## **1. NATURE OF OPERATIONS AND GOING CONCERN**

Declan Resources Inc. (“the Company”) was incorporated on August 25, 2005 under the Laws of British Columbia. The Company’s head office and registered and records office address is Suite 302 – 1620 West 8<sup>th</sup> Ave, Vancouver, BC, V6J 1V4, Canada. The Company is traded on the TSX Venture Exchange (“TSX-V”).

The Company is a mineral exploration company focused on acquiring, exploring and developing exploration and evaluation assets in Sierra Leone and Canada. In conducting operations in Sierra Leone, the Company is subject to considerations and risks not typically associated with companies operating in North America. These include risks such as the political, economic and legal environments in an emerging market. Among other things, the Company’s results may be adversely affected by changes in political and social conditions in Sierra Leone, and by changes in governmental policies with respect to mining laws and regulations, anti-inflationary measures, currency conversion and remittance abroad, and rates and methods of taxation.

At the date of the condensed interim consolidated financial statements, the Company has not identified a known body of commercial grade mineral on any of its exploration and evaluation assets. The ability of the Company to realize the costs it has incurred to date on exploration and evaluation assets is dependent upon the Company identifying a commercial mineral body, to finance its development costs and to resolve any environmental, regulatory or other constraints which may hinder the successful development of the exploration and evaluation assets. To date, the Company has not earned any revenues and is considered to be in the exploration stage.

The condensed interim consolidated financial statements have been prepared assuming the Company will continue on a going-concern basis. The Company has incurred losses since its inception and the ability of the Company to continue as a going-concern depends upon its ability to raise adequate financing and to develop profitable operations. These condensed interim consolidated financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations.

Management is actively targeting sources of additional financing through alliances with financial, exploration and mining entities, and other business and financial transactions which would assure continuation of the Company’s operations and exploration programs. In addition, management closely monitors commodity prices of precious metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company if favorable or adverse market conditions occur.

The Company estimates that it will need additional capital to operate for the upcoming year. The Company believes such financing will be available as required, however, there can be no assurance that the Company will be successful in its future financing attempts. These material uncertainties may cast doubt on the Company’s ability to continue as a going concern.

## **2. BASIS OF PRESENTATION**

### **Statement of compliance**

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with IAS 34, Interim Financial Reporting, as issued by the International Accounting Standards Board (“IASB”) and the interpretations of the IFRS Interpretations committee (“IFRIC”)s). They do not include all disclosures required by International Financial Reporting Standards (“IFRS”) for annual financial statements, and, therefore, should be read in conjunction with the Company’s audited consolidated financial statements for the year ended September 30, 2013, prepared in accordance with IFRS as issued by the IASB.

**2. BASIS OF PRESENTATION (cont'd...)**

**Basis of presentation**

These condensed consolidated interim financial statements have been prepared on a historical cost basis, using the accrual basis of accounting, except for cash flow information and for certain financial assets that are measured at fair value.

**Functional and presentation currency**

These condensed consolidated interim financial statements are presented in Canadian dollars, unless otherwise noted, which is both the functional currency of the parent and of the subsidiary.

**Basis of consolidation**

These condensed interim consolidated financial statements include the accounts of the Company and its subsidiary companies. Intercompany balances and transactions, and any unrealized income and expenses arising from intercompany transactions, are eliminated in preparing the condensed interim consolidated financial statements.

---

Name of Subsidiary	Place of Incorporation	Proportion of Ownership	
		Interest	Principal Activity
Talos Minerals Ltd.	Canada	100%	Holding Company
Revonah Resources (SL) Ltd.	Sierra Leone	85%	Exploration in Sierra Leone
Greenstone Minerals (SL) Ltd.	Sierra Leone	85%	Exploration in Sierra Leone

---

**Use of estimates and judgments**

The preparation of these condensed interim consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed interim consolidated financial statement. Actual results could differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

i) Exploration and evaluation assets

The carrying value and recoverability of exploration and evaluation assets requires management to make certain estimates, judgments and assumptions about its projects. Management has determined that of exploration, evaluation and related costs incurred which were capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geologic and other technical information, history of conversion of mineral deposits with similar characteristics to its own properties to proven and probably mineral reserves, scoping and feasibility studies, accessible facilities and existing permits.

ii) Share-based compensation

The fair value of stock options issued are subject to the limitation of the Black-Scholes option pricing model, which incorporates market data and involves uncertainty in estimates used by management in the assumptions. The Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices, and, as a result, changes in subjective input assumptions can materially affect the fair value estimate.

**2. BASIS OF PRESENTATION** (cont'd...)

**Use of estimates and judgments** (cont'd...)

iii) Deferred income taxes

The determination of income tax is inherently complex and requires making certain estimates and assumptions about future events. The Company has adequately provided for all income tax obligations, however, changes in facts and circumstances as a result of income tax audits, reassessments, jurisprudence and any new legislation may result in an increase or decrease in the Company's provision for deferred income taxes.

