1. Nature of operations

Eurotin Inc. ("the Corporation" or "Eurotin") was incorporated under the Ontario Business Corporations Act on July 31, 2008 as a "Capital Pool Corporation" ("CPC"), as this term is defined in the policies of the TSX Venture Exchange (the "Exchange"). On April 18, 2011, Stannico Resources Inc. ("the Company" or "Stannico") completed a reverse takeover ("RTO") of Eurotin (see note 14). Eurotin had no significant assets other than cash with no commercial operations at the time. On April 18, 2011, Eurotin changed its year end to March 31.

Stannico Resources Inc. was incorporated on October 9, 2008 under the laws of the province of Ontario. The Company controls 100% of the issued common shares of Minas De Estano De Espana, S.L.U. ("MEE"), a private corporation incorporated on November 29, 2006 in Spain whose business is the exploration, research, exploitation and utilization of mineral deposits, resources and substances, as well as the establishment of industries related to them, to obtain mining, industrial and chemical products and processed products in general.

The condensed consolidated interim financial statements of the Corporation for the three months ended June 30, 2012 were reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors on August 24, 2012.

These financial statements have been prepared on the basis that the Corporation is a going concern, which contemplates the realization of its assets and the settlement of its liabilities in the normal course of operations. The exploration, development and financing of mineral properties involves substantial risks and several phases of exploration, evaluation and financing. The ability of the Corporation to continue operations and achieve profitability is dependent upon obtaining the necessary financing to complete the successful development of its mineral properties and ultimately upon the discovery and commercialization of mineral resources. These financial statements do not include any adjustments related to the carrying values and classifications of assets and liabilities that would be necessary should the Corporation be unable to continue as a going concern.

The Corporation operates from its headquarters in Ontario, Canada and also through two wholly-owned subsidiaries: Stannico Resources Inc. and Minas de Estano De Espana, S.L.U.. These subsidiaries represent the interest of Eurotin Inc. in Spain. The address of the registered office is 25 Adelaide Street East, Suite 818, Toronto, Ontario, Canada, M5C 3A1

Although the Corporation has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations of such properties, these procedures do not guarantee the Corporation's title. Property title may be subject to government licensing requirements or regulations, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Corporation's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, political uncertainty and currency exchange fluctuations and restrictions.

2. Significant accounting policies

Statement of compliance

The Corporation applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC"). These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by IASB and interpretations issued by IFRIC

The policies applied in these condensed consolidated interim financial statements are based on IFRSs issued and outstanding as of August 24, 2012, the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these condensed consolidated interim financial statements as compared with the most recent annual financial statements as at and for the year ended March 31, 2012. Any subsequent changes to IFRS that are given effect in the Corporation's annual financial statements for the year ending March 31, 2013 could result in restatement of these condensed interim financial statements.

New standards not yet adopted and interpretations issued but not yet effective

There are no relevant changes in accounting standards applicable to future periods other than as disclosed in the most recent annual statements as at and for the year ended March 31, 2012.

3. Capital risk management

The Corporation manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions; and
- to maximize shareholder return through enhancing the share value.

The Corporation monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Corporation may manage its capital structure by issuing new shares, repurchasing outstanding shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

The Corporation considers its capital to be equity, which comprises share capital, warrants, contributed surplus, non-controlling interests, accumulated other comprehensive loss and accumulated deficit, which at June 30, 2012, totaled \$15,736,358 (March 31, 2012 - \$16,037,278).

The Corporation manages capital through its financial and operational forecasting processes. The Corporation reviews its working capital and forecasts its future cash flows based on operating expenditures, and other investing and financing activities. The forecast is updated based on activities related to its mineral properties and deferred expenditures. Selected information is provided to the Board of Directors of the Corporation. The Corporation's capital management objectives, policies and processes have remained unchanged during the three months ended June 30, 2012.

The Corporation is not subject to any capital requirements imposed by a lending institution.

4. Financial risk management

Financial risk

The Corporation's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate, foreign currency risk and commodity and equity price risk).

Risk management is carried out by the Corporation's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management. There were no changes to credit risk, liquidity risk or market risk for the three months ended June 30, 2012.

(i) Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Corporation's credit risk is primarily attributable to cash. Cash is held with select major Canadian chartered banks, from which management believes the risk of loss to be minimal.

