The Company's financial instruments consist of accounts payable and accrued liabilities. The fair value of these financial instruments approximates their carrying values, unless otherwise noted. The Company is not exposed to significant interest, currency, or credit risk arising from financial instruments.

The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing. If the Company is not successful in raising sufficient capital, the Company may have to curtail or otherwise limit its operations. From time to time the Company works to raise additional capital through private placements or other equity financing. See "Risk Factors" of this MD&A.

As of May 31, 2020, the Company has no cash and \$22,500 in current liabilities. The Company intends to raise capital by future financings. However, current market conditions make it difficult to raise funds by private placements of shares. There is no guarantee that additional financing will be available or that it will be available on terms acceptable to management of the Company. These factors all cast doubt about the liquidity of the Company and its ability to continue as a going concern.

FINANCIAL INSTRUMENTS

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The fair value of the Company's receivables, accounts payable and accrued liabilities, approximate carrying value, which is the amount payable on the statement of financial position. The Company's other financial instrument, cash, is measured at fair value based on level one quoted prices in active markets for identical assets or liabilities.

The Company is exposed to varying degrees to a variety of financial instrument related risks:

Credit risk

The Company currently has no credit risk as there is no cash or receivables as at May 31,2020.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

The Company as of May 31, 2020 does not have cash and has \$22,500 in current liabilities. The Company intends to raise capital by future financings; however, the low price of the Company's common shares and current market conditions may make it difficult to raise funds by private placements of shares.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and equity prices.

a) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The risk that the Company will realize a loss as a result of a decline in the fair value of its financial instruments is low, as the Company has no short-term investments.

b) Foreign currency risk

As at May 31, 2020, the Company's expenditures are predominantly in Canadian dollars, and any future equity raised is expected to be predominantly in Canadian dollars. As a result, the Company believes its currency risk to be minimal.

c) Price risk

Price risk is related to equity and commodity price risks. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. As the Company holds no equity or commodity related investments or assets, the Company has no exposure to price risk.

RISK FACTORS

Financing

The Company does not currently have any operations generating cash. The Company is therefore dependent upon debt and equity financing to carry out its plans. There can be no assurance that such financing will be available to the Company.

CORPORATE GOVERNANCE

National Policy 58-201 – *Corporate Governance Guidelines* and National Instrument 58-101 – *Disclosure of Corporate Governance Practices*, sets out a series of guidelines for effective corporate governance. The Company has reviewed its own corporate governance practices in light of these guidelines. In certain cases, the Company's practices comply with the guidelines; however, the board of directors (the "Board") considers that some of the guidelines are not suitable for the Company at its current stage of development and therefore these guidelines have not been adopted. National Instrument 58-101 mandates disclosure of corporate governance practices which disclosure is set out below.

Board of Directors

The Board consists of three directors, two of whom are independent based upon the tests for independence set forth in National Instrument 52-110. Mark Oberg and Daniel Knol are independent. The independent directors are also on the Audit Committee and are able to meet with the Company's auditors without management or the non-independent member of the Audit Committee being in attendance.

Orientation and Continuing Education

The Board has not developed an official orientation or training program for new Board members. As required, new directors will have the opportunity to become familiar with the Company by meeting with the other directors and with officers and employees. Orientation activities will be tailored to the particular needs and experience of each director and the overall needs of the Board. Board members are encouraged to communicate with management and auditors and technical consultants if required. They are expected to keep themselves current with industry trends and developments and changes in legislation with management's assistance. Board members have full access to the Company's records.

Ethical Business Conduct

The Board has not adopted a written code of conduct for directors, officers and employees. The Board has found that the fiduciary duties placed on individual directors and officers by the Company's governing corporate legislation and on the individual director's participation in decisions of the Board in which the director has an interest, have been sufficient to ensure that the Board operates in the best interests of the Company.

Nomination of Directors

The Board has not appointed a nominating committee because the Board fulfills these functions. The Board assesses potential Board candidates to fill perceived needs on the Board for required skills, expertise, independence and other factors.

Compensation of Directors and the Chief Executive Officer

The Board is responsible for approving compensation of the executive officers and the directors. The Board determines compensation reflecting the need to provide incentive and compensation for the time and effort expended by the directors and officers while taking into account the financial and other resources of the Company.

Board Committees

The Company does not have any committees in addition to the Audit Committee.

Assessments

Based upon the Company's size, its current state of development and the number of individuals on the Board, the Board considers a formal process for assessing regularly the effectiveness and contribution of the Board, as a whole, its committees or individual directors to be unnecessary at this time. The Board plans to continue evaluating its own effectiveness on an ad hoc basis.
