INDEPENDENT AUDITORS' REPORT

To the Shareholders of Hillcrest Resources Ltd.:

We have audited the accompanying consolidated financial statements of Hillcrest Resources Ltd., which comprise the consolidated financial position as at December 31, 2011, December 31, 2010 and January 1, 2010, and the consolidated statements of comprehensive loss, changes in equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2011, December 31, 2010 and January 1, 2010, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 2 in the consolidated financial statements which describes conditions and matters that indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

1. Nature and Basis of Operations

Hillcrest Resources Ltd. (the “Company”) was incorporated on May 2, 2006 under the Business Corporations Act of British Columbia, and is in the business of acquiring, exploring and developing exploration interests in oil and gas projects in the United States of America. The Company’s registered office is suite 303 – 750 West Pender Street, Vancouver, British Columbia, Canada, V6C 2T7.

The Company is subject to several categories of risk associated with the exploration and development of oil and gas resources. Oil and gas exploration and production is a speculative business, and involves a high degree of risk. Among the factors that have a direct bearing on the Company’s prospects are uncertainties inherent in estimating oil and gas reserves, future hydrocarbon production, and cash flows, particularly with respect to wells that have not been fully tested and with wells having limited production histories; access to additional capital; changes in the price of oil and gas; availability and cost of services and equipment; and the presence of competitors with greater financial resources and capacity.

The oil and gas industry is subject, by its nature, to environmental hazards and clean-up costs. At this time, management knows of no substantial costs from environmental accidents or events for which the Company may be currently liable. In addition, the Company’s oil and gas business makes it vulnerable to changes in prices of crude oil and natural gas. Such prices have been volatile in the past and can be expected to be volatile in the future. By definition, proved reserves are based on estimated future oil and gas prices and costs. Price declines reduce the estimated quantity of proved reserves and increase annual depletion expense (which is based on proved and probable reserves).

2. Basis of Preparation

Statement of compliance

The Company prepares its financial statements in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and the International Financial Reporting Interpretations Committee (“IFRIC”), including IFRS 1, *First-time Adoption of International Financial Reporting Standards*. The transition date to IFRS for the Company was January 1, 2010. Prior to 2011, the Company’s financial statements were prepared in accordance with Canadian Generally Accepted Accounting Principles (“Canadian GAAP”). See note 13.

Basis of measurement

Subject to certain IFRS 1 transition elections disclosed in note 13, the Company has consistently applied the same accounting policies in its opening IFRS statement of financial position as at January 1, 2010 and throughout all periods presented, as if these policies had always been in effect. Note 13 discloses the impact of the transition to IFRS on the Company’s reported statements of financial position and comprehensive income, including the nature and effect of significant changes in accounting policies from those used in the Company’s consolidated financial statements for the year ended December 31, 2010.

Material changes in reporting from the annual financial statements in Canadian GAAP to these consolidated financial statements in IFRS are discussed in Note 13.

The financial statements have been prepared on a historical cost basis and are presented in Canadian dollars, which is also the Company’s functional currency.

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

2. Basis of Preparation (continued)

Going concern of operations

These consolidated financial statements have been prepared on the basis of a going concern, which contemplates the realization of assets and the discharge of liabilities in the normal course of business for the foreseeable future. The Company incurred a net loss of \$699,554 during the year ended December 31, 2011 and, as of that date the Company's deficit was \$1,889,801. The Company's ability to meet its obligations as they fall due and to continue to operate as a going concern is dependent on the continued financial support of the creditors and the shareholders and ultimately, the attainment of profitable operations. There is no certainty that the Company will continue to produce revenue due to the inherent production risks associated with the oil and natural gas industry. In the past, the Company has relied on sales of equity securities to meet its cash requirements. There can be no assurance that funding from this or other sources will be sufficient in the future to satisfy operational requirements and cash commitments. Even if the Company is able to obtain new financing, it may not be on commercially reasonable terms or terms that are acceptable to it. Failure to obtain such financing on a timely basis could cause the Company to reduce or terminate its operations. Due to the uncertainties as noted above, there is significant doubt regarding the Company's ability to continue as a going concern. These consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

	December 31, 2011	December 31, 2010	January 31, 2010
Working capital surplus/(deficiency)	\$ 188,922	\$ (330,126)	\$ 47,272
Deficit	\$ (1,889,801)	\$ (1,190,247)	\$ (1,296,504)

Critical judgments in applying accounting policies

The preparation of these consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the year. Actual results could differ from these estimates.

These consolidated financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the reporting date that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- the recoverability of receivables;
- the carrying value and the recoverability of oil and gas properties;
- depletion and depreciation;
- petroleum and natural gas reserves;
- decommissioning liabilities;
- the inputs used in the accounting for share-based payments;
- income taxes.

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

3. Significant Accounting Policies

Principles of consolidation

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Hillcrest Exploration Inc. and Hillcrest Resources (Arizona) Ltd. All intercompany balances and transactions have been eliminated.

