Enertopia Appoints Clean Energy Veteran Mark Snyder to the Technological Advisory Board

Kelowna, BC—Enertopia Corporation (ENRT) on the OTC (the "Company" or "Enertopia"), an exploration and development company focused on employing modern technology to be able to produce battery-grade lithium carbonate from the company's lithium project in Clayton Valley, Nevada, the Company is pleased to announce the appointment of Mark Snyder to the Technological Advisory Board.

Mr. Snyder has been active in the Clean Energy space for over 40 years with experience covering a wide range of activities across multiple clean energy industries. His expertise in new tech, process development, management of feasibility studies, engineering & management of construction, and operation of projects will be a great addition to the Enertopia Technological Advisory Board.

“Enertopia is extremely pleased to have Mark Snyder join our team. Mr. Snyder has over 40 years worth of experience in the Green/Cleantech space, which will be invaluable to Enertopia as we move forward not only on our current Lithium project, but also as we review potential acquisition targets or JV's in the burgeoning field of off-grid & micro-grid storage systems. Mr. Snyder's experience in Solar PV/ Solar Heating/ Water Purification, alongside his unique knowledge of Lithium and Lead acid battery storage is an invaluable addition to the growing Enertopia team.” Stated President and CEO of Enertopia, Robert McAllister.

“This is indeed an exciting time for Enertopia and I look forward to being a part of the team using my skill sets, such as Solar PV , Water Purification, Battery Storage, Battery Management ,Battery Recycling, New Advanced Battery Technology expertise in working with Enertopia in the clean energy sectors as our collective goal.” Stated Mr. Snyder

Additionally, Mr. Snyder has been granted 2,000,000 options with an exercise price of \$0.02 per option with a term of two years in connection with his engagement.

About Enertopia:

A Company focused on using modern technology for extracting lithium and verifying or sourcing other intellectual property in the EV and green technologies to build shareholder value.
