

BetterLife Launches New Corporate Website

VANCOUVER, British Columbia, Feb. 10, 2022 -- BetterLife Pharma Inc. ("BetterLife" or the "Company") (CSE: [BETR](#)/ OTCQB: [BETRF](#)/ FRA: [NPAU](#)), an emerging biotech company focused on the development and commercialization of 2nd-generation non-hallucinogenic psychedelic analogs for the treatment of neuropsychological disorders, is pleased to announce the launch of its new website. The Company's newly designed website better presents BetterLife's mission to develop new and innovative medicines to treat mental health disorders, such as depression and anxiety. The new website can be accessed at <https://abetterlifepharma.com/>.

"In the past year, our team made significant advancements in development of our lead compounds, BETR-001 and BETR-002. We have obtained solid pre-clinical data to position BETR-001 as a leading candidate for potential treatment of certain mental health disorders affecting millions around the world. The non-hallucinogenic properties of BETR-001, combined with our proprietary non-controlled (scheduled) manufacturing process, allows for faster development and treatment of millions of additional patients. With recent guidance from the FDA, we continue to generate additional data to complete our Investigational New Drug (IND) Application to be submitted second half of this year," said BetterLife's Chief Executive Officer, Dr. Ahmad Doroudian.

About BetterLife Pharma

BetterLife Pharma Inc. is an emerging biotechnology company primarily focused on developing and commercializing two compounds, BETR-001 and BETR-002, to treat neuro-psychiatric and neurological disorders.

BETR-001 (formerly TD-0148A), which is in preclinical and IND-enabling studies, is a non-hallucinogenic and non-controlled LSD derivative in development and it is unique in that it is unregulated and therefore can be self-administered. BetterLife's synthesis patent for BETR-001 eliminates regulatory hurdles and its pending patent for composition and method of use covers treatment of depression, cluster headaches, post-traumatic stress disorder and other neuro-psychiatric and neurological disorders.

BETR-002 (formerly TD-010), which is in preclinical and IND-enabling studies, is based on honokiol, the active anxiolytic ingredient of magnolia bark. BetterLife's pending method of use and formulations patent covers treatment of anxiety related disorders including benzodiazepine dependency.

BetterLife also owns a drug candidate for the treatment of viral infections such as COVID-19 and is in the process of seeking strategic alternatives for further development.

Cautionary Note Regarding Forward-Looking Statements

No securities exchange has reviewed nor accepts responsibility for the adequacy or accuracy of the content of this news release. This news release contains forward-looking statements relating to product development, licensing, commercialization and regulatory compliance issues and other statements that are not historical facts. Forward-looking statements are often identified by terms such as "will", "may", "should", "anticipate", "expects" and similar expressions. All statements other than statements of historical fact, included in this release are forward-looking statements that involve risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from the Company's expectations include the failure to satisfy the conditions of the relevant securities exchange(s) and other risks detailed from time to time in the filings made by the Company with securities regulations. The reader is cautioned that assumptions used in the preparation of any forward-looking information may prove to be incorrect. Events or circumstances may cause actual results to differ materially from those predicted, as a result of numerous known and unknown risks, uncertainties, and other factors, many of which are beyond the control of the Company. The reader is cautioned not to place undue reliance on any forward-looking information. Such information, although considered reasonable by management at the time of preparation, may prove to be incorrect and actual results may differ materially from those anticipated. Forward-looking statements contained in this news release are expressly qualified by this cautionary statement. The forward-looking statements contained in this news release are made as of the date of this news release and the Company will update or revise publicly any of the included forward-looking statements as expressly required by applicable law.