Foreign currency translation

(i) Functional and presentation currency

The financial results of foreign operations that have a functional currency different from the presentation currency are translated into the presentation currency. Income and expenditure transactions of foreign operations are translated at the average rate of exchange for the year except for significant individual transactions which are translated at the rate of exchange in effect at the transaction date. All assets and liabilities, including fair value adjustments and goodwill arising on acquisition, are translated at the rate of exchange ruling at the reporting date. Differences arising on translation from the transition date are recognized as other comprehensive income. When the settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely in the foreseeable future, foreign exchange gains and losses arising from such a monetary item are considered to form part of the net investment in a foreign operation and are recognized in other comprehensive income. On disposal of part or all of the operations, the proportionate share of the related cumulative gains and losses previously recognized in the comprehensive income are included in determining the profit or loss on disposal of that operation. The consolidated financial statements are presented in Canadian dollars, which is the Company's functional and presentation currency, while the US dollar is the functional currency of the Company's subsidiary.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies, are recognised in the statement of comprehensive income (loss), except for the Company's net investment in its foreign subsidiaries which are recognised in other comprehensive income.

Exploration and evaluation

Exploration and evaluation ("E&E") costs are capitalized for projects after the Company has acquired the legal right to explore but prior to their technical feasibility and commercial viability being confirmed, generally determined as the establishment of proved or probable reserves. These costs may include costs of license acquisition, technical services and studies, seismic acquisition, exploration drilling and testing, directly attributable overhead and administration expenses, including remuneration of production personnel and supervisory management, the projected costs of retiring the assets, and any activities in relation to evaluating the technical feasibility and commercial viability of extracting mineral resources.

Once technical feasibility and commercial viability are confirmed the E&E asset is then reclassified to property and equipment and tested for impairment. For purposes of impairment testing, E&E assets are allocated to the appropriate cash-generating units based on geographic proximity.

Expired lease costs are expensed as part of depletion and depreciation expense as they occur and costs incurred prior to the legal right to explore are charged to net income (loss).

Property and equipment

(i) Cost and valuation

All costs directly associated with the development of oil and gas interests are capitalized on an area-by-area basis as oil and gas interests and are measured at cost less accumulated depletion and net impairment losses. These costs include expenditures for areas where technical feasibility and commercial viability have been determined. These costs include property acquisitions with proved and/or probable reserves, development

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

3. Significant Accounting Policies (continued)

Property and equipment (continued)

(i) Cost and valuation (continued)

drilling, completion, gathering and infrastructure, decommissioning liabilities and transfers of exploration and evaluation assets.

Equipment includes computer equipment which is recorded at cost on initial acquisition. Cost includes the purchase price and the directly attributable costs of acquisition required to bring an asset to the location and condition necessary for the asset to be capable of operating in the manner intended by management. Subsequent expenditure relating to an item of equipment is capitalized when it is probable that future economic benefits from the use of the assets will be increased. All other subsequent expenditure is recognized as repairs and maintenance expenses during the period in which they are incurred.

(ii) Depletion and depreciation

The provision for depletion for oil and natural gas assets is calculated based on each asset's production for the period divided by the Company's estimated total proved and probable oil and natural gas reserve volumes before royalties for that asset, taking into account estimated future development costs. Production and reserves of natural gas and associated liquids are converted at the energy equivalent ratio of six thousand cubic feet of natural gas to one barrel of oil. Changes in estimates used in prior periods, such as proven and probable reserves, that affect the unit-of-production calculations do not give rise to prior period adjustments and are dealt with on a prospective basis.

Equipment is depreciated on a declining balance basis over the estimated useful life of the asset at the rate of 45% to 55% per annum. Where components of an asset have a different useful life and cost that is significant to the total cost of the asset, depreciation is calculated on each separate component. Depreciation methods, useful lives and residual values are reviewed at the end of each reporting date, and adjusted if appropriate.

Impairment of non-financial assets

At each reporting period the carrying amounts of the Company's non-financial assets, other than exploration and evaluation assets, are reviewed for indicators of impairment. If indicators exist, the recoverable amount of the asset is estimated. Exploration and evaluation assets are assessed for impairment when they are reclassified to property and equipment and if facts and circumstances suggest that the carrying amount exceeds the recoverable amount.

For purposes of assessing impairment, exploration and evaluation assets and property and equipment are grouped into cash generating units ("CGU") defined as the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or groups of assets. The Company has used geographical proximity, geological similarities, analysis of shared infrastructure, commodity type, assessment of exposure to market risks and materiality to define its CGUs.

If the carrying amount exceeds the recoverable amount, the asset or CGU is recorded at its recoverable amount with the reduction recognized in net income (loss) in depletion and depreciation expense. The recoverable amount is the greater of the value in use or fair value less costs to sell. Fair value is the amount the asset could be sold for in an arm's length transaction. The value in use is the present value of the estimated future cash flows of the asset from its continued use. The fair value less costs to sell considers the continued development of a property and market transactions in a valuation model. The Company uses the present value of the cash generating unit's estimated future cash flows from both proved and probable reserves in its fair value model. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded entities or other available fair value indicators.