(ii) Liquidity risk

Liquidity risk is the risk that the Corporation will not have sufficient cash resources to meet its financial obligations as they come due. The Corporation's liquidity and operating results may be adversely affected if its access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or matters specific to the Corporation. The Corporation generates cash flow primarily from its financing activities. The Corporation prepares annual capital expenditure budgets, which are monitored and updated as required. In addition, the Corporation requires authorization for expenditures on projects to assist with the management of capital. The Corporation's financial liabilities comprise accounts payable and accrued liabilities, which are due within normal trade terms, generally 30 days.

(iii) Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and commodity and equity prices.

(a) Interest rate risk

The Corporation currently does not have any short-term or long-term debt that is interest bearing and, as such, the Corporation's current exposure to interest rate risk is minimal as at June 30, 2012.

(b) Foreign currency risk

The Corporation's functional and reporting currency is the Canadian dollar and the Corporation holds cash balances in Euros which could give rise to exposure to foreign exchange risk. It is not the Corporation's policy to hedge its foreign currency.

Eurotin Inc.

Notes to Condensed Consolidated Interim Financial Statements

(Expressed in Canadian dollars)

(Unaudited)

4. Financial risk management (continued)

(iii) Market risk (continued)

(c) Commodity and equity price risk

The Corporation is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Corporation closely monitors commodity prices, as they relate to precious and base metals and other minerals, and the stock market to determine the appropriate course of action to be taken by the Corporation.

Commodity price risk could adversely affect the Corporation. In particular, the Corporation's future profitability and viability of development depend upon the world market price of precious and base metals and other minerals. Precious and base metals and other mineral prices have fluctuated widely in recent years. There is no assurance that, even if commercial quantities of precious and base metals and other minerals are produced in the future, a profitable market will exist for them. As of March 31, 2012 and 2011, the Corporation was not a precious mineral, base metals and other minerals producer. Even so, commodity price risk may affect the completion of future equity transactions such as equity offerings and the exercise of stock options and warrants. This may also affect the Corporation's liquidity and its ability to meet its ongoing obligations.

Sensitivity analysis

As at June 30, 2012, \$3,129,350 was held in Canadian Dollars and 141,700 was held in Euros. Based on management's knowledge and experience of the financial markets, the Corporation believes the following movements are reasonably possible over a twelve month period:

(i) The Corporation is exposed to currency risk to the extent that monetary assets and liabilities held by the Corporation are not denominated in Canadian dollars. The Corporation has not entered into any foreign currency contracts to mitigate this risk.

The Corporation holds balances in foreign currencies which could give rise to exposure to foreign exchange risk. Sensitivity to a plus or minus 10% change in the foreign exchange rate of the Euro against the Canadian dollar would affect the reported loss and comprehensive loss by approximately \$89,000.

	\$ 3,751,456	\$ 806,673	\$ 4,558,129

- (i) On February 15, 2008, MEE acquired the right to earn a 100% interest in Oropesa Investigation Permit No. 13.050 ("IP Oropesa") from Sondeos y Perforaciones Industriales del Biezro, SA ("SPIB"). The property (the "Oropesa Property") is situated in Spain within the North East part of the Region of Andalucía and totals 23.4km².

MEE satisfied the terms to earn 50% interest in IP Oropesa by spending €1,500,000 on exploration on the Oropesa Property over a three year period and the milestone was achieved by March 31, 2011. A further 50% interest can be acquired by either:

- (a) granting SPIB a 1.35% net smelter royalty; or
(b) paying SPIB 0.90% of the value of the metal reserves at the time of feasibility;

in the event of commercial production MEE has committed to issue to SPIB 4% of the equity of the entity developing and mining IP Oropesa.

In order to keep the right in good standing MEE must make annual lease payments of C\$23,238 (€18,000) as at June 30, 2011).

8. Mineral properties and deferred exploration expenditures (continued)

- (i) (continued) On March 13, 2008, the Corporation entered into an option agreement with Minas Tenidas S.A.U ("MATSA") a wholly owned subsidiary of Iberian Minerals Corp. whereby MATSA was granted the right to earn a 25% interest in IP Oropesa. In order to earn its interest, MATSA was required to pay to MEE an amount equal to double the amount of the expenses incurred by MEE to bring the Oropesa property to pre-feasibility status.

Following the delivery of a notice of termination by MEE to MATSA on October 6, 2011, the Option Agreement terminated on March 13, 2012.

