**DECLAN RESOURCES INC.**

Notes to the Condensed Interim Consolidated Financial Statements

Three Month Period Ended December 31, 2016

(Expressed in Canadian dollars)

(Unaudited)

**1. NATURE OF OPERATIONS AND GOING CONCERN**

Declan Resources Inc. (the "Company") was incorporated on August 25, 2005 under the laws of British Columbia. The Company's head office and registered and records office is Suite 302 – 1620 West 8<sup>th</sup> Ave, Vancouver, BC, V6J 1V4, Canada. The Company is traded on the Canadian Securities Exchange ("CSE").

The Company is a mineral exploration company focused on acquiring and exploring exploration and evaluation assets in Canada.

At the date of these condensed interim consolidated financial statements, the Company has not identified a known body of commercial grade mineral on any of its exploration and evaluation assets. The ability of the Company to realize the costs it has incurred to date on exploration and evaluation assets is dependent upon the Company identifying a commercial mineral body, to finance its development costs and to resolve any environmental, regulatory or other constraints which may hinder the successful development of the exploration and evaluation assets. To date, the Company has not earned any revenues and is considered to be in the exploration stage.

These condensed interim consolidated financial statements have been prepared assuming the Company will continue on a going concern basis. The Company has incurred losses since its inception and the ability of the Company to continue as a going-concern depends upon its ability to raise adequate financing and to develop profitable operations. These condensed interim consolidated financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations.

Management is actively targeting sources of additional financing through alliances with financial, exploration and mining entities, and other business and financial transactions which would assure continuation of the Company's operations and exploration programs. In addition, management closely monitors the commodity prices and other developments in the natural resources market, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company if favorable or adverse market conditions occur.

The Company estimates that it will need additional capital to operate for the upcoming year. There can be no assurance that the Company will be successful in its future financing attempts. These material uncertainties may cast significant doubt on the Company's ability to continue as a going concern.

**2. BASIS OF PRESENTATION**

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with IAS 34, Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB") and the interpretations of the IFRS Interpretations committee. They do not include all disclosures required by International Financial Reporting Standards ("IFRS") for annual financial statements, and therefore, should be read in conjunction with the Company's audited consolidated financial statements for the year ended September 30, 2016, prepared in accordance with IFRS as issued by the IASB.

The condensed interim consolidated financial statements were authorized for issue by the Board of Directors on February 21, 2017.

**2. BASIS OF PRESENTATION (continued)****Basis of Measurement**

These condensed interim consolidated financial statements have been prepared on the historical cost basis, except for financial instruments classified as held for trading that have been measured at fair value. Cost is the fair value of consideration given in exchange for net assets.

**Functional and presentation currency**

These condensed interim consolidated financial statements are presented in Canadian dollars, unless otherwise noted, which is the functional currency of the parent and its subsidiaries.

**Basis of consolidation**

These condensed interim consolidated financial statements include the accounts of the Company and its subsidiaries. Intercompany balances and transactions, and any unrealized income and expenses arising from intercompany transactions, are eliminated in preparing the consolidated financial statements.

Name of Subsidiary	Place of Incorporation	Proportion of Ownership Interest	Principal Activity
Declan Resources (Wyoming) LLC	U.S.A.	100%	Dormant
Talos Minerals Ltd.	Canada	100%	Dormant
Revonah Resources (SL) Ltd.	Sierra Leone	85%	Dormant
Greenstone Minerals (SL) Ltd.	Sierra Leone	85%	Dormant

**Significant Accounting Judgments, Estimates and Assumptions**

In the application of the Company's accounting policies which are described in Note 3, management is required to make judgments, estimates, and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, revenue and expenses and are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and management's assessment of current events and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods.

**DECLAN RESOURCES INC.**

Notes to the Condensed Interim Consolidated Financial Statements

Three Month Period Ended December 31, 2016

(Expressed in Canadian dollars)

(Unaudited)

**2. BASIS OF PRESENTATION** (continued)**Use of estimates and judgments** (continued)

Significant judgments, estimates and assumptions that have the most significant effect on the amounts recognized in these consolidated financial statements include:

***Estimates:****Deferred Tax Assets*

Deferred tax assets, including those arising from un-utilized tax losses, require management to assess the likelihood that the Company will generate sufficient taxable earnings in future periods in order to utilize recognized deferred tax assets. Assumptions about the generation of future taxable profits depend on management's estimates of future cash flows. In addition, future changes in tax laws could limit the ability of the Company to obtain tax deductions in future periods. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize any deferred tax assets could be impacted.

*Share-based compensation*

The fair value of stock options issued are subject to the limitation of the Black-Scholes option pricing model, which incorporates market data and involves uncertainty in estimates used by management in the assumptions. The Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices, and, as a result, changes in subjective input assumptions can materially affect the fair value estimate.

*The carrying value and the recoverability of exploration and evaluation assets*

Management has determined that exploration, evaluation and related costs incurred which were capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geologic and other technical information, history of conversion of mineral deposits with similar characteristics to its own properties to proven and probable mineral reserves, scoping and feasibility studies, accessible facilities and existing permits.

***Judgements:****Determination of functional currency*

The functional currency of the Company and its subsidiary is the currency of the primary economic environment in which each entity operates. The Company has determined the functional currency of each entity to be the Canadian dollar. Determination of the functional currency may involve certain judgments to determine the primary economic environment. The functional currency may change if there is a change in events and conditions which determines the primary economic environment.

**3. SIGNIFICANT ACCOUNTING POLICIES**

These condensed interim consolidated financial statements were prepared using the same accounting policies and methods of computation as in the Company's annual consolidated financial statements for the year ended September 30, 2016.

