

Rockland Minerals Corp.

**MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE QUARTER ENDED SEPTEMBER 30, 2016**

This Management's Discussion and Analysis ("MD&A") should be read in conjunction with the unaudited financial statements and notes thereto for the period ended September 30, 2016 of Rockland Minerals Corp. (the "Company"). Such financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS").

All dollar amounts are expressed in Canadian dollars unless otherwise indicated.

DATE

This MD&A is prepared as of November 28, 2016.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this report are forward-looking statements, which reflect our management's expectations regarding our future growth, results of operations, performance and business prospects and opportunities including statements related to the development of existing and future property interests, availability of financing and projected costs and expenses. Forward-looking statements consist of statements that are not purely historical, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits we will obtain from them. These forward-looking statements reflect management's current views and are based on certain assumptions and speak only as of the date of this report. These assumptions, which include management's current expectations, estimates and assumptions about current mineral property interests, the global economic environment, the market price and demand for commodities and our ability to manage our property interests and operating costs, may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking statements, including: (1) a downturn in general economic conditions, (2) a decreased demand or price of precious and base metals, (3) delays in the start of projects with respect to our property interests, (4) inability to locate, acquire, or re-negotiate property interests, (5) the uncertainty of government regulation and politics in the province of Quebec regarding mining and mineral exploration, (6) potential negative financial impact from regulatory investigations, claims, lawsuits and other legal proceedings and challenges, and (7) other factors beyond our control.

There is a significant risk that such forward-looking statements will not prove to be accurate. Investors are cautioned not to place undue reliance on these forward-looking statements. No forward-looking statement is a guarantee of future results. We disclaim any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. Additional information about these and other assumptions, risks and uncertainties are set out in the section entitled "Risk Factors" below.

DESCRIPTION OF BUSINESS

The Company was incorporated under the laws of the province of British Columbia on June 12, 2008. The Company is a junior mineral exploration company engaged in the business of acquiring, exploring and evaluating natural resource properties and has recently focused on the acquisition of interests in, and exploration for, Gold, Copper, Nickel, Platinum Group Metals in the province of Quebec, Canada. The Company completed an initial public offering on June 28, 2010 and began trading on the TSX Venture Exchange (the “Exchange”) under the symbol “RL” on July 2, 2010. For further details, please see the final prospectus of the Company dated March 29, 2010, which is available on SEDAR at www.sedar.com. This Management’s Discussion and Analysis (“MD&A”) should be read in conjunction with the audited financial statements and notes thereto for the year ended December 31, 2015 and the unaudited financial statements and notes thereto for the period ended September 30, 2016 of Rockland Minerals Corp. (the “Company”). Such financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

The Company currently has four material exploration properties consisting of the Blue Lake copper- nickel-PGM property (“Blue Lake Property”), Retty Lake copper-nickel-PGM property (the “Retty Lake Property”), Blue Lake South copper- nickel-PGM property (“Blue Lake South Property”) and the Schefferville Gold Property (the “Schefferville Gold Property”) all located in the Schefferville area of Quebec, Canada, the details of which are set out below. The Company has not yet determined whether its property interests contain reserves that are economically recoverable. The recoverability of amounts shown for resource properties and related deferred exploration expenditures are dependent upon the discovery of economically recoverable reserves, confirmation of the Company’s interest in the underlying mineral claims, the ability of the Company to obtain necessary financing to complete the development of the resource property and upon future profitable production or proceeds from the disposition thereof.

EXPLORATION ACTIVITY

BLUE LAKE PROPERTY – SCHEFFERVILLE REGION, QUEBEC, CANADA

On November 16, 2011, Rockland entered into an option and joint venture agreement (“Blue Lake Option and Joint Venture Agreement”) with La Fosse Platinum Group Inc. (“La Fosse”) to earn a 55% interest in Blue Lake, Jimmick, Chance Lake, Gance Lake, Walsh Lake and Lac Aulneau properties in the southern Labrador Trough (“the Blue Lake property”). On November 28, 2012 and April 25, 2014 Rockland and La Fosse amended the Blue Lake Option and Joint Venture Agreement. On May 14, 2015 the Company returned the Jimmick, Chance Lake, Gance Lake, Walsh Lake and Lac Aulneau properties to La Fosse leaving only the Blue Lake property under option from La Fosse. On August 25, 2016, the Company cancelled the Blue Lake option agreement and returned the claims to La Fosse in good standing.

