Overview of the Company

Kaiyue was incorporated on November 23, 2009 under the Business Corporation Act of Alberta and carries on business as a Capital Pool Company ("CPC") in accordance with Policy 2.4 of the TSX Venture Exchange. The Company completed its initial public offering of 2,000,000 common shares at $0.10 per share for gross proceeds of $200,000 on August 6, 2010. Subsequently, its shares commenced trading on the Toronto Stock Exchange Venture ("Exchange") on August 12, 2010 under the symbol "KYU.P".

As a CPC, the principal business of the Company is to identify and evaluate businesses and assets with a view to completing a Qualifying Transaction under Exchange rules and policies. Until completion of a Qualifying Transaction, the Company will not carry on any business other than the identification and evaluation of businesses or assets with a view to completing a potential Qualifying Transaction. The Company is actively engaged in the search for a suitable Qualifying Transaction.

On December 3, 2010, the Company entered into an agreement ("Agreement") with China Easy-Pay Technology Inc. ("China Easy-Pay") and its sole shareholder, Soar High Group Limited ("Soar High"), to purchase all of the issued and outstanding shares of China Easy-Pay (the "Acquisition"). The Acquisition, as contemplated, would have constituted the Company's Qualifying Transaction under Policy 2.4-Capital Pool Company of the Exchange.

On October 24, 2011, the Company announced that it had completed its previously announced non-brokered private placement with certain accredited investors, pursuant to which such investors purchased an aggregate of 10,000,000 common shares of the Company at a price of $0.15 per share for aggregate gross proceeds of $1,500,948 and net proceeds of $1,489,214. The shares were subject to a hold period and unless permitted under securities legislation the shares could not be traded before February 22, 2012. The Company paid a finder's fee to an agent in the amount of $11,734 or 3.5% in connection with the sale of 2,235,000 shares pursuant to the private placement. The proceeds from the private placement have been added to the Company's working capital to be used towards the completion of a Qualifying Transaction in accordance with the rules of the Exchange.

On June 22, 2012, the Company after a lengthy review announced that it would not proceed with the proposed acquisition of China Easy-Pay from Soar High. The Agreement was terminated pursuant to its terms.

The Company has since been actively identifying and evaluating potential assets, properties or businesses with an aim to completing a Qualifying Transaction as soon as practicable.

On August 10, 2012, the Company announced that it has entered into a letter agreement (the "Letter Agreement") with BCGold pursuant to which BCGold has agreed to grant the Company an option to acquire up to 70% of its 100% interest in and to 76 mineral claims known as the Toe Property located at Yukon (the "Transaction"). The Transaction is intended to be the Company's "Qualifying Transaction" as that term is defined in Policy 2.4 of the TSX Venture Exchange. The Transaction will be carried out by parties dealing at arm's length to one another and no non-arm's length parties of the Company have any direct or indirect interest in the Toe Property. In order to acquire a 60% interest in the Toe Property, the Company will be required to:

(a) pay to BCGold an aggreate of $255,000 as follows:
    (i) $25,000 upon signing of the Letter Agreement;

Financial Instruments

The Company is not exposed to significant credit, liquidity or market risk. The carrying value of cash and cash equivalents and accounts payable and accrued liabilities reflected in the condensed interim statement of financial position approximate fair value due to the short term nature of these instruments.

Risks and Uncertainties

The Company has no active business. The Company does not have a history of earnings, nor has it paid any dividends, and will not be in a position to generate earnings or pay dividends until at least after completion of the Qualifying Transaction. It is possible the Company may never generate earnings or be in a position to pay dividends. The directors and officers of the Company will only devote part of their time and efforts to the affairs of the Company.

The Company has only limited funds available to identify and evaluate potential Qualifying Transactions and thereby cannot provide assurance the Company will be able to identify or complete a suitable Qualifying Transaction. Until completion of the Qualifying Transaction, the Company will not carry on any business other than the identification and evaluation of assets or businesses for the purpose of completing the Qualifying Transaction.

Critical Accounting Estimates

The preparation of the financial statements in conformity with IFRS, requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Judgments made by management in the application of IFRS that have a significant effect on the financial statements and estimates with a significant risk of material adjustment in the current and following fiscal years are discussed below:

- Recovery of deferred tax assets: judgement is required in determining whether deferred tax assets are recognized on the statement of financial position. Deferred tax assets, including those arising from un-utilized tax losses, require management to assess the likelihood that the Company will generate taxable earnings in future periods, in order to utilize recognized deferred tax assets. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the reporting date could be impaired.
