The increase in loss is primarily due to the recognition of an unrealized loss of \$17,002,492 due to the decrease in the stock price of the Northern Data Shares in Q2, compared to an unrealized loss of \$10,043,991 in Q1.

Six Months Ended June 30, 2022 Compared to Six Months Ended June 30, 2021

During the six months ended June 30, 2022 (the “2022 period”) the Company reported a net loss of \$27,298,485 compared to a net income of \$27,141,509 for the six months ended June 30, 2021 (the “2021 period”), an increase in loss of \$54,439,994. The increase in loss is primarily due to the following:

- (i) recognition of a gain on disposal of subsidiaries of \$38,788,992 in the 2021 period;
- (ii) recognition of an unrealized loss of \$27,046,483 in the 2022 period compared to an unrealized loss of \$9,499,703 in the 2021 period due to the changes in the quoted stock price on the Company’s holdings in the Northern Data Shares;
- (iii) decrease in corporate expenses of \$1,912,635 from \$2,031,665 in the 2021 period to \$119,030 in the 2022 period. Corporate and administrative expenses were significantly reduced upon the sale of the subsidiaries.

Financing Activities

No financing activities were conducted by the Company during the 2022 or 2021 period.

Advance

In November 2021 the Company received an advance from Mr. Rowe. The advance bears interest at the rate of 10% per annum. As at June 30, 2022 \$60,326 (December 31, 2021 - \$57,666) of the advance and accrued interest remained outstanding.

Convertible Debentures

The Company has received a number of loans and issued convertible debentures which bear interest at 10% per annum and are repayable between December 2025 and August 2027. During the 2022 period the Company recognized \$235,138 (2021 - \$235,138) of interest expense. As at June 30, 2022 \$4,768,063 (December 31, 2021 - \$4,768,063) of principal and \$1,379,590 (December 31, 2021 - \$1,144,452) of interest remained unpaid.

The amount of the loans, at the option of each lender, may be convertible into common shares of the Company at the market price at time of such conversion in accordance with the policies of and subject to acceptance by the CSE.

Provision

The Company's previously owned Swedish subsidiary, Hydro66 Svenska AB ("Hydro AB"), has been under a tax review regarding parts of its recovered VAT for the period 2016-2020. The Company has given the buyer of Hydro66 Svenska AB an indemnity to be liable for tax rulings attributed to periods before the transaction date (March 4, 2021). The Swedish Tax Authorities have not yet come with a ruling but have expressed an intent to recover a portion of the VAT recovered by Hydro AB on grounds that Hydro AB is mining crypto currencies for its own use. The Company does not share the Swedish Tax Authorities opinion and is of the clear position that all its services are VAT eligible and performed for its customers. Since the legal framework regarding cryptocurrency related tax issues is still untested and the Swedish Tax Authorities are known for their aggressive stance in the matter, the Company has chosen to record a provision regarding the expected VAT claim. The amount recorded (SEK 15,466,934) represents approximately 50% of the total amount that is under consideration and represents the weighted effect of the expected decision from the Swedish Tax Authorities together with the probability of the outcome.

Financial Condition / Capital Resources

During the six months ended June 30, 2022 the Company recorded a net loss of \$27,298,485 and, as at June 30, 2022, had a working capital deficiency of \$142,498. The Company has \$1,630,643 of restricted cash which will be available to the Company upon resolution of the VAT issues. With the sale of its subsidiaries, the Company has curtailed its levels of corporate and administrative activities. However, until the Company is able to secure the release of the restricted cash and able to trade in in equity securities, management anticipates the Company will continue to require additional financing and continued shareholder support to maintain essential levels of administration and corporate expenses required for a publicly traded company and provide working capital to conduct due diligence on any business or acquisition opportunities as they arise. There can be no assurance that the Company will be successful in identifying a business opportunity or securing financing.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Proposed Transactions

The Company has no proposed transactions.

Financial Instruments and Risk Management

Categories of Financial Assets and Liabilities

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 - Inputs that are not based on observable market data.

The principal financial instruments used by the Company, from which financial instrument risk arises, are as follows:

- (i) Trade receivables
- (ii) Cash and restricted cash
- (iii) Investment in equity security
- (iv) Accounts payable and accrued liabilities
- (v) Advance and convertible debentures

Trade and other receivables are initially measured at the amount of consideration that is unconditional. The Company holds trade receivables with the objective of collecting the contractual cash flows so is subsequently measured at amortized cost. Book values and expected cash flows are reviewed by the Board and any impairment charged to the consolidated statement of comprehensive income in the relevant period.

The fair value of the investment in equity security is measured based on level 1 at the quoted market price of the related common shares at each reporting date, and changes in fair value are recognized in comprehensive income (loss).

Accounts payable and accrued liabilities are measured at book value. The book value of financial assets and liabilities equates to their fair value.

Accounts payable and accrued liabilities principally comprise amounts outstanding for trade purchases and ongoing costs.

The Company's non-derivative financial liabilities have contractual maturities (including interest payments where applicable) as summarized below:

	As at June 30, 2022			
	Current		Non-Current	
	Within 6 Months \$	6-12 Months \$	1 - 5 Years \$	Over 5 Years \$

Trade and other payables	88,616	-	-	-

The above amounts reflect the contractual undiscounted cash flows, which may differ to the carrying values of the liabilities at the reporting date.
