, 2011
St. Cloud Mining (Rudy de Jonge) – Management Fees*	\$ -	\$ 30,600
Global Mining Services (Kent Ausburn)	2,567	-
	<u>\$ 2,567</u>	<u>\$ 30,600</u>

A director of the Company is a party to the Sweetwater Option Agreement with American Potash LLC.

9. Capital risk management

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to pursue the development of any identified business opportunities and to maintain a flexible capital structure for the benefit of its stakeholders.

The Company includes equity, comprised of issued share capital, reserves and deficit in the definition of capital. The Company manages the capital structure and makes adjustments to it in light of changes in the economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the

Company may attempt to issue new shares, enter into joint venture arrangements, acquire or dispose of assets or adjust the amount of cash.

The Board of Directors does not establish quantitative return on capital criteria for management; but rather promotes year over year sustainable growth. The Company is not subject to externally imposed capital requirements. There has been no change with respect to capital risk management strategy during the six months ended January 31, 2012.

(Expressed in Canadian Dollars - unaudited)

10. Financial instruments and risk factors

The Company classifies its cash and cash equivalents as financial assets at fair value through profit or loss and accounts payable and accrued liabilities as other financial liabilities.

The fair value of accounts payable and accrued liabilities approximate their carrying value due to the short-term nature of these liabilities.

The Company classifies its fair value measurements within a fair value hierarchy, which reflects the significance of the inputs used in making the measurements as defined in IFRS 7 – *Financial Instruments – Disclosures*.

Level 1 – Unadjusted quoted prices at the measurement date for identical assets or liabilities in active markets. The Company's cash and cash equivalents are measured as level 1 inputs.

Level 2 – Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Significant unobservable inputs which are supported by little or no market activity.

Credit risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and cash equivalents which are held in large Canadian financial institutions. The Company believes this credit risk is insignificant.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations when they become due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at January 31, 2012, the Company had cash and cash equivalent balance of \$2,001,211 (July 31, 2011 - \$34,250) to settle current liabilities of \$249,014 (July 31, 2011 - \$60,764). In general, the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has cash balances and no interest-bearing debt. The Company believes it has no significant interest rate risk.

(Expressed in Canadian Dollars - unaudited)

12. Geographic information

The Company's activities are all in one industry segment of mineral property acquisition and exploration. The Company's mining operations are centralized whereby management of the Company is responsible for business results and the everyday decision-making. The Company's operations therefore are segmented on a geographic basis. All of the Company's resource properties are located in the United States. The Company's assets are located in the following geographic locations:

As at	January 31, 2012	July 31, 2011
Total assets:		
Canada	\$ 2,022,533	\$ 33,764
United States	4,942,629	398,253
	<u>\$ 6,965,162</u>	<u>\$ 432,017</u>

13. Transition to international financial reporting standards

The accounting policies in Note 3 have been applied in preparing the condensed consolidated interim financial statements for the three and six months ended January 31, 2012, the comparative information for the three and six months ended January 31, 2011 and the financial statements for the year ended July 31, 2011.

The changes in accounting policies resulting from the Company's adoption of IFRS had no impact on comparative information for the three and six months ended January 31, 2011 and financial statements for the year ended July 31, 2011, previously reported in accordance with Canadian GAAP.

In preparing the Company's IFRS financial statements, the Company has adjusted amounts reported previously in the financial statements prepared in accordance with pre-transition Canadian GAAP.

i) Optional exemptions

Foreign currency translation

IFRS 1 allows a first-time adopter to not comply with the requirements of IAS 21 "The Effects of Changes in Foreign Exchange Rates" for cumulative foreign currency translation differences that existed at the date of transition to IFRS. The Company has chosen to apply this election and has eliminated the cumulative foreign currency translation difference and adjusted deficit by the same.

ii) Mandatory exceptions

Estimates

The estimates previously made by the Company under pre-transition Canadian GAAP were not revised for the application of IFRS except where necessary to reflect any difference in accounting policy or where there was objective evidence that those estimates were in error. As a result the Company has not used hindsight to revise those estimates.

IFRS 1 requires an entity to reconcile equity, comprehensive loss and cash flows for prior periods upon transition. No reconciliation of the statement of cash flows has been prepared as there have been no material adjustments to the net cash flows.

(Expressed in Canadian Dollars - unaudited)

13. Transition to international financial reporting standards (cont'd)**Explanatory notes**

The following paragraphs explain the significant differences between Canadian GAAP and the current IFRS accounting policies applied by the Company. These differences result in the adjustments in the tables above.

(i) Adjustment on translation of foreign currency entity

Under Canadian GAAP, all the Company's subsidiaries were integrated foreign operations. Therefore, monetary items were translated at year-end rates and non-monetary items were translated at historic rates with all foreign currency gains and losses recognized in statement of operations. IFRS requires that the functional currency of each subsidiary of the Company be determined separately. It was determined that, as at the transition date, the functional currency of the Company is Canadian dollars and the functional currency of its joint venture is USD.

In accordance with the IFRS 1 optional exemptions, the Company elected to transfer the currency translation differences recognized as a separate component of equity, to deficit.

The net impact of this change in policy was as follows:

- At January 31, 2011, an increase in statement of operations of \$1,378 and a cumulative charge of \$9,337 to other comprehensive income.
- At July 31, 2011, a decrease to mineral property interests of \$18,425, an increase in statement of operations of \$4,086 and a cumulative charge of \$23,733 to other comprehensive income.

Changes to accounting policies

The Company has changed certain accounting policies to be consistent with IFRS, however, these changes to its accounting policies have not resulted in any significant change to the recognition and measurement of assets, liabilities, equity, revenue and expenses within its financial statements.

The following summarizes the significant changes to the Company's accounting policies on adoption of IFRS.

a) Impairment of (non-financial) assets

IFRS requires a write down of assets if the higher of the fair market value and the value in use of a group of assets is less than its carrying value. Value in use is determined using discounted estimate future cash flows. Current Canadian GAAP requires a write down to estimated fair value only if the undiscounted estimated future cash flows of a group of assets are less than its carrying value.

The Company's accounting policies related to impairment of non-financial assets have been changed to reflect these differences. There is no impact on the unaudited condensed interim financial statements.

MAGNA RESOURCES LTD.

13. Transition to international financial reporting standards (cont'd)

Changes to accounting policies (cont'd)

b) Presentation

Certain amounts on the unaudited condensed consolidated statement of financial position, statement of loss and comprehensive loss and statement of cash flows have been reclassified to conform to the presentation adopted under IFRS.

14. Subsequent events

- a) In February, 2012, the Company granted 3,285,000 stock options to directors, officers and consultants of the Company exercisable at \$0.40 per share for a term of five years.
- b) American Potash has received final approval from the State of Utah to commence drilling on one of its State leases which is part of the Green River Potash Project in Utah's Paradox Basin. The first hole, "Duma Point" is to be drilled targeting the Cycle 5 potash zone in Section 2, Township 24 South and Range 17 East, Grand County, Utah.