**3. SIGNIFICANT ACCOUNTING POLICIES**

These condensed interim consolidated financial statements were prepared using the same accounting policies and methods of computation as in the Company's consolidated financial statements for the year ended September 30, 2013 except as noted below.

**New accounting policies adopted**

The following standards and amendments to existing standards have been adopted by the Company effective October 1, 2013:

*IFRS 10, Consolidated Financial Statements*

This standard establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. This standard:

- i) requires a parent entity (an entity that controls one or more other entities) to present consolidated financial statements;
- ii) defines the principle of control, and establishes control as the basis for consolidation;
- iii) sets out how to apply the principle of control to identify whether an investor controls and investee and therefore must consolidate the investee; and
- iv) sets out the accounting requirements for the preparation of consolidated financial statements. IFRS 10 supersedes IAS 27 Consolidated and Separate Financial Statements and SIC-12 Consolidation-Special Purpose Entities.

*IFRS 11, Joint Arrangements*

This standard establishes the core principle that a party to a joint arrangement determines the type of joint arrangement in which it is involved by assessing its rights and obligations and accounts for those rights and obligations in accordance with that type of joint arrangement.

*IFRS 12, Disclosure of Involvement with Other Entities*

This standard requires the disclosure of information that enables users of financial statements to evaluate the nature of, and risks associated with, its interests in other entities and the effect of those interests on its financial position, financial performance and cash flows.

**3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**

**New accounting policies adopted (cont'd...)**

*IFRS 13, Fair Value Measurement*

This standard defines fair value, sets out in a single IFRS a framework for measuring fair value and requires disclosure about fair value measurements. IFRS 13 applies when another IFRS requires or permits fair value measurements or disclosures about fair value measurements (and measurements, such as fair value less cost to sell, based on fair value or disclosures about those measurements), except for: share-based payment transactions within the scope of IFRS 2 Share-based payment; leasing transactions within the scope of IAS 17 Leases; measurements that have some similarities to fair value but that are not fair value, such as net realizable value in IAS 2 Inventories or value in use in IAS 36 Impairment of Assets.

*IAS 27, Separate Financial Statements*

This standard has the objective of setting standards to be applied in accounting for investments in subsidiaries, joint ventures, and associates when an entity elects, or is required by local regulations, to present separate (non-consolidated) financial statements.

*IAS 28, Investments in Associates and Joint Ventures*

This standard prescribes the accounting for investment in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. IAS 28 applies to all entities that are investors with joint control of, or significant influence over, an investee (associate or joint venture).

*IAS 32, Financial instruments: presentation*

The amendments to this standard focused on four main areas:

- i) the meaning of “currently has a legally enforceable right of set-off”;
- ii) the application of simultaneous realization and settlement;
- iii) the offsetting of collateral amount; and
- iv) the unit of account for applying the offsetting requirements.

The adoption of these standards did not have an impact on the condensed interim consolidated financial statements.

**New standards, amendments and interpretations to existing standards not yet effective**

The following standards, amendments to standards and interpretations have been issued but are not effective:

*IFRS 9, Financial instruments*

This standard was issued in November 2009 and covers the classification and measurement of financial assets as part of its project to replace IAS 39 Financial Instruments: Recognition and Measurement. In October 2010, the requirements for classifying and measuring financial liabilities were added to IFRS 9. Under this guidance, entities have the option to recognize financial liabilities at fair value through earnings. If this option is elected, entities would be required to reverse the portion of the fair value change due to own credit risk out of earnings and recognize the change in other comprehensive income. The IASB has deferred a mandatory effective date for IFRS 9 pending the finalization of requirements on impairment, classification and measurement.

**3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**

**New standards, amendments and interpretations to existing standards not yet effective (cont'd...)**

The Company has not yet assessed the impact that the application of this standard or determined whether it will adopt this standard early.

**4. ACQUISITION OF TALOS MINERALS LTD.**

The Company acquired an 85% interest in certain Sierra Leone mineral properties (Note 9) through the purchase of 100% of the voting shares of Talos Minerals Ltd. ("Talos") in exchange for the issue of 24,470,002 common shares valued at \$2,202,300 and 1,500,000 stock options valued at \$78,200.

On July 12, 2012, the Company purchased 100% of the shares of Talos. The transaction was treated as an asset acquisition. A summary of the net assets acquired is as follows:

Notes payable	\$ 558,375	\$ 538,325
Total	\$ 558,375	\$ 538,325

On July 5, 2013, the Company issued notes payable for proceeds of \$600,000, of which \$300,000 was from directors, bearing interest at 12% per annum, payable in cash. A loan bonus of 2,400,000 common shares was issued at a value of \$72,000 to the lenders, which offset the notes payable, resulting in an effective rate of interest of approximately 24%. The notes mature one year from date of issuance and are secured by promissory notes. Total fees of \$7,546 were paid in association with the notes. The loans bonus and fees will be accreted to finance fees, over the term of the notes.

