1. Nature and Continuance of Operations

Deploy Technologies Inc. (the "Company") was originally incorporated on 5 November 1998 in the State of Delaware, USA, under the name Concept Development Group, Inc. In May 2004, the Company acquired 100% of Kaleidoscope Venture Capital, Inc. (formerly Vocalscape Networks, Inc.) ("Kaleidoscope") and changed its name to Vocalscape, Inc. In November 2005, the Company changed its name to Nevstar Precious Metals Inc. and in September 2008, the Company changed its name to Deploy Technologies Inc.

On 15 September 2010, the Company completed a merger with its newly incorporated and wholly-owned subsidiary, Deploy Acquisition Corp., a Nevada corporation, formed for the sole purpose of changing the Company's state of incorporation from the State of Delaware to the State of Nevada. Although Deploy Acquisition Corp. was the surviving corporation, upon the completion of the merger it assumed the name of the Company and all the assets, obligations and commitments of the Company. Concurrent with the merger, the authorized capital of the Company decreased to 100,000,000 common shares from 500,000,000 common shares.

The Company's Nevada Charter authorizes it to issued two classes of equity securities. Accordingly, on 29 September 2011, the Company increased its authorized capital to include 2,900,000 Class A Preferred Shares (Note 10).

The Company is a development stage company. The Company is devoting all of its present efforts to the marketing and sale of its fleet management technology in order to generate revenue. The Company only recently commenced its planned principal operations, and, accordingly, it has generated minimal revenues to date.

The head office and principal address of the Company is 19011 - 1153 56th Street, Delta, BC, V4L 2A2.

At 31 October 2013, the Company had cash and cash equivalents of \$15,053 (31 July 2013 – \$1,913) and a working capital deficit of \$616,275 (31 July 2013 – \$611,716). The funds on hand at 31 October 2013 are not sufficient to meet the Company's planned corporate, administrative and development activities for the next 12 months. Additional financing will be required to meet the Company's obligations as they fall due. Because of this uncertainty, there is significant doubt about its ability to continue as a going concern.

These condensed interim financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will be able to continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business.

Several adverse conditions cast significant doubt upon the validity of this assumption. Consistent with other entities in the development stage, the Company has incurred operating losses since inception, is generating no revenue, is unable to self-finance operations, and has significant cash requirements to meet its overhead and continue its development activities. The Company's ability to continue as a going concern is dependent upon management's ability to secure additional financing. While management has been successful in obtaining funding in the past, there can be no assurance that it will be able to do so in future.

If the going concern assumption were not appropriate for these condensed interim financial statements then adjustments would be necessary to the carrying value of assets and liabilities, the reported expenses and the classifications on the statement of financial position used, and such adjustments would be material.

2. Basis of Preparation

a) Basis of Presentation

These condensed interim financial statements have been prepared on a historical cost basis except for certain financial instruments, which are measured at fair value. These financial statements are presented in US dollars except where otherwise indicated.

b) Statement of Compliance

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). Therefore, these condensed interim financial statements comply with International Accounting Standards ("IAS") 34, "Interim Financial Reporting".

These condensed interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the Company's annual financial statements for the year ended 31 July 2013 prepared in accordance with and using accounting policies in full compliance with International Financial Reporting Standards ("IFRS") and International Accounting Standards ("IAS") issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

c) Adoption of new and revised standards and interpretations

At the date of authorization of these financial statements, the IASB and IFRIC has issued the following new and revised standards, amendments and interpretations which are not yet effective during the period ended 31 October 2013.

