The Company's businesses are not subject to seasonal variations. Losses in the last eight quarters are mainly due to operating expenses incurred to support the Company's operations and development of the Company's IP into marketable products. Other factors that affect the losses among these eight quarters are losses from the disposition of the Company's resource properties and other assets, and incidental events. Loss in 2015 Q4 was higher as the Company recognized \$3,750,000 research expenditures when 25,000,000 common shares were released from escrow during 2015 Q4.

The Company expects the operating expenses will further increase in the next two years in connection with the research and development of the Company's MRU100 units. The Company expects to finance these expenditures with addition equity/debt financing.

The Company earned revenue from licensing the MRU100 units in the past eight quarters. Readers should be cautioned that the Company's MRU100 unit is still in its research stages. As a result, there is no guarantee that the Company will be able to earn more revenue from licensing in the future.

for gross proceeds of \$105,000 in early 2017. The Company also plans to raise more money from equity financing and will consider negotiation with creditor for a share for debt settlement in the next twelve months.

The Company realizes that the current resources are not adequate for the Company to achieve its long term objectives. The Company considers different financing options, including, but not limited to, further debt or equity financing, or share for debt settlement, to secure addition financing to provide adequate capital resource for the Company to meet its long term business objective.

The Company has not yet achieved profitable operations and expects to incur further losses in the development of its business. These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

The Company has a history to raise funds when needed in the past. However, there is no guarantee the Company is able to do so in the future.

As of the date of this MD&A, the Company does not have commitments for capital expenditures and the Company is not subject to external requirement in using its capital resources or maintenance of its capital structure.