Under the amended option and joint venture agreement, the Company had the option to acquire a 55% interest in the property over a four-year period by making cash payments totalling \$350,000 and issuing a total of 5,500,000 common shares and by spending \$4,500,000 in exploration on the property. The option and joint venture covers Blue Lake, Jimmick, Chance Lake, Gance Lake, Walsh Lake and Lac Aulneau properties. As at September 30, 2016, the Company had made \$180,000 in cash payments to La Fosse and had issued 5,500,000 shares to La Fosse (and has made expenditures of \$1,897,474 on the property which includes the 12% allowable management charges under the option agreement). The details of the cash and common share payments are provided below:

Cash and common share payments to La Fosse:

- a) Payment of \$50,000 before December 31, 2011 and 1,000,000 shares (paid and issued)
- b) \$45,000 and 1,500,000 shares on or before November 16, 2012 (paid and issued);
- c) \$25,000 and 1,000,000 shares on or before November 16, 2013 (paid and issued);
- d) \$25,000 and 1,000,000 shares on or before November 16, 2014 (paid and issued);
- e) \$35,000 and 1,000,000 shares on or before November 16, 2015 (paid and issued);
- f) \$55,000 on or before November 16, 2016 (not required - cancelled);
- g) \$55,000 on or before November 16, 2017 (not required - cancelled); and
- h) \$60,000 on or before November 16, 2018 (not required - cancelled).

Work commitment expenditures:

- a) \$700,000 on or before November 16, 2012 (completed);
- b) \$400,000 on or before November 16, 2013 (completed);
- c) \$Nil on or before November 16, 2014 (completed);
- d) \$500,000 on or before November 16, 2015 (completed);
- e) \$900,000 on or before November 16, 2016 (not required - cancelled);
- f) \$1,000,000 on or before November 16, 2017 (not required - cancelled);
- g) \$1,000,000 on or before November 16, 2018 (not required - cancelled).

RETTY LAKE PROJECT – SCHEFFERVILLE REGION, QUEBEC, CANADA

The Company completed its 100% earn-in on the Retty Lake property on February 12, 2013. On June 30, 2008, the Company entered into an option agreement, as amended on January 14, 2010 (the “Retty Lake Option Agreement”), between the Company and Ernest D. Black, P. Eng. of Comox, British Columbia, whereby the Company was granted the sole and exclusive right and option to acquire an undivided 100% right, title and interest in all of the mineral claims making up the “Retty Lake Property”. Pursuant to the Retty Lake Option Agreement, the Company had been granted the exclusive right and option to acquire an undivided 100% right, title and interest in and to the Retty Lake Property by issuing 2,000,000 common shares to E.D. Black (issued), and by incurring aggregate cumulative expenditures on the Retty Lake Property of \$1,850,000 by March 31, 2014. On February 12, 2013, Rockland completed its 100% earn-in on the Retty Lake property by issuing Ernest D. Black 1,600,000 common shares and in return Mr. Black waived all remaining exploration work commitments.

The Retty Lake Property is subject to a 3% net smelter return royalty (“NSR”) from the sale of mineral products from the Retty Lake Property following the commencement of commercial production less allowable deductions, to be vested in the estate of E.D. Black upon the exercise of the option contemplated in the Retty Lake Option Agreement. The NSR is subject to a buy-back right of the Company to repurchase the NSR for \$3,000,000 and in the event the estate of E.D. Black intends to sell all or part of the NSR, the Company has the right to require the estate of E.D. Black to sell all or part of the NSR to the Company (the “NSR ROFR”) on the terms and conditions set out in a notice which will be open for acceptance by the Company for a period of 30 days from receipt of the notice.

The Company will be required to raise additional funds in order to keep the Retty Lake claims in good standing in relation to claim renewal costs required by the MERN. The Company has and will add or drop claims based on geological merit and as financial resources allow.