- IFRS 9 "Financial Instruments: Classification and Measurement" is a new financial instruments standard effective for annual periods beginning on or after 1 January 2015 that replaces IAS 39 and IFRIC 9 for classification and measurement of financial assets and financial liabilities.
- IFRS 12, "Disclosure of Interests in Other Entities" is a new standard effective for annual periods beginning on or after 1 January 2013 that replaces disclosure requirements in IAS 27 (as amended in 2008), IAS 28 (as revised in 2003) and IAS 31.
- IFRS 13, "Fair Value Measurement" is a new standard effective for annual periods beginning on or after 1 January 2013 that replaces fair value measurement guidance in other IFRSs.
- IAS 32 (Amendment), "Offsetting Financial Assets and Financial Liabilities" is effective for annual periods beginning on or after 1 January 2014 that clarifies the application of offsetting requirements.
- IAS 1 (Amendment), "Presentation of Financial Statements" is effective for annual periods beginning on or after 1 January 2013 that clarifies the requirements for comparative information.

The Company has not early adopted these standards, amendments and interpretations and anticipates that the application of these standards, amendments and interpretations will not have a material impact on the financial position and financial performance of the Company.

3. Significant Accounting Policies

These condensed interim financial statements follow the same accounting policies and methods of their application as the Company's full annual financial statements prepared in accordance with IFRS and as such should be read in conjunction with the Company's full annual financial statements for the year ended 31 July 2013. There have been no changes to the accounting policies and methods applied in the three month period 31 October 2013.

Fair value

The fair value of financial assets and financial liabilities at amortized cost is determined in accordance with generally accepted pricing models based on discounted cash flow analysis or using prices from observable current market transactions. The Company considers that the carrying amount of all its financial assets and financial liabilities recognized at amortized cost in the financial statements approximates their fair value due to the short term maturity of these instruments and the nature of the loans.

4. Fair Value of Financial Instruments - Continued

The following table provides an analysis of the Company's financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to 3 based on the degree to which the inputs used to determine the fair value are observable.

- Level 1 fair value measurements are those derived from quoted prices in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1, that are observable either directly or indirectly.
- Level 3 fair value measurements are those derived from valuation techniques that include inputs that are not based on observable market data. As at 31 October 2013, the Company does not have any Level 3 financial instruments.

Management of financial risks

The financial risk arising from the Company's operations are credit risk, liquidity risk, interest rate risk and currency risk. These risks arise from the normal course of operations and all transactions undertaken are to support the Company's ability to continue as a going concern. The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Credit risk

The Company is not exposed to credit risk as it does not hold cash in excess of federally insured limits, with major financial institutions.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company is exposed to liquidity risk as it has a working capital deficit of \$536,685 as at 31 October 2013. However, the Company manages liquidity risk by continuously monitoring actual and projected cash flows and matching the maturity profile of financial assets and liabilities.

4. Fair Value of Financial Instruments - Continued

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The risk that the Company will realize a loss as a result of a decline in the fair value of the term deposits is limited.

Currency risk

The Company is exposed to currency risk by incurring expenditures and holding assets denominated in currencies in the Canadian dollar. Assuming all other variables remain constant, a 1% change in the Canadian dollar against the US dollar would not result in a significant change to the Company's operations.

Other risks

The Company is not exposed to other risks unless otherwise noted.

7. Fleet Management Technology

On 10 November 2008, the Company acquired fleet management technology from a company controlled by the Chief Executive Officer of the Company and Vice President of Operations of the Company, in exchange for the issuance of 30,000,000 Common Shares of the Company valued at \$30,000. The technology is focusing on enabling organizations that use it to become more efficient, productive and profitable through the use of their fleet assets.

The fleet management technology was completed during the year ended 31 July 2012; however, no depreciation expense was recorded during the period ended 31 October 2013 as the technology has not been placed in use for the purpose of earning revenue.

During the year ended 31 July 2013, an addition to the fleet management technology includes \$7,572 incurred to obtain a Canadian PCT patent and for the application of other international patents.

On 6 April 2013, the Company entered into an agreement with a third party to receive an exclusive license to the Air Brake Monitor technology. This technology is to be incorporated with the fleet management technology in the development of marketable products. In exchange, the Company is obligated to make royalty payments of 15% of net sales relating to products utilizing the technology. During the period ended 31 October 2013, no related sales have been made by the Company and no development costs have been incurred by the Company (Note 17).
