Caracara Silver Inc.,
(formerly Ansue Capital Corp.)
Management's Discussion and Analysis
Three and nine months ended March 31, 2013

This management discussion and analysis ("MD&A") has been prepared based on information available to Caracara Silver Inc. ("Caracara" or the "Company") as at May 17, 2013. The MD&A of the operating results and financial condition of the Company for the three and nine months ended March 31, 2013, should be read in conjunction with the Company's unaudited interim consolidated financial statements (the "Financial Statements") and the related notes as at and for the three and nine months ended March 31, 2013 and 2012 and the Company's audited consolidated financial statements for the years ended June 30, 2012 and 2011. The Financial Statements have been prepared by management in accordance with International Financial Reporting Standards ("IFRS") and all amounts are expressed in Canadian dollars unless otherwise noted. Other information contained in this MD&A has also been prepared by management and is consistent with the data contained in the Financial Statements. Additional information relating to the Company may be found under its profile on SEDAR at www.sedar.com.

MANAGEMENT'S ASSESSMENT OF INTERNAL CONTROL OVER FINANCIAL REPORTING ("ICFR")

Management is responsible for establishing and maintaining adequate internal control over the Company's financial reporting. The internal control system was designed to provide reasonable assurance to the Company's management regarding the preparation and presentation of the financial statements.

The inherent limitations in all control systems are such that they can provide only reasonable, not absolute, assurance that all control issues and instances of fraud or error, if any have been detected. Therefore, no matter how well designed, ICFR has inherent limitations and can provide only reasonable assurance with respect to financial statement preparation and may not prevent and detect all misstatements.

As the Company is a Venture Issuer (as defined under National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings*) ("NI 52-109"), the Company and Management are not required to include representations relating to the establishment and/or maintenance of disclosure controls and procedures ("DC&P") and/or ICFR, as defined in NI 52-109. The reader is directed to disclosure of the inherent limitations of ICFR for small to mid-size companies under the **Risks and uncertainties** section of this MD&A with regard to segregation of duties.

CAUTIONARY NOTE

This document contains or refers to forward-looking information. Such forward-looking information includes, among other things, statements regarding targets, estimates and/or assumptions in respect of future production, capital costs and future economic, market and other conditions, and is based on current expectations that involve a number of business risks and uncertainties. Factors that could cause actual results to differ materially from any forward-looking statement include, but are not limited to: the grade and recovery of ore which is mined varying from estimates; exploration and development costs varying significantly from estimates; inflation; fluctuations in commodity prices; delays in the development of the any project caused by unavailability of equipment, labour or supplies, climatic conditions or otherwise; termination or revision of any debt financing; failure to raise additional funds required to finance the completion of a project; and other factors. Forward-looking statements are subject to significant risks and uncertainties and other factors that could cause actual results to differ materially from expected results. Readers should not place undue reliance on forward-looking statements. These forward-looking statements are made as of the date hereof and we assume no responsibility to update them or revise them to reflect new events or circumstances, except as required by law. See the section of this MD&A entitled **Risks and uncertainties**.

Caracara Silver Inc.,
(formerly Ansue Capital Corp.)
Management's Discussion and Analysis
Three and nine months ended March 31, 2013

Corporate

The Company is the continuing entity of Ansue Capital Corp. ("Ansue"), which was incorporated under the laws of British Columbia on December 3, 2009. Ansue was a capital pool company ("CPC") as defined by the rules of the TSX Venture Exchange ("TSXV") in Policy 2.4 of the TSXV. On July 18, 2011, Ansue announced that at the Annual Meeting of the shareholders of Ansue, all matters regarding a Qualifying Transaction with Southern Andes Energy Inc. ("SAE") were approved including the proposed name change of Ansue to Caracara Silver Inc. On August 19, 2011, the Company closed on a qualifying transaction and completed the Corporate Merger (see note 4 of the Financial Statements). Based on the relative ownership percentages of the combined Company by the shareholders of Southern Andes prior to the transaction, former Ansue shareholders and the composition of the Board of Directors of the newly-combined Company, from an accounting perspective, Solex del Peru S.A.C. ("Solex") (a former Southern Andes subsidiary) is considered to be the accounting acquirer and therefore the Qualifying Transaction has been accounted for as a reverse takeover. For financial reporting purposes, the Company is considered a continuation of Solex, a legal subsidiary, except with regard to authorized and issued share capital, which is that of Ansue, the legal parent.