SCHEFFERVILLE GOLD PROPERTY – SCHEFFERVILLE REGION, QUEBEC, CANADA

On June 15, 2011, Rockland acquired a 55% interest in the Schefferville Gold Property by completing \$800,000 in exploration work, making cash payments totalling \$60,000 and issuing 600,000 common shares to Western Troy Capital Resources Inc (“Western Troy”) to complete the earn-in. Upon earn-in Rockland and Western Troy Capital Resources Inc formed a joint venture with Rockland having a 55% interest in the property and Western Troy Capital Resources Inc having a 45% interest. Subsequent to December 31, 2011, the Company further increased its participating interest in the Schefferville Gold property from 55% to 64% (leaving Western Troy with a 36% interest), based on relative mineral exploration expenditures, by incurring an additional \$375,973 in exploration expenditures.

The option and joint venture agreement with Western Troy states that once a Scoping Study is completed by the parties, Rockland at its sole election may earn an additional 15% interest, to 70%, in the Property (the “Additional Interest”) by solely funding a Bankable Feasibility Study. Rockland must notify Western Troy in writing of its election to exercise its right to earn the Additional Interest before the Bankable Feasibility Study is initiated or Western Troy has provided any funds for such Bankable Feasibility Study. Provided, however, that if Western Troy's interest in the Joint Venture is 35% or less at the time Rockland notifies Western Troy of such election, Rockland may only earn a maximum of 80% interest in the Property by funding the Bankable Feasibility Study and the Additional Interest earned by Rockland shall be reduced accordingly. Upon receipt of the Bankable Feasibility Study, the joint venture will proceed to fund the project on a pro rata basis and the standard dilution clause will apply.

Upon receipt of a Bankable Feasibility Study, the parties to the joint venture will formally commit to fund mine construction on a pro rata basis, and demonstrate funding to meet such obligation in a timely fashion. If either party is unable to meet its obligation at the construction decision point, such party's interest in the Property will be diluted in accordance with the dilution formula, and the diluting party will still be required to demonstrate partial funds available, subject to a further dilution as defined in the agreement. If the diluting party is unable to provide funding in order to maintain a 10% or above interest in the joint venture, its interest will then automatically be converted to a 2% NSR Royalty. Western Troy will retain a minimum 2% NSR Royalty in the Property of which 1% can be purchased for \$1,000,000 by Rockland at any time.

Under the Schefferville Gold Property Agreement, the Company is entitled to include in the expenditures charges for management supervision and administrative services of the Company equal to 10% of all expenditures made or incurred by the Rockland.

The Company will be required to raise additional funds in order to keep all the Schefferville gold claims in good standing in relation to claim renewal costs required by the MERN. The Company will add and or drop claims based on geological merit and as financial resources allow.

OVERALL PERFORMANCE

The Company was incorporated on June 12, 2008 and completed its initial public offering on June 28, 2010 and began trading on the TSX Venture Exchange (the "Exchange") under the symbol "RL" on July 2, 2010. As an exploration stage company, the Company has not generated revenues to date from its properties and anticipates that it will continue to require equity financing to fund operations until such time as its properties are put into commercial production on a profitable basis. Since incorporation, the Company identified the base metals, primarily Copper and Nickel, and the Precious Metals, including Platinum Group Metals ("PGM's") and Gold, sectors as a viable business opportunity to increase shareholder value. During the time since inception, the Company entered into Agreements regarding the Retty Lake Property, Blue Lake Property, Ashuanipi Property and the Schefferville Gold Property. In 2012, the Company terminated the Ashuanipi Property option agreement and on August 25, 2016, the Company terminated the Blue Lake option agreement. As a result, the Company has incurred ongoing costs in connection with the acquisition of the projects and exploration programs on the properties. Net loss for the three month period ended September 30, 2016 was \$571,659 compared to a net loss of \$425,202 for the three month period ended September 30, 2015. Management intends to concentrate its activities on the gold, platinum, palladium, copper, cobalt and nickel sectors and anticipates that expenses will increase as the Company carries out its exploration activities on its Quebec exploration properties.

