

Processing Waste Gas into Clean Power
and Engineered Fuels
with the Mobile Refinery Unit

FOR IMMEDIATE RELEASE

October 27, 2016 - VANCOUVER, BRITISH COLUMBIA – ME Resource Corp. (the "Company" or "MEC") (CNSX: MEC | OTC: MEEFX) is pleased to announce that the Company will collaborate with Ineratec GmbH from Karlsruhe, Germany in developing a commercial Mobile Refinery Unit ("MRU"). Within the considerations of MEC's Patent #US 779/15931, Ineratec will contribute its' world-class expertise in implementing compact Fischer-Tropsch processors. The Company has confidence that Ineratec has the proficiency and facilities to develop and test a scalable version of a commercial MRU. Ali Gulamhusein, Lead Demonstration Engineer, states, "Ineratec boasts a strong team of researchers and engineers working out of an advanced, fully operational, R&D facility. This combination of experts and a state of the art testing facility provides the best opportunity to accelerate the commercialization of the MRU."

About Ineratec

INERATEC is a company providing ultra-compact chemical reactor technology and end-to-end solutions for demanding chemical reactions including Synthesis Gas Production and Fischer-Tropsch Reactions. Breakthrough process intensifications and improvements realize a decentralized, compact plant design and applications in numerous industries.

About ME Resource Corp.:

ME Resource Corp. ("MEC") is a Canadian company focusing on the development, commercialization and deployment of an economical, mobile and modular waste natural gas processor, which synthesizes waste natural gas, both flared and vented, into green fuel - Engineered Fuel™ and Clean Power. ME Resource Corp. is also pursuing the acquisition, exploration and development of resource properties. The Company's objective is to explore and develop its current assets and pursue additional acquisitions. The Corporation intends to acquire a portfolio of properties through project acquisitions, joint ventures and alliances.
