Management's Discussion and Analysis

For the Three and Six Months Ended June 30, 2014 and 2013

The following Management's Discussion and Analysis ("MD&A"), dated August 29, 2014, reviews Petro Viking Energy Inc.'s ("Petro Viking" or the "Company") activities and results of operations for the three and six months ended June 30, 2014 and should be read in conjunction with the following:

- Audited consolidated financial statements for the year ended December 31, 2013,
- MD&A for the three and twelve months ended December 31, 2013,
- Audited consolidated financial statements for the year ended December 31, 2012 and
- MD&A for the three and twelve months ended December 31, 2012

DESCRIPTION OF THE COMPANY

Petro Viking is a Calgary, Alberta based petroleum and natural gas exploration, production and development company, with operations in western Canada. On February 28, 2011, the Company completed its "Qualifying Transaction" pursuant to which Deep Creek Oil & Gas Inc. ("Deep Creek") and 1560368 Alberta Ltd., a wholly-owned subsidiary of the Company, amalgamated pursuant to the provisions of the Business Corporations Act (Alberta). On March 21, 2011, Deep Creek changed its name to Petro Viking Management Corp. ("PVMC").

The consolidated financial statements referred to above, include the accounts of the Company and its wholly owned subsidiary, Petro Viking Management Corp. ("PVMC", formerly Deep Creek Oil & Gas Inc.), after the elimination of intercompany transactions and balances.

The business of exploring for oil and gas involves a high degree of risk and there can be no assurance that planned exploration and development programs will result in profitable reserves that are economically recoverable. The recovery of amounts capitalized for resource properties and related costs in the consolidated statement of financial position is dependent upon the existence of economically recoverable reserves, the ability of the Company to arrange appropriate financing to complete development of its properties and upon future profitable production or proceeds from their disposition. Changes in future conditions could require material write-downs of the carrying values of its properties.

BASIS OF PRESENTATION

The consolidated financial statements referred to above, including comparatives, and the financial data presented in this MD&A are in Canadian dollars and have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to a going concern, which assumes continuity of operations and realization of assets and settlement of liabilities in the normal course of business. In assessing whether or not there are material uncertainties that may lend doubt as to the ability of the Company to continue as a going concern, management takes into account all available information about the future, which is at least but is not limited to twelve months from the end of the reporting period. Management is aware of the material uncertainties that could cast significant doubt upon the Company's ability to continue as a going concern. As at June 30, 2014, the Company reported a net loss of $379,162 and a negative working capital of $1,964,914. As a result the Company will need to raise additional financing within the next twelve months in order to meet its liabilities as they come due and to continue with its business activities.

The preparation of financial statements in conforming to IFRS also requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities, at the date of the financial statements, and the reported amounts of revenues and expenses during the period. Actual results could differ from these estimates.

NON-IFRS MEASURES

This report contains financial terms that are not considered measures under IFRS, such as barrels of oil equivalent (“boe”), funds flow from operations, and operating netback. These measures are commonly utilized in the oil and gas industry and are considered informative for management and stakeholders.

Boe Presentation - In conformity with National Instrument 51-101, Standards for Disclosure of Oil and Gas Activities (“NI 51-101”), natural gas volumes have been converted to boe, using a conversion rate of six thousand cubic feet of natural gas to one barrel of oil. This ratio is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Readers are cautioned that the term “boe” may be misleading, particularly if used in isolation.

Funds flow from operations reflects cash generated from operating activities before changes in non-cash working capital. Management considers funds flow from operations important as it helps evaluate performance and demonstrate the ability to generate sufficient cash to fund future growth opportunities and repay debt.

Profitability relative to commodity prices per unit of production is demonstrated by an operating netback. Operating netback reflects revenues less royalties, transportation costs, and production expenses divided by production for the period.

Funds flow from operations and operating netbacks may not be comparable to those reported by other companies nor should they be viewed as an alternative to cash flow from operations or other measures of financial performance calculated in accordance with IFRS.