RESULTS OF OPERATIONS

Quarter ended September 30, 2016

During the quarter ended September 30, 2016, the Company incurred expenses of \$571,659, primarily impairment expenses related to cancelling the Blue Lake option agreement of \$558,621, claims maintenance fees in relation to renewing the Blue Lake property claims of \$3,104, transfer agent and filing fees of \$1,340, professional fees of \$8,033, and office and miscellaneous costs of \$561. Net loss for the period ended September 30, 2016 was \$571,659. In comparison, during the quarter ended September 30, 2015, the Company incurred expenses of \$425,202, primarily exploration expenses of \$383,890 relating to the Retty Lake and Blue Lake Properties, investor relations fees of \$956, salaries and benefits of \$37,819, office and miscellaneous costs of \$247, transfer agent and filing fees of \$1,090, and professional fees of \$1,200. Net loss for the quarter ended September 30, 2015 was \$419,124.

SUMMARY OF QUARTERLY RESULTS

The following is a summary of the Company's financial results for the eight most recently completed quarters:

	Quarter Ended September 30, 2016 \$	Quarter Ended June 30, 2016 \$	Quarter Ended March 31, 2016 \$	Quarter Ended December 31, 2015 \$	Quarter Ended September 30, 2015 \$	Quarter Ended June 30, 2015 \$	Quarter Ended March 31, 2015 \$	Quarter Ended December 31, 2014 \$
	09/30/2016	06/30/2016	03/31/2016	12/31/2015	09/30/2015	06/30/2015	03/31/2015	12/31/2014
Revenue	Nil	Nil	Nil	Nil	Nil	Nil	Nil	Nil
Net income (loss)	(571,659)	(70,328)	(62,557)	(236,282)	(419,124)	(171,193)	(61,304)	(46,513)
Loss per share, basic and diluted	(0.01)	(0.00)	(0.00)	(0.01)	(0.01)	(0.00)	(0.00)	(0.00)

As a mineral exploration company, the Company has not generated any revenues to date from its properties. On a quarter-by-quarter basis the loss can fluctuate significantly due to exploration activities during the period.

An analysis of the quarterly results over the eight quarters shows little variation in financial performance quarter by quarter for some of the periods, but considerable variation for the quarters ended September 30, 2016, December 31, 2015, September 30, 2015, and June 30, 2015. There is little variation in expenditures and net loss for the Company during the four quarters compared ended December 31, 2014, March 31, 2015, March 31, 2016, and June 30, 2016 due to the Company not initiating exploration programs on the properties during these periods. Field exploration expenditures would increase expenses and net loss significantly. During the quarters ended June 30, 2015 through December 31, 2015, the Company had significant expenditures related to exploration drill programs, which increase the net loss dramatically compared to the other quarters. During the other four quarters, the exploration expenditures have been incurred primarily from data compilation, geophysics data, staking, maps, and reports. During the quarters ended June 30, 2015 through December 31, 2015, the company incurred expenses related to an exploration drilling program that was conducted on the Blue Lake and Retty Lake properties. During the quarter ended June 30, 2016, the Company incurred significant consulting fees pursuant to settlement agreements with ex-directors and the Chief Financial Officer. The expenses were offset by the Quebec resource tax refund received during the quarter of \$228,672. During the quarter ended September 30, 2016, the Company incurred expenses of \$558,621 in relation to the cancellation of the Blue Lake option agreement. These expenses were recorded as an impairment of exploration assets. General expenditures should remain relatively stable going forward as management does not anticipate additional costs related to the Company's activities.

USE OF PROCEEDS FOR EXPLORATION

The Company has completed an IPO and subsequent flow-through financings. A portion of the IPO proceeds were budgeted for the Retty Lake project while the proceeds from the flow-through financings were budgeted for all four of the Company's properties. Below is a summary of the budgeted proceeds and actual expenditures.