The head office, principal address and registered and records office of the Company is located at 120 Adelaide Street West, Suite 2400, Toronto, Ontario, M5H 1T1.

The Financial Statements were approved for issuance by the Board of Directors on May 16, 2013.

Option agreement

On May 3, 2013, the Company announced that it has signed an option agreement with Inversiones Collodi SAC ("IC") with respect to Caracara's Peruvian exploration properties. IC is a private Peruvian mineral exploration and development company based in Lima. Under the terms of the agreement, IC will have the right to earn a 65% interest in the Company's concessions by making exploration expenditures totalling US\$12.5 million over a four-year period. In addition, IC will make cash payments to the Company's wholly-owned affiliate company in Peru, totalling \$1.85 million plus VAT taxes. The Company has received the first \$250,000 payment owing.

The following are highlights of the transaction:

- \$12.5 million of exploration expenditures over a four-year period
- \$2 million exploration budget in year one
- \$1.85 million in cash payments to the Company net of VAT taxes over the four year option period
- IC can earn a 65% interest and an additional 5% by financing and completing a prefeasibility study on any of the projects in the Company's portfolio
- Key Caracara exploration staff will manage the field exploration programs with IC staff under the guidance of a Technical Committee
- The option agreement will not be effective until the Company has received the approval of the TSX Venture Exchange

Exploration Program

- *Princesa*
Caracara and IC are planning a 2013 exploration program which will include 6,000 metres of drilling as part of a \$2.0 million exploration budget. The first phase of this program is expected to begin by late May with the start of a 3,000-metre drill program at the Princesa project.

Caracara Silver Inc.,
(formerly Ansue Capital Corp.)
Management's Discussion and Analysis
Three and nine months ended March 31, 2013

Princesa is located 850 kilometres south east of Lima in Puno Province and hosts a 43-101 compliant resource estimate totalling 4.6 million tonnes in the inferred category, grading 90.88 grams silver per tonne and 1.69% zinc and 1.61% lead. Princesa remains open along strike and at depth.

- Pilunani

The second part of the program, including 2,000 metres of drilling, will focus on the Pilunani zinc-lead project located 20 kilometres southeast of the Princesa project. Pilunani is a high priority target with potential for hosting near surface zinc-lead mineralization.

Drilling completed by previous operators intersected widespread zinc and lead mineralization associated with a stratabound manto type deposit hosted in Permian limestones and sediments including polymictic breccias.

Some of the more encouraging intersections which require follow up investigation include:

Hole PIL-1 - 20.2 metres grading 6.54% zinc and 5.14 % lead. ⁽¹⁾
Hole PIL-6 – 17.1 metres grading 5.18% zinc and 1.63% lead
Hole PIL-9 – 18.75 metres grading 5.71% zinc and 1.11% lead
Hole PIL-10 – 9.55 metres grading 6.8% zinc and 15.44% lead

(1) Intervals represent the down hole core intersection and, until more data is available on the geometry of the mineralized zone, are not considered true widths.

- Parcuvo

The Parcuvo project, located approximately 28 kilometres northwest of the Princesa project, is an early stage silver-lead-zinc prospect that will be tested by a 1,000-metre drill program later this year. The target at Parcuvo has been defined by surface mapping and sampling over a 200-metre by 100-metre area.

Mineralization is hosted by diatreme clastic breccias and includes high grading grab samples such as 28% zinc and 18.8% lead and 16% zinc and 12.6% lead. Parcuvo has never been drill tested.

Project update

The Company controls two groups of claims located in the southeast part of Peru. The most important group is the Princesa-Pilunani Project which consists of 30 claims totaling 20,699 hectares located within the Puno Department at approximately 1,000 kilometers from Lima, the capital of Peru. The Princesa-Pilunani lead-zinc-silver Project has been the focus of all exploration work carried out by the Company from the Ansue merger. The second group is the Cullquimayo Project consisting of 13 claims covering 8400 hectares within the Cusco Department. There has been no exploration work done on the Cullquimayo Project since its acquisition in 2011. As of March 31, 2013, all of these claims were in good standing with the Peruvian authorities.

The Pilunani-Princesa Project is divided into three sub-groups named Princesa, Pilunani and Potoni, all located within a 45 km long metallogenic belt underlined by several lead-zinc+/-silver showings and old mines which are associated with cross cutting structures and diatreme breccia. Twenty of these base metals occurrences are located within the Company's claims including the Princesa mineralized zone which hosts a NI 43-101 inferred resources of 4.6 million tonnes grading 90.88 g/t Ag, 1.69% Zn and 1.66% Pb.

