### **1. Nature of operations and going concern**

#### Nature of operations

Eurotin Inc. ("the Corporation", the "Company" or "Eurotin") was incorporated under the Ontario Business Corporations Act on July 31, 2008 as a "Capital Pool Corporation" ("CPC"), as this term is defined in the policies of the TSX Venture Exchange (the "Exchange"). On April 18, 2011, Stannico Resources Inc. ("Stannico") completed a reverse takeover ("RTO") of Eurotin. Eurotin had no significant assets other than cash with no commercial operations at the time. On April 18, 2011, Eurotin changed its year end to March 31.

Stannico Resources Inc. was incorporated on October 9, 2008 under the laws of the province of Ontario. The Company controls 100% of the issued common shares of Minas De Estano De Espana, S.L.U. ("MESPA" or "MEE"), a private corporation incorporated on November 29, 2006 in Spain whose business is exploration, research, exploitation and utilization of mineral deposits, resources and substances, as well as the establishment of industries related to them, to obtain mining, industrial and chemical products and processed products in general.

The unaudited condensed interim consolidated financial statements of the Corporation for the three months ended September 30, 2015 were reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors on November 30, 2015.

The Corporation operates from its headquarters in Ontario, Canada and also through two wholly-owned subsidiaries: Stannico Resources Inc. and MESPA. These subsidiaries represent the interest of Eurotin Inc. in Spain. The address of the registered office is 25 Adelaide Street East, Suite 818, Toronto, Ontario, Canada, M5C 3A1.

Although the Corporation has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations of such properties, these procedures do not guarantee the Corporation's title. Property title may be subject to government licensing requirements or regulations, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Corporation's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, political uncertainty and currency exchange fluctuations and restrictions.

#### Going concern

These unaudited condensed interim consolidated financial statements have been prepared based upon accounting principles applicable to a going concern, which assume that the Corporation will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business.

In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period. Management is aware in making its assessment, of material uncertainties related to events or conditions, such as those described herein, that may cast significant doubt upon the Corporation's ability to continue as a going concern.

As at September 30, 2015, the Corporation had negative working capital of \$1,452,034 (March 31, 2015 - negative working capital of \$2,498,590), had not yet achieved profitable operations, had accumulated losses of \$17,482,473 (March 31, 2015 - \$18,105,269) and expects to incur further losses in the development of its business. The Corporation will need further financings to operate over the next 12 months.

### **1. Nature of operations and going concern (continued)**

#### *Going concern (continued)*

Management acknowledges that uncertainty remains over the ability of the Corporation to meet its funding requirements but believes that financing will be available and continues to explore debt and equity financing options that would provide the Corporation with sufficient cash to continue with its exploration activities.

There is, however, no assurance that the sources of funding described above will be available to the Corporation, or that they will be available on terms and a timely basis that are acceptable to the Corporation. Accordingly, these unaudited condensed interim consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities, the reported expenses and the statement of financial position classifications used that would be necessary should the Corporation be unable to continue as a going concern. These adjustments could be material.

### **2. Basis of presentation and statement of compliance**

#### *Statement of compliance*

The Corporation applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC"). These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by IASB and interpretations issued by IFRIC.

The policies applied in these unaudited condensed interim consolidated financial statements are based on IFRSs issued and outstanding as of November 30, 2015, the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these unaudited condensed interim consolidated financial statements as compared with the most recent annual financial statements as at and for the year ended March 31, 2015. Any subsequent changes to IFRS that are given effect in the Corporation's annual financial statements for the year ending March 31, 2016 could result in restatement of these unaudited condensed interim consolidated financial statements.

#### *New standards not yet adopted and interpretations issued but not yet effective*

IFRS 9 – Financial Instruments was issued in November 2009 as the first step in its project to replace IAS 39 'Financial Instruments: Recognition and Measurement'. IFRS 9 introduces new requirements for classifying and measuring financial assets that must be applied starting January 1, 2018, with early adoption permitted. The IASB intends to expand IFRS 9 during the intervening period to add new requirements for classifying and measuring financial liabilities, de-recognition of financial instruments, impairment and hedge accounting. Earlier adoption is permitted.