- (ii) On December 11, 2010, MEE and Quercus Explorations Mining S.A. ("QEM") entered into an agreement (which amended and replaced a previous agreement between the parties dated August 8, 2008) (the "Santa Maria Agreement") whereby both parties agreed to form and enter into a joint venture as it relates to the "Santa Maria" property (the "Santa Maria Property"). The Santa Maria Property is located approximately 50 kilometers north of Caceres in Extremadura Province in West Central Spain. The Santa Maria Property is comprised of Investigation Permit Ampliacion Retamar n° 10.220 and Investigation Permit Retamar n° 10.201, both of which were held by QEM. Pursuant to the terms of the agreement, a new company – Minas De Estano De Extremadura, S.L. ("MESEX") – was incorporated on February 25, 2011, and the parties agreed that both Investigation Permit Ampliacion Retamar n° 10.220 and Investigation Permit Retamar n° 10.201 shall be transferred to MESEX. The parties further agreed that MEE and QEM will own 60% and 40%, respectively, of MESEX. In consideration for its interest in MESEX, MEE (or the Corporation on behalf of MEE) has paid to QEM:

- (a) US\$200,000 through the issuance of 1,386,667 (pre RTO) (1,040,000 post RTO) common shares of the Corporation at an issue price of CDN\$0.15 per share (CDN\$0.20 per share post RTO); and
(b) €145,000 in cash.

In addition, MEE paid to QEM €265,000 in cash for certain information relating to the Santa Maria Property.

On October 25, 2011 the Retamar and Ampliación a Retamar Investigation Permits Transfer Agreement was executed and notarized as a deed. This deed was confirmed and ratified by MESEX the following day. Currently, MESEX is preparing all relevant documents and information required by law to apply for the mandatory authorization of the transfer. The transfer was completed on March 9, 2012.

In addition to the Santa Maria Agreement, the two shareholders of MESEX have also entered into a shareholders' agreement with respect to their shareholdings in MESEX. The Santa Maria Agreement and the shareholders' agreement will govern the relationship between parties with respect to their shareholdings in MESEX and the Santa Maria Property. The Corporation has accounted for the joint venture as a subsidiary. Accordingly, the payments made to date have been accounted for as mineral property expenditures. The non-controlling interests in the net assets of the consolidated subsidiary are identified separately from the Corporation's equity therein. Losses applicable to the non-controlling interests in excess of their interest in the subsidiary's equity are allocated against the interests of the Corporation except to the extent that the non-controlling interests have a binding obligation and are able to make an additional investment to cover the losses.

9. Share capital (continued)

(i) On April 18, 2011, Stannico completed the RTO of Eurotin through which Eurotin acquired of all the issued and outstanding securities of Stannico. Concurrently with the completion of the acquisition by Eurotin, 7,370,233 warrants of the Company were exercised. Pursuant to the acquisition agreement, in exchange for obtaining all of the issued and outstanding securities of the Company, Eurotin issued to the former shareholders of the Company, at a conversion rate of the securities in the ratio of 1.33 to 1, a total of 45,677,384 common shares, 12,968,560 warrants, 3,821,250 options (with each warrant and each option entitling the holder to acquire one common share of Eurotin) and 624,500 compensation options. Each compensation option is exercisable into a unit of Eurotin (with each option entitling the holder to acquire one common share and one half warrant and each whole warrant entitling the holder to acquire one common share of Eurotin). The number of common shares, warrants (Note 12) and options (Note 13) issued and outstanding for periods prior to the RTO have been retroactively adjusted to reflect the share capital of Eurotin, the legal acquirer, based on the exchange ratio defined in the acquisition agreement.

(ii) On July 26, 2011, Eurotin closed a private placement, with a syndicate of agents. Under the private placement Eurotin issued 15,625,000 special warrants (the "Special Warrants") at an issue price of \$0.80 per special warrant for gross proceeds of \$12,500,000. The proceeds of this placement will be used primarily to accelerate the development of the Corporation's Spanish properties.

Each special warrant, subject to the penalty provision (as outlined below) and subject to adjustments in certain circumstances, were exercisable into one unit of Eurotin, with each unit comprised of one Common Share and one half of one Common Share purchase warrant, for no additional consideration. Each full Warrant will entitle the holder to purchase one Common Share for a period of 2 years following the closing at an exercise price of \$1.20 per Warrant.