Property	Financing & Budget		Exploration Expenditures	Variance
	IPO and subsequent financings	Flow-through		
	\$	\$	\$	\$
Blue Lake	130,000	1,550,000	1,694,173	(14,173)
Retty Lake	250,000	1,227,150	1,445,051	32,099
Schefferville	0	990,000	990,000	-

The Company has been successful in meeting the budgeted expenditures with very little variance. In the cases of the there is a variance, the expenditures have come in only slightly different than budgeted. In such cases the proceeds are carried forward and spent on the future exploration programs or the budget is adjusted on the other projects. The qualifying expenditures from flow-through proceeds have been made at the date of this MD&A.

LIQUIDITY

The Company has not begun commercial production on any of its resource properties and accordingly, the Company does not generate cash from operations. The Company finances exploration activities by raising capital from equity markets. The Company may encounter difficulty sourcing future financing in light of the ongoing malaise in the junior mining-exploration sector with respect to nickel projects.

The Company had cash of \$184,220 at September 30, 2016 and \$280,447 at September 30, 2015, and the Company had working capital of \$172,840 at September 30, 2016 and working capital of \$278,446 at September 30, 2015.

On October 28, 2014, the Company issued 17,000,000 flow-through units at \$0.05 per unit for proceeds of \$850,000. Each unit consisted of one flow-through common share and one-half share purchase warrant. Each whole share purchase warrant entitles the holder to acquire one additional common share at an exercise price of \$0.10 per share for a period of 12 months from the closing.

If additional funds are required, the Company plans to raise additional capital primarily through the private placement of its equity securities. Under such circumstances, there is no assurance that the Company will be able to obtain further funds required for the Company's continued working capital requirements. Junior explorer share prices have undergone significant decreases over the last few years, and any issuance of the Company's equity securities may result in substantial dilution to the Company's existing shareholders.

CAPITAL RESOURCES

The Company has capital commitments in connection with one of its three exploration properties. The Company holds 100% interests in the Retty Lake Property and is not required to make any further expenditure commitments on this property. All share and cash payments related to the Retty Lake property have been paid in full. The Company has a 64% ownership in the Schefferville Gold Property and has no further contractual obligations to perform further work on this property. The Company controls 100% of the Blue Lake South property with no work commitments. The Company optioned the Blue Lake property on November 16, 2011 and amended its Blue Lake Joint Venture and Option agreement on November 30, 2012 and on April 25, 2014. On August 25, 2016, the Company cancelled the Blue Lake option agreement and returned the claims in good standing.

The Company will be required to raise additional funds in order to keep the remaining claims on the Retty Lake, Blue Lake South, and Schefferville gold properties in good standing in relation to claim renewal costs required by the MERN. The Company has and will add or drop claims based on geological merit and as financial resources allow.

Operating Activities

The Company used net cash of \$75,481 in operating activities during the three month period ended September 30, 2016 compared to using net cash of \$465,682 during the three month period ended September 30, 2015.

Financing Activities

The Company received net cash of \$nil in financing activities during the three month periods ended September 30, 2016 and 2015.

Investing Activities

The Company used cash of \$nil in investing activities during the three month periods ended September 30, 2016 and 2015.

OFF-BALANCE SHEET ARRANGEMENTS

The Company has not entered into any off-balance sheet arrangements.

TRANSACTIONS WITH RELATED PARTIES

- (a) During the three month period ended September 30, 2016, the amount of \$nil (2015 – \$9,000) was paid and \$nil (2015 - \$3,000) was accrued as a payable to a director of the Company for geological work performed on the mineral properties.
- (b) During the three month period ended September 30, 2016, the Company paid \$nil (2015 – \$12,000) in salary and \$nil (2015 - \$6,000) was accrued as payable to the President of the Company.
- (c) During the three month period ended September 30, 2016, the Company paid \$nil (2015 – \$12,000) in salary and \$nil (2015 - \$6,000) was accrued as a payable to the Chief Financial Officer of the Company

PROPOSED TRANSACTIONS

There are no proposed transactions that have not been disclosed herein.

SUBSEQUENT EVENTS

There are no subsequent events to report as at the date of this MD&A.

ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE

A number of new standards, and amendments to standards and interpretations, are not yet effective for the period ended September 30, 2016, and have not been applied in preparing these financial statements.

New standard IFRS 9, “Financial Instruments”

The Company has not early adopted these revised standards and is currently assessing the impact that these standards will have on the financial statements.

