

# Albert Labs Appoints Principal Investigator for Real World Evidence Study for KRN-101

## *Albert Labs Appoints Dr Sara Tai as Principal Investigator for upcoming RWE Study on KRN-101*

VANCOUVER, BC, May 26, 2022 /CNW/ - [Albert Labs International Corp.](#) (Albert Labs (CSE: ABRT) (FSE: VB50), the "Company"), an R&D company developing mental health therapeutic medicines, is pleased to announce Dr. Sara Tai, Senior Lecturer in Clinical Psychology from Manchester University, as Principal Investigator for its upcoming trial. The trial will evaluate the safety and efficacy of KRN-101, a psilocybin-based medicine, for the treatment of cancer-related distress, an indication thought to affect some 15 million patients in Europe and North America.

Dr. Tai has extensive clinical research experience, having developed psychological interventions for people diagnosed with a variety of mental health issues such as depression, psychosis and bipolar disorder. Her research focuses on the science and practice of therapy, progressing these into regulatory approved clinical practices. In addition to developing these structures and practices, Sara has a deep understanding of the commercial imperative of delivering the necessary training to offer these novel therapeutics at scale as part of the UK's National Health Service.

Dr. Malcolm Barratt-Johnson, Albert Labs' Chief Medical Officer, said, "I'm delighted that Dr. Tai has agreed to work with Albert Labs as Principal Investigator in what will be the company's key first study investigating the effects of a natural psilocybin treatment on cancer-related distress. Sara is rightly regarded as a leading global light in the field of psilocybin research, having been involved in several of the studies underpinning our present knowledge in this important area of clinical research."

"I am thrilled to be working with Albert Labs, who are committed to addressing the mental health needs of people with cancer, a significant area of unmet need. I value Albert Labs' emphasis on ethical and patient-centred investigations of the effectiveness of psychotherapy assisted by novel plant-based medications. Being involved in such groundbreaking research with the potential to develop new treatments for people in great need is very exciting", added Dr. Sara Tai. Listen more to what Dr Tai had to say in a [recent interview](#).

### **Business of Albert Labs Inc.**

A clinical research and drug development enterprise, Albert Labs and its team of experts leverage advanced culture technology and natural extraction to accelerate the development of highly effective mental health medicines. Albert Labs uses an approved, fast track regulatory pathway known as Real World Evidence (RWE). RWE studies are increasingly recognized as a valuable regulatory approval process, which was used in the successful development of Covid-19 vaccines. This accelerated development pathway will facilitate Albert Labs in delivering on its goal of receiving market authorization and creating safe and effective licensed medicines.

Through collaborations with research institutions, hospital centres and government agencies, Albert Labs uses existing clinical infrastructure to deliver and improve patient access to its treatment. Albert Labs' first drug target, KRN-101, is a potential solution for cancer-related anxiety, a market of over 15 million people with roughly 1 million new sufferers each year. From this initial focus, Albert Labs will address broader mental health concerns, reported to affect over a billion people worldwide.

Albert Labs (CSE: ABRT) (FSE: VB50) is [listed on the Canadian Securities Exchange \(CSE\)](#) and uses [patent-pending](#) technology to manufacture natural psilocybin Active Pharmaceutical Ingredients (API). Albert Labs is progressing swiftly through confirmatory [toxicology studies](#) a work programme that will provide essential data on Albert Labs' product in support of clinical trials due to start later this year.
