1. NATURE AND CONTINUANCE OF OPERATIONS

Red Metal Resources Ltd. (the “Company”) is involved in acquiring and exploring mineral properties in Chile through its wholly-owned subsidiary, Minera Polymet SpA (“Polymet”) organized under the laws of the Republic of Chile. The Company has not determined whether its properties contain mineral reserves that are economically recoverable.

The Company’s head office is located at 1130 West Pender Street, Suite 820, Vancouver, British Columbia, V6E 4A4. Its registered office address is 800 - 885 West Georgia Street, Vancouver, BC V6C 3H1. The Company's mailing address is 278 Bay Street, Suite 102, Thunder Bay, Ontario, P7B 1R8. Polymet's head office is located in Vallenar, III Region of Atacama, Chile.

These condensed interim consolidated financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. As at April 30, 2024, the Company has not advanced its mineral properties to commercial production and is not able to finance day to day activities through operations. The Company’s continuation as a going concern is dependent upon the successful results from its mineral property exploration activities and its ability to attain profitable operations and generate funds there from and/or raise equity capital or borrowings sufficient to meet current and future obligations. As at April 30, 2024, the Company had \$13,103 cash and working capital deficit of \$3,433,377. The Company raises financing for its exploration and development activities in discrete tranches to finance its activities for limited periods only. The Company has identified that further funding may be required for working capital purposes, and to finance the Company’s exploration program and development of mineral assets. These conditions may cast substantial doubt on the Company’s ability to continue as a going concern.

On May 23, 2024, the Company completed a share consolidation (reverse stock split) on the basis of one new share for every three old shares. As a result of the share consolidation, the number of issued and outstanding ordinary shares was reduced from 54,866,625 to 18,288,861 shares. The share consolidation did not change the proportionate ownership interest of any shareholder or the total equity attributable to the Company's shareholders. All references to share and per share amounts in these condensed interim consolidated financial statements and accompanying notes have been retrospectively adjusted to reflect the share consolidation as if it had occurred at the beginning of the earliest period presented.

These condensed interim consolidated financial statements do not give effect to any adjustment which would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the consolidated financial statements and such adjustments may be material.

2. BASIS OF PREPARATION

These condensed interim consolidated financial statements were authorized for issue on June 27, 2024, by the directors of the Company.

a) Statement of Compliance and Basis of Presentation

The condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee which the Canadian Accounting Standards Board has approved for incorporation into Part 1 of the CPA Canada Handbook - Accounting including IAS 34 Interim financial reporting. The condensed interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended January 31, 2024.

The condensed interim consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments which have been measured at fair value.

Balance sheet items are classified as current if receipt or payment is due within twelve months. Otherwise, they are presented as non-current.

b) Material accounting policies

The accounting policies applied in these condensed interim consolidated financial statements are consistent with those applied in the preparation of the Company's consolidated financial statements for the year ended January 31, 2024.

c) Functional & presentation currencies

The functional currency of the Company is the Canadian dollar. The functional currency of the Company's subsidiary, Polymet, is the Chilean peso, which is determined to be the currency of the primary economic environment in which Polymet operates.

d) Accounting standards issued but not yet effective

Accounting standards, amendments to standards, or interpretations have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's condensed interim consolidated financial statements.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of these condensed interim consolidated financial statements in conformity with IFRS requires management to make assumptions and estimates that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of income and expenses during the reporting period. These condensed interim consolidated financial statements include estimates which, by their nature, are uncertain. These assumptions and associated estimates are based on historical experience and other factors that are considered to be relevant. The current market conditions introduce additional uncertainties, risks and complexities in management's determination of the estimates and assumptions used to prepare the Company's financial results. As volatility in financial markets is an evolving situation, management cannot reasonably estimate the length or severity of the impact on the Company. As such, actual results may differ from estimates and the effect of such differences may be material. The impacts of such estimates are pervasive throughout the financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and the revision affects both current and future periods.

The following are critical judgments that management has made in the process of applying accounting policies and that have the most significant effect on the amounts recognized in the financial statements:

- classification/allocation of expenses as exploration and evaluation expenditures;
- classification and measurement of the Company's financial assets and liabilities;
- determination that the Company is able to continue as a going concern; and
- determination whether there have been any events or changes in circumstances that indicate the impairment of the Company's exploration and evaluations assets.

Key sources of estimation uncertainty include the following:

- the carrying value and recoverability of exploration and evaluation assets;
- recoverability and measurement of deferred tax assets;
- provisions for restoration and environmental obligations and contingent liabilities; and
- measurement of share-based transactions.

4. FINANCIAL INSTRUMENTS AND RISKS

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels at the fair value hierarchy are:

Level 1 — quoted prices in active markets for identical assets and liabilities.

Level 2 — observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3 — unobservable inputs in which there is little or no market data available, which require the reporting entity to develop its own assumptions.

The Company has classified its cash as measured at fair value in the statement of financial position, using level 1 inputs.