Impairments are reversed in subsequent periods when there has been an increase in the recoverable amount of a previously impaired asset or CGU and these reversals are recognized in net income (loss). The recovery is limited to the original carrying amount less depletion and depreciation that would have been recorded had the asset not been impaired.

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

3. Significant Accounting Policies (continued)

Impairment of financial assets

At each reporting date, the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or group of financial assets.

Joint operations

Oil and natural gas operations are conducted jointly with external parties and, accordingly, these consolidated financial statements reflect only the Company's proportionate interest in such activities.

Revenue recognition

Revenue from the sale of oil and natural gas is recorded when the significant risks and rewards of ownership of the product is transferred to the buyer which is usually when legal title passes to the external party. Revenue is measured net of discounts and customs duties.

Financial instruments

(i) Non-derivative financial assets

All financial instruments are classified into one of five categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables, available-for-sale financial assets or other financial liabilities. All financial instruments and derivatives are measured in the balance sheet at fair value, except for loans and receivables, held-to-maturity investments and other financial liabilities, which are measured at amortized cost. Subsequent measurement and changes in fair value will depend on their initial classification. Financial assets at fair value through profit or loss are measured at fair value and changes in fair value are recognized in net income (loss).

Available-for-sale financial instruments are measured at fair value with changes in fair value recorded in other comprehensive income until the instrument is derecognized or impaired. Held-to-maturity investments, loans and receivables, and other financial liabilities are initially measured at fair value and subsequently measured at amortized cost. Amortization of premiums or discounts and losses due to impairment are included in current year net earnings (loss).

The Company has classified its cash as a financial asset at fair value through profit or loss, and accounts receivable as loans and receivables.

The Company derecognizes a financial asset when its contractual obligations to the cash flows from the asset are discharged or cancelled or expire.

(ii) Non-derivative financial liabilities

The Company initially recognizes debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities (including liabilities designated at fair value through profit or loss) are recognized initially on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

The Company classifies the non-derivative financial liabilities to the following categories: loans and borrowings, bank overdrafts, and trade and other payables. Such financial liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition these financial liabilities are measured at amortized cost using the effective interest method.

Accounts payable and accrued liabilities, and loan payable are classified as other financial liabilities. Transaction costs incurred upon the issuance of debt instruments or modification of a financial liability are deducted from the financial liability and are amortized using the effective interest method over the expected life of the related liability.

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

3. Significant Accounting Policies (continued)

Financial instruments (continued)

(ii) Non-derivative financial liabilities (continued)

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled or expire.

(iii) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

Cash and cash equivalents

Cash equivalents consist of highly liquid investments, which are readily convertible into cash and generally have maturities of three months or less when acquired. As of December 31, 2011, December 31, 2010 and January 1, 2010, there were no cash equivalents.

Decommissioning and restoration costs

Decommissioning and restoration costs will be incurred by the Company at the end of the operating life of certain of the Company's assets. The ultimate decommissioning and restoration costs are uncertain and cost estimates can vary in response to many factors including changes to relevant legal and regulatory requirements, the emergence of new restoration techniques or experience at other production sites. The expected timing and amount of expenditure can also change, for example in response to changes in reserves or changes in laws and regulations or their interpretation. In determining the amount of the provision, assumptions and estimates are required in relation to discount rates. As a result, there could be significant adjustments to the provisions established which would affect future financial results. In the Company's judgment, the most appropriate discount rate to use is the Company's credit adjusted rate of 12%.

As at December 31, 2011, the Company has incurred \$23,181 asset retirement obligations (December 31, 2010 - \$nil, January 31, 2010 - \$nil) related to its oil and gas and mineral exploration properties.

Share-based payments

The grant date fair value of share-based payment awards granted to employees is recognized as an employee expense, with a corresponding increase in equity, over the period that the employees unconditionally become entitled to the awards. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognized as an expense is based on the number of awards that do meet the related service and non-market performance conditions at the vesting date. For share-based payment awards with non-vesting conditions, the grant date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes.

Where equity instruments are granted to parties other than employees, they are recorded by reference to the fair value of the services received. If the fair value of the services received cannot be reliably estimated, the Company measures the services received by reference to the fair value of the equity instruments granted, measured at the date the counterparty renders service.

All equity-settled share-based payments are reflected in contributed surplus, until exercised. Upon exercise, shares are issued from treasury and the amount reflected in contributed surplus is credit to share capital, adjusted for any consideration paid.

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements

(Expressed in Canadian Dollars Unless Otherwise Stated)

3. Significant Accounting Policies (continued)

Basic and diluted earnings (loss) per share

Earnings (loss) per share are calculated using the weighted-average number of common shares outstanding during the year. In calculating diluted earnings (loss) per share, the Company considers the potential exercise of outstanding share purchase options and warrants to the extent each option, warrant or contingent issuance was dilutive. Potentially dilutive securities were excluded in the computation of diluted loss per share as their inclusion would be anti-dilutive.

