James Nelson states, "Pure Energy is one of a few junior lithium companies that Tesla Inc. (TSLA) has signed a lithium Supply Agreement (Sept 16, 2015) with. Management feels that the two lithium projects have very strategic value as we feel the results already achieved justify further drilling. Management has also been very active to acquire multiple gold, nickel and copper prospects in the Golden Triangle of British Columbia. Management anticipates commencing operations in 2017 on multiple projects and we are very optimistic about the future growth of the company."
