

BetterLife Fast Tracks Its US Patent for BETR-001 and Other LSD Derivatives

VANCOUVER, British Columbia, June 27, 2023 -- BetterLife Pharma Inc. ("BetterLife" or the "Company") (CSE: [BETR](#) / OTCQB: [BETRF](#) / FRA: [NPAU](#)), an emerging biotech company focused on the development and commercialization of cutting-edge treatments for mental disorders, today announced the fast tracking of its U.S. Patent Application which relates to new non-hallucinogenic lysergic acid diethylamide ("LSD") derivatives. This U.S. Patent Application is part of a developing international patent portfolio which cover compositions of these derivatives. BetterLife has developed "BETR-001", a new 2-bromo-LSD derivative covered by these patent filings.

In addition to composition claims, these applications also cover a novel method for making non-hallucinogenic LSD derivatives that does not involve the use of strictly controlled intermediate substances. The applications also cover use of these derivatives in the treatment of a range of neuropsychiatric and neurological conditions, including depression, anxiety, cluster headaches and neuropathic pain.

Dr. Ahmad Doroudian, CEO of BetterLife commented, "2-bromo-LSD was originally thought to be neuro-pharmacologically inactive compared to LSD. However, BetterLife has been able to show that 2-bromo-LSD has robust neuroplasticity properties, and efficacy in preclinical models of depression, anxiety, and pain. Importantly, its stereoisomers have different polymorphs as well as different pharmacological properties which are part of the composition claims in BetterLife's patent applications." He added, "We believe these are strong composition claims and will hold the test of time, much like we are seeing how similar composition patents for molecules like S- and R-ketamine, psilocybin polymorphs and so forth, although challenged, have been upheld by the US Patents and Trademarks Office." He further added, "BETR-001 IND-enabling studies are ongoing, and we are looking forward to file its IND and begin human trials as soon as these are completed."

About BetterLife Pharma

BetterLife Pharma Inc. is an emerging biotechnology company primarily focused on developing and commercializing two compounds, BETR-001 and BETR-002, to treat neuro-psychiatric and neurological disorders.

BETR-001, which is in preclinical and IND-enabling studies, is a non-hallucinogenic and non-controlled LSD derivative in development and it is unique in that it is unregulated and therefore can be potentially self-administered. BetterLife's synthesis patent application for BETR-001 eliminates regulatory hurdles and its pending patent, for composition and method of use, covers treatment of major depressive disorder, anxiety disorder and neuropathic pain and other neuro-psychiatric and neurological disorders.

BETR-002, which is in preclinical and IND-enabling studies, is based on honokiol, the active anxiolytic ingredient of magnolia bark. BetterLife's pending method of use and formulations patent covers treatment of anxiety related disorders including benzodiazepine dependency.

BetterLife also owns a drug candidate for the treatment of viral infections such as COVID-19 and is in the process of seeking strategic alternatives for further development.

Cautionary Note Regarding Forward-Looking Statements

No securities exchange has reviewed nor accepts responsibility for the adequacy or accuracy of the content of this news release. This news release contains forward-looking statements relating to product development, licensing, commercialization and regulatory compliance issues and other statements that are not historical facts. Forward-looking statements are often identified by terms such as "will", "may", "should", "anticipate", "expects" and similar expressions. All statements other than statements of historical fact, included in this release are forward-looking statements that involve risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from the Company's expectations include the failure to satisfy the conditions of the relevant securities exchange(s) and other risks detailed from time to time in the filings made by the Company with securities regulations. The reader is cautioned that assumptions used in the preparation of any forward-looking information may prove to be incorrect. Events or circumstances may cause actual results to differ materially from those predicted, as a result of numerous known and unknown risks, uncertainties, and other factors, many of which are beyond the control of the Company. The reader is cautioned not to place undue reliance on any forward-looking information. Such information, although considered reasonable by management at the time of preparation, may prove to be incorrect and actual results may differ materially from those anticipated. Forward-looking statements contained in this news release are expressly qualified by this cautionary statement. The forward-looking

statements contained in this news release are made as of the date of this news release and the Company will update or revise publicly any of the included forward-looking statements as expressly required by applicable law.
