Of which, \$50,000 advanced but not yet closed, pending completion of “round 2.” The convertible debentures bear interest of 15% per annum, payable semi-annually and mature three years following the date of issuance. The convertible debentures are convertible at a conversion price of \$0.05 per common share.

In April 2023, the Company initiated a negligence claim against the lawyer who acted for CB Holdings and related companies in relation to the US\$3.5M loans made by James Bay in 2018, seeking damages incurred from the lawyer’s negligent conduct. The claim has been filed in California and has been served on the defendants (the “California Litigation”).

James Bay has made legal filings in April 2023 to pursue 1782 disclosure under Nevada law from Wynn Casinos in Nevada, in efforts to obtain evidence to substantiate the claim that Wynn Casinos did not properly fulfill its duty to know your client and to properly investigate sources of funding from designated guests spending excessively at the casinos and other facilities extensively (the “Nevada Litigation”). The California Litigation and the Nevada Litigation, collectively the “Litigation”.

The Company concurrently sold and assigned, pursuant to separate agreements with each subscriber, a pro rata entitlement (based on all the subscribers) for up to an aggregate of 30% of the net proceeds of the Litigation, if any (whether as a result of final judgement by a court of competent jurisdiction or settlement for which no appeal or further proceeding may be taken (the "Final Award")), after deduction of all related costs and taxes incurred by the Company in the Litigation (the "Net Final Amount"), for the initial 1 Million of Net Final Amount and 20% of any Net Final Amount above \$1,000,000 payable to the Holders within 60 days from the receipt of the Final Award. In the event the Company prepays the Debentures in full prior to that date which is one year from the date of issue and prior to the date of the Final Award, then the amount payable to the Holders under the agreement will be adjusted to reflect an aggregate entitlement of 15%. Should the Company’s litigation be settled or be the subject of a final decision and if the Company is in receipt of settlement funds, the convertible debentures holders will have rights to accelerate the maturity date to 15 days following the date the convertible debentures holders provide written notice to the Company.

The President and CEO of the Company purchased an aggregate of \$50,000 of convertible debentures. Two Directors of the Company purchased an aggregate of \$100,000 of convertible debentures.

In accordance with IFRS, the entire instrument is treated as a liability and the conversion option is revalued every reporting period. The net present value of the liability component of the convertible debentures has been estimated using an effective interest rate of 27.2%. The directly attributable transaction costs were expense in the consolidated statements of loss and comprehensive loss. The convertible debentures, net of transaction costs, are accreted such that carrying amount of the convertible debenture will equal the face value of the convertible debenture at maturity. The accretion on the convertible debentures is included in interest expense in the consolidated statements of loss and comprehensive loss.

The rate of 27.2% was used in estimating the value of the liability component of the convertible debentures and used to apply the effective interest rate method to the convertible debentures is based on significant management estimation.

James Bay was awarded costs of approximately \$309,402, solely against Mak Mera. Costs were not awarded against Mr. Wale Sola personally, as Justice Papageorgiou determined that there was divided success in the Decision concerning the issues between Mr. Sola and James Bay.
