1. Reporting Entity

Loon Energy Corporation (õ**Loon**ö or the õ**Company**ö) was incorporated pursuant to the provisions of the Business Corporation Act (Alberta) on October 30, 2008 in conjunction with the reorganization by legal plan of arrangement of Loon Energy Inc. (õ**Loon Energy**ö). The reorganization of Loon Energy resulted in the Company receiving the net assets associated with resource properties located in Colombia and Peru.

2. Basis of Preparation

(a) Statement of compliance and Basis of Presentation

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting and do not include all the information required for full annual financial statements.

These condensed interim financial statements have been prepared following the same accounting policies and methods of computation as the consolidated financial statements of the Company for the year ended December 31, 2012, except as described in note 2(b). The disclosures provided herein are incremental to those included within the annual financial statements and certain disclosures which are normally required to be included in the notes to the annual financial statements have been condensed or omitted. These condensed interim financial statements should be read in conjunction with the financial statements and notes thereto in the Companyos annual filings for the year ended December 31, 2012.

These condensed consolidated interim financial statements were approved by the Companyos Board of Directors on November 27, 2013.

(b) Going Concern

The Company is an oil and gas exploration and development company. The Company only properties at present are in Colombia, have no proved reserves and do not generate positive net production revenue.

These condensed consolidated interim financial statements have been prepared on a going concern basis, which contemplates the realization of assets and settlement of liabilities in the normal course of business and do not reflect adjustments that would otherwise be necessary if the going concern assumption was not valid. To date, the Company's exploration and development operations have been financed by way of equity issuances, debt facilities and by farm-out arrangements with third parties who pay for all or a portion of the Company's expenditures to earn a portion of the Company's ownership interests. As at September 30, 2013 the Company has a working capital deficiency of \$135,877 and incurred a net loss of \$494,472 for the nine month period ended September 30, 2013. The Company is pursuing international oil and gas opportunities and will require additional capital to fund the working capital deficit, ongoing operating activities and international exploration activities. The need to raise capital to fund the working capital deficit, ongoing operations, acquire additional concessions and for exploration and development opportunities creates a significant doubt as to the Company®s ability to continue as a going concern. There are no guarantees that additional capital, either through additional equity, debt or farm-out arrangements will be available when needed.

(c) Adoption of new accounting pronouncements

On January 1, 2013, the Company adopted new standards with respect to consolidation (IFRS 10), joint arrangements (IFRS 11), disclosure of interest in other entities (IFRS 12), fair value measurements (IFRS 13), amendments to financial instrument disclosures (IFRS 7) as well as amendments related to investments in associates and joint ventures (IAS 28). The adoption of these amendments and standards had no impact on the amounts recorded in the consolidated financial statements as at January 1, 2013 or on the comparative periods.