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company’s financial statements.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

The Company’s financial instruments consist of cash, amounts receivable, accounts payable and accrued liabilities, and due to related parties. Unless otherwise noted, it is management’s opinion that the Company is not exposed to significant interest rate, currency or credit risks arising from these financial instruments. The fair values of these financial instruments approximate their carrying values due to the relatively short-term maturity of these instruments.

ADDITIONAL DISCLOSURE FOR VENTURE ISSUERS WITHOUT SIGNIFICANT REVENUE

During the period ended September 30, 2016 and 2015, the Company incurred the following expenses:

	Quarter Ended September 30, 2016	Quarter Ended September 30, 2015
Exploration costs	\$3,104	\$383,890
General and administrative costs	\$9,934	\$41,312

An analysis of material components of the Company’s general and administrative expenses is disclosed in the unaudited financial statements for the period ended September 30, 2016 to which this MD&A relates. An analysis of the material components of the mineral property acquisition costs and mineral exploration costs are disclosed in the notes to the unaudited financial statements for the period ended September 30, 2016 to which this MD&A relates.

The Company had three exploration properties during the period ended September 30, 2016 pursuant to the Blue Lake Option and Joint Venture Agreement, dated November 16, 2011 (amended on November 30, 2012 and on April 25, 2014), the Retty Lake Property (100% controlled by Rockland), and the Schefferville Gold Property dated September 29, 2010. The Company owns 100% of the Blue Lake South property. For the Schefferville Gold Property, the Company has earned a 64% interest from Western Troy Capital Resources Inc (“Western Troy”).

Western Troy will retain a minimum 2% NSR Royalty in the Property of which 1% can be purchased for \$1,000,000 by Rockland at any time. On August 25, 2016, the Company cancelled the Blue Lake option agreement.

DISCLOSURE OF OUTSTANDING SHARE DATA

Common Shares

The Company's common shares are listed on the TSX Venture Exchange under the symbol "RL". The Company's authorized share capital consists of an unlimited number of common shares without par value. As at November 28, 2016 the Company had 68,504,461 common shares issued and outstanding.

Share Purchase Warrants

As at November 28, 2016, the Company had no share purchase warrants outstanding.

Stock Options

The Company had 2,475,000 stock options outstanding as at September 30, 2016 which had the following characteristics:

Number of Options	Exercise Price	Expiry Date
450,000	\$0.15	April 12, 2017
450,000	\$0.15	April 12, 2017
100,000	\$0.20	May 10, 2017
975,000	\$0.10	April 12, 2017
300,000	\$0.06	August 11, 2019
200,000	\$0.10	January 7, 2017

RISK FACTORS

Much of the information included in this report includes or is based upon estimates, projections or other forward-looking statements. Such forward-looking statements include any projections or estimates made by the Company and its management in connection with the Company's business operations. While these forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect the Company's current judgment regarding the direction of its business, actual results will almost always vary, sometimes materially, from any estimates, predictions, projections, assumptions, or other future performance suggested herein. Except as required by law, the Company undertakes no obligation to update forward-looking statements to reflect events or circumstances occurring after the date of such statements.

Such estimates, projections or other forward-looking statements involve various risks and uncertainties as outlined below. The Company cautions readers of this report that important factors in some cases have affected and, in the future, could materially affect actual results and cause actual results to differ materially from the results expressed in any such estimates, projections or other forward-looking statements. In evaluating the Company, its business and any investment in its business, readers should carefully consider the following factors:

Risks Related to the Company's Business

Because of the unique difficulties and uncertainties inherent in mineral exploration ventures, the Company faces a high risk of business failure.

Potential investors should be aware of the difficulties normally encountered by mineral exploration companies and the high rate of failure of such enterprises. The likelihood of success must be considered in light of the problems, expenses, difficulties, complications and delays encountered in connection with the exploration program that the Company intends to undertake on its properties and any additional properties that the Company may acquire. These potential problems include unanticipated problems relating to exploration, and additional costs and expenses that

may exceed current estimates. The expenditures to be made by the Company in the exploration of its properties may not result in the discovery of mineral deposits. Any expenditures that the Company may make in the exploration of any other mineral property that it may acquire may not result in the discovery of any commercially exploitable mineral deposits. Problems such as unusual or unexpected geological formations and other conditions are involved in all mineral exploration and often result in unsuccessful exploration efforts. If the results of the Company's exploration do not reveal viable commercial mineralization, the Company may decide to abandon some or all of its property interests.

