*Adjusted EBITDA is a Non-GAAP metric used by management that does not have any standardized meaning prescribed by U.S. GAAP and may not be comparable to similar measures presented by other companies. Management defines the Adjusted EBITDA as the Income (loss) from operations, as reported, before interest, taxes, and adjusted for removing other non-cash items, including stock-based compensation expense, gain on settlement, loss on impairment, depreciation, and further adjustments to remove acquisition related costs or gains. Management believes Adjusted EBITDA is a useful financial metric to assess its operating performance on a cash adjusted basis before the impact of non-cash items and acquisition activities. The most comparable financial measure calculated and presented in accordance with U.S. GAAP is net income (loss), which was presented above prior to the Adjusted EBITDA figure.