All unexercised special warrants were deemed to be exercised at 4:00 pm (Toronto time) on the earlier of: (a) November 27, 2011; and (b) the third business day after the date a final receipt is issued by each of the applicable securities regulatory authorities in Canada (except Quebec), for a final prospectus qualifying the distribution of the securities issuable upon exercise or deemed exercise of the special warrants.

On September 21, 2011, a receipt was issued for the final prospectus filed in connection with the qualification for distribution of the securities underlying the 15,625,000 special warrants issued on July 26, 2011. 15,625,000 common shares in the capital of the Corporation (the "Common Shares") and 7,812,500 Common Share purchase warrants (the "Warrants") were issued on September 26, 2011, being the third business day following the issuance of this receipt, as each Special Warrant shall automatically convert into one free trading Common Share and one-half of one free trading Warrant. The fair value of the 7,812,500 warrants was estimated to be \$722,169 using a fair market value technique incorporating Black-Scholes valuation model on the following assumptions: dividend yield 0%; volatility 100%; risk free rate 0.89%; and expected life of 1.84 years.

As consideration for services in connection with the Private Placement, Eurotin has paid the syndicate of agents a cash commission equal to 6% of the gross proceeds of the offering and has issued 781,250 compensation options equal to 5% of the special warrants sold pursuant to the Private Placement. The compensation options were deemed to be exercised into broker warrants on the same date as the exercise of the special warrants which is September 26, 2011. Each broker warrant was exercisable into one broker unit at an exercise price of \$0.80 per broker unit. The broker units were issued on the same terms as the special warrant units and shall be subject to the same penalty provision. The fair value of 781,250 broker warrants was estimated to be \$104,766, using Black-Scholes valuation model on the following assumptions: dividend yield 0%; volatility 100%; risk free rate 0.89%; and expected life of 1.84 years.

The Corporation entered into an advisory services agreement effective June 24, 2011, in conjunction with the private placement described above wherein an amount equal to 1% of the gross proceeds of the private placement were payable to the advisor. The agreement terminated on the completion date of the offering, September 26, 2011.

The Corporation incurred total transaction costs of \$914,046 including \$750,000 of cash commission equal to 6% of the gross proceeds of the offering, of which \$52,703 was allocated to warrants issued.

10. Reverse takeover

The share capital of each company prior to the Reverse Takeover ("RTO") was as follows:

Eurotin

	Number of shares	Amount \$
Balance as at March 31, 2011	10,092,500	686,750
Balance as at April 18, 2011 prior to the RTO	10,092,500	686,750

Stannico

	Number of shares	Amount \$
Balance as at March 31, 2011	53,532,947	5,236,703
Balance as at April 18, 2011 prior to the RTO	53,532,947	5,236,703

- (i) On April 18, 2011, the Corporation completed its acquisition of all of the issued and outstanding securities of Stannico. Pursuant to the acquisition agreement, in exchange for obtaining all of the issued and outstanding securities of Stannico, Eurotin issued to the former Stannico security holders 45,677,384 common shares, 12,968,560 warrants, 3,831,250 options (with each warrant and each option entitling the holder to acquire one common share of Eurotin) and 624,500 compensation options. Each compensation option is exercisable into a unit of the Corporation (with each option entitling the holder to acquire one common share and one half warrant of Eurotin and each whole warrant entitling the holder to acquire one common share of Eurotin).

In accordance with IFRS 3, Business Combination, the substance of the transaction is a reverse takeover of a non-operating company. The transaction does not constitute a business combination as Eurotin does not meet the definition of a business under the standard. As a result, the transaction is accounted for as a capital transaction with the Stannico being identified as the acquirer and the equity consideration being measured at fair value. The resulting statement of financial position is presented as a continuance of the original Stannico and comparative figures presented in the financial statements after the reverse takeover are those of the original Stannico.

IFRS 2 applies to transactions where an entity grants equity instruments and cannot identify specifically some or all of the goods or service received in return. Because Stannico would have issued shares with a value in excess of the assets received, IFRS 2 would indicate that the difference is recognised in comprehensive loss as a transaction cost. The amount assigned to the transaction cost of \$5,186,347 is the difference between the fair value of the consideration and the net identifiable assets of Eurotin acquired by Stannico and included in the consolidated statement of loss and comprehensive loss.

