SpearMint Resources Inc. Encounters Positive Gold and Copper Indicators on its Golden Triangle Gold Prospects in BC

August 9, 2019 - SpearMint Resources Inc. (CSE: SPMT) (OTC Pink: SPMTF) (FSE: A2AHL5) (the “**Company**”) is pleased to report on results of a recent sampling program on its “Golden Triangle Gold Prospects” directly bordering GT Gold Corp. (GTT.v) in the Golden Triangle of BC.

James Nelson, President of SpearMint stated, “We are very encouraged with the initial results on the ‘Golden Triangle Gold Prospects’ that directly borders GT Gold Corp (GTT.v). The sampling program returned positive results that are worthy of ‘on-the-ground’ follow-up towards defining and tightening up possible mineralized drill targets focused around the highest gold and copper values. Mining sector sentiment is gaining momentum as the price of gold has recently hit all-time highs in Canadian Dollars, in addition, we remain very active in the Golden Triangle and look forward to the majority of our work programs being carried out in this region during the summer.”

The sampling survey was carried out by Apex Geoscience Ltd., on behalf of SpearMint. Of the samples collected, a sulphide-bearing float sample collected from a creek in the GT-2 mineral tenure returned a significant assay value of **264 ppb Au (gold)** and a **1740 ppm Cu (copper)**.
