Kaiyue International Inc.
(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

1 Nature of operations

Kaiyue International Inc. (“Kaiyue” or the “Company”) was incorporated under the Business Corporation Act of Alberta on November 23, 2009.

The Company intends to carry on business as a Capital Pool Company (“CPC”) as defined in the Policy 2.4 “Capital Pool Companies” of the TSX Venture Exchange (the “Exchange”). The Company’s principal purpose is the identification, evaluation and acquisition of assets, properties or businesses or participation therein subject, in certain cases, to shareholders approval and acceptance by the Exchange. As at March 31, 2011, the Company has no business operations. Where an acquisition or participation (the “Qualifying Transaction”) is warranted, additional funding will be required. The ability of the Company to fund its potential future operations and commitments is dependent upon the ability of the Company to obtain additional financing. Under the policies of the Exchange, the Company must identify and complete a Qualifying Transaction within 24 months from the date the Company’s shares are listed for trading on the Exchange. There is no assurance that the Company will be able to complete a Qualifying Transaction within 24 months of being listed or that it will be able to secure the necessary financing to complete a Qualifying Transaction. The Exchange may suspend or de-list the Company’s shares from trading should it not meet these requirements.

In order to complete its Qualifying Transaction, the Company has entered into an agreement effective December 3, 2010 with China Easy-Pay Technology Inc. (“China Easy-Pay”) and its sole shareholder Soar High Group Limited (“Soar High”), to purchase all of the issued and outstanding shares of China Easy-Pay (the “Acquisition”). The Acquisition, if completed, will constitute the Company’s Qualifying Transaction under Policy 2.4- Capital Pool Company of the Exchange. China Easy-Pay and Soar High are at arm’s length to the Company, as such, the Company anticipates that the Acquisition will not be subject to approval of the Company’s shareholders.

On May 25, 2010, the Company filed the prospectus for the issuance of 2,000,000 common shares at \$0.10 per share for gross proceeds of \$200,000 (the “Offering”).

Kaiyue International Inc.
(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

1 Nature of operations (continued)

The proceeds raised from the issuance of share capital may only be used to identify and evaluate assets or business for future investment, with the exception that up to lesser of 30% of the gross proceeds or \$210,000 may be used to cover prescribed costs of issuing the common shares or administrative and general expenses of the Company. These restrictions apply until completion of a Qualifying Transaction by the Company as defined under the policies of the Exchange.

The Company engaged M Partners (the “Agent”) as its agent to complete an initial public offering to raise minimum proceeds of \$200,000 pursuant to the terms set out in the provisions of the CPC Policy (the “Offering”). In consideration for services to be performed by the Agent in connection with the Offering, the Company has agreed to pay the Agent a cash commission equal to 4% of the gross proceeds raised pursuant to the Offering and a corporate finance fee of \$5,000 plus applicable taxes. In addition, at the closing of the Offering, the Agent will receive an option (the “Agent’s Option”) exercisable at any time up to 24 months following the respective date of closing on purchase up to that number of treasury shares equal to 4% of the number of common shares sold pursuant to the Offering. The terms of the Agent’s Option shall be in compliance with the CPC Policy.

On August 6, 2010, the Offering is close with the issuance of 2,000,000 common shares at \$0.10 per share. The gross and net proceeds received from the Offering are \$200,000 and \$173,527, respectively.

On August 12, 2010, the Company is listed on the TSX Venture Exchange under the symbol “KYU.P”.

(Unaudited)

2 Basis of preparation

The interim condensed financial statements of the Company were prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

The financial statements were prepared on a going concern basis which assumes continuity of operations and realization of assets and settlement of liabilities in the normal course of business, under the historical cost convention except for certain financial assets which are presented at fair value in Canadian dollars, the Company’s functional currency. All financial information is presented in Canadian dollars, except as otherwise noted.

Statement of compliance

These are the Company’s first financial statements prepared in accordance with IFRS. Previously, the Company prepared its financial statements in accordance with Canadian Generally Accepted Accounting Principles (“Canadian GAAP”). The disclosures required by the provisions of IFRS 1, “First-time adoption of International Financial Reporting Standards” (“IFRS 1”), explaining how the transition to IFRS has affected the reported financial performance, cash flows and financial position of the Company, are presented in Note 8.

