We also recently closed on the acquisition of the 'Green Clay Lithium Project' in the Clayton Valley of Nevada where we plan to begin a work program shortly. Additionally, a phase III drill program on our flagship Clayton Valley Lithium project is being planned for Fall 2021 with the goal to build upon our recently released a maiden resource estimate which included a total of 1,006,000 tonnes of Lithium Carbonate Equivalent (LCE). We are well funded for multiple drill and work programs in the US and Canada and look forward to building upon an already active and successful year."
