# Management's Responsibility for Condensed Consolidated Interim Financial Statements

The accompanying unaudited condensed consolidated interim financial statements of Eurotin Inc. (the "Corporation") are the responsibility of management and the Board of Directors.

The unaudited condensed consolidated interim financial statements have been prepared by management, on behalf of the Board of Directors, in accordance with the accounting policies disclosed in the notes to the unaudited condensed consolidated interim financial statements. Where necessary, management has made informed judgments and estimates in accounting for transactions which were not complete at the statement of financial position date. In the opinion of management, the unaudited condensed consolidated interim financial statements have been prepared within acceptable limits of materiality and are in accordance with International Accounting Standard 34-Interim Financial Reporting using accounting policies consistent with International Financial Reporting Standards appropriate in the circumstances.

Management has established processes, which are in place to provide it sufficient knowledge to support management representations that it has exercised reasonable diligence that (i) the unaudited condensed consolidated interim financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of, and for the periods presented by, the unaudited condensed consolidated interim financial statements and (ii) the unaudited condensed consolidated interim financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Corporation, as of the date of and for the periods presented by the unaudited condensed consolidated interim financial statements.

The Board of Directors is responsible for reviewing and approving the unaudited condensed consolidated interim financial statements together with other financial information of the Corporation and for ensuring that management fulfills its financial reporting responsibilities. An Audit Committee assists the Board of Directors in fulfilling this responsibility. The Audit Committee meets with management to review the financial reporting process and the unaudited condensed consolidated interim financial statements together with other financial information of the Corporation. The Audit Committee reports its findings to the Board of Directors for its consideration in approving the unaudited condensed consolidated interim financial statements together with other financial information of the Corporation for issuance to the shareholders.

Management recognizes its responsibility for conducting the Corporation's affairs in compliance with established financial standards, and applicable laws and regulations, and for maintaining proper standards of conduct for its activities.

(signed) "Peter Miller"

Chief Executive Officer

Toronto, Canada  
November 28, 2011

(signed) "Carlos Pinglo"

Chief Financial Officer

## **Advisory to Reader**

Under National Instrument 51-102, if an auditor has not performed a review of interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited condensed consolidated interim financial statements have been prepared by, and are the responsibility of the Corporation's management.

The Corporation's independent auditor has not performed a review of these financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an auditor.

**Eurotin Inc.****Condensed Consolidated Interim Statement of Changes in Equity (continued) (note a)****(Expressed in Canadian dollars)****(Unaudited)**

---

Note a: In accordance with IFRS 1.32, an entity is required to provide a reconciliation of its equity at the end of the comparable interim period of the immediately preceding financial year, and of its comprehensive income for that comparable interim period, only if it presented an interim financial report for that period. Stannico did not publish any financial information as at September 30, 2010 as it was not a public entity at that time. Consequently, the Corporation has not presented a reconciliation of its Equity for the period ending September 30, 2010.

The accompanying notes to the unaudited condensed consolidated interim financial statements are an integral part of these statements.

## **Notes to Condensed Consolidated Interim Financial Statements**

**September 30, 2011**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

### **1. Nature of operations and going concern**

Stannico Resources Inc. ("the Company" or "Stannico") was incorporated on October 9, 2008 under the laws of the province of Ontario. The Company controls 100% of the issued common shares of Minas De Estano De Espana, S.L.U. ("MEE"), a private corporation incorporated on November 29, 2006 whose business is the exploration, research, exploitation and utilization of mineral deposits, resources and substances, as well as the establishment of industries related to them, to obtain mining, industrial and chemical products and processed products in general.

On April 18, 2011, Stannico completed a reverse takeover ("RTO") of Eurotin Inc. ("the Corporation" or "Eurotin") (see note 14). Eurotin was incorporated under the Ontario Business Corporations Act on July 31, 2008 as a "Capital Pool Corporation" ("CPC"), as this term is defined in the policies of the TSX Venture Exchange (the "Exchange") and accordingly had no significant assets other than cash with no commercial operations. On April 18, 2011, Eurotin changed its year end to March 31.

The unaudited condensed consolidated interim financial statements of the Corporation for the three and six months ended September 30, 2011 were reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors on November 28, 2011.

These financial statements have been prepared on the basis that the Corporation is a going concern, which contemplates the realization of its assets and the settlement of its liabilities in the normal course of operations. The exploration, development and financing of mineral properties involves substantial risks and several phases of exploration, evaluation and financing. The ability of the Corporation to continue operations and achieve profitability is dependent upon obtaining the necessary financing to complete the successful development of its mineral properties and ultimately upon the discovery and commercialization of mineral resources. These financial statements do not include any adjustments related to the carrying values and classifications of assets and liabilities that would be necessary should the Corporation be unable to continue as a going concern.

As at September 30, 2011, the Corporation had recorded losses and net cash outflows from operations since its incorporation. The Corporation, as a result of an equity financing associated with the Reverse Acquisition, has sufficient funding to finance its planned exploration program over the next 12 months.

The Corporation operates from its headquarters in Ontario, Canada and also through two wholly-owned subsidiaries: Stannico Resources Inc. and Minas de Estano De Espana, S.L.U.. These subsidiaries represent the interest of Eurotin Inc. in Spain. The address of the registered office is Suite 1600, 320 Bay Street, Toronto, ON, M5H 4A6.

# **Eurotin Inc.**

## **Notes to Condensed Consolidated Interim Financial Statements**

**September 30, 2011**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

### **1. Nature of operations and going concern (continued)**

Although the Corporation has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations of such properties, these procedures do not guarantee the Corporation's title. Property title may be subject to government licensing requirements or regulations, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Corporation's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, political uncertainty and currency exchange fluctuations and restrictions.

These condensed consolidated interim financial statements were approved by the Board of Directors on November 28, 2011.

### **2. Basis of preparation**

#### *Statement of compliance*

The condensed interim consolidated financial statements for the period ended September 30, 2011 have been prepared in accordance with IAS 34, Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB").

These condensed interim consolidated financial statements are the Corporation's second financial statements prepared under IFRS. The Corporation adopted IFRS in accordance with IFRS 1 First-time Adoption of International Financial Reporting Standards ("IFRS 1") with a transition date to IFRS of January 1, 2010. Consequently the comparative figures for 2010 and the Corporation's statement of financial position as at January 1, 2010 have been restated from accounting principles generally accepted in Canada ("Canadian GAAP") to comply with IFRS.

