CORPORATE UPDATE

APRIL 14, 2011, VANCOUVER, BC: QMI SEISMIC INC. (CNSX: QSS) (the “Company” or “QMI”) is providing this corporate update regarding its current activities and future plans.

As previously announced, QMI entered into a distribution agreement for the sale of electronic safety systems. The Company continues to market these products, however the QMI Board of Directors believes it to be in the shareholder’s interest for the Company to look for new business opportunities. The Company’s board has extensive experience and contacts in a variety of sectors; they will take advantage of these avenues to advance the Company’s long terms goals and enhance shareholder value.

At the Annual General Meeting, the Company will provide an update of its activities and report on any new business developments.

About QMI Seismic Inc.:

QMI markets and distributes advanced commercial, industrial, and residential electronic safety systems that detect the presence of gas leaks, water leaks, and seismic vibrations then signal controls to shut off gas valves, water valves, and power inputs. QMI holds distribution agreements in a number of international regions for products with patented technology that allow for remote gas and water shutoff. The seismic detection products that it markets and distributes are used by some of the world’s largest companies and organizations including NASA and G.E. Rail. The advanced early warning systems are designed to remotely shut-off utilities in the event of an earthquake and to provide early warning to households.
