

# Corporate Update

Vancouver, British Columbia--(Newsfile Corp. - November 30, 2022) - **Spearmint Resources Inc. (CSE: SPMT) (OTC Pink: SPMTF) (FSE: A2AHL5) (the "Company" or "Spearmint")** wishes to announce it has received the results of the drill program on the 185-acre "Goose Gold Project" in Newfoundland. Four diamond drill holes were located and drilled for a total 677 meters of drilling completed. The drill results did not provide evidence of economical gold grades. Therefore, the Company has decided not to pursue this project as management has determined all of the primary targets were tested. Moving forward, the Company will continue to focus on its flagship McGee lithium project in Nevada, as well as its Green Clay lithium project, both located in Clayton Valley.

On June 17, 2022, the Company announced that it has received the updated Technical Report and Mineral Resource estimate for the 100-per-cent-owned McGee Lithium Clay Deposit in Clayton Valley, Nevada. The Technical Report included an updated Mineral Resource estimate of 1,369,000 indicated tonnes and 723,000 inferred tonnes of lithium carbonate equivalent (LCE) for a total of 2,092,000 tonnes of LCE, more than doubling the maiden resource estimate announced on June 11, 2021. The Technical Report and Mineral Resource Estimate was prepared by Derek Loveday, P.Geo. and Mariea Kartick, P.Geo. of Stantec Consulting Services Ltd. ("Stantec") in conformity with CIM "Estimation of Mineral Resource and Mineral Reserves Best Practices" guidelines and were reported in accordance with the Canadian Securities Administrators NI 43-101.

### Qualified Person

Mr. Frank Bain, P.Geo., a Qualified Person as defined by National Instrument 43-101 has reviewed and approved the scientific and technical disclosure contained within this news release.

### About Spearmint Resources

Spearmint's primary projects include three lithium projects in Clayton Valley, Nevada; the 'McGee Lithium Clay Deposit' which has a resource estimate of 1,369,000 indicated tonnes and 723,000 inferred tonnes of lithium carbonate equivalent (LCE) for a total of 2,092,000 tonnes of LCE., directly bordering Pure Energy Minerals & Cypress Development Corp.; the 'Elon Lithium Brine Project' which

has access to some of the deepest parts of the only lithium brine basin in production in North America; and the recently acquired 'Green Clay Lithium Project' comprised of 97 contiguous claims totaling approximately 2,000 acres.

Spearmint's other primary projects include the Perron-East Gold Project consisting of 5 mineral claim blocks covering 11,608 acres located in the Abitibi greenstone belt of northwestern Quebec in the direct vicinity of Amex Exploration Inc.'s Perron property and past-producing Normetal mine. For a complete list of Spearmint's projects please visit [spearmintresources.ca](http://spearmintresources.ca). Management cautions that past results or discoveries on properties in proximity to Spearmint may not necessarily be indicative to the presence of mineralization on the Company's properties.