FORWARD-LOOKING STATEMENTS

This MD&A contains forward-looking statements relating to future events. Forward-looking information is information that does not relate strictly to historical or current facts, and can be identified by words such as “anticipate”, “continue”, “estimate”, “expect”, “forecast”, “may”, “will”, “project”, “should”, “believe”, or similar expressions. Such statements represent Petro Viking’s internal projections, estimates or beliefs concerning, among other things, an outlook on the estimated amounts and timing of capital expenditures, anticipated future debt, revenues or other expectations, beliefs, plans, objectives, intentions or statements about future events or performance. These statements represent management’s best projections, expectations, and estimates as of the date of this document, but undue reliance should not be placed upon them as they are derived from numerous assumptions. These assumptions are subject to known and unknown risks and uncertainties, including the business risks discussed in the MD&A, which may cause actual performance and financial results to differ materially from any projections of future performance or results expressed or implied by such forward-looking statements. Such risks and uncertainties would include, without limitation, risks associated with the oil & natural gas exploration and development, exploitation, production, marketing and transportation, loss of markets, volatility of commodity prices, currency fluctuations, imprecision of reserve estimates, environmental risks, increased competition from other producers, inability to retain drilling rigs and other services, delays resulting from or inability to obtain required regulatory approvals and ability to access sufficient capital from internal and external sources, the impact of general economic conditions in Canada and the United States and overseas, industry conditions, changes in laws and regulations (including the adoption of new environmental laws and regulations) and changes in how they are interpreted and enforced, changes in federal and provincial tax laws and legislation (including the adoption of new royalty regimes), the lack of availability of qualified personnel, fluctuations in foreign exchange or interest rates, stock market volatility and market valuations of companies with respect to announced transactions and the final valuations thereof, and obtaining required approvals of regulatory authorities. Examples of forward-looking information in this document include, but are not limited to the following, each of which is

subject to significant risks and uncertainties and is based on a number of assumptions which may prove to be incorrect.

- Petro Viking's planned capital program is subject to realized commodity prices and funds from operations generated as well as results from drilling operations.
- Petro Viking's plans to drill, complete and tie-in wells is subject to the availability of drilling and related equipment, the effects of inclement weather, unexpected cost increases, the availability of skilled and productive labour, and unexpected changes in regulations. The drilling of some wells may also be predicated on the success of other wells.
- The expectation is that the Company can fund ongoing operations and capital programs with funds from operations. Absolute assurance cannot be given that the funds considered necessary to operate will be available.

This forward-looking information represents our views as of the date of this document and such information should not be relied upon as representing our views as of any date subsequent to the date of this document. We have attempted to identify important factors that could cause actual results, performance or achievements to vary from those current expectations or estimates expressed or implied by the forward-looking information. However, there may be other factors that cause results, performance or achievements not to be as expected or estimated and that could cause actual results, performance or achievements to differ materially from current expectations. There can be no assurance that forward-looking information will prove to be accurate, as results and future events could differ materially from those expected or estimated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. While we anticipate that subsequent events and developments may cause our views to change, we do not have an intention to update this forward-looking information, except as required by applicable securities laws.

This MD&A was reviewed and approved by the Company's Audit Committee and Board of Directors on August 29, 2014.

ACQUISITIONS AND DISPOSITIONS

Acquisitions:

The Company purchased the oil and natural gas assets from a court appointed receiver and manager of a working interest partner in receivership during the three and six months ended June 30, 2014.

Dispositions:

There were no dispositions during the three and six months ended June 30, 2014.

FINANCIAL AND OPERATIONAL RESULTS

Production	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
Oil and NGL (bbl/d)	**53**	41	**43**	39
Natural gas (mcf/d)	**191**	224	**167**	192
Total (boe/d)	**85**	78	**71**	71

For the second quarter of 2014 oil and NGL production was 53 bbl/d compared to 41 bbl/d reported for the equivalent quarter of 2013. This represents an increase of approximately 29%. Natural Gas production decreased 15% from 224 Mcf/d for the second quarter of 2013, to 191 Mcf/d, for the second quarter of 2014. For the six month period ended June 30, 2014, oil and NGL production increased 10% from 39 bbl/d for the six months ended June 30, 2013 to 43 bbl/d for same period in 2014. Natural gas production fell 13% from 192 mcf/d for the six months ended June 30, 2013 to 167 mcf/d for the equivalent period of 2014. Total production in boe's increased 9% to 85 boe/d, for the quarter ended June 30, 2014, from 78 boe/d, for the same quarter in 2013. For the six months period ended June 30, 2014, the production remained constant even with the acquisition of the working interest partner's oil and natural gas interests.