### **3. Capital risk management**

The Corporation manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions; and
- to maximize shareholder return through enhancing the share value.

The Corporation monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Corporation may manage its capital structure by issuing new shares, repurchasing outstanding shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

The Corporation considers its capital to be equity, which comprises share capital, warrants, contributed surplus, non-controlling interest, and deficit, which at September 30, 2015, totaled \$11,811,415 (March 31, 2015 - \$10,516,491).

The Corporation manages capital through its financial and operational forecasting processes. The Corporation reviews its working capital and forecasts its future cash flows based on operating expenditures, and other investing and financing activities. The forecast is updated based on activities related to its mineral properties and deferred expenditures. Selected information is provided to the Board of Directors of the Corporation. The Corporation's capital management objectives, policies and processes have remained unchanged during the three and six months ended September 30, 2015.

The Company is not subject to any capital requirements imposed by a lending institution or regulatory body, other than of the TSX Venture Exchange ("TSXV") which requires adequate working capital or financial resources of the greater of: (i) \$50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of 6 months.

As of September 30, 2015, the Company may not be compliant with the policies of the TSXV. The impact of this violation is not known and is ultimately dependent on the discretion of the TSXV.

### **4. Financial risk management**

Financial risk

The Corporation's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate, foreign currency risk and commodity and equity price risk).

Risk management is carried out by the Corporation's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management.

(i) Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Corporation's credit risk is primarily attributable to cash. Cash is held with select major European and Canadian chartered banks, from which management believes the risk of loss to be minimal.

**September 30, 2015**

**(Expressed in Canadian dollars)**

**(Unaudited)**

---

#### **4. Financial risk management (continued)**

##### (ii) Liquidity risk

Liquidity risk is the risk that the Corporation will not have sufficient cash resources to meet its financial obligations as they come due. The Corporation's liquidity and operating results may be adversely affected if its access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or matters specific to the Corporation. The Corporation generates cash flow primarily from its financing activities. The Corporation prepares annual capital expenditure budgets, which are monitored and updated as required. In addition, the Corporation requires authorization for expenditures on projects to assist with the management of capital. The Corporation's financial liabilities comprise accounts payable and other liabilities, which are due within normal trade terms, generally 30 days.

##### (iii) Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and commodity and equity prices.

###### (a) Interest rate risk

The Corporation currently does not have any interest bearing debt and, as such, the Corporation's current exposure to interest rate risk is minimal as at September 30, 2015.

###### (b) Foreign currency risk

The Corporation's functional and reporting currency is the Canadian dollar and the Corporation holds cash balances in Euro which could give rise to exposure to foreign exchange risk. It is not the Corporation's policy to hedge its foreign currency.

###### (c) Commodity and equity price risk

The Corporation is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Corporation closely monitors commodity prices, as they relate to precious and base metals and other minerals, and the stock market to determine the appropriate course of action to be taken by the Corporation.

Commodity price risk could adversely affect the Corporation. In particular, the Corporation's future profitability and viability of development depend upon the world market price of precious and base metals and other minerals. Precious and base metals and other mineral prices have fluctuated widely in recent years. There is no assurance that, even if commercial quantities of precious and base metals and other minerals are produced in the future, a profitable market will exist for them. As of September 30, 2015, the Corporation was not a precious mineral, base metals and other minerals producer. Even so, commodity price risk may affect the completion of future equity transactions such as equity offerings and the exercise of stock options and warrants. This may also affect the Corporation's liquidity and its ability to meet its ongoing obligations.

**4. Financial risk management (continued)****Sensitivity analysis**

As at September 30, 2015, \$12,024 was held in Canadian Dollars and €3,599 was held in Euro. Based on management's knowledge and experience of the financial markets, the Corporation believes the following movements are reasonably possible over one year:

The Corporation is exposed to currency risk to the extent that monetary assets and liabilities held by the Corporation are not denominated in Canadian dollars. The Corporation has not entered into any foreign currency contracts to mitigate this risk.

The Corporation holds balances in foreign currencies which could give rise to exposure to foreign exchange risk. Sensitivity to a plus or minus 10% change in the foreign exchange rate of the Euro against the Canadian dollar would affect the reported (loss) income and comprehensive (loss) income by approximately \$55,000.