Loss of Interest In Properties

The Company's ability to maintain an interest in the properties optioned by the Company will be dependent on its ability to raise additional funds. Failure to obtain additional financing may result in the Company being unable to make the periodic payments required to keep the property interests in good standing and could result in the delay or postponement of further exploration and or the partial or total loss of the Company's interest in the properties optioned by the Company, including the Qualifying Property.

Because of the speculative nature of the exploration of mineral properties, there is no assurance that the Company's exploration activities will result in the discovery of any quantities of mineral deposits on its current properties or any other additional properties the Company may acquire.

The Company intends to continue exploration on its current properties and the Company may or may not acquire additional interests in other mineral properties. The search for mineral deposits as a business is extremely risky. The Company can provide investors with no assurance that exploration on its current properties, or any other property that the Company may acquire, will establish that any commercially exploitable quantities of mineral deposits exist. Additional potential problems may prevent the Company from discovering any mineral deposits. These potential problems include unanticipated problems relating to exploration and additional costs and expenses that may exceed current estimates. If the Company is unable to establish the presence of mineral deposits on its properties, its ability to fund future exploration activities will be impeded, the Company will not be able to operate profitably and investors may lose all of their investment in the Company.

The potential profitability of mineral ventures depends in part upon factors beyond the control of the Company and even if the Company discovers and exploits mineral deposits, the Company may never become commercially viable and the Company may be forced to cease operations.

The commercial feasibility of an exploration program on a mineral property is dependent upon many factors beyond the Company's control, including the existence and size of mineral deposits in the properties the Company explores, the proximity and capacity of processing equipment, market fluctuations of prices, taxes, royalties, land tenure, allowable production and environmental regulation. These factors cannot be accurately predicted and any one or a combination of these factors may result in the Company not receiving an adequate return on invested capital. These factors may have material and negative effects on the Company's financial performance and its ability to continue operations.

Exploration and exploitation activities are subject to comprehensive regulation which may cause substantial delays or require capital outlays in excess of those anticipated causing an adverse effect on the Company.

Exploration and exploitation activities are subject to federal, provincial, state and local laws, regulations and policies, including laws regulating the removal of natural resources from the ground and the discharge of materials into the environment. Exploration and exploitation activities are also subject to federal, provincial, state and local laws and regulations which seek to maintain health and safety standards by regulating the design and use of drilling methods and equipment.

Environmental and other legal standards imposed by federal, provincial, state or local authorities may be changed and any such changes may prevent the Company from conducting planned activities or may increase its costs of doing so, which would have material adverse effects on its business. Moreover, compliance with such laws may cause substantial delays or require capital outlays in excess of those anticipated, thus causing an adverse effect on the Company. Additionally, the Company may be subject to liability for pollution or other environmental damages that the Company may not be able to or elect not to insure against due to prohibitive premium costs and other

reasons. Any laws, regulations or policies of any government body or regulatory agency may be changed, applied or interpreted in a manner which will alter and negatively affect the Company's ability to carry on its business.

Title to mineral properties is a complex process and the Company may suffer a material adverse effect in the event one or more of its property interests are determined to have title deficiencies.

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. Although the Company has obtained previous title opinion with respect to its Retty Lake Project interests, the Company cannot give an assurance that title to such property will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. A successful claim that the Company does not have title to one or more of its properties could cause the Company to lose any rights to explore, develop and mine any minerals on that property, without compensation for its prior expenditures relating to such property.