During the three months ended December 31, 2013, the Company booked \$18,148 (2012 - \$Nil) and \$20,050 (2012 - \$Nil) in interest and accretion costs, respectively, recorded in finance fees.

**c) Stock options**

Pursuant to the policies of the TSX-V, the Company may grant incentive stock options to its officers, directors, employees and consultants. The Company has implemented a fixed Stock Option Plan (the "Plan") whereby the Company has reserved 10% of the issued shares for issuance under the Plan. Options have a maximum term of ten years and terminate after a certain number of days following the termination of the optionee's term/employment, except in the case of death, in which case they terminate one year after the event. Vesting is determined by the Board of Directors.

At December 31, 2013, the Company had outstanding stock options enabling the holders to acquire further common shares as follows:

Included in accounts payable were amounts due to related parties at December 31, 2013 of \$432,381 (September 30, 2013 - \$449,549).

In July 2013, the Company received \$150,000 from a company controlled by a director and \$150,000 from a director (Note 11).

**14. BASIC AND DILUTED LOSS PER SHARE**

The calculation of basic and diluted loss per share for the three months ended December 31, 2013, is based on the loss attributable to common shareholders of \$787,052 (2012 - \$1,069,858) and a weighted average number of common shares outstanding of 124,680,424 (2012 - 108,353,676).

**15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

*Financial risk management*

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's financial instruments consist of cash, receivables, accounts payable and accrued liabilities and notes payable.

The Company classified its cash as fair value through profit or loss; receivables as loans and receivables; and accounts payable and accrued liabilities and notes payable as other financial liabilities. The fair value of cash is measured on the statement of financial position using level 1 of the fair value hierarchy. The fair values of receivables, accounts payable and accrued liabilities and notes payable approximate their book values because of the short-term nature of these instruments.

*Financial instrument risk exposure*

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management processes.

*Credit risk*

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its payment obligations. The Company has no material counterparties to its financial instruments with the exception of the financial institutions which hold its cash. The Company manages this credit risk by ensuring that these financial assets are placed with a major financial institution with strong investment grade ratings by a primary ratings agency. The Company's receivables consist primarily of goods and services tax due from the government and other receivables; the balances are in good standing as at December 31, 2013. The Company does not believe it has a material exposure to credit risk.

**15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)**

*Liquidity risk*

The Company ensures that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash. The Company's cash is invested in business accounts which are available on demand. The Company has significant financial liabilities outstanding including accounts payable and accrued liabilities and loans payable. The Company is exposed to the risk that it may not have sufficient liquid assets to meet its commitments associated with these financial liabilities. To the extent that the Company does not believe it has sufficient liquidity to meet these obligations, management will consider securing additional funds through equity transactions.

*Interest rate risk*

The Company is exposed to interest rate risk. The Company's bank account earns interest income at variable rates. The fair value of its portfolio is relatively unaffected by changes in short-term interest rates. Interest rate risk is minimal as the Company does not have significant interest bearing assets or any interest bearing liabilities that are tied into market rates.

*Foreign exchange risk*

The Company expects to continue to raise equity predominantly in Canadian dollars. The Company's property exploration that occurs in Sierra Leone is conducted in Canadian dollars, U.S. dollars and, to a lesser degree, Sierra Leonean leone. As such, it is subject to risk due to fluctuations in the exchange rates of these currencies. The Company does not enter into derivative financial instruments to mitigate its exposure to foreign currency risk. The effect of a one percent change in the foreign exchange rate on the Company's cash held in foreign currencies would be minimal.

*Commodity price risk*

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of precious and base metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company. Fluctuations in pricing may be significant.

*Political uncertainty*

In conducting operations in other countries, the Company is subject to considerations and risks not typically associated with companies operating in North America. These include risks such as the political, economic and legal environments. Among other things, the Company's results may be adversely affected by changes in the political and social conditions, and by changes in governmental policies with respect to mining laws and regulations, anti-inflationary measures, currency conversion and remittance abroad, and rates and methods of taxation.

**16. MANAGEMENT OF CAPITAL**

The Company manages its common shares, stock options and share purchase warrants as capital. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its exploration and evaluation assets and to maintain a flexible capital structure which optimizes the cost of capital at an acceptable risk. The Company is not subject to any externally imposed capital requirements.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt or acquire or dispose of assets.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

In order to maximize ongoing exploration efforts, the Company does not pay out dividends. The Company's investment policy is to keep its cash treasury invested in certificates of deposit with major financial institutions.

The properties in which the Company currently has an interest are in the exploration stage; as such the Company has historically relied on the equity markets to fund its activities. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

There have been no changes to the Company's approach to capital management during the three months ended December 31, 2013.

**17. SEGMENTED INFORMATION**

The Company operates in one industry segment being the acquisition and exploration of exploration and evaluation assets interests. The total assets attributable to the geographical locations relate primarily to exploration and evaluation assets.
