

## **Enertopia Announces Second Update to Spring Drilling Program at WT Lithium Project**

Kelowna, British Columbia--(Newsfile Corp. – March 28, 2023) - **Enertopia Corporation** (OTCQB: ENRT) and (CSE: ENRT) ("Enertopia" or the "Company") a company focused on building shareholder value through a combination of our Nevada lithium claims, intellectual property, & pending patents in the green technology space, is very pleased to provide the following lithium project update.

We are happy to report that 273 drill samples for assay, from the first five completed drill holes, have been received by ALS labs in Reno, NV. The drill crew is back from their week off, and back drilling. The drill crew will have a short break for the Easter holiday season, and will then be back for the completion of the drill program, which is expected around the third week of April. The company will provide additional drilling summaries as the drilling program progresses.

It is gratifying that every hole in the 2023 drill program has intersected the green claystone horizon, which is host to the higher-grade green Lithium claystone horizon intersected in the 2022 drilling program. Drilling this year has increased the green claystone horizon from 120 feet in depth, to 295 feet in depth. Furthermore, a second claystone horizon has been drilled down to 400 feet in depth in our first drill hole of the year DH23-01.

### **Inaugural 43-101 report**

Upon completion of the 2023 drilling program, the Company will commission the writing of an inaugural 43-101 report for the West Tonopah Project, which covers 1,760 acres.

### **Results of AGM held on March 22, 2023**