Taxes

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income.

i) Current income tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

ii) Deferred income tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is not recognized for the following temporary differences:

- liabilities arising from initial recognition of goodwill for which amortization is not deductible for tax purposes;
- liabilities arising from the initial recognition of an asset/liability other than in a business combination which, at the time of the transaction, does not affect either the accounting or the taxable profit; and
- liabilities arising from undistributed profits from investments where the entity is able to control the timing of the reversal of the difference and it is probable that the reversal will not occur in the foreseeable future.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

iii) Sales tax

Revenues, expenses and assets are recognized net of the amount of sales tax except:

- Where the sales tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the sales tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable
- Receivables and payables that are stated with the amount of sales tax included. The net amount of sales tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

(Expressed in Canadian Dollars Unless Otherwise Stated)

3. Significant Accounting Policies (continued)

Standards, amendments and interpretations not yet effective

The following standards and amendments to existing standards have been published and are mandatory for the Company's annual accounting periods beginning January 1, 2012 or later, with early adoption permitted:

IFRS 9 'Financial Instruments: Classification and Measurement' – introduces new requirements for the classification and measurement of financial instruments.

IFRS 10 'Consolidated Financial Statements' – establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities.

IFRS 11 'Joint Arrangements' - provides for a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form.

IFRS 12 'Disclosure of Interests in Other Entities' - requires the disclosure of information that enables users of financial statements to evaluate the nature of, and risks associated with its interests in other entities and the effects of those interests on its financial position, financial performance and cash flows.

IFRS 13 'Fair Value Measurement' - provides the guidance on the measurement of fair value and related disclosures through a fair value hierarchy.

IAS 1 'Presentation of Financial Statements' – improves the consistency and clarity of the presentation of items of other comprehensive income.

IAS 27 'Separate Financial Statements' – contains accounting and disclosure requirements for investments in subsidiaries, joint ventures and associates when an entity prepares separate financial statements.

IAS 28 'Investments in Associates and Joint Ventures' – prescribes the accounting for investments in associates and joint ventures and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

Management anticipates that the above standards will be adopted in the Company's financial statements for the period beginning January 1, 2012 or later, and currently evaluating the impact of the adoption of these standards.

4. Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of oil and gas properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company is primarily dependent on external financing to fund its activities. In order to carry out the planned exploration and development and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient economic potential and if it has adequate available or committed financial resources to complete such acquisitions.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the year ended December 31, 2011. The Company is not subject to externally imposed capital requirements.

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

5. Risk Factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

The Company's credit risk is primarily attributable to cash and cash equivalents. The Company has no significant concentration of credit risk arising from operations. Cash and cash equivalents are held with reputable financial institutions, from which management believes the risk of loss to be remote.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at December 31, 2011, the Company had current assets of \$479,119 (December 31, 2010 - \$179,648, January 1, 2010 - \$79,044) to settle current liabilities of \$290,197 (December 31, 2010 - \$509,774, January 1, 2010 - \$31,772). On March 3, 2011, the Company completed its Initial Public Offering and issued 10,350,000 common shares at a price of \$0.20 per share for gross proceeds of \$2,070,000. All of the Company's financial liabilities, other than loan payable, have contractual maturities of less than 30 days and are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factor such as interest rates, foreign exchange rates, and commodity and equity prices.

Interest rate risk

The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade short-term certificates of deposits issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

Foreign currency risk

Foreign currency exchange rate risk is the risk that the fair value of financial instruments or future cash flows will fluctuate as a result of changes in foreign exchange rates. The Company operates in Canada and the United States. All of the Company's oil and natural gas sales are denominated in United States dollars.

The Company was exposed to the following foreign currency risk:

Expressed in foreign currencies	December 31, 2011 US\$	December 31, 2010 US\$	January 1, 2010 US\$
Cash	\$ 159,336	\$ 48,309	\$ -
Accounts receivable	71,950	100,243	2,537
Accounts payable and accrued liabilities	(200,499)	(111,087)	-
Loan payable	-	(213,545)	-
	\$ 30,787	\$ (176,080)	\$ 2,537

The following foreign exchange rates applied for the year ended and as at December 31:

	2011	2010
Year-to-date average USD to CAD	0.9893	0.9946
As at December 31	1.0170	1.0305

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

5. Risk Factors (continued)

Foreign currency risk (continued)

The Company has performed a sensitivity analysis on its foreign currency denominated financial instruments. Based on the Company's foreign currency exposure noted above and assuming that all other variables remain constant, a 10% appreciation of the US dollar against the Canadian dollar would result in the increase of net gain of \$3,079 at December 31, 2011 (increase of net loss of \$17,600 at December 31, 2010). For a 10% depreciation of the above foreign currencies against the Canadian dollar, assuming all other variables remain constant, there would be an equal and opposite impact on net loss.

Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of natural resources, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

6. Property and Equipment (continued)

Hartburg Project, Newton County, Texas

By agreement dated December 8, 2009, the Company entered into an Assignment and Assumption Agreement for the assignment of a 60% working interest in certain land leases known as the Hartburg Project in Newton County, Texas. In consideration the Company paid a lump sum of \$111,266 US (\$117,040 CDN). The Company is responsible for their proportionate share of all future costs of the development of the property.

On March 27, 2009, Barry Lasker (“Lasker”) and Delta Oil and Gas, Inc. (“Delta”) entered into an exploration agreement (the “Exploration Agreement”). Pursuant to the terms of the Exploration Agreement, Lasker agreed to identify and secure leases which would subsequently be assigned to Delta and pursuant to the terms of such agreement, Delta agreed to pay 100% of the lease acquisition costs and operating costs of up to three wells. In exchange for Lasker’s performance under the Exploration Agreement, Lasker obtained a 10% carried interest in the first target well, Donner #1, and a 20% carried interest in the second and third target wells, Prospect 1 and Prospect 2, respectively, until payout in each of the wells. Upon payout, Lasker’s carried interest converted to a 50% working interest in Donner #1 and a 40% working interest in each of Prospect 1 and Prospect 2.

On December 30, 2010, Delta entered into an agreement (the “HRI Assignment”) with the Company to assign 60% of all of Delta’s right, title and interest in and to the Exploration Agreement.

The effect of the Exploration Agreement and the HRI Assignment was to create the following net revenue interests to the Company in Donner #1, Prospect 1, and Prospect 2:

<u>Donner #1</u>	
Before payout	54%
After payout	22.5%
<u>Prospect 1 and Prospect 2</u>	
Before payout	48%
After payout	27%

Livingston Property, Polk County, Texas

By agreement dated November 1, 2009, the Company, entered into an Assignment of Oil and Gas Lease and Bill of Sale for the assignment of a 30% working interest and a 22.5% net revenue interest in certain oil and gas leases known as the Livingston property in Polk County, Texas. In consideration the Company paid a lump sum of \$90,000 US (\$96,120 CDN). The Company is responsible for their proportionate share of all future costs of the development of the property.

Arizona Project

The Company acquired a total of 120,080 acres through a significant lease hold position in the Pedregosa Basin located in Cochise and Graham County in the State of Arizona. In consideration, the Company paid US \$200,000 (CDN\$ 193,669). The Company plans to commission a seismic survey of the area to devise a plan of action for drilling one or more exploration wells

Montana Project

On September 26, 2011, the Company entered into a purchase and sale agreement with Longshot Oil, LLC, a private company with common management and shareholders with Bakken Oil Holdings, with the acquisition of certain oil and gas properties in Teton County, Montana. The Company will issue 1,000,000 common shares in the capital of the Company at a deemed price of \$0.25 per Share and pay \$400,000 in cash.

On November 1, 2011 the Company entered into a purchase and sale agreement with Washington-based Longshot Oil LLC, with respect to the acquisition by the company from Longshot of certain oil and gas properties in Pondera county, Montana. Pursuant to the terms of the purchase and sale agreement, the company will acquire Longshot's legal and beneficial right, title and interest in and to certain oil and gas properties in Pondera county, Montana, including all oil and gas leases, all geological and geophysical data (including all seismic data) and copies of all records with respect to such oil and gas properties. As consideration for the acquisition of the properties, the company will pay to Longshot \$350,000 in cash.

On November 30, 2011 the Company entered into a purchase and sale agreement with Bakken Oil Holdings, LLC, a private company with common management and shareholders with Longshot Oil, LLC, to acquire certain oil and gas properties in Teton and Pondera Counties, Montana comprising approximately 12,333 acres. As consideration the Company will issue 4,000,000 warrants at a price of \$0.20 per share exercisable for a period of 24 months and pay \$1,000,000 in cash.

The Company obtained 3,849.38 acres of oil and gas properties in Teton County, Montana at a land sale held on December 7, 2011.

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

8. Loan Payable

During the year ended December 31, 2010, the Company received a loan in the principal sum of US\$200,000. The term of the loan is for a twelve (12) month period ending June 8, 2011. Interest is calculated at 12% per annum, compounded annually.

During the initial six months of the term, no payments of principal or interest is payable. On the first day of the seventh month of the term, the Company shall make its first payment of no less than the proportionate amount of principal and interest then due and payable. Thereafter, the Company shall make payments of not less than the proportionate amount of principal and interest due and payable on a quarterly basis until the end of the term. During the year ended December 31, 2010, the Company and the lender mutually agreed to delay the commencement of repayment until April 2011.