The reconciliations to IFRS from the previous Canadian GAAP financial statements are summarized in Note 22. In addition, IFRS 1 allows certain exemptions from retrospective application of IFRS in the opening statement of financial position. Where these have been used they are explained in Note 22.

These condensed interim consolidated financial statements should be read in conjunction with the Corporation's March 31, 2011 annual financial statements prepared in accordance Canadian GAAP and in consideration of the IFRS transition disclosures included in Note 22.

#### *Basis of measurement*

These condensed interim consolidated financial statements are stated in Canadian dollars and were prepared on a going concern basis, under the historical cost convention.

#### *Use of estimates and judgments*

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates. Areas where estimates are significant to the condensed interim consolidated financial statements are disclosed in Note 4.

---

## **Eurotin Inc.**

### **Notes to Condensed Consolidated Interim Financial Statements**

**September 30, 2011**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

#### **2. Basis of preparation (continued)**

##### *Functional and presentation currency*

These condensed interim consolidated financial statements are presented in Canadian dollars which is the Corporation's functional currency.

#### **3. Summary of significant accounting policies**

The principal accounting policies applied in the preparation of these condensed interim consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

##### *(a) Basis of consolidation*

##### **Subsidiaries**

Subsidiaries are entities controlled by Eurotin. Control is achieved where the entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The results of subsidiaries acquired or disposed of during the period are included in the condensed interim consolidated statement of comprehensive loss from the effective date of acquisition and up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by other members of the group.

Intra-group balances and transactions, and any unrealized gains and losses or income and expenses arising from intra-group transactions are eliminated in preparing the condensed interim consolidated financial statements. Unrealized gains arising from transactions with associates are eliminated to the extent of the Corporation's interest in the entity. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment

##### *(b) Cash and cash equivalents*

Cash in the condensed consolidated interim statements of financial position comprise cash at banks. The Corporation's cash is invested with major financial institutions in business accounts that are available on demand by the Corporation for its programs. The Corporation does not invest in any asset backed deposits/investments.

---

## **Eurotin Inc.**

### **Notes to Condensed Consolidated Interim Financial Statements**

**September 30, 2011**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

### **3. Summary of significant accounting policies (continued)**

#### *(c) Foreign currency translation*

Items included in the financial statements of each consolidated entity are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities not denominated in the functional currency of an entity are recognized in the statement of comprehensive income.

Assets and liabilities of entities with functional currencies other than Canadian dollars are translated at the period end rates of exchange, and the results of their operations are translated at average rates of exchange for the period. The resulting translation adjustments are included in accumulated other comprehensive income in shareholders' equity. Additionally, foreign exchange gains and losses related to certain intercompany loans that are permanent in nature are included in accumulated other comprehensive income.

The functional currency, as determined by management, of Eurotin and its subsidiaries is the Canadian Dollar. For the purpose of the unaudited condensed consolidated interim financial statements, the results and financial position are expressed in Canadian Dollars.

#### *(d) Exploration and evaluation expenditures*

General exploration and evaluation ("E&E") expenditures incurred prior to acquiring the legal right to explore are charged to the consolidated statement of comprehensive loss as incurred.

E&E expenditures incurred subsequent to acquisition of the legal right to explore, including license and property acquisition costs, geological and geophysical expenditures, costs of drilling exploratory holes and directly attributable overhead including salaries and employee benefits, are initially capitalized as E&E assets. E&E assets are not depleted and are moved into property, plant and equipment when they are determined to meet certain technical feasibility and commercial viability thresholds as determined by management. Upon transfer to property, plant and equipment, E&E assets are assessed for impairment in addition to regular impairment reviews to ensure they are not carried at amounts above their estimated recoverable values.

# **Eurotin Inc.**

## **Notes to Condensed Consolidated Interim Financial Statements**

**September 30, 2011**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

### **3. Summary of significant accounting policies (continued)**

#### *(e) Equipment*

Equipment is carried at cost less accumulated depreciation. Depreciation is charged on a straight line basis so as to write-off the cost of these assets less residual value over their estimated useful economic lives, which is estimated to be 3 to 5 years.

#### *(f) Non-derivative financial instruments*

Non-derivative financial instruments are recognized when the Corporation becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Corporation has transferred substantially all risks and rewards of ownership. Non-derivative financial instruments are recognized initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs.

At initial recognition, all financial instruments are classified in one of the following categories depending on the purpose for which the instruments were acquired:

#### **Loans and receivables**

Loans and receivables are subsequently measured at amortized cost using the effective interest method, less any impairment losses, with interest expense recognized on an effective yield basis. Assets in this category include cash and amounts receivable and other assets.

#### **Other financial liabilities**

Other financial liabilities are initially measured at fair value, net of transaction costs, and are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis. Any gains or losses arising from the realization of other financial liabilities are included in the profit (loss) statement. Liabilities in this category include amounts payable and other liabilities and due to related parties.

#### **Equity instruments**

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Corporation are recorded at the proceeds received, net of direct issue costs.

# **Eurotin Inc.**

## **Notes to Condensed Consolidated Interim Financial Statements**

**September 30, 2011**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

### **3. Summary of significant accounting policies (continued)**

*(g) Impairment*

#### **Financial assets**

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. Significant financial difficulties of a debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments are considered indicators that the financial asset is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognized in the consolidated statement of comprehensive loss. When a financial asset is uncollectible, it is written off against the allowance account for trade receivables.

#### **Non-financial assets**

At the end of each reporting period, the Corporation reviews the carrying amounts of its long lived assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Corporation estimates the recoverable amount of the cash-generating unit ("CGU") to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual CGU's, or otherwise they are allocated to the smallest group of CGU's for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. If the recoverable amount of an asset or CGU is estimated to be less than its carrying amount, the carrying amount of the asset or CGU is reduced to its recoverable amount. An impairment loss is recognized immediately in comprehensive loss. Where an impairment loss subsequently reverses for assets with a finite useful life, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or CGU in prior periods. A reversal of an impairment loss is recognized immediately in comprehensive loss.

### **3. Summary of significant accounting policies (continued)**

#### *(h) Shared-based payments*

The Corporation operates an equity-settled compensation plan under which it receives services from employees, directors and consultants as consideration for equity instruments of the Corporation.

The fair value of share options granted is recognized as an expense with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee, including directors of the Corporation.

The fair value of share-based payments to employees is measured at the grant date and recognized over the period during which the options vest. Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued if it is determined the fair value of the goods or services cannot be reliably measured, and are measured and recorded at the date the goods or services are received.