Caracara Silver Inc.,
(formerly Ansue Capital Corp.)
Management's Discussion and Analysis
Three and nine months ended March 31, 2013

During the nine months ended March 31, 2013, the Company continued advancing its exploration program at the Princesa Group by completing two diamond drill holes ("DDH") for a total of 344.60 meters. No exploration work has been conducted on any of the other properties of the Company.

The exploration work requires permitting from the Peruvian authorities which, during the last years, became more severe and constrained for the mining sector. Permitting from the local communities is also mandatory and must be obtained legitimately in order to acquire access rights and use of the lands to conduct its field program. Our community relations team always treat these communities in a professional and harmonious manner and makes every effort to participate in economic, educational and social development by encouraging local community involvement. The Team has been successful in negotiating new agreements with the Cullco Belen Community for the drilling program at the Princesa Property and with the Picotani Community for the exploration program (Permitting and diamond drilling) to be completed at the Pilunani Property. The Company has strict corporate policies enforcing the mandate respecting the inhabited land, the residents and the environment.

On August 26, 2012, the Company halted temporarily its Princesa drilling program in order to fulfill new Peruvian regulations for exploration activities. The Company received on December 11, 2012 the "Favorable Technical Report" from the MEM and was authorized to resume its drilling operation. However, the Company had to postpone the drilling operations until March 2013 due to the rainy season

Before halting the Princesa drilling program, two DDH totalling 344.6 meters were completed to verify the mineralization cut between holes PRIN-61 and 62 drilled in 2007 and to test its down dip extension. Mineralization cut in DDH PRIN12-01 and 02 consisted in fine disseminations and hairline veinlets of pyrite-galena-sphalerite and is geochemically characterized by an enrichment of barium and manganese. The best results of these two holes:

DDH PRIN12-01: 1.10% Zn, 1.47% Pb and 47.4 g/t Ag over 9.2 m from 63.8 to 73.0 m. Inc: 1.75% Zn, 1.6% Pb and 87.8 g/t Ag over 2.2 m.

DDH PRIN12-02: 0.38% Zn, 0.34% Pb and 9.2 g/t Ag over 33.7 m from 163.5 to 197.2 m. Inc: 0.74% Zn, 0.90% Pb and 32.5 g/t Ag over 3 m from 191.2 to 194.2 m.

In April 2013, the Company resumed its field operations and is expected to commence drilling at Princesa in late May 2013. Workers are currently preparing and cleaning road accesses, building drill set-ups and organizing camp facilities. At Pilunani, a Semi Detailed Environmental study has been launched and our geologists are re-visiting the drill sites to update geological interpretations and to pin point the best drilling targets.

Results of operations

Restatement

Comparative amounts for the 9 months ended March 31, 2012, have been restated for accounting modifications and adjustments resulting from its audit for the years ended June 30, 2012 and 2011 (the "Audited Financial Statements"). The Audited Financial Statements reflected an adjustment to the previously reported listing fee that the Company incurred in completion of the Corporate Merger (as defined in note 4 of the Financial Statements) with Ansue and for a shareholders' equity reallocation of broker options. The listing fee was increased by \$367,604 representing loans due and paid to SAE pursuant to the transaction and broker options with a fair value of \$316,898 were reallocated to reserve for options from reserve for warrants.

Caracara Silver Inc.,
(formerly Ansue Capital Corp.)
Management's Discussion and Analysis
Three and nine months ended March 31, 2013

Net loss for 3 months ended March 31, 2013 and 2012 – \$257,909 vs. \$775,785.

During the 3 months ended March 31, 2013, the Company incurred net losses of \$257,909 compared to a net loss for the same period in 2012 of \$775,785. The reduction in net loss for the quarter ended March 31, 2013, is mainly due to reduced exploration work in the field after the postponement of the diamond drilling activities (see *Project Update* section of this M&A).

Consulting and professional fees - \$7,000 vs. \$35,587.

Current costs reflect normalized expense patterns for operations. Whereas, the comparative period reflects costs that were related to the Corporate Merger.

Investor relations - \$1,871 vs. \$29,571.

The current reduction of \$27,700 is attributable to reduced fees charged by the Company's investor relations firm and reflect the Company's overall cash management scrutinization.