If the Company elects, at any time during the term of the loan, to repay the lender the full amount of principal and interest then due and payable, it is free to do so, but in doing it agrees to pay an additional sum of 3% of the principal amount of the loan as an exit fee. If the Company elects, at any time during the second 12 months of the term, to repay the lender the full amount of principal and interest then due and payable, it is free to do so, but in doing it agrees to pay an additional sum of 1.5% of the principal amount of the loan as an exit fee.

At any time during the term, regardless of whether the Company is current with its interest payments, the lender may, at its option, by giving the Company written notice of its intentions, convert not more than the amount of principal and interest then due and payable into one or a combination of the following:

- a) Common shares at \$0.05 per common share; and/or
- b) The acquisition of a working interest(s) in the hydrocarbon production of the Company in which the value of each flowing barrel, to be determined at the time the conversion, shall be equal to the current market value for a flowing barrel of oil, discounted by an amount to be agreed upon at the time by the Company and the lender.

The Company determined the equity component of the conversion option to have a nominal fair value.

On May 9, 2011, the full amount of principal and interest of the loan was repaid.

9. Share Capital

Authorized:

Unlimited number of common shares without par value

Issued and outstanding:

Year Ended December 31, 2011

Issued for Cash

On March 17, 2011, the Company completed its Initial Public Offering and issued 10,350,000 common shares at a price of \$0.20 per share for gross proceeds of \$2,070,000. The Company also issued 828,000 Agent's warrants with an exercise price of \$0.20 per share, exercisable until March 17, 2013. The Agent's warrants were valued at \$155,853 using the Black Scholes option pricing model with weighted average assumptions of an expected life of two years, dividend yield of 0%, expected volatility of 266%, and risk-free rate of return of 1.61%.

During the year ended December 31, 2011, the Company issued 4,648,933 common shares pursuant to the exercise of 4,257,000 warrants at \$0.10 per share and 391,933 agent's warrants at \$0.20 per share for total proceeds of \$504,087.

HILLCREST RESOURCES LTD.

(Expressed in Canadian Dollars Unless Otherwise Stated)

9. Share Capital (continued)

Issued for Oil and Gas Properties

On October 13, 2011, the Company issued 1,000,000 common shares at a fair value of \$0.27 per share to Longshot Oil LLC, for certain oil and gas properties in Teton county, Montana, including all oil and gas leases.

Year ended December 31, 2010

Issued for Cash

During the year ended December 31, 2010, the Company issued 6,610,000 units at \$0.05 per unit for gross proceeds of \$330,500 by way of a private placement. Each unit consists of one common share and one share purchase warrant. Each share purchase warrant entitles the holder to purchase one common share at \$0.10 per share for a period of 24 months.

Issued for Oil and Gas Properties

On January 14, 2010, the Company issued 100,000 units for services at a fair value of \$0.05 per unit. Each unit consists of one common share and one share purchase warrant. Each share purchase warrant entitles the holder to purchase one common share at \$0.10 per share for a period of 24 months.

Share Repurchase

During the year ended December 31, 2010, the Company purchased from a former director one common share of the Company for the price of \$1.00 per share pursuant to a Repurchase Agreement.

Restructure of Share Capital

During the year ended December 31, 2010, the Company restructured the share capital by returning to treasury and cancelling 6,387,500 common shares of the Company, which were originally issued to investors at a price of \$0.02 and \$0.01 per share. In exchange, the Company re-issued the equivalent number of common shares at a deemed price of \$0.05 per share to these investors. As a result, there was no reduction in share capital.

Share Purchase Warrants

During the year ended December 31, 2010, the Company issued 6,710,000 share purchase warrants pursuant to private placements. Each warrant is exercisable for one common share at \$0.10 per share expiring 24 months from the date of issuance. During the year ended December 31, 2011, 4,257,000 warrants were exercised.

	December 31, 2011		December 31, 2010

Balance, end of year	436,067	\$ 0.20	-	\$ -

Stock Options

Effective November 4, 2010, the Company adopted a stock option plan to grant stock options to its directors, officers, employees and consultants. Subjective to the requirement of the TSX Venture Exchange (the "Exchange"), the aggregate number of securities reserved for issuance under the plan, at any point in time, will be 10% of the number of common shares of the Company issued and outstanding at the time the option is granted (on a diluted basis), less any common share reserved for issuance under share options granted under share compensation arrangements other than the plan. The exercise price of option grants will be determined by the board, but will not be less than the closing market price of the common shares on the Exchange less allowable discounts at the time of grant. All options granted under the plan will expire not later than the date that is five years from the date that such options are granted.

On March 22, 2011, the Company granted 1,550,000 stock options to officers and directors of the Company and 350,000 stock options to two consultants of the Company. The stock options are exercisable for a period of 5 years from the date of listing on the TSX Venture Exchange ("Listing") at an exercise price of \$0.20 per common share. The stock options granted will vest on the day that is four months from date of Listing. Total stock-based compensation expense of \$525,295 has been charged to operations. The weighted average fair value of the options granted was \$0.28 per option.