**4. ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE**

Standards issued but not yet effective up to the date of issuance of the Company's condensed interim consolidated financial statements are listed below. This listing is of standards and interpretations issued, which the Company reasonably expects to be applicable at a future date. The Company intends to adopt these standards when they become effective. The pronouncements are being assessed to determine their impact on the Company's results and financial position.

The following amendments to an existing standard has been issued for annual periods beginning on or after January 1, 2017 but is not yet effective:

*IAS 12, Income Taxes*

Amendments to IAS 12 to clarify the recognition of a deferred tax asset for unrealized losses.

*IAS 16 & IAS 38, Clarification of Acceptable Methods of Depreciation and Amortization*

Amended to (i) clarify that the use of a revenue-based depreciation and amortization method is not appropriate, and (ii) provide a rebuttable presumption for intangible assets.

The following standards, amendments to standards and interpretations have been issued for annual periods beginning on or after January 1, 2018 but are not yet effective:

*IFRS 9, Financial Instruments – Classification and Measurement*

IFRS 9 is a new standard on financial instruments that will replace IAS 39, *Financial Instruments: Recognition and Measurement*.

IFRS 9 addresses classification and measurement of financial assets and financial liabilities as well as derecognition of financial instruments. IFRS 9 has two measurement categories for financial assets: amortized cost and fair value. All equity instruments are measured at fair value. A debt instrument is at amortized cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest. Otherwise it is at fair value through profit or loss.

**4. ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE** (continued)*IFRS 15, Revenue from Contracts with Customers*

IFRS 15 is a new standard to establish principles for reporting the nature, amount, timing, and uncertainty of revenue and cash flows arising from an entity's contracts with customers. It provides a single model in order to depict the transfer of promised goods or services to customers. IFRS 15 supersedes IAS 11, *Construction Contracts*, IAS 18, *Revenue*, IFRIC 13, *Customer Loyalty Programs*, IFRIC 15, *Agreements for the Construction of Real Estate*, IFRIC 18, *Transfers of Assets from Customers*, and SIC-31, *Revenue – Barter Transactions involving Advertising Service*.

The following standards, amendments to standards and interpretations have been issued for annual periods beginning on or after January 1, 2019 but are not yet effective:

*IFRS 16, Leases*

IFRS 16 is a new standard that sets out the principles for recognition, measurement, presentation, and disclosure of leases including guidance for both parties to a contract, the lessee and the lessor. The new standard eliminates the classification of leases as either operating or finance leases as is required by IAS 17 and instead introduces a single lessee accounting model.

The Company has not yet assessed the potential impact of the application of these standards, nor determined whether it will early adopt these standards.

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT***Financial risk management*

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's financial instruments consist of cash, short-term investments, receivables, restricted deposits, accounts payable and notes payable.

The Company classified its cash and short-term investments as fair value through profit or loss; receivables and restricted deposits as loans and receivables; and accounts payable and notes payable as other financial liabilities. The fair values of cash and short-term investments are measured on the statement of financial position using level 1 of the fair value hierarchy. The fair values of receivables, restricted deposits and accounts payable approximate their book values because of the short-term nature of these instruments.

**13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)***Financial instrument risk exposure*

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management processes.

*Credit risk*

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its payment obligations. The Company has no material counterparties to its financial instruments with the exception of the financial institutions which hold its cash. The Company manages this credit risk by ensuring that these financial assets are placed with a major financial institution with strong investment grade ratings by a primary ratings agency. The Company's receivables consist primarily of goods and services tax due from the government and other receivables; the balances are in good standing as at December 31, 2016. The Company does not believe it has a material exposure to credit risk.

*Liquidity risk*

The Company ensures that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash. The Company's cash is invested in business accounts which are available on demand. The Company has significant financial liabilities outstanding including accounts payable and accrued liabilities and notes payable. The Company is exposed to liquidity risk. To the extent that the Company does not believe it has sufficient liquidity to meet these obligations, management will seek to secure additional funds through long term debt and equity transactions.

*Interest rate risk*

The Company is exposed to interest rate risk. The Company's bank account earns interest income at variable rates. The fair value of its portfolio is relatively unaffected by changes in short-term interest rates. Interest rate risk is minimal as the Company does not have significant interest bearing assets or any variable interest bearing liabilities that are tied into market rates.

*Foreign exchange risk*

The Company is not exposed to any significant foreign currency risk.

*Commodity price risk*

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of precious and base metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company. Fluctuations in pricing may be significant.

**14. MANAGEMENT OF CAPITAL**

The Company manages its common shares, stock options and share purchase warrants as capital. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its exploration and evaluation assets and to maintain a flexible capital structure which optimizes the cost of capital at an acceptable risk. The Company is not subject to any externally imposed capital requirements.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt or acquire or dispose of assets.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

In order to maximize ongoing exploration efforts, the Company does not pay out dividends. The Company's investment policy is to keep its cash treasury invested in certificates of deposit with major financial institutions.

The properties in which the Company currently has an interest are in the exploration stage; as such the Company has historically relied on the equity markets to fund its activities. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

There have been no changes to the Company's approach to capital management during the period ended December 31, 2016.

**15. SEGMENTED INFORMATION**

The Company operates in one industry segment being the acquisition and exploration of mineral exploration and evaluation assets. The total assets attributable to the geographical locations relate primarily to exploration and evaluation assets and are all located in Canada.

**16. COMMITMENTS**

On August 1, 2015, as amended on December 1, 2016, the Company entered into a cost sharing arrangement agreement for the provision of office space and various administrative services. Under the terms of the agreement, the Company will pay \$2,500 plus GST per month commencing on September 1, 2015, increasing to \$5,000 plus GST per month commencing on December 1, 2016, and continuing until the expiration of the underlying head lease on July 31, 2018.