These unaudited interim condensed financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting (“IAS 34”) as issued by IASB and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

The accounting policies set out below have been applied in preparing an opening IFRS statement of financial position at January 1, 2010 (Note 8) for the purposes of the transition to IFRS, as required by IFRS 1. These unaudited interim condensed financial statements have been prepared on the basis of IFRS that are expected to be effective on December 31, 2011, the Company’s first annual reporting date under IFRS. The Company has made certain assumptions about the accounting policies expected to be adopted when the first IFRS annual financial statements are prepared for the year ending December 31, 2011.

Kaiyue International Inc.
(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

3 Summary of Significant Accounting Policies

The significant accounting policies are summarized as follows:

Cash and cash equivalents

Cash and cash equivalents include bank balances deposited with maturity dates of three months or less.

Functional and presentation currency

These unaudited interim condensed financial statements have been prepared in Canadian dollars, which is the Company's functional and presentation currency.

Income taxes

Income tax on the profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: goodwill not deductible for tax purposes and the initial recognition of assets or liabilities that affect neither accounting nor taxable profit. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the financial position reporting date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a future tax asset will be recovered, it provides a valuation allowance against that excess.

(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

3 Summary of Significant Accounting Policies (continued)

Use of estimates

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates, and changes in these estimates are recorded when known. Significant estimates made by management include accrued liabilities of the Company. The amount recognized as accrued liabilities is the best estimate of the consideration required to settle the related liability, including any related interest charges, taking into account the risks and uncertainties surrounding the obligation. The Company assesses its liabilities based upon the best information available.

Related party transactions

All transactions with related parties would be in the normal course of business and measured at the exchange value (the amount established and agreed to by the related parties). During the period, no related party transactions have taken place.

Loss per share

Loss per share is determined using the weighted average number of shares outstanding during the period. Diluted loss per share is determined using the treasury stock method. Under this method, the dilutive effect of loss per share is recognized on the use of proceeds that could be obtained from exercise of options, warrants and similar instruments. It assumes that proceeds would be used to purchase common shares at the average market price during the period. As of March 31, 2011, the calculation of basic and diluted loss per share is the same as the Company does not have any dilutive instruments.

Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

3 Summary of Significant Accounting Policies (continued)

Financial instruments

Financial assets

All financial assets are recognized and derecognized on the trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the time frame established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through profit or loss which are initially measured at fair value.

Financial assets are classified into the following categories: “financial assets at fair value through profit or loss” (“FVTPL”), “held-to-maturity investments”, “available-for-sale financial assets” and “loans and receivables”. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

The Company has classified cash as financial assets at FVTPL, which is measured at fair value.

Financial liabilities

Financial liabilities are classified as either “financial liabilities at FVTPL” or “other financial liabilities”.

Other financial liabilities are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest recognized on an effective yield basis.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest costs over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability or (where appropriate) to the net carrying amount on initial recognition.

All accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost using the effective interest method.

(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

3 Summary of Significant Accounting Policies (continued)

Financial instruments (continued)

De-recognition of financial assets and liabilities

A financial asset is derecognized when the contractual right to the asset's cash flows expires; or if the Company transfers the financial asset and all risks and rewards of ownership to another entity.

The Company derecognizes financial liabilities when the obligations are discharged, cancelled or expire.

Fair value hierarchy

The Company follows a fair value hierarchy that requires an entity to maximize the use of the observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurements. There are three levels of inputs that may be used to measure fair value.

Level 1 applies to assets and liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2 applies to assets and liabilities for which there are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3 applies to assets and liabilities for which there are unobservable inputs to the valuation methodology that significant to the measurement of the fair value of the assets or liabilities and that cannot be corroborated by market data.

As of March 31, 2011 and December 31, 2010, none of the Company's financial instruments are recorded at fair value on the unaudited interim condensed statement of financial position except for cash and cash equivalents within Level 1.