The Corporation uses the Black-Scholes pricing model to estimate the fair value of equity-settled awards to employees at the grant date. The expense is recognized over the vesting period, which is the period over which all of the specified vesting conditions are satisfied. For awards with graded vesting, the fair value of each tranche is recognized over its respective vesting period.

When recognizing the fair value of each tranche over its respective vesting period, the Corporation incorporates an estimate of the number of options expected to vest and revises that estimate when subsequent information indicates that the number of options expected to vest differs from previous estimates.

No expense is recognized for awards that do not ultimately vest, except for equity-settled awards where vesting is conditional upon a market or non-vesting condition, which are treated as vesting irrespective of whether or not the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

#### *(i) Provisions*

Provisions are recognized when the Corporation has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Corporation expects some or all of the provision to be reimbursed, the expense relating to any provision is presented in the consolidated statement of comprehensive loss net of the reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost in the consolidated statement of comprehensive income

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

### **3. Summary of significant accounting policies (continued)**

#### *(j) Taxes*

Tax expense comprises current and deferred tax. Tax is recognized in the condensed consolidated interim statement of comprehensive loss except to the extent it relates to items recognized in other comprehensive income or directly in equity.

#### **Current income tax**

Current tax expense is based on the results for the period as adjusted for items that are not taxable or not deductible. Current tax is calculated using tax rates and laws that were enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. Provisions are established where appropriate on the basis of amounts expected to be paid to the tax authorities.

#### **Deferred tax**

Deferred taxes are the taxes expected to be payable or recoverable on differences between the carrying amounts of assets in the consolidated statement of financial position and their corresponding tax bases used in the computation of taxable profit, and are accounted for using the liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences between the carrying amounts of assets and liabilities and their corresponding tax bases. Deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets in a transaction that affects neither the taxable profit nor the accounting profit.

#### Deferred tax liabilities:

- are generally recognized for all taxable temporary differences;
- are recognized for taxable temporary differences arising on investments in subsidiaries except where the reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future; and
- are not recognized on temporary differences that arise from goodwill which is not deductible for tax purposes.

#### Deferred tax assets:

- are recognized to the extent it is probable that taxable profits will be available against which the deductible temporary differences can be utilized; and
- are reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are not recognized in respect of temporary differences that arise on initial recognition of assets and liabilities acquired other than in a business combination.

#### *(k) Finance expenses*

Finance expenses comprise interest expense on borrowings, accretion of provisions and any impairment losses recognized on financial assets.

Borrowing costs incurred for the construction of qualifying assets are capitalized during the period of time that is required to complete and prepare the assets for their intended use or sale. All other borrowing costs are recognized in the condensed consolidated interim statement of comprehensive loss using the effective interest method. Interest has been capitalized at the rate of interest applicable to the specific borrowings financing the asset, or where financed through general borrowings, at a capitalization rate representing the average interest rate on such borrowings.

**September 30, 2011**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

#### **3. Summary of significant accounting policies (continued)**

*(l) Earnings per share ("EPS")*

Basic EPS is calculated by dividing profit or loss attributable to owners of the Corporation (the numerator) by the weighted average number of ordinary shares outstanding (the denominator) during the period. The denominator (number of units) is calculated by adjusting the shares in issue at the beginning of the period by the number of shares bought back or issued during the period, multiplied by a time-weighting factor.

Diluted EPS is calculated by adjusting the earnings and number of shares for the effects of dilutive options and other dilutive potential units. The effects of anti-dilutive potential units are ignored in calculating diluted EPS. All options are considered anti-dilutive when the Corporation is in a loss position

*(m) Segment reporting*

An operating segment is a component of the Corporation that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Corporation's other components. All operating segments' operating results are reviewed regularly by the Corporation's President and Chief Executive Officer ("CEO") to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

### **4. Critical judgments and accounting estimates**

The preparation of the interim consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the interim consolidated financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and judgments are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual outcomes can differ from these estimates.

The key sources of estimation uncertainty that have a significant risk of causing material adjustment to the amounts recognized in the interim consolidated financial statements are:

#### **Useful lives of equipment**

The Corporation estimates the useful lives of property, plant and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of property, plant and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the relevant assets. In addition, the estimation of the useful lives of property, plant and equipment are based on internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in the estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of the property, plant and equipment would increase the recorded expenses and decrease the non-current assets.

#### **Share-based payment transaction**

The Corporation measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining and making assumptions about the most appropriate inputs to the valuation model including the expected life, volatility and dividend yield of the share option.

#### **Fair value of financial instruments**

The estimated fair value of financial assets and liabilities, by their very nature, are subject to measurement uncertainty.

#### **Taxes**

Provisions for taxes are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Corporation reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final outcome of these tax-related matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determination is made.

#### **Financial assets**

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. Significant financial difficulties of a debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognized in the statement of comprehensive income. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables.

---

**Eurotin Inc.****Notes to Condensed Consolidated Interim Financial Statements****September 30, 2011****(Expressed in Canadian dollars)****(Unaudited)**

---

**4. Critical judgments and accounting estimates (continued)****Impairment of non-financial assets**

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Corporation is not yet committed to or significant future investments that will enhance the asset's performance of the cash generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash inflows and the growth rate used for extrapolation purposes.

**(Unaudited)**

---

#### **5. Recent accounting pronouncements**

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or International Financial Reporting Interpretations Committee ("IFRIC") that are mandatory for accounting periods beginning after January 1, 2010 or later periods. The standards impacted that are applicable to the Corporation are as follows:

- a) IFRS 9, 'Financial Instruments' was issued in November 2009 as the first step in its project to replace IAS 39 'Financial Instruments: Recognition and Measurement'. IFRS 9 introduces new requirements for classifying and measuring financial assets that must be applied starting January 1, 2013, with early adoption permitted. The IASB intends to expand IFRS 9 during the intervening period to add new requirements for classifying and measuring financial liabilities, de-recognition of financial instruments, impairment and hedge accounting. The Corporation is currently assessing the impact of this standard.
- b) IFRS 10, 'Consolidated Financial Statements' was issued in May 2011 and will supersede the consolidation requirements in SIC-12 'Consolidation – Special Purpose Entities' and IAS 27 'Consolidated and Separate Financial Statements' effective for annual periods beginning on or after January 1, 2013, with early application permitted. IFRS 10 builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company. The standard also provides additional guidance to assist in the determination of control where this is difficult to assess. The Corporation is currently assessing the impact of this standard.
- c) IFRS 11, 'Joint Arrangements' was issued in May 2011 and will supersede existing IAS 31, 'Joint Ventures' effective for annual period beginning on or after January 1, 2013, with early application permitted. IFRS 11 provides for the accounting of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form (as is currently the case). The standard also eliminates the option to account for jointly controlled entities using the proportionate consolidation method. The Corporation is currently assessing the impact of this standard.
- d) IFRS 12, 'Disclosure of Interests in Other Entities' was issued in May 2011 and is a new and comprehensive standard on disclosure requirements for all forms of interests in other entities, including subsidiaries, joint arrangements, associates and unconsolidated structured entities. IFRS 12 is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted. The Corporation is currently assessing the impact of this standard.
- e) IFRS 13, 'Fair Value Measurement' was issued in May 2011 and sets out in a single IFRS a framework for measuring fair value. IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This definition of fair value emphasizes that fair value is a market-based measurement, not an entity-specific measurement. In addition, IFRS 13 also requires specific disclosures about fair value measurement. IFRS 13 is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted. The Corporation is currently assessing the impact of this standard.

