

FOR IMMEDIATE RELEASE

QUEST CRITICAL METALS CEO TO SPEAK AT EU ‘RAW MATERIALS WEEK’ 2024 IN BRUSSELS DECEMBER 9th-13th 2024 INCLUDING ON RESULTS OF INITIAL TESTING OF EIS SOFTWARE

Vancouver, BC – December 3, 2024 – Quest Critical Metals Inc (“Quest Critical Metals” or the “Company”) (CSE: BULL, OTC: DCNNF, FSE: DCR0) announces that it will be speaking at the EU Raw Materials Week 2024 (December 9th-13th, 2024) in Brussels, Belgium (https://single-market-economy.ec.europa.eu/sectors/raw-materials/week_en).

James Newall, Quest’s CEO, representing Quests’ 100% owned Czech subsidiary Golden Pet, will be speaking on December 12th on ‘Exploration: Challenges, Needs and Solutions’ at the main event. In addition, on Friday 13th December he will be speaking at the “Innovative CRM Exploration through EIS and GSEU’ side event at the Hotel Marivaux, Boulevard Adolphe Maxlaan, Brussels. A full list of speakers can be found at https://single-market-economy.ec.europa.eu/sectors/raw-materials/week/speakers_en.

Quest Critical Metals is part of two EU Horizon funded projects. It is a Partner in the Exploration Information Systems (EIS) project, which is creating a free-to-use software tool that utilises data analysis and AI facilitate the identification of new minerals deposits (<https://eis-he.eu/>). Quest is also an Associate Partner in DeepBEAT which aims to develop innovative geo-chemical technologies for detecting deep-seated mineral deposits.

Quest Critical Metals is focused on its Tisova/Klingenthal licence areas which contain at least one potential copper/cobalt hosting Volcanic Massive Sulphide deposit (VMS). Hence our licence areas were chosen as a test site for both the EIS project and now also the DeepBEAT project. The results of the initial testing of the EIS software on the Tisova licence area have not only confirmed the presence of the large potential VMS anomaly, that was also identified by Quest’s geophysical survey, but also a new area of interest to the North West of this anomaly on the German side of the licence area.

James Newall President and CEO, commented: “The EU Raw Materials Week is largest event on raw materials organised by the European Commission since 2016 and we have been informed by the EU that the event is at full capacity with over 1,000 people attending. The opportunity to speak to such a large and important European audience, as a junior explorer, is unique and a testament to the incredible benefits we, and our shareholders, have gained being part of the EIS Project”.

Reader Advisory

This news release contains certain "forward-looking information" within the meaning of applicable securities law. Forward-looking information is frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may" or "will" occur. Although we believe that the expectations reflected in the forward-looking information are reasonable, there can be no assurance that such expectations will prove to be correct. We cannot guarantee future results, performance or achievements. Consequently, there is no representation that the actual results achieved will be the same, in whole or in part, as those set out in the forward-looking information.

Forward-looking information is based on the opinions and estimates of management at the date the statements are made, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated in the forward-looking information. Some of the risks and other factors that could cause the results to differ materially from those expressed in the forward-looking information include, but are not limited to: general economic conditions in Canada and globally; industry conditions, including governmental regulation and environmental regulation; failure to obtain industry partner and other third party consents and approvals, if and when required; the availability of capital on acceptable terms; the need to obtain required approvals from regulatory authorities; stock market volatility; liabilities inherent in water disposal facility operations; competition for, among other things, skilled personnel and supplies; incorrect assessments of the value of acquisitions; geological, technical, processing and transportation problems; changes in tax laws and incentive programs; failure to realize the anticipated benefits of acquisitions and dispositions; and the other factors. Readers are cautioned that this list of risk factors should not be construed as exhaustive.

The forward-looking information contained in this news release is expressly qualified by this cautionary statement. We undertake no duty to update any of the forward-looking information to conform such information to actual results or to changes in our expectations except as otherwise required by applicable securities legislation. Readers are cautioned not to place undue reliance on forward-looking information.