Kaiyue International Inc.
(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

3 Summary of Significant Accounting Policies (continued)

Deferred transactions costs

Costs directly incurred in connection with the Company's proposed public share offering are recorded as deferred transaction costs until the offering is completed, if the completion is considered likely; otherwise they are expensed as incurred. Deferred transaction costs will be charged against share capital upon completion of the public share offering, or against operations if the offering is not completed.

Comprehensive loss

Comprehensive loss includes both net loss and other comprehensive income (loss). Other comprehensive income is the change in shareholders' equity from non-owner sources which is not included in the calculation of net loss until realized. Cumulative changes in other comprehensive income are included in Accumulated Other Comprehensive Income, which is presented as a separate category of shareholders' equity on the statement of financial position. The Company had no other comprehensive income balance as at March 31, 2011 and December 31, 2010, and no transactions during the three months ended March 31, 2011 and 2010.

Share-based payment transactions of the Company

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

Kaiyue International Inc
(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

3 Summary of Significant Accounting Policies (continued)

Share-based payment transactions of the Company (continued)

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the period.

New Accounting Pronouncements

The Company has not early applied the following new and revised standards that have been issued by the IASB but are not yet effective.

IFRS 7 (Amendment)	Financial Instruments: Disclosure for amendments enhancing disclosures about transfers of financial assets ⁽¹⁾
IFRS 9	Financial Instruments (Issued November 2009) ⁽³⁾
IFRS 10	Consolidated Financial Statements ⁽³⁾
IFRS 11	Joint Arrangements ⁽³⁾
IFRS 12	Disclosure of Interests in Other Entities ⁽³⁾
IFRS 13	Fair Value Measurement ⁽³⁾
IAS 12 (Amendment)	Income Taxes: Limited scope amendment (recovery of underlying assets) ⁽²⁾
IAS 27 (Amendment)	Separate Financial Statements ⁽³⁾
IAS 28 (Amendment)	Investments in Associates and Joint Ventures ⁽³⁾

⁽¹⁾ effective for annual periods beginning on or after July 1, 2011

⁽²⁾ effective for annual periods beginning on or after January 1, 2012

⁽³⁾ effective for annual periods beginning on or after January 1, 2013

The Company is currently assessing the impact that the new and revised standards will have on its financial statements or whether to early adopt any of the new requirements.

Balance - December 31, 2010 and March 31, 2011, net of share issue costs of \$47,473	4,180,000	261,527

Shares to be issued

	Number of Shares	Amount (\$)
Shares to be issued for cash	666,667	100,000

In February and March 2011, the Company received from two persons \$70,000 and \$30,000 respectively to subscribe for 466,667 and 200,000 common shares of the Company at a subscription price of \$0.15 per share. The total proceeds of \$100,000 were recorded as shares to be issued at March 31, 2011.

Escrow shares

Subject to an Escrow Agreement pursuant to the requirements of the TSX Venture Exchange, all of the shares issued on and prior to January 6, 2010 will be held in escrow. Under the terms of the Escrow Agreement (assuming at least 75% of the securities pursuant to the Qualifying Transaction are “value securities”), these shares will be released as to 10% thereof on the completion of the Company’s Qualifying Transaction, as defined in the policies of the Exchange, and as to 15% thereof on each of the 6th, 12th, 18th, 24th, 30th and 36th months following the initial release.

All common shares acquired on exercise of stock options granted to directors and officers prior to the completion of a Qualifying Transaction must also be in escrow until the Final Exchange Bulletin is issued.

Kaiyue International Inc.
(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

4 Share Capital (continued)

Escrow shares (continued)

All common shares of the Company acquired in the secondary market prior to the completion of a Qualifying Transaction by a Control Person, as defined in the policies of the Exchange, are required to be deposited in escrow. Subject to certain permitted exemptions, all securities of the Company held by principals of the resulting issuer will also be escrowed.

Stock option

The Company has adopted an incentive stock option plan (the "Option Plan") which provides that the directors of the Corporation may from time to time, in their discretion, and in accordance with the Exchange requirements, grant to directors, officers, employees and technical consultants to the Company, non-transferable options to purchase common shares, provided that the number of common shares received for issue will not exceed 10% of the number of outstanding common shares.