On September 26, 2011, the Company granted 800,000 stock options to directors and consultants of the Company. The stock options are exercisable for a period of 5 years from the date of listing on the TSX Venture Exchange ("Listing") at an exercise price of \$0.25 per common share. The stock options granted will vest on the day that is four months from date of Listing. Total stock-based compensation expense of \$185,756 has been charged to operations. The weighted average fair value of the options granted was \$0.235 per option.

The fair value of the option granted was estimated on the date of grant using the Black-Scholes option pricing model with the following weight average assumptions:

Dividend yield	Nil
Expected volatility	216% - 225%
Risk-free rate of return	1.43% - 2.57%
Expected life of options	5 years

10. Related Party Transactions

Related party transactions are with directors and a company controlled by a director and officer of the Company.

The following summarizes the Company's related party transactions for management compensation during the years ended December 31, 2011 and 2010:

	<u>2011</u>	<u>2010</u>
Consulting fees to directors and companies controlled by a director of the Company	<u>\$ 101,500</u>	<u>\$ 27,750</u>
Consulting fees to the president of the Company	<u>\$ 5,000</u>	<u>\$ -</u>

As at December 31, 2011, due from related parties includes \$610 (December 31, 2010 - \$ nil, January 1, 2010 - \$nil) advanced to a company controlled by the Chief Executive Officer of the Company for legal fee. The Company owes the Chief Executive Officer of the Company, a company controlled by the Chief Financial Officer and the director a total of \$6,697 (December 31, 2010- \$20,367, January 1, 2010 - \$nil), which is included in accounts payable and accrued liabilities.

Stock-based compensation of \$548,725 was recognised during the year ended December 31, 2011, related to stock options granted to directors and officers.

These transactions are in the normal course of operations and are measured at the exchange amount of consideration established and agreed to by the related parties.

HILLCREST RESOURCES LTD.
Notes to Consolidated Financial Statements
December 31, 2011
(Expressed in Canadian Dollars Unless Otherwise Stated)

11. Income Taxes

The Company has accumulated non-capital losses for tax purposes of approximately \$418,000 (2010 – \$396,000), which begin to expire commencing in 2027.

Future income tax assets and liabilities are recognized for temporary differences between the carrying amounts of the balance sheet items and their corresponding tax values as well as for the benefit of losses available to be carried forward to future years for tax purposes that are more likely than not to be realized.

The reconciliation of income tax benefit computed at statutory rates to the reported income tax benefit is as follows:

	<u>2011</u>	<u>2010</u>
Income (loss) before income taxes	\$ 700,000	\$ 106,000
Statutory income tax rate	26.50%	28.50%
Expected income tax recovery (expense)	\$ 185,000	\$ (30,000)
Non-deductible items	(180,000)	(9,000)
Change in valuation allowance	(5,000)	39,000
Income tax recovery (expense)	<u>\$ -</u>	<u>\$ -</u>

Significant components of the Company's future tax assets and liabilities, after applying substantially enacted corporate income tax rates, are as follows:

	<u>2011</u>	<u>2010</u>
Future income tax assets:		
Non-capital losses	\$ 105,000	\$ 99,000
Property and equipment	143,000	202,000
Share issue costs	86,000	3,000
	<u>334,000</u>	<u>304,000</u>
Valuation allowance for future income tax assets	<u>(334,000)</u>	<u>(304,000)</u>
	<u>\$ -</u>	<u>\$ -</u>

12. Subsequent events

The Company entered into a purchase and sale agreement with 0914577 BC Ltd. to acquire certain oil and gas properties in Pondera County, Montana. As consideration the Company will issue 2,000,000 common shares.

Offering of a non-brokered private placement of up to 10 million units at a price of \$0.18 per unit. Each unit will consist of one common share and one half warrant with each whole warrant exercisable at a price of \$0.30 for a term of 2 years.

The Company purchased the override position held by Arizona Energy Explorations LLC (“AEE”) in the Pedregosa Basin in Cochise County, Arizona. AEE held a 25% interest in the first well, exploration work and participation right for future wells. The Company purchased the interest for consideration of 1,500,000 shares and is now the sole owner and beneficiary of the leases.

13. First-time Adoption of International Financial Reporting Standards

The accounting policies set out in note 3 have been applied in preparing the financial statements for the year ended December 31, 2011, the comparative information presented in these financial statements for the year ended December 31, 2010 and in the preparation of an opening IFRS balance sheet at January 1, 2010 (the Company’s date of transition).

IFRS 1 requires that the same policies are applied for all periods presented in the first IFRS financial statements and that those policies comply with IFRSs in effect as at the end of the first IFRS annual reporting period. Accordingly, the opening IFRS statement of financial position, 2010 comparatives and current financial statements have been prepared using the same policies. The previously presented 2010 Canadian GAAP financial information has been reconciled to the IFRS information as part of this transition note in accordance with the requirements of IFRS 1. Further, the policies applied have been done so on a full retrospective basis unless an alternative treatment is permitted or required by an IFRS 1 election or exception.