#### **6. Capital risk management**

The Corporation manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions; and
- to maximize shareholder return through enhancing the share value.

The Corporation monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Corporation may manage its capital structure by issuing new shares, repurchasing outstanding shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

The Corporation considers its capital to be equity, which comprises share capital, warrants, contributed surplus and deficit.

The Corporation manages capital through its financial and operational forecasting processes. The Corporation reviews its working capital and forecasts its future cash flows based on operating expenditures, and other investing and financing activities. The forecast is updated based on activities related to its mineral properties. Selected information is provided to the Board of Directors of the Corporation. The Corporation's capital management objectives, policies and processes have remained unchanged during the three and six months ended September 30, 2011.

The Corporation is not subject to any capital requirements imposed by a lending institution.

#### **7. Financial risk management**

##### Financial risk

The Corporation's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate, foreign currency risk and commodity and equity price risk).

Risk management is carried out by the Corporation's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management. There were no changes to credit risk, liquidity risk or market risk for the period ended September 30, 2011.

##### (i) Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Corporation's credit risk is primarily attributable to cash. Cash is held with select major Canadian chartered banks, from which management believes the risk of loss to be minimal.

##### (ii) Liquidity risk

Liquidity risk is the risk that the Corporation will not have sufficient cash resources to meet its financial obligations as they come due. The Corporation's liquidity and operating results may be adversely affected if its access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or matters specific to the Corporation. The Corporation generates cash flow primarily from its financing activities. The Corporation prepares annual capital expenditure budgets, which are monitored and updated as required. In addition, the Corporation requires authorization for expenditures on projects to assist with the management of capital. The Corporation's financial liabilities comprise accounts payable and accrued liabilities, which are due within 12 months.

---

## **Eurotin Inc.**

### **Notes to Condensed Consolidated Interim Financial Statements**

**September 30, 2011**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

#### **7. Financial risk management (continued)**

##### (iii) Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and commodity and equity prices.

##### (a) Interest rate risk

The Corporation currently does not have any short-term or long-term debt that is interest bearing and, as such, the Corporation's current exposure to interest rate risk is minimal.

##### (b) Foreign currency risk

The Corporation's functional and reporting currency is the Canadian dollar and the Corporation holds cash balances in Euros which could give rise to exposure to foreign exchange risk. It is not the Corporation's policy to hedge its foreign currency.

##### (c) Commodity and equity price risk

The Corporation is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Corporation closely monitors commodity prices, as they relate to precious and base metals and other minerals, and the stock market to determine the appropriate course of action to be taken by the Corporation.

Commodity price risk could adversely affect the Corporation. In particular, the Corporation's future profitability and viability of development depend upon the world market price of precious and base metals and other minerals. Precious and base metals and other mineral prices have fluctuated widely in recent years. There is no assurance that, even if commercial quantities of precious and base metals and other minerals are produced in the future, a profitable market will exist for them. As of September 30, 2011, the Corporation was not a precious mineral, base metals and other minerals producer. Even so, commodity price risk may affect the completion of future equity transactions such as equity offerings and the exercise of stock options and warrants. This may also affect the Corporation's liquidity and its ability to meet its ongoing obligations.

#### **Sensitivity analysis**

Based on management's knowledge and experience of the financial markets, the Corporation believes the following movements are reasonably possible over a six month period:

(i) The Corporation is exposed to currency risk to the extent that monetary assets and liabilities held by the Corporation are not denominated in Canadian dollars. The Corporation has not entered into any foreign currency contracts to mitigate this risk.

The Corporation holds balances in foreign currencies which could give rise to exposure to foreign exchange risk. Sensitivity to a plus or minus 10% change in the foreign exchange rate of the Euro against the Canadian dollar would affect the reported loss and comprehensive loss by approximately \$63,000.

- (i) On February 15, 2008, MEE acquired the right to earn a 100% interest in Oropesa Investigation Permit No. 13.050 ("IP Oropesa") from Sondeos y Perforaciones Industriales del Biezro, SA ("SPIB"). The property (the "Oropesa Property") is situated in Spain within the North East part of the Region of Andalucía and totals 23.4km<sup>2</sup>.

MEE satisfied the terms to earn 50% interest in IP Oropesa by spending €1,500,000 on exploration on the Oropesa Property over a three year period. A further 50% interest can be acquired by either:

- (a) granting SPIB a 1.35% net smelter royalty; or  
(b) paying SPIB 0.90% of the value of the metal reserves at the time of feasibility;

and in the event of commercial production MEE has committed to issue to SPIB 4% of the equity of the entity developing and mining IP Oropesa.

In order to keep the right in good standing MEE must make annual lease payments of €18,000 (C\$24,660 as at March 31, 2011).

#### **10. Mineral properties and deferred exploration expenditures (continued)**

- (i) (continued) On March 18, 2008, the Company entered into an option agreement with Minas Tenidas S.A.U ("MATSA") whereby MATSA was granted the right to earn a 25% interest in IP Oropesa. In order to earn its interest, MATSA must pay to the MEE an amount equal to double the amount of the expenses incurred by MEE to bring the Oropesa property to pre-feasibility status.

The initial term of this Option Agreement was the 36 months period from March 13, 2008 to March 13, 2011. Thereafter, the Option Agreement automatically renews for subsequent one year terms unless the Option Agreement is terminated by either party by providing written notice not less than 90 days prior to the expiration of the initial term or any renewal term, the agreement is in effect.

In the event MATSA exercises the right granted in the Option Agreement, the parties have agreed that they will enter into a joint venture agreement with respect to the Oropesa Property which shall provide, amongst other things that MATSA will fund 25% of the expenditures required to complete a bankable feasibility study for the Oropesa property.