Revenue and Royalties	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
Petroleum and natural gas sales	**511,096**	253,371	**843,030**	576,051
Less: royalties	**(93,567)**	(41,820)	**(143,192)**	(86,815)
Net petroleum and natural gas sales	**417,529**	211,551	**699,838**	489,236
Prices received:				
Oil and NGL (per bbl)	**89.46**	54.85	**88.33**	69.19
Natural gas (per mcf)	**4.63**	2.35	**5.30**	2.52
Royalties as a percentage of sales	**18%**	16%	**17%**	15%

For the three month quarter ended June 30 2014, petroleum and natural gas sales was $511,096 compared to $253,371 reported for the same period of 2013. This represents an increase of approximately 102%. The increase is attributed to higher commodity prices and increased production from the acquisition and management's conscious effort to improve operations. For the second quarter ended June 30, 2014, oil and NGL prices per bbl increased 40% to $89.46 per bbl compared to $54.85 per bbl for the same period. Natural gas prices for the quarter improved the most with the average price being $4.63 per mcf, an increase of 81% over the average price of $2.35 per mcf received in the same quarter of 2013. The increase oil and NGL prices for the quarter reflects the demand for the product for the summer driving season and the increase in natural gas prices is due in part to the replenishment of the storage facilities.

For the six months ended June 30, 2014, petroleum and natural gas sales was up 46% due to higher commodity prices for all products and higher production of oil and NGL offset in part by lower natural gas production. The increase in overall production is also attributable to the acquisition of the working interest partner's oil and gas assets from the court appointed receiver manager during this period. Petroleum and natural gas sales were $843,030 for the six month ended June 30, 2014 compared to $576,051 for the same period in 2013.

Petro Viking continues to maintain a higher weighting in oil and NGL at 58% for the second quarter of 2014 and 2013 and increased the weighting to oil and NGL's for the six months ended June 30, 2014 to 61% from 55% compared to the same six month period for 2013. This increase is due in part to the acquisition of the working interest partner's assets in Ronalane, which is mainly an oil producing property.

Royalties, as a percentage of sales for the second quarter and for the six months ended June 30, 2014 increased by 13% over the comparable quarter and period for 2013. This is mainly due to the increased production in Ronalane and Retlaw from the acquisition of the working partner's interest.

Operating Expenses	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
Operating expenses	**328,254**	187,394	**501,701**	375,223
Total (per boe)	**42.58**	26.23	**39.32**	29.23

Operating expenses, on a per boe basis, for the second quarter and six months ended June 30, 2014 were higher by 62% and 35% respectively, when compared to corresponding period in 2013. The higher operating costs are due to property taxes incurred for this time of the year and to operating costs incurred in the Brownfield area where the Company to date did not have any production.

Operating Netback	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
Petroleum and natural gas sales	**511,096**	253,371	**843,030**	576,051
Royalties	**(93,567)**	(41,820)	**(143,192)**	(86,815)
Operating expenses	**(328,254)**	(187,394)	(501,701)	(375,223)
Operating netback	**89,275**	24,157	**198,937**	114,013
Operating netback (per boe)	**$11.58**	3.38	**$15.53**	8.88

Operating netbacks for the second quarter and for the six months ended June 30, 2014 were $11.58 and $15.53 per boe compared to $3.88 and $8.88 per boe for the corresponding period for 2013. This represents a 243% and 75% increase over the equivalent periods for 2013. Petro Viking realized a higher netback due primarily to the higher commodity prices and in part to management's continuing efforts to maximize production in the Ronalane and Retlaw properties while continuing to monitor the marginal producing properties and streamline operations.

