

Enertopia Corporation Provides Technology and Patent Update

Kelowna, British Columbia--(Newsfile Corp. – May 24, 2023) - **Enertopia Corporation** (OTCQB: ENRT) and (CSE: ENRT) ("Enertopia" or the "Company") a company focused on building shareholder value through a combination of our Nevada lithium claims, intellectual property, & pending patents in the green technology space, is very pleased to provide the following lithium project update.

The Company has received first comments from the USPTO (United States Patent and Trademark Office) on non provisional patents 17/751,300 (Solar Energy Collector System), 17/751,305 (Heat Recovery System), 17/888,320 (Water Producing System for a Liquid Transfer Mat). We expect to file our responses in September of this year. Currently the platforms are finally being built, as the record rains in California this past winter made the ground saturated, and footings were unable to be dug and set. This part of the project is expected to be completed shortly, and then the modules with our technology (pictured below) will be mounted. Once the assembly is completed, we will provide photos of the testbed array.

Solar Booster

We are also excited to announce that all the regulatory sales paperwork for our Energy Management System has been completed. We are expected to have more frequent announcements after two years of testing and paperwork on our multiple non provisional patents.

“The Enertopia team of consultants looks forward to continuing to move ahead on our developing Lithium and technology assets.” Stated President Robert McAllister.

For additional project details please visit our website at <https://enertopia.com/>

About Enertopia

Defines itself as an Environmental Solutions Company focused on using modern technology on extracting lithium and verifying or sourcing other intellectual property in the EV & green technologies to build shareholder value.