- (ii) On December 11, 2010, MEE and Quercus Explorations y Mining S.A. ("QEM") entered into an agreement (which amended and replaced a previous agreement between the parties dated August 8, 2008) whereby both parties agreed to form and enter into a joint venture as it relates to the "Santa Maria" property (the "Santa Maria Property"). The Santa Maria Property is located approximately 50 kilometers north of Caceres in Extremadura Province in West Central Spain. The Santa Maria Property is comprised of Investigation Permit Ampliacion Retamar n° 10.220 and Investigation Permit Retamar n° 10.201, both of which are held by QEM. Pursuant to the terms of the agreement, a new company – Minas De Estano De Extremadura, S.L. ("MESEX") – was incorporated on February 25, 2011, and the parties agreed that both Investigation Permit Ampliacion Retamar n° 10.220 and Investigation Permit Retamar n° 10.201 shall be transferred to MESEX. The parties further agreed that MEE and QEM will own 60% and 40%, respectively, of MESEX. In consideration for its interest in MESEX, MEE (or the Company on behalf of MEE) has paid to QEM:
- (a) US\$200,000 through the issuance of 1,386,667 (pre RTO) (1,040,000 post RTO) common shares of the Company at an issue price of CDN\$0.15 per share; and
- (b) €145,000 in cash.

In addition, MEE paid to QEM €265,000 in cash for certain information relating to the Santa Maria Property.

The joint venture agreement has not yet been completed. The payments made to date have been accounted for as mineral property expenditures until such time as the terms of the joint venture are finalized.

**12. Convertible debt**January 1,  
2010

---

Face value of loans denominated in Canadian dollars bearing interest at the one-year EURIBOR rate in force at the start date of each annual period, unsecured and maturing in fiscal year 2015. Payment of interest is deferred until fiscal 2011 with principal payment to be made in full in fiscal 2015. The loans are convertible, at the option of the holder, at any time into common shares of the Company at \$0.075 per share.

\$ 500,000

Attributed equity value on face  
value of convertible debt

(131,846)

Accumulated accretion

72,428

Shares issue for debt

-

---

\$ 440,582

---

This debt was incurred in 2008. The fair value of the liability component of the note, calculated at issuance, in the amount of \$368,154, was calculated as the present value of the principal and interest, discounted at 18%, a rate of approximately the market interest rate that would have been applicable to non convertible debt at the time the notes were issued. This portion of the notes is accreted over the term to the full face value by recording accretion expense using the effective interest method. The equity component of the note, in the amount of \$131,846, is comprised of the value of the exchange option, being the difference between the face value of the note and the fair value of the liability component.

Included in the convertible long-term debt balance was a loan, with a face value of \$50,000, owed to a company controlled by a director of the Corporation.

During the fifteen months ended March 31, 2011, the convertible loans and accrued interest were fully converted into common shares.

During the three and six months ended September 30, 2011, \$nil interest was accrued using the EURIBOR rate of 1.23% (three and six months ended September 30, 2010, \$1,116 and \$2,232)

#### 13. Share capital

##### a) Authorized share capital

The authorized share capital consisted of unlimited number of common shares. The common shares do not have a par value. All issued shares are fully paid.

##### b) Common shares issued

On April 18, 2011, Eurotin completed the acquisition of all the issued and outstanding securities of Stannico.

At September 30, 2011, the issued share capital amounted to \$23,322,906. The change in issued share capital for the periods were as follows:

	Number of common shares	Amount
Balance, January 1, 2010	14,673,998	\$ 411,920
Shares issued on private placements	27,591,458	4,035,124
Shares issued as finder's fee	383,334	46,000
Shares issued for debt	8,297,490	826,470
Shares issued pursuant to a drilling services arrangement	1,200,000	180,000
Share issue costs	-	(275,235)
Valuation of warrants issued	-	(195,576)
Shares issued to QEM (note 8 (ii))	1,386,667	208,000
Balance, March 31, 2011	53,532,947	5,236,703
Issue of common shares for warrants exercise	7,370,233	1,252,078
Fair value of warrants exercised	-	164,247
Conversion of Stannico shares to Eurotin shares upon RTO (i)	(15,225,796)	-
Deemed consideration for RTO of Eurotin (note 14)	10,092,500	5,046,250
Exercise of warrants	1,360,000	423,042
Fair value of warrants exercised	-	14,247
Exercise of stock options	1,291,750	218,750
Fair value of stock options exercised	-	155,867
Issue of common shares in private placement (ii)	15,625,000	10,811,722
<b>Balance, September 30, 2011</b>	<b>74,046,634</b>	<b>\$ 23,322,906</b>

(i) On April 18, 2011, Stannico completed the RTO of Eurotin through which Eurotin acquired of all the issued and outstanding securities of the Stannico. Concurrently with the completion of the acquisition by Eurotin, 7,370,233 warrants of the Company were exercised. Pursuant to the acquisition agreement, in exchange for obtaining all of the issued and outstanding securities of the Company, Eurotin issued to the former shareholders of the Company, at a conversion rate of the securities in the ratio of 1.33 to 1, a total of 45,677,384 common shares, 12,968,560 warrants, 3,821,250 options (with each warrant and each option entitling the holder to acquire one common share of Eurotin) and 624,500 compensation options. Each compensation option is exercisable into a unit of Eurotin (with each option entitling the holder to acquire one common share and one half warrant and each whole warrant entitling the holder to acquire one common share of Eurotin).

**(Unaudited)**

---

#### **13. Share capital (continued)**

(ii) On July 26, 2011, Eurotin closed a private placement, with a syndicate of agents. Under the private placement Eurotin issued 15,625,000 special warrants (the "Special Warrants") at an issue price of \$0.80 per special warrant for gross proceeds of \$12,500,000. The proceeds of this placement will be used primarily to accelerate the development of the Corporation's Spanish properties.

Each special warrant, subject to the penalty provision (as outlined below) and subject to adjustments in certain circumstances, will be exercisable into one unit of Eurotin, with each unit comprised of one Common Share and one half of one Common Share purchase warrant, for no additional consideration. Each full Warrant will entitle the holder to purchase one Common Share for a period of 2 years following the closing at an exercise price of \$1.20 per Warrant.

All unexercised special warrants will be deemed to be exercised at 4:00 pm (Toronto time) on the earlier of: (a) November 27, 2011; and (b) the third business day after the date a final receipt is issued by each of the applicable securities regulatory authorities in Canada (except Quebec), for a final prospectus qualifying the distribution of the securities issuable upon exercise or deemed exercise of the special warrants.