Depletion and Depreciation	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
Depletion and depreciation	**151,950**	69,500	**178,260**	155,120
Total (per boe)	**19.71**	9.73	**13.97**	12.08

Depletion and depreciation for the second quarter and for the six month period ended June 30, 2014 is significantly higher than the corresponding period for 2013. The increase is mainly due to a higher depletion base from capital expenditures incurred, the acquisition and the resulting revision of the change in estimates for abandonment and reclamation costs assumed from the purchase of the Ronalane and Retlaw assets over the equivalent period for 2013. During the year ended December 31, 2013, the Company recorded an impairment expense on its producing properties that reduced the value of the cash generating unit to its recoverable amount. The recoverable amount was determined using the fair value less costs to sell methodology with the expected future cash flows based on proved and probable reserves using a pre-tax discount rate of 12%. The Company had higher production volumes for the second quarter and six months ended June 30, 2014 compared to the corresponding quarter and period for 2013.

For the six month period ended June 30, 2014, no producing properties were impaired.

General and Administrative Expenses	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
General and Administrative Expenses	**220,672**	149,862	**310,964**	344,008
Total (per boe)	**28.63**	20.94	**24.37**	26.77

General and administrative ("G&A") expenses include management fees, consulting fees, legal and professional fees, regulatory, transfer agent and listing fees, and office and administration costs. For the three months ended June 30, 2014, G&A expenses rose by 47% mainly due to the bad debt expense on amounts receivable from a working interest partner that the Company purchased the assets in Ronalane and Retlaw from the court appointed receiver manager and legal costs incurred for litigation. The general and administrative expenses increased by 47% for the three months ended June 30, 2014 over the corresponding period for 2013. However, general and administrative expenses declined by 10% for the six month period compared to the corresponding period for 2013.

Other Income	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
Interest income	88	-	88	438

The Company had interest income for the three and six months ended June 30, 2014.

Financing Costs	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
Interest expense	26,865	22,502	54,401	40,351
Accretion on decommissioning liabilities	16,906	12,185	33,792	24,455
Total	**43,771**	34,687	**88,193**	64,806

Financing costs for the second quarter and for the six months ended June 30, 2014 was $43,771 and $88,193. The interest expense is higher than the corresponding quarter for 2013 due to the borrowing of additional funds in the form of notes payable in the third and fourth quarters of 2013 and additional notes payable of $150,000 used to finance the acquisition of the working interest partner's assets in Ronalane and Retlaw. Additional interest was incurred for late payment of vendor invoices. The notes payable of $450,000 are unsecured and bear interest at 10% compounded monthly. $250,000 of the notes payable is due to a related party.

The accretion on decommissioning liabilities for the second quarter and for the six month period of 2014 was $16,906, and $33,792 respectively. The increase in decommissioning costs by 38% compared to the accretion on decommissioning liabilities for the same relevant period of 2013 is due to the acquisition of the Ronalane and Retlaw properties and the decline in the risk free rate used from 1.62% to 1.47%.

Taxes

At June 30, 2014, Petro Viking had an estimated total of $2.9 million of tax pools available to reduce future taxable income and corporate income taxes. In addition the Company has $7.1 million in loss carry forwards. This is subject to confirmation from tax authorities.

Funds flow from Operations	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
Cash flow from operating activities	319,101	(146,567)	300,110	(350,378)
Add (Deduct):				
Changes in non-cash working capital	(483,291)	(25,343)	(487,746)	56,767
Settlement of decommissioning liabilities	6,016	23703	20,496	23703
Funds flow from operations	**(158,174)**	(148,297)	**(167,140)**	(269,908)
per share (basic)	(0.01)	(0.01)	(0.01)	(0.01)
per share (diluted)	(0.01)	(0.01)	(0.01)	(0.01)

Funds flow from operations for the second quarter of 2014 is unfavorable when compared to the similar quarter for 2013. This is due to higher operating and general administrative expenses, offset in part by higher revenues.

Funds flow from operations for the six month period ended June 30, 2014 was favourable compared to the same period for 2013. This was due in part to lower general and administrative expenses and additional debt from notes and accounts payable.