Categories of financial instruments

As at:	April 30, 2024	January 31, 2024
Financial assets:

Due to related parties	\$ 616,055	\$ 600,223
Notes payable	\$ 2,708,113	\$ 2,561,691

Assets and liabilities measured at fair value on a recurring basis:

As at April 30, 2024	Level 1	Level 2	Level 3	Total
Cash	\$ 13,103	\$ -	\$ -	\$ 13,103

Accounts payable, accrued liabilities, due to related parties, and notes payable approximate their fair value due to the short-term nature of these instruments.

Risk management

The Company has exposure to the following risks from its use of financial instruments: credit risk, market risk and liquidity risk. Management, the Board of Directors, and the Audit Committee monitor risk management activities and review the adequacy of such activities.

Credit risk:

Credit risk is the risk of potential loss to the Company if a customer or counter party to a financial instrument fails to meet its contractual obligations. The Company's credit risk is limited to the carrying amount on the statement of financial position and arises from the Company's cash, which is held with a high-credit quality financial institutions in Canada and in Chile. As such, the Company's credit risk exposure is minimal.

Market risk:

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and equity prices.

i. Interest rate risk:

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has minimal interest rate risk as it has no interest accumulating financial assets that may become susceptible to interest rate fluctuations.

ii. Currency risk:

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company has offices in Canada and Chile, and holds cash in Canadian, United States, and Chilean currencies. A significant change in the currency exchange rates between the Canadian dollar relative to US dollar and Chilean Peso could have an effect on the Company's results of operations, financial position, and/or cash flows. At April 30, 2024, the Company had no hedging agreements in place with respect to foreign exchange rates. As the majority of the

transactions of the Company are denominated in CAD and Chilean Peso currencies, movements in the foreign exchange rates are not expected to have a material impact on the consolidated statements of comprehensive loss.

iii. Equity price risk:

Equity price risk is the risk that the fair value of equity/securities decreases as a result of changes in the levels of equity indices and the value of individual stocks. The Company is not exposed to equity price risk as it does not have any investments in marketable securities.

Liquidity risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company ensures that there are sufficient funds to meet its short-term business requirements, considering its anticipated cash flows. Historically, the Company's sources of funding have been through equity financings and loans from the Company's management and its major shareholder. The Company's access to financing is uncertain, and there can be no assurance of continued access to significant debt or equity funding.

The following table details the remaining contractual maturities of the Company's financial liabilities as of April 30, 2024:

	Within 1 year	1-5 years	5+ years
Accounts payable and accrued liabilities	\$ 199,507	\$ -	\$ -
Amounts due to related parties	616,055	-	-
Loans payable	2,708,113	-	-
Withholding taxes payable	-	-	139,451

5. EXPLORATION AND EVALUATION ASSETS

As of April 30, 2024, and January 31, 2024, the Company's interest in exploration and evaluation assets consisted of three active copper-gold projects on two properties, namely the Farellón and Perth Projects both located on the Carrizal Property, and the Mateo Project located on the Mateo Property. The Company capitalizes acquisition costs incurred on the Company's exploration and evaluation properties; the costs associated with exploration and drilling programs as well as property tax payments are expensed as period costs in the period they are incurred. Following tables present acquisition costs associated with each property as of April 30, 2024 and January 31, 2024:

9. SHARE CAPITAL

The Company is authorized to issue an unlimited number of common shares without par value (the "Shares").

The Company did not issue any Shares during the three months ended April 30, 2024.

Share consolidation

On May 23, 2024, the Company completed a share consolidation (reverse stock split) on the basis of one new share for every three old shares. As a result of the share consolidation, the number of issued and outstanding ordinary shares was reduced from 54,866,625 to 18,288,861 shares. The share consolidation did not change the proportionate ownership interest of any shareholder or the total equity attributable to the Company's shareholders. All references to share and per share amounts in the financial statements and accompanying notes have been retrospectively adjusted to reflect the share consolidation as if it had occurred at the beginning of the earliest period presented.

Warrants

The changes in the number of warrants outstanding during the three-month period ended April 30, 2024, and for the year ended January 31, 2024, are as follows:

(b) On July 29, 2020, Polymet entered into mining royalty agreements (the “NSR Agreements”) with the Company’s director and former CEO, CFO, and the major shareholder (the “Purchasers”) to sell net smelter returns (the “NSR”) on its mineral concessions. NSR range from 0.3% to 1.25% depending on particular concession and the Purchaser. The Company’s director and former CEO agreed to acquire the NSR for \$2,063 (US\$1,500), CFO agreed to acquire the NSR for \$1,375 (US\$1,000), and the major shareholder agreed to acquire the NSR for \$3,438 (US\$2,500).

The NSR will be paid quarterly once commercial exploitation begins and will be paid on gold, silver, copper and cobalt sales. If, within two years, the Company does not commence commercial exploitation of the mineral properties, an annual payment of \$10,000 per purchaser will be paid.

Pursuant to Chilean law, the NSR agreements will come in force only when registered against the land title in Chile. Due to temporary safety restrictions associated with COVID-19 pandemic, the registration of the NSR Agreements has been deferred, therefore the payments made by the CEO, CFO, and the major shareholder have been recorded as advances on the books of the Company and will be applied towards the NSR Agreements, once they are fully legalized.