Eurotin Inc.**Notes to Condensed Consolidated Interim Financial Statements****June 30, 2012****(Expressed in Canadian dollars)****(Unaudited)**

10. Reverse takeover (continued)

The fair value of the consideration is determined based on the percentage of ownership the legal parent's shareholders have in the amalgamated entity after the transaction. This represents the fair value of the shares that Stannico would have had to issue for the ratio of ownership interest in the combined entity to be the same, if the transaction had taken the legal form of Stannico acquiring 100% of the shares in Eurotin. The percentage of ownership Eurotin shareholders had in the combined entity is 18% after the issue of 45,677,384 shares of Eurotin shares. The fair value of the consideration in the Reverse Takeover is equivalent to the fair value of the 10,092,500 Eurotin shares controlled by original Eurotin shareholders and 364,250 stock options issued to Eurotin stock options holders. The fair value of the Eurotin shares was estimated to be \$5,046,250 based on fair market value of \$0.50 per share on the date of April 20, 2011, the first trading day of Eurotin shares after the Reverse Takeover. The fair value of the stock options was estimated to be \$145,700 using Black-Scholes valuation model on the following assumptions: dividend yield 0%; volatility 100%; risk free interest rate 0.98%; and an expected life of 0.16 years.

Based on the statement of financial position of Eurotin at the time of the Reverse Takeover, the net assets at estimated fair value that were acquired by Stannico were \$73,822 and the resulting transaction cost charged to the statement of loss and comprehensive loss is as follows:

	Amount
	\$
Consideration	5,191,950
Identifiable assets acquired	
Cash	10,248
Other assets	100,000
Accounts payable and accrued liabilities	(104,645)
	5,603
Unidentifiable assets acquired	
Transaction cost	5,186,347
Total net identifiable assets and transaction cost	5,191,950

11. Net loss per common share

The calculation of basic and diluted loss per share for the three months ended June 30, 2012 and 2011 was based on the loss attributable to common shareholders of \$497,649 and \$6,344,099 respectively and the weighted average number of common shares outstanding of 79,335,249 and 57,673,627 respectively. Diluted loss per share did not include the effect of 14,989,684 warrants and 5,406,250 stock options as they are anti-dilutive.

(a) On April 18, 2011, the Corporation issued to directors, officers and consultants of the Corporation 125,000 stock options to acquire common shares of the Corporation. The options vest immediately and are exercisable at a price of \$0.27 per share for a period of 5 years. The fair value of the stock options was estimated on the date of grant using the Black Scholes option pricing model with the following assumptions: dividend yield 0%; volatility of 100%; risk free interest rate of 2.55%; and an expected life of 4.78 years. As a result, the fair value of the stock options was estimated at \$17,583. During the three months ended June 30, 2012, \$nil was recorded as share-based payments in the condensed consolidated interim statements of loss and comprehensive loss (three months ended June 30, 2011 - \$17,583).

(b) On May 4, 2011, the Corporation issued to directors, officers and employees of the Corporation 1,500,000 stock options to acquire common shares of the Corporation. The options vest one-third on the date of grant, one-third on the first anniversary of the date of grant and one-third one the second anniversary of the date of grant. These options are exercisable at a price of \$1.05 per share for a period of 5 years. The fair value of the stock options was estimated on the date of grant using the Black Scholes option pricing model with the following assumptions: dividend yield of 0%; volatility of 100%; risk free interest rate of 2.20%; and an expected life of 5 years. As a result, the fair value of the stock options was estimated at \$1,182,000. During the three months ended June 30, 2012, \$51,018 was recorded as share-based payments in the condensed consolidated interim statements of loss and comprehensive loss (three months ended June 30, 2011 - \$486,083) and \$28,921 was capitalized in mineral properties and deferred exploration expenditures (three months ended June 30, 2011 - \$nil).

(c) On April 18, 2011, 364,250 stock options of Eurotin outstanding were deemed to be part of the consideration for the reverse takeover (see note 10), and these options were valued on April 18, 2011, the date of the reverse takeover, using Black Scholes option pricing model with the following assumptions: dividend yield of 0%; volatility of 100%; risk free interest rate of 0.98%; and an expected life of 0.16 years. As a result, the fair value of the stock options was estimated at \$145,700 and the amount was recorded as part of the reverse takeover transaction cost in the condensed consolidated interim statements of loss and comprehensive loss for the three months ended June 30, 2011. During the three months ended June 30, 2012, \$nil was recorded as share-based payment in the condensed consolidated interim statements of loss and comprehensive loss.