On September 22, 2011, a receipt was issued for the final prospectus filed in connection with the qualification for distribution of the securities underlying the 15,625,000 special warrants issued on July 26, 2011. 15,625,000 common shares in the capital of the Corporation (the "Common Shares") and 7,812,500 Common Share purchase warrants (the "Warrants") were issued on September 25, 2011, being the third business day following the issuance of this receipt, as each Special Warrant shall automatically convert into one free trading Common Share and one-half of one free trading Warrant. The fair value of the 7,812,500 warrants was estimated to be \$722,169 using a fair market technique incorporating Black-Scholes valuation model on the following assumptions: dividend yield 0%; volatility 100%; risk free rate 0.89%; and expected life of 1.84 years.

As consideration for services in connection with the Private Placement, Eurotin has paid the syndicate of agents a cash commission equal to 6% of the gross proceeds of the offering and has issued 781,250 compensation options equal to 5% of the special warrants sold pursuant to the Private Placement. The compensation options will be deemed to be exercised into broker warrants on the same date as the exercise of the special warrants which is September 25, 2011. Each broker warrant is exercisable into one broker unit at an exercise price of \$0.80 per broker unit. The broker units will be issued on the same terms as the special warrant units and shall be subject to the same penalty provision. The fair value of 781,250 broker warrants was estimated to be \$104,766, using Black-Scholes valuation model on the following assumptions: dividend yield 0%; volatility 100%; risk free rate 0.89%; and expected life of 1.84 years.

The Corporation entered into an advisory services agreement effective June 24, 2011, in conjunction with the private placement described above wherein an amount equal to 1% of the gross proceeds of the private placement were payable to the advisor. The agreement terminated on the completion date of the offering, September 26, 2011.

The Corporation incurred total transaction costs of \$914,046 including \$750,000 of cash commission equal to 6% of the gross proceeds of the offering, of which \$52,703 was allocated to warrants issued.

**Eurotin Inc.****Notes to Condensed Consolidated Interim Financial Statements****September 30, 2011****(Expressed in Canadian dollars)****(Unaudited)**

---

**14. Reverse Takeover**

The share capital of each company prior to the Reverse Takeover ("RTO") was as follows:

**Eurotin**

	<b>Number of shares</b>	<b>Amount \$</b>
Balance as at March 31, 2011	10,092,500	686,750
Balance as at April 18, 2011 prior to the RTO	10,092,500	686,750

**Stannico**

	<b>Number of shares</b>	<b>Amount \$</b>
Balance as at March 31, 2011	53,532,947	5,236,703
Balance as at April 18, 2011 prior to the RTO	53,532,947	5,236,703

- (i) On April 18, 2011, the Corporation completed its acquisition of all of the issued and outstanding securities of Stannico. Pursuant to the acquisition agreement, in exchange for obtaining all of the issued and outstanding securities of Stannico, Eurotin issued to the former Stannico security holders 45,677,384 common shares, 12,968,565 warrants, 3,831,250 options (with each warrant and each option entitling the holder to acquire one common share of Eurotin) and 624,500 compensation options. Each compensation option is exercisable into a unit of the Corporation (with each option entitling the holder to acquire one common share and one half warrant of Eurotin and each whole warrant entitling the holder to acquire one common share of Eurotin).

In accordance with IFRS 3, Business Combination, the substance of the transaction is a reverse takeover of a non-operating company. The transaction does not constitute a business combination as Eurotin does not meet the definition of a business under the standard. As a result, the transaction is accounted for as a capital transaction with the Stannico being identified as the acquirer and the equity consideration being measured at fair value. The resulting statement of financial position is presented as a continuance of the original Stannico and comparative figures presented in the financial statements after the reverse takeover are those of the original Stannico.

IFRS 2 applies to transactions where an entity grants equity instruments and cannot identify specifically some or all of the goods or service received in return. Because Stannico issued shares with a value in excess of the assets received, IFRS 2 would indicate that the difference is recognised in comprehensive loss as a transaction cost. The amount assigned to the transaction cost of \$5,186,347 is the difference between the fair value of the consideration and the net identifiable assets of Eurotin acquired by Stannico and included in the consolidated statement of loss and comprehensive loss.

---

**Eurotin Inc.****Notes to Condensed Consolidated Interim Financial Statements****September 30, 2011****(Expressed in Canadian dollars)****(Unaudited)**

---

**14. Reverse Takeover (continued)**

The fair value of the consideration is determined based on the percentage of ownership the legal parent's shareholders have in the amalgamated entity after the transaction. This represents the fair value of the shares that Stannico would have had to issue for the ratio of ownership interest in the combined entity to be the same, if the transaction had taken the legal form of Stannico acquiring 100% of the shares in Eurotin. The percentage of ownership Eurotin shareholders had in the combined entity is 18% after the issue of 45,677,384 shares of Eurotin shares. The fair value of the consideration in the Reverse Takeover is equivalent to the fair value of the 10,092,500 Eurotin shares controlled by original Eurotin shareholders and 364,250 stock options issued to Eurotin stock options holders. The fair value of the Eurotin shares was estimated to be \$5,046,250 based on fair market value of \$0.5 per share on the date of April 20, 2011, the first trading day of Eurotin shares after the Reverse Takeover. The fair value of the stock options was estimated to be \$145,700 using Black-Scholes valuation model on the following assumptions: dividend yield 0%; volatility 100%; risk free interest rate 0.98%; and an expected life of 0.16 years.

Based on the statement of financial position of Eurotin at the time of the Reverse Takeover, the net assets at estimated fair value that were acquired by Stannico were \$5,603 and the resulting transaction cost charged to the statement of loss and comprehensive loss is as follows:

	<b>Amount</b>
	<b>\$</b>
<b>Consideration</b>	5,191,950
<b>Identifiable assets acquired</b>	
Cash	10,248
Other assets	100,000
Accounts payable and accrued liabilities	(104,645)
	5,603
<b>Unidentifiable assets acquired</b>	
Transaction cost	5,186,347
<b>Total net identifiable assets and transaction cost</b>	<b>5,191,950</b>

**15. Net loss per common share**

The calculation of basic and diluted loss per share for the three and six months ended September 30, 2011 and for the three and six months ended September 30, 2010 was based on the loss attributable to common shareholders of \$1,180,469 and \$7,524,568, respectively, (\$522,852 and \$659,983 for the three and six months ended September 30, 2010, respectively) and the weighted average number of common shares outstanding of 59,100,982 and 57,402,444, respectively, (21,328,838 and 19,669,496 for three and six months ended September 30, 2010, respectively). Diluted loss per share did not include the effect of 20,202,310 warrants and 5,331,250 stock options as they are anti-dilutive.