Management fees and salaries – \$138,996 vs. \$152,251.

Management fees and salaries are reflective of normal pattern of operations. The higher amount in 2012 is related to Board of Directors' fees.

Share-based compensation - \$33,362 vs. \$204,616.

No new options were issued for the current quarter and the difference in share-based compensation from the comparative period is entirely due to the vesting of previously-issued options.

Net loss for 9 months ended March 31, 2013 and 2012 – \$1,798,964 vs. \$4,102,803, as restated.

During the 9 months ended March 31, 2013, the Company incurred net losses of \$1,798,964 compared to a net loss for the same period in 2012 of \$4,102,803, as restated. The reduction in net loss for the nine months ended March 31, 2013, is due mainly to the completion of the Corporate Merger in Q1-2012, which included one-time legal, regulatory and listing fees as well as reduced exploration activities after the postponement of the diamond drilling activities.

Consulting and professional fees - \$39,780 vs. \$258,128.

Current costs reflect normalized expense patterns for operations. Whereas, the comparative period reflects one-time costs to affect and close the Corporate Merger which included legal fees of \$104,724 and audit fees of \$72,287.

General and administrative - \$150,610 vs. \$103,071.

The majority of the increase of \$47,539 over the comparative period is attributable to administrative fees including general manager and insurance costs.

Investor relations - \$24,426 vs. \$58,513.

The current reduction of \$34,086 is attributable to reduced fees charged by the Company's investor relations firm and reflect the Company's overall cash management scrutinization.

Caracara Silver Inc.,
 (formerly Ansue Capital Corp.)
Management's Discussion and Analysis
Three and nine months ended March 31, 2013

Listing costs - \$nil vs. \$751,984, as restated.

Listing fees were non-cash charges that the Company incurred during the comparative period regarding the Corporate Merger.

Management fees and salaries – \$395,096 vs. \$343,376.

Upon completion of the Corporate Merger, the Company adopted a directors' fee compensation plan and entered into an agreement with RGMI. The increase of \$51,720 is attributed entirely to the fact that Directors' fees were not paid during the first quarter of 2012 while Management fees were only applied for two months during the comparative period. (See the Financial Statements, note 4 and the *Transactions with related Parties* section of this MD&A).

Share-based compensation - \$156,839 vs. \$689,423.

No new options were issued for the current period with the difference in share-based compensation entirely due to the vesting of previously-issued options.

Shareholder and public company expenses - \$19,250 vs. \$82,575.

The large decrease of \$63,325 is entirely attributable to one-time costs incurred during the comparative period regarding the Company's go-public transaction costs.

The Company's operations are not generally subject to seasonal variations. The timing of exploration activities is influenced primarily by the availability of funds and the identification of suitable exploration targets, however, due to either their location or nature the exploration of some properties may be restricted during certain times of the year due to climatic conditions.

Liquidity and capital resources

As at March 31, 2013, the Company had cash and cash equivalents of \$1,294,252 and working capital of \$1,207,046 compared to cash and cash equivalents of \$2,929,525 and working capital of \$2,776,068 at June 30, 2012. The positive cash and working capital position are attributed to the completion of the Corporate Merger in 2011, which included a financing completed by Ansue that garnered net proceeds (after issuance costs) of \$5,971,897. In addition, the Company acquired \$127,239 of cash from Ansue

Caracara Silver Inc.,
(formerly Ansue Capital Corp.)
Management's Discussion and Analysis
Three and nine months ended March 31, 2013

upon completion of the transaction. During the 9 months ended March 31, 2013, the Company used \$1,708,373 (2012 - \$2,283,334) for operating activities.

Adoption of new and revised standards and interpretations

The IASB issued a number of new and revised International Accounting Standards, International Financial Reporting Standards, and amendments that are effective for the Company's financial year beginning on or after July 1, 2013 with early adoption permitted.

- **IFRS 9 'Financial Instruments: Classification and Measurement'** – introduces new requirements for the classification and measurement of financial instruments.
- **IFRS 10 'Consolidated Financial Statements'** – establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities.
- **IFRS 11 'Joint Arrangements'** - provides for a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form.
- **IFRS 12 'Disclosure of Interests in Other Entities'** - requires the disclosure of information that enables users of financial statements to evaluate the nature of, and risks associated with its interests in other entities and the effects of those interests on its financial position, financial performance and cash flows.
- **IFRS 13 'Fair Value Measurement'** - provides the guidance on the measurement of fair value and related disclosures through a fair value hierarchy.

