

Press Release #201713

FOR IMMEDIATE RELEASE

May 8, 2017

Enertopia Provides Lithium Exploration Update

Vancouver, BC—Enertopia Corporation (ENRT) on the OTCQB and (TOP) on the CSE (the "Company" or "Enertopia") the Company provides the following update with respect to its ongoing lithium exploration program.

The Company is happy to announce that after six months of due diligence and internal review that it will be launching a very targeted location specific review of high priority Lithium targets across the South Western USA over a 10 day period from May 17 to May 27. The Company believes this approach is in the best interests of the company and all shareholders. Any self-generated and acquired projects would not be subject to 3rd party cash payments, share issuances or over riding royalties.

The Company further announces that it will be conducting its first lithium exploration program in Argentina from June 1-5 after several months of due diligence and internal review targeting very specific locations with the company's Argentinian consultants. The Company will be attending the Catamarca Lithium conference on June 6-7 and will be meeting with pre-selected lithium salar owners.

After a complete internal project review of the company's three brine targets in Nevada the company has decided not to make its final property payment and the projects have been returned to the property vendors and the Company has terminated its Option Agreement that it entered into on May 12, 2016.

"We are working aggressively at mapping out the next steps for phase two battery grade lithium carbonate purity bench testing, project advancements and property acquisitions." Stated President and CEO Robert McAllister

About Enertopia

Enertopia is concurrently working with water purification technology partner GWT using patent pending technology that is believed able to recover Lithium from brine solutions. The companies are currently in the planning phase for a much larger and expanded phase two of bench tests with the goal of achieving battery grade Lithium Carbonate. This is expected to result in the buildout of a pilot plant after achieving battery grade Li₂CO₃ purity results.

Enertopia's shares are quoted in Canada with symbol TOP and in the United States with symbol ENRT. For additional information, please visit www.enertopia.com or call Robert McAllister, the President at 1.250.765.6412
