

**FORM 51-102F3  
MATERIAL CHANGE REPORT**

**Item 1. Name and Address of Company**

*State the full name of your company and the address of its principal office in Canada:*

Enertopia Corp. (the "Company")  
950 - 1130 West Pender Street  
Vancouver, BC V6E 4A4

**Item 2. Date of Material Change**

August 7, 2013

**Item 3. News Release**

The Company did disseminate a news release through Newswire.ca on August 7, 2013. The Company announced the material change by filing a Form 8-K with the Securities and Exchange Commission on August 7, 2013.

**Item 4. Summary of Material Change**

On August 7, 2013, announces that the Company has been notified by the vendor of the Pennsylvania oil property, that three oil wells have been successfully brought on production and are currently unloading frac water with oil starting to flow. The fourth well is currently being fracked and will be tied in to the production facilities shortly. The Company has no direct interest in these wells, but does have an option to participate in up to 100 light oil wells on the same lands.

**Full Description of Material Change**

See attached Form 8-K.

**Item 5. Reliance on subsection 7.1(2) or (3) of National Instrument 51-102**

*If this report is being filed on a confidential basis in reliance of subsection 7.1(2) or (3) of National Instrument 51-102, state the reasons for such reliance.*

Not Applicable.

**Item 6. Omitted Information**

Not Applicable.

**Item 7. Executive Officer**

*Give the name and business telephone number of an executive officer of your company who is knowledgeable about the material change and the Report, or the name of an officer through whom such executive officer may be contacted.*

Please contact Robert McAllister, CEO and President of the Company, at 604.602.1633

**Item 8. Date of Report**

DATED August 7, 2013.

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

**FORM 8-K**

Current Report  
Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

PRESS RELEASE #201306

FOR IMMEDIATE RELEASE

AUGUST 7, 2013

## **Enertopia Announces Light Oil Project Update # 2**

**VANCOUVER, BC – August 7, 2013 - Enertopia Corporation** (ENRT-OTCBB) (TOP-CNSX) (the "Company" or "Enertopia") announces that the Company has been notified by the vendor of the Pennsylvania oil property, that three oil wells have been successfully brought on production and are currently unloading frac water with oil starting to flow. The fourth well is currently being fracked and will be tied in to the production facilities shortly. The Company has no direct interest in these wells, but does have an option to participate in up to 100 light oil wells on the same lands.

The Company has also learned that the vendor will drill a further nine wells over the next several weeks as development continues on this low risk, light oil opportunity. Enertopia has signed a Letter of Intent to participate in up to 100, high-netback, light-oil-producing wells in Pennsylvania.

The light oil assets include a number of original oil-in-place pools in NW Pennsylvania discovered and developed in the 1960's and 1970's by Quaker State Oil. The vendor has now drilled and completed 41 infill well locations with a 100% success rate: all 41 of the wells drilled were completed and outfitted for commercial oil production. Each shallow oil well can have up to four separate producing sand intervals. Initial production numbers to date have averaged 10 to 15 bbl/d per well with some wells occasionally achieving 20 to 40 bbl/d on initial production.

Robert McAllister, President, stated: "While Enertopia has no ownership interest in these latest wells, the vendor continues to showcase this low risk oil project to produce oil in every well drilled to date. These consistent results show this to be a project of considerable merit and gives our company the ability to grow dramatically through the drill bit."

Photo's of the recent drilling program can be seen at the Enertopia oil project page [www.enertopia.com/s/pennoil.asp](http://www.enertopia.com/s/pennoil.asp).

Enertopia management expects the field development will provide the essential elements required to support a growth based business model:

- Capital to maintain production – then grow production through the drilling of additional wells- is expected to be provided through future oil revenues after initial capex is utilized;
- Vendor-reported expected light oil production netbacks of approximately \$55 per barrel of oil should place the performance of these operations in the top 10% of all North American fields;
- Significant development inventory with undrilled well locations in NW Pennsylvania in addition to the scope of the current Letter of Intent.

The Pennsylvania light oil project provides the opportunity for a potential step change in value for shareholders through the low risk development of 100 drill locations, without the pipeline and transportation issues affecting many producers situated in less advantaged locations today; while receiving WTI-based pricing. All the wells are targeting known historic oil producing areas.

Enertopia plans to drill its first development wells within 30 days of closing the underlying Area of Mutual Interest Agreement and necessary financing.

Enertopia is positioning to execute a successful growth model with predictable well drilling results combined with a significant development inventory.

### **About Enertopia**

Enertopia's shares are quoted in the USA with symbol ENRT and in Canada with symbol TOP. For additional information, please visit [www.enertopia.com](http://www.enertopia.com) or call Robert McAllister, President, Enertopia Corporation at 1.250.765.6412

This release includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements which are not historical facts are forward-looking statements. The Company makes forward-looking public statements concerning its expected future financial position, results of operations, cash flows, financing plans, business strategy, products and services, evaluation of clean energy projects for participation and/or financing, competitive positions, growth opportunities, plans and objectives of management for future operations, including statements that include words such as "anticipate," "if," "believe," "plan," "estimate," "expect," "intend," "may," "could," "should," "will," and other similar expressions that are forward-looking statements. Such forward-looking statements are estimates reflecting the Company's best judgment based upon current information and involve a number of risks and uncertainties, and there can be no assurance that other factors will not affect the accuracy of such forward-looking statements. Factors which could cause actual results to differ materially from those estimated by the Company include, but are not limited to, government regulation, managing and maintaining growth, the effect of adverse publicity, litigation, competition, access to capital, and other factors which may be identified from time to time in the Company's public announcements and filings. The Company's successful efforts in the oil and gas sector are dependent on many factors such as but not limited to financing, completion and production and field depletion. Expected field production could be materially different than from expected and past results. The Company's evaluation of alternative energy projects in the heat recovery, solar thermal, solar PV and water purification; and of resource projects provides no assurance that any particular project will have any material effect on the Company. Successful drilling of oil wells in Pennsylvania by others provides no assurance that the Company's expected drill programs will also be successful, in whole or in part.