The Company has not early adopted these standards, amendments and interpretations, however it is currently assessing what impact the application of these standards or amendments will have on the Financial Statements.

Transactions with related parties

9 months ended March 31, 2013 and 2012

During the 9 months ended March 31, 2013, RGMI charged the Company \$331,650 (2012 - \$294,800) for management and administrative fees and \$nil (2012 - \$\$7,500) for investor relations and Company web-based set-up costs. RGMI provides management and administrative services to the Company and provides the services of the Company's personnel. The agreement providing the services has a term of 1 year and expires May 31, 2013. It is automatically renewed for successive 12-month periods unless terminated upon 60 days prior notice by either party or upon the criminal conviction, death, disability, incapacity, bankruptcy, insolvency, gross negligence, gross dereliction of duty or gross misconduct, of RGMI or the personnel it provides to the Company. The Company's CEO and CFO beneficially own RGMI.

During the 9 months ended March 31, 2013, the fair value of vested stock options issued to directors and officers of the Company amounted to \$106,426 (2012 - \$467,823).

During the 9 months ended March 31, 2013, the Company incurred board of directors' fees of \$52,500 (2012 - \$41,701).

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Caracara Silver Inc.,
(formerly Ansue Capital Corp.)
Management's Discussion and Analysis
Three and nine months ended March 31, 2013

3 months ended March 31, 2013 and 2012

During the 3 months ended March 31, 2013, RGMI charged the Company \$110,550 (2012 - \$110,550) for management and administrative fees.

During the 3 months ended March 31, 2013, the fair value of vested stock options issued to directors, officers and employees of the Company amounted to \$22,638 (2012 - \$134,058).

During the 3 months ended March 31, 2013, the Company incurred board of directors' fees of \$17,500 (2012 - \$18,375).

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Risks and uncertainties

Operational

The operations of the Company are speculative due to the high-risk nature of its business, which are the acquisition, financing, exploration and development of mining properties. The risks below are not the only ones facing the Company. Additional risks not currently known to the Company, or that the Company currently deems immaterial, may also impair the Company's operations. If any of the following risks actually occur, the Company's business, financial condition and operating results could be adversely affected.

Exploration and development risk

Caracara's business of exploring mineral resources involves a variety of operational, financial and regulatory risks that are typical in the mining industry. The Company attempts to mitigate these risks and minimize their effect on its financial performance, but there is no guarantee that the Company will be profitable in the future, and Caracara's common shares should be considered speculative.

Financing risk

There can be no assurance that any funding required by the Company will become available, and, if so, that it will be offered on reasonable terms or that the Company will be able to secure such funding through third party financing or cost sharing arrangements. Furthermore, there is no assurance that the Company will be able to secure new mineral properties or projects or that they can be secured on competitive terms

Political and demographic risk

Some operations of the Company are conducted in Peru. As a result, the Company and its wholly-owned subsidiary, Solex, will be subject to political instability and changes in government policies, laws and regulations in Peru. Any changes in regulations or shifts in political conditions are beyond the Company's control and may adversely affect the Company's and/or Solex's business, including, income taxes, expropriation of property, employment, land use, water use, environmental legislation and exploration safety.

Caracara Silver Inc.,
(formerly Ansue Capital Corp.)
Management's Discussion and Analysis
Three and nine months ended March 31, 2013

Segregation of duties

Segregation of duties is a basic, key internal control and one of the most difficult to achieve in a small company. It is used to ensure that errors or irregularities are prevented or detected on a timely basis by employees in the normal course of business. Due to the Company's small size and limited resources, a complete segregation of duties within the Company's accounting group cannot be fully achieved. The result is that the Company is highly reliant on the performance of mitigating procedures during the process of closing its financial statements in order to ensure the financial statements are presented fairly in all material respects. Management will identify and hire additional accounting resources where cost effective and when required. Where it is not cost effective to obtain additional accounting resources, management will review existing mitigating controls and, if appropriate, implement changes to its internal control processes whereby more effective mitigating controls will be adopted.

Outstanding Share Data

As at May 17, 2013, the Company had 51,895,835 common shares outstanding, 2,933,333 outstanding options and 7,975,800 warrants outstanding.

General

The Company also discloses information related to its activities on SEDAR at www.sedar.com and on its website www.caracarasilver.com.