#### 17. Stock options

The Corporation's outstanding stock options as at September 30, 2011 and the changes for the period then ended are as follows:

	Number of Stock Options	Weighted Average Exercise Price \$
Balance, January 1, 2010	-	-
Granted <sup>(a)(b)(c)</sup>	5,774,999	0.19
Balance, March 31, 2011	5,774,999	0.19
Conversion to Eurotin stock options upon RTO	(1,443,749)	0.20
Options granted - April 18, 2011 <sup>(d)(e)(f)</sup>	1,989,250	0.83
Options exercised	(979,250)	0.23
Options expired	(10,000)	0.10
Balance, September 30, 2011	5,331,250	<b>0.49</b>

<sup>(a)</sup> On August 1, 2010, Stannico granted to directors, officers and consultants of the Company 3,675,000 stock options to acquire common shares of the Company. The options vest immediately and are exercisable at a price of \$0.20 per share for a period of five years from the date of issuance. The fair value of stock options was estimated on the date of grant using the Black Scholes option pricing model with the following assumptions: dividend yield of 0%; volatility of 100%; risk free interest rate of 2.29%; and an expected life of 5 years. As a result, the fair value of the stock options was estimated as \$386,338. This amount has been recorded as stock-based compensation in the fifteen months ended March 31, 2011. On April 18, 2011, upon reverse takeover, these stock options were converted into 2,756,250 stock options of Eurotin at an exchange ratio of four for three. At the same time, the exercise price was changed to \$0.27 with other terms remaining unchanged.

<sup>(b)</sup> On January 25, 2011, Stannico granted to directors, officers and consultants of the Company 1,266,666 stock options to acquire common shares of the Company. The options vest immediately and are exercisable at a price of \$0.20 per share for a period of five years from the date of issuance. The fair value of stock options was estimated on the date of grant using the Black Scholes option pricing model with the following assumptions: dividend yield of 0%; volatility of 100%; risk free interest rate of 2.55%; and an expected life of 5 years. As a result, the fair value of the stock options was estimated as \$133,638. This amount has been recorded as stock-based compensation in the fifteen months ended March 31, 2011. On April 18, 2011, upon reverse takeover, these stock options were converted into 950,000 stock options of Eurotin at an exchange ratio of four for three. At the same time, the exercise price was changed to \$0.27 with other terms remaining unchanged.

<sup>(c)</sup> On December 15, 2010 Stannico issued 833,333 broker compensation options. Each compensation option is exercisable into a unit of the Company. Each unit consists of one common shares and a half warrant at a price of \$0.225 per share until December 15, 2012. The fair value of these options was estimated on the date of grant using the Black Scholes option pricing model with the following assumptions: dividend yield of 0%; volatility of 100%; risk free interest rate of 2.55%; and an expected life of one month. As a result, the fair value of the stock options was estimated as \$14,167. This amount was recorded as share issue costs in the fifteen months ended March 31, 2001. On April 18, 2011, upon reverse takeover, these stock options were converted into 625,000 stock options of Eurotin at an exchange ratio of four for three.

#### 17. Stock options (continued)

(d) On April 18, 2011, the Corporation issued to directors, officers and consultants of the Corporation 125,000 stock options to acquire common shares of the Corporation. The options vest immediately and are exercisable at a price of \$0.27 per share for a period of 4.78 years. The fair value of the stock options was estimated on the date of grant using the Black Scholes option pricing model with the following assumptions: dividend yield 0%; volatility of 100%; risk free interest rate of 2.55%; and an expected life of 4.78 years. As a result, the fair value of the stock options was estimated at \$17,583 and the amount recorded as share-based payments in the condensed consolidated interim statements of loss and comprehensive loss for the three and six months ended September 30, 2011 is \$nil and \$17,583.

(e) On May 4, 2011, the Corporation issued to directors, officers and employees of the Corporation 1,500,000 stock options to acquire common shares of the Corporation. The options vest one-third on the date of grant, one-third on the first anniversary of the date of grant and one-third one the second anniversary of the date of grant. These options are exercisable at a price of \$1.05 per share for a period of 5 years. The fair value of the stock options was estimated on the date of grant using the Black Scholes option pricing model with the following assumptions: dividend yield of 0%; volatility of 100%; risk free interest rate of 2.20%; and an expected life of 5 years. As a result, the fair value of the stock options was estimated at \$1,182,000. During the three and six months ended September 30, 2011, \$148,625 and \$634,708 was recorded as share-based payments in the condensed consolidated interim statements of loss and comprehensive loss.

(f) 364,250 stock options of Eurotin outstanding as at April 18, 2011 was deemed as part of the consideration for the reverse takeover (see note 11), and these options were valued on April 18, 2011, the date of the reverse takeover, using Black Scholes option pricing model with the following assumptions: dividend yield of 0%; volatility of 100%; risk free interest rate of 0.98%; and an expected life of 0.16 years. As a result, the fair value of the stock options was estimated at \$145,700 and the amount was recorded as part of the reverse takeover transaction cost in the condensed consolidated interim statements of loss and comprehensive loss for the six months ended September 30, 2011.

Details of the stock options outstanding at September 30, 2011 are as follows:

	Fair Value	Contractual Life (years)	Exercisable Options	Number of Options	Weighted Average Exercise Price (\$)	Remaining Expiry Date
\$	386,338	3.84	2,756,250	2,756,250	0.27	August 1, 2015

### **Notes to Condensed Consolidated Interim Financial Statements**

**September 30, 2011**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

## **22. Conversion to IFRS**

### *(i) Overview*

As stated in Significant accounting policies note 3, these are the Corporation's second unaudited condensed consolidated interim financial statements prepared in accordance with IFRS as issued by the IASB.

The policies set out in the Significant Accounting Policies note have been applied in preparing the unaudited condensed consolidated interim financial statements for the three and six months ended September 30, 2011 and in the preparation of an opening IFRS balance sheet at January 1, 2010 (the Corporation's Transition Date).

### *(ii) First-time adoption of IFRS*

The adoption of IFRS requires the application of IFRS 1, which provides guidance for a Corporation's initial adoption of IFRS. IFRS 1 generally requires retrospective application of IFRS as effective at the end of its first annual IFRS reporting period. However, IFRS 1 also provides certain optional exemptions and mandatory exceptions to this retrospective treatment.