The properties optioned by the Company may now or in the future be the subject of first nations land claims. The legal nature of aboriginal land claims is a matter of considerable complexity. The impact of any such claim on the Company's ownership interest in the properties optioned by the Company cannot be predicted with any degree of certainty and no assurance can be given that a broad recognition of aboriginal rights in the area in which the properties optioned by the Company are located, by way of a negotiated settlement or judicial pronouncement, would not have an adverse effect on the Company's activities. Even in the absence of such recognition, the Company may at some point be required to negotiate with first nations in order to facilitate exploration and development work on the properties optioned by the Company.

Because the Company's property interests may not contain mineral deposits and because it has never made a profit from its operations, the Company's securities are highly speculative and investors may lose all of their investment in the Company.

The Company's securities must be considered highly speculative, generally because of the nature of its business and its stage of operations. The Company currently has exploration stage property interests which may not contain mineral deposits. The Company may or may not acquire additional interests in other mineral properties but the Company does not have plans to acquire rights in any specific mineral properties as of the date of this report. Accordingly, the Company has not generated significant revenues nor has it realized a profit from its operations to date and there is little likelihood that the Company will generate any revenues or realize any profits in the short term. Any profitability in the future from the Company's business will be dependent upon locating and exploiting mineral deposits on the Company's current properties or mineral deposits on any additional properties that the Company may acquire. The Company may never discover mineral deposits in respect to its current properties or any other area, or the Company may do so and still not be commercially successful if the Company is unable to exploit those mineral deposits profitably. The Company may not be able to operate profitably and may have to cease operations, the price of its securities may decline and investors may lose all of their investment in the Company.

As the Company faces intense competition in the mineral exploration and exploitation industry, the Company will have to compete with the Company's competitors for financing and for qualified managerial and technical employees.

The Company's competition includes large established mining companies with substantial capabilities and with greater financial and technical resources than the Company. As a result of this competition, the Company may have to compete for financing and be unable to acquire financing on terms it considers acceptable. The Company may also have to compete with the other mining companies for the recruitment and retention of qualified managerial and technical employees. If the Company is unable to successfully compete for financing or for qualified employees, the Company's exploration programs may be slowed down or suspended, which may cause the Company to cease operations as a company.

The Company's future is dependent upon its ability to obtain financing and if the Company does not obtain such financing, the Company may have to cease its exploration activities and investors could lose their entire investment.

There is no assurance that the Company will operate profitably or will generate positive cash flow in the future. The Company requires additional financing in order to proceed with the exploration and development of its properties. The Company will also require additional financing for the fees it must pay to maintain its status in relation to the rights to the Company's properties and to pay the fees and expenses necessary to operate as a public company. The Company will also need more funds if the costs of the exploration of its mineral claims are greater than the Company has anticipated. The Company will require additional financing to sustain its business operations if it is not successful in earning revenues. The Company will also need further financing if it decides to obtain additional mineral properties. The Company currently does not have any arrangements for further financing and it may not be able to obtain financing when required. The Company's future is dependent upon its ability to obtain financing. If the Company does not obtain such financing, its business could fail and investors could lose their entire investment.

The Company's directors and officers are engaged in other business activities and accordingly may not devote sufficient time to the Company's business affairs, which may affect its ability to conduct operations and generate revenues.

The Company's directors and officers are involved in other business activities. As a result of their other business endeavours, the directors and officers may not be able to devote sufficient time to the Company's business affairs, which may negatively affect its ability to conduct its ongoing operations and its ability to generate revenues.

Risks Relating to the Company's Common Stock

A decline in the price of the Company's common stock could affect its ability to raise further working capital and adversely impact its ability to continue operations.

A prolonged decline in the price of the Company's common stock could result in a reduction in the liquidity of its common stock and a reduction in its ability to raise capital. Because a significant portion of the Company's operations have been and will be financed through the sale of equity securities, a decline in the price of its common stock could be especially detrimental to the Company's liquidity and its operations. Such reductions may force the Company to reallocate funds from other planned uses and may have a significant negative effect on the Company's business plan and operations, including its ability to develop new products and continue its current operations. If the Company's stock price declines, it can offer no assurance that the Company will be able to raise additional capital or generate funds from operations sufficient to meet its obligations. If the Company is unable to raise sufficient capital in the future, the Company may not be able to have the resources to continue its normal operations.

ADDITIONAL INFORMATION