An explanation of how the transition from Canadian GAAP to IFRS has affected the Company’s financial position, financial performance and cash flows is set out in the following tables and the notes that accompany the tables.

Set out below are the applicable IFRS 1 optional exemptions and mandatory exceptions applied by the Company in the conversion from Canadian GAAP to IFRS:

Optional exemptions:

(i) Share-based payment transactions

An IFRS 1 exemption allows the Company to not apply IFRS 2, ‘*Share-based Payment*’, to equity instruments granted after November 7, 2002 that vested before the date of transition to IFRS. The Company has elected to take the exemption and, as a result, was only required to recalculate the impact on any share based payments that have not vested at the date of transition, of which there were none.

(ii) Cumulative translation adjustment

International Accounting Standard 21 (“IAS 21”) requires an entity to recognise some translation differences in other comprehensive income and accumulate these in a separate component of equity. However, a first-time adopter need not comply with these requirements for cumulative translation differences that existed at the date of transition to IFRSs. If a first-time adopter uses this exemption the cumulative translation differences for all foreign operations are deemed to be zero at the date of transition to IFRSs. The Company has elected to apply IAS 21.

13. First-time Adoption of International Financial Reporting Standards (continued)

(iii) Borrowing costs

IFRS 1 allows a first time adopter to apply the transitional provisions set out in IAS 23, '*Borrowing Costs*'. Taking this exemption allows the Company to apply IAS 23 prospectively from the date of transition. The Company has not elected to adopt the remaining voluntary exemptions or they do not apply to the Company.

(iv) Business combinations

IFRS 1 indicates that a first-time adopter may elect not to apply IFRS 3, '*Business Combinations*' retrospectively to business combinations that occurred before the date of transition to IFRS. The Company has elected to apply IFRS 3 to only those business combinations that occurred on or after the transition date and such business combinations have not been restated. As a result of this election, no adjustments were required to the Company's statement of financial position as at the transition date due to no business combinations.

(v) Full cost oil and gas entities

The Company elected to apply the IFRS1 exemption available to entities which followed full cost accounting under previous Canadian GAAP ("CGAAP"). This exemption permits the total carrying value of property, plant and equipment ("PP&E"), and exploration and evaluation ("E&E"), under IFRS on transition to equal the carrying value under previous CGAAP, subject to an impairment test. In addition, conversion to IFRS required the allocation of the carrying amount of the full cost pool under previous CGAAP to E&E, and to components and CGUs for PP&E assets. Firstly, E&E were recorded at the carrying amount under previous CGAAP. The remaining previous CGAAP carrying amount was then allocated, pro-rata to components (Areas) for Producing/Developing assets ("D&P assets") ("PP&E"), based on proved plus probable reserve values, using the present values at a 10 percent discount rate. Impairment tests were completed on transition, resulting in no impairment charge to PP&E or E&E at January 1, 2010.

E&E assets are required to be segregated from D&P assets. These assets comprise possible reserves assigned as a result of business acquisitions and undeveloped land associated with exploratory areas. As at January 1, 2010 and December 31, 2010, Hillcrest's E&E assets were \$nil, respectively. Under previous CGAAP these assets were included in the full cost pool as PP&E, in accordance with the CICA's full cost accounting guideline. Under IFRS, these costs are initially recorded as E&E and, on determination of technical feasibility and commercial viability of the assets, the capitalized costs are moved to PP&E.

(vi) Decommissioning provisions

The Company elected the exemption under IFRS 1 to not restate decommissioning provisions retrospective under IAS 37 & IFRIC 1.

Mandatory exceptions:

The IFRS 1 mandatory exception applied by the Company in the conversion from Canadian GAAP to IFRS is as follows:

(i) Estimates

In accordance with IFRS 1, an entity's estimates under IFRS at the date of transition to IFRS must be consistent with estimates made for the same date under previous GAAP unless those estimates were in error. The Company's IFRS estimates as at the transition date are consistent with its Canadian GAAP estimates as at that date.

In preparing the opening IFRS statement of financial position and the financial statements for the year ended December 31, 2011, the Company did not identify any adjustments to the amounts reported previously in the financial statements prepared in accordance with Canadian GAAP. IFRS 1 requires an entity to reconcile equity, comprehensive loss, and cash flows for prior periods. There were no changes made to the statements of financial position, statements of loss and comprehensive loss, and cash flows.

13. First-time Adoption of International Financial Reporting Standards (continued)

Mandatory exceptions: (continued)

- (i) The Company's first-time adoption did not have a material impact on shareholder's equity as at January 1, 2010, hence no reconciliation has been provided.
- (ii) The Company's first-time adoption did not have a material impact on shareholder's equity as at December 31, 2010, and comprehensive income for the year ended December 31, 2010, hence no reconciliation has been provided.
- (iii) The Company's first-time adoption did not have an impact on cash flows for the year ended December 31, 2010, hence no reconciliation has been provided.