The funds flow from operations is impacted by production, prices received, royalties paid, operating expenses and general and administrative expenses. Refer to the above discussions regarding the changes in these components.

Exploration and evaluation expenditures for the second quarter and six month period ended June 30, 2014 was $Nil.

CAPITAL EXPENDITURES

	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
Asset additions	710,321	29,348	711,231	124,574
Revisions to asset retirement costs	1,030,965	(77,139)	1,033,671	(71,334)
Capital expenditures	**1,741,286**	(47,791)	**1,744,902**	53,240

Asset additions during the quarter and six months ended June 30, 2014 relate to purchase of the Ronalane and Retlaw oil and natural gas assets from a working interest partner in receivership and workovers on some of the Company's operated oil producing properties.

Revisions to asset retirement costs during the quarter ended June 30, 2014 was $1,030,965 and the increase is due to the assumption of working interest partner's share of the abandonment and reclamation

liability with respect to Ronalane and Retlaw.

OUTSTANDING SHARE DATA

No options were granted to officers, directors, employees and consultant for the quarter ended and six month period ended June 30, 2014.

The Company has 30,259,707 outstanding common shares at August 29, 2014. The common shares trade on the TSXV under the symbol "VIK".

LIQUIDITY AND CAPITAL RESOURCES

At June 30, 2014, the Company has cash and short term investments (with maturities of under 90 days), of $138,302 and a negative working capital of $1,964,914. At June 30, 2014 the Company has not established a bank line of credit.

FINANCIAL INSTRUMENTS

At June 30, 2014, the Company's financial instruments include cash and cash equivalents, short–term investments, accounts receivable, accounts payable and accrued liabilities, and debentures. The carrying values of accounts receivable, accounts payable and accrued liabilities, approximate their fair values due to their relatively short periods to maturity. The short-term interest bearing securities are recorded at cost plus accrued interest earned which approximates current market value. The Company presently has no established credit facility.

To date, the Company has not used derivative financial instruments, such as commodity price risk management contracts, to mitigate risk.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have any special purpose entities, nor is it a party to any transactions or arrangements that would be excluded from the balance sheet other than its operating leases for office space on a month-to-month basis.

RELATED PARTY DISCLOSURES

Transactions with related parties are incurred in the normal course of business and are measured at the exchange amount which is the amount of consideration established and approved by the related parties. Related party transactions during the period are disclosed below:

	Three months ended June 30		Six months ended June 30	
	2014	2013	**2014**	2013
			$	$
Key management personnel compensation:				
Administration and consulting fees	43,503	75,065	89,633	142,118
Others:				
Interest expense on the Company's debentures, held by a director of the Company, and companies controlled by a director of the Company.	11,985	11,898	23,746	20,464

	Six months ended June 30	
Amount owing to / from related parties	**2014**	2013
	$	$
Accounts payable and accrued liabilities for administration and consulting fees, legal fees, and debenture interest payable.	199,599	82,850
Debenture – Principal outstanding.	370,000	370,000
Notes Payable	250,000	50,000

The unaudited interim condensed consolidated financial statements for the six months ended June 30, 2014 include the financial statements of Petro Viking and its wholly owned subsidiary, PVMC. Balances between Petro Viking and its subsidiary, which is a related party, have been eliminated on consolidation and are not disclosed.

CRITICAL ACCOUNTING ESTIMATES

There have been no changes to the Company's critical accounting estimates in the three months ended March 31, 2014. The Company's critical accounting estimates are described in note 3(u) in the audited consolidated financial statements for the year ended December 31, 2013.

CHANGES IN ACCOUNTING POLICIES

There have been no changes to the Company's accounting policies for the six months ended June 30, 2014. The Company's significant accounting policies are described in to note 3 in the audited consolidated financial statements for the year ended December 31, 2013.

RISK MANAGEMENT

Petro Viking is exposed to a number of risks in the normal course of its business that have the potential to affect its operating performance. The Company has exposure to credit risk, liquidity and financial risk, and market risk.

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its commercial obligations. This arises principally from joint venture partners and natural gas marketers.