The Corporation has elected to apply the following optional exemption in its preparation of an opening IFRS statement of financial position as at January 1, 2010:

- IFRS 3 - Business Combinations ("IFRS 3"). The Corporation has elected not to retrospectively apply IFRS 3, Business combinations, to any business combinations that may have occurred prior to its transition date.
- IFRS 6 - Exploration for and Evaluation of Mineral Resources. The Corporation has elected to apply the exemption from full retrospective application of IFRS 6. As such the Corporation has at January 1, 2010, measured the exploration and evaluation assets at the amount determined under Canadian GAAP and measured the development and production assets by allocating the amount determined under Canadian GAAP to the underlying assets on a pro rata basis using reserve values at that date. As a result of using the IFRS 1 optional exemption, the exploration and evaluation assets and the development and production assets have been subject to an impairment test.
- IAS 23 - Borrowing Costs. IAS 23 has not been applied retrospectively. As at the transition date, the Corporation did not have any qualifying assets.
- IAS 37 - Provision, Contingent Liabilities and Contingent Assets ("IAS 37") The Corporation has elected to apply the exemption from full retrospective application of decommissioning liabilities as allowed under IFRS 1. As such the Corporation has re-measured the provisions as at January 1, 2010 under IAS 37 and recognized the difference between the amount determined under IAS 37 and the carrying amount of the provisions at January 1, 2010, directly in retained earnings.
- IFRIC 4 - Determining whether an Arrangement contains a Lease. This IFRIC has not been applied retrospectively. The Corporation made an assessment as to whether an arrangement, existing at the Transition Date, contains a lease on the basis of the facts and circumstances existing at that date. The assessment was made in accordance with the requirements of IFRIC 4. The Corporation did not identify any arrangements containing a lease on the transition date.

IFRS 1 does not permit changes to estimates that have been made previously. Accordingly, estimates used in the preparation of the Corporation's opening IFRS statement of financial position as at the Transition Date are consistent with those that were made under Canadian GAAP.

---

**22. Conversion to IFRS (continued)***(iii) Presentation*

Certain amounts in the unaudited condensed interim consolidated statements of financial position, statements of loss and comprehensive loss and statements of cash flows have been reclassified to conform to the presentation adopted under IFRS.

*(iv) Reconciliation between IFRS and Canadian GAAP*

The Corporation's Transition Date IFRS unaudited consolidated statement of financial position is included as comparative information in the unaudited consolidated statements of financial position in the Corporation's condensed interim consolidated financial statements as at and for the three months ended June 30, 2011.

In accordance with IFRS 1.32, an entity is required to provide a reconciliation of its equity at the end of the comparable interim period of the immediately preceding financial year, and of its comprehensive income for that comparable interim period, only if it presented an interim financial report for that period. Stannico did not publish any financial information as at September 30, 2010 as it was not a public entity at that time. Consequently, the Corporation has not presented a reconciliation of its Equity for the period ending September 30, 2010.

---

**22. Conversion to IFRS (continued)***(iv) Reconciliation between IFRS and Canadian GAAP (continued)*

The Canadian GAAP interim statement of loss and comprehensive loss for the three month period ended September 30, 2010 has been reconciled to IFRS as follows:

	<b>Three months ended September 30, 2010</b>		
	<b>Canadian GAAP</b>	<b>Effect of transition to IFRS</b>	<b>IFRS</b>
<b>Expenses</b>			
General and administrative	\$ 503,975	\$ -	\$ 503,975
<b>Operating loss before the following items</b>	(503,975)	-	(503,975)
Foreign exchange loss	(2,924)	-	(2,924)
Interest, accretion and financing fees	(15,953)	-	(15,953)
<b>Net loss and comprehensive loss for the period</b>	\$ (522,852)	\$ -	\$ (522,852)

The Canadian GAAP interim statement of loss and comprehensive loss for the six month period ended September 30, 2010 has been reconciled to IFRS as follows:

	<b>Six months ended September 30, 2010</b>		
	<b>Canadian GAAP</b>	<b>Effect of transition to IFRS</b>	<b>IFRS</b>
<b>Expenses</b>			
General and administrative	\$ 621,255	\$ -	\$ 621,255
<b>Operating loss before the following items</b>	(621,255)	-	(621,255)
Foreign exchange loss	(6,822)	-	(6,822)
Interest, accretion and financing fees	(31,906)	-	(31,906)
<b>Net loss and comprehensive loss for the period</b>	\$ (659,983)	\$ -	\$ (659,983)

#### **23. Subsequent event**

(i) On November 28, 2011, the Company accepted the resignation of Francisco Fimbres as an Executive Board member and has appointed Mark Thompson as a new and Independent Board member both effective that day.

(ii) On November 28, 2011, the Company changed its Registered office to 25 Adelaide Street East, Suite 818, Toronto, Ontario, Canada, M5C 3A1

(iii) On November 28, 2011, the Company granted 175,000 stock options to Outsource Services Limited its Investor Relations representative in Europe, with each option exercisable into one common share at a price of \$0.85 per share. The options are exercisable for up to 5 years from the date of grant and vested immediately.

(iv) On November 18, 2011 367,955 Warrants were exercised at \$ 0.13 for a total proceeds of \$ 47,834.

(v) On November 9, 2011, the Company granted 400,000 stock options to an officer of the Company, with each option exercisable into one common share at a price of \$0.70 per share. The options are exercisable for up to 5 years from the date of grant.

(vi) On October 25th, 2011 the Retamar and Ampliación a Retamar Investigation Permits Transfer Agreement was executed and notarized as a deed. This deed was confirmed and ratified by MESEX the following day. Currently, MESEX is preparing all relevant documents and information required by law to apply for the mandatory authorization of the transfer.

(vii) On October 1, 2011, the Company signed the Investor Relations Agreement with Outsource Services Limited for it to act as Eurotin's exclusive agency in Europe.

Outsource will be responsible for all aspects of the Company's Investor Relations program with respect to European matters. Their objective is to create effective communication between the Company, its shareholders and the investment community in Europe.

In consideration for their services, the Company will pay Outsource a fee of \$6,000 per month plus reimbursement of all related expenses which shall continue indefinitely until either party gives 90 days written notice of termination. The Company will also grant Outsource stock options to purchase up to 175,000 common shares of the Company at an exercise price of \$0.85 per share. Outsource currently holds or has control or direction over 62,500 common shares and 62,500 warrants to purchase common shares in the capital of the Company. The appointment of Outsource remains subject to the approval of the TSX Venture Exchange