Stock option will be exercisable for a period of up to five years after date of grant thereof. The number of common shares reserved for issue to any individual director or officer will not exceed five percent of the number of then outstanding common shares and the number of common shares reserved for issue to all technical consultants will not exceed two percent of the number of then outstanding common shares. Options may be exercised the greater of 12 months after completion of the Qualifying Transaction and 90 days following cessation of the optionee's position with the Corporation, provided that the cessation of office, directorship, or technical consulting arrangement was by reason of death, the option may be exercised within a maximum period of one year after such death, subject to the expiry date of such option. Any common shares acquired pursuant to the exercise of options prior to completion of the Qualifying Transaction must be deposited in escrow and will be subject to escrow until the Final Exchange Bulletin is issued.

200,000 common shares pursuant to the exercise of the Directors' and Officers' Options, exercisable at \$0.10 per share, were granted at the closing of the Offering on August 6, 2010 and outstanding as of March 31, 2011 and December 31, 2010. These options will expire on August 6, 2015.

Kaiyue International Inc.
(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

4 Share Capital (continued)

Stock option (continued)

In addition, the Company granted to the underwriters of the Offering Options (“Underwriters’ options”) to purchase up to 80,000 common shares at a price of \$0.10 per common share and outstanding as of March 31, 2011 and December 31, 2010, which may be exercised for a period of 24 months after the day of listing on August 12, 2010, hence expiring on August 12, 2012.

The management considers that the fair value of the above stock options granted was insignificant at the respective date of granting and therefore, no share based payment transactions expense is recognized during the period ended March 31, 2011 and 2010. Share based payment transactions calculations have no effect on the Company’s cash position.

5 Financial Instruments

Financial risk

The Company’s approach in managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when they become due. As at March 31, 2011, the Company had cash of \$187,163 to settle current liabilities of \$15,413. The Company is not exposed to significant credit, liquidity or market risk.

Fair value

The carrying value of cash and accounts payable and accrued liabilities reflected in the condensed statements of financial position approximates fair value due to the limited terms of these instruments.

6 Capital Management

The Company’s objective is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to allow the Company to complete a qualifying transaction and to ensure the Company remains in a sound financial position.

The Company considers its capital structure to consist of share capital and deficit amounted to \$171,750 as at March 31, 2011 and \$123,543 as at December 31, 2010.

Kaiyue International Inc.
(A Capital Pool Company)
Notes to Interim Condensed Financial Statements - Amended
For the three months ended March 31, 2011
(Unaudited)

6 Capital Management (continued)

The directors of the Company review the capital structure from time to time. As part of this review, the directors considered the cost of capital and the risks associate with the capital structure. The Company will balance its overall capital structure through the payment of dividend, raising new capital or debt. The Company is not subject to any externally imposed capital requirements.

7 Segment Information

The Company has no operations and all assets are located in Canada.

8 Transition to IFRS

As stated in Note 2, these are the Company's first unaudited interim condensed financial statements prepared in compliance with IAS 34 in conformity with IFRS. The accounting policies adopted under IFRS were applied in the preparation of the opening IFRS unaudited interim condensed statement of financial position. The Company's IFRS transition date is January 1, 2010. As a result of the adoption of IFRS, there was no impact on the Company's statement of financial position at December 31, 2009, as reported under Canadian GAAP, thereby resulting in a similar opening statement of financial position at January 1, 2010, in accordance with IFRS.

IFRS 1 requires an entity to reconcile equity, comprehensive loss and cash flow for comparative periods. The Company's adoption of IFRS did not have a monetary impact on equity, loss and comprehensive loss and operating, investing or financing cash flows in the prior periods. As a result there were no adjustments to the Company's statements of financial position, statements of comprehensive loss, cash flows and changes in shareholders' equity.

As anticipated by management, the adoption of IFRS has resulted in certain presentation, disclosure and description changes to the unaudited interim condensed financial statements. IFRS 1 does not permit changes to estimates that have been made previously. Consistent with that restriction, estimates used in the preparation of the Company's opening unaudited interim condensed statement of financial position in compliance with IAS 34 were consistent with those that were made under Canadian GAAP.