Virtually all of the Company's accounts receivable are with companies in the petroleum and natural gas industry within Canada and are subject to normal industry credit risks. The Company generally extends unsecured credit to these companies and therefore, the collection of accounts receivable may be affected by changes in economic or other conditions. Management believes the risk is mitigated by the size and reputation of the companies to which they extend credit. The Company's maximum credit risk exposure is limited to the carrying value of its accounts receivable. However, the receivables are from participants in the oil and gas sector and collection of the outstanding balances is dependent on industry factors such as commodity price fluctuations, escalation costs and the risk of unsuccessful drilling.

As at June 30, 2014, the Company incurred a bad debt in the amount of $37,529 on the approximate amount due of $390,000 from a company that had filed for receivership in April of 2014. Even though the Company had filed a lien on the assets of that company, the full amount could not be recovered.

The Company does not typically obtain collateral from petroleum and natural gas marketers or joint venture partners; however, the Company does have the ability to withhold production from joint venture partners in the event of non-payment.

Liquidity and financial risk

Liquidity risk is the risk that the Company will incur difficulties meeting its financial obligations as they are due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Company's reputation.

The Company prepares annual capital expenditure budgets, which are regularly monitored and updated as considered necessary. The Company uses authorizations for expenditures on both operated and non-operated projects to further manage capital expenditures.

The Company anticipates it will continue operations in the foreseeable future and it will have adequate liquidity to fund its financial liabilities through its future cash flows. At June 30, 2014, the Company had a working capital deficiency of $1,964,914 (June 30, 2013 – $120,092 positive working capital).

The Company's financial liabilities are comprised of accounts payable and accrued liabilities, notes payable and debentures. The accounts payable and accrued liabilities and notes payable have expected maturities of less than one year resulting in their current classification on the consolidated statement of financial position. The full balance of the debentures matures in fiscal 2015.

To further reduce the financial risk, management intends to renegotiate the debentures and notes payable either by exchanging shares for debt or extending the maturity date of the debentures beyond 2015.

Market risk

Market risk is the risk that changes in market factors, such as foreign exchange rates, commodity prices, and interest rates will affect the Company's cash flows, net income, liquidity or the value of financial instruments. The objective of market risk management is to mitigate market risk exposures where considered appropriate and maximize returns.

i. Interest rate risk
Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is exposed to interest rate risk on its cash and cash equivalents. The Company had no interest rate swap or financial contracts in place at June 30, 2014 or 2013. For the six months ended June 30, 2014 or 2013, an increase or decrease of interest rates by one percent would not have materially affected the financial results of the Company.

ii. Currency risk
Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. All of the Company's petroleum and natural gas sales are denominated in Canadian dollars; however, the underlying market prices in Canada for petroleum and natural gas are impacted by changes in the exchange rate between the Canadian and United States dollar. The Company had no outstanding forward exchange rate contracts in place at June 30, 2014 or 2013.

iii. Commodity price risk
Commodity price risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for petroleum and natural gas are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States dollar, as outlined above. Significant changes in commodity prices may materially impact the Company's financial results.

If production remained constant and the Company' s realized prices changed by $1.00 per barrel of oil equivalent, the Company's net loss would vary by $7,709 and $12,758 for the three six months ended June 30, 2014.

NEW ACCOUNTING STANDARDS ADOPTED

On January 1, 2013, the Company adopted new accounting standards, IFRS 10 *Consolidated Financial Statements,* IFRS 12 *Disclosure of Interests in Other Entities* and IFRS 13, *Fair Value Measurement.* All standards were effective for annual periods beginning on or after January 1, 2013. The adoption of these standards had no impact on the financial statements as at January 1, 2013 or on the comparative periods.

RECENT PRONOUNCEMENTS ISSUED

The following pronouncement from the International Accounting Standards Board ("IASB") is not yet effective and has not been early adopted by the Company. The Company intends to adopt this standard when it becomes effective.

IFRS 9, *Financial Instruments: Classification and Measurement.* IFRS 9 revises the current multiple classification and measurement models for financial assets and liabilities and limits the models to two: amortized cost or fair value. The effective date for this standard is still to be determined. The Company is currently assessing the impact of this standard on its consolidated financial statements.
