

**FINANCIAL STATEMENTS**

**For the three months ended March 31, 2018 and 2017.**

---

## NOTICE OF NO AUDIT REVIEW OF INTERIM CONDENSED FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, Subsection 4.3(3) (a), if an auditor has not performed a review of the interim condensed financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by the auditor. The accompanying unaudited interim condensed financial statements of the Company have been prepared by management and approved by the Audit Committee and Board of Directors of the Company. The Company's independent auditors have not performed a review of these financial statements in accordance with the standards established by the Chartered Professional Accountants for a review of the interim financial statements by the entity's auditors.

**1. Corporate information**

Petro Viking Energy Inc. (“Petro Viking” or the “Company”) is incorporated under the laws of the province of Alberta with shares listed on the TSX Venture Exchange.

The records office and principal address is located at 434 Sierra Madre Ct., Calgary, Alberta T3H 3M4.

The Company currently is not engaged in any activities and is in the process of getting its filing documents up to date to have its shares relisted and be able to enter into a qualifying transaction to have future operations. On December 15, 2017, the Company restructured all its current liabilities to directors, as explained in Notes 4 and 5, into long-term liabilities and is planning to convert these into shares at the market price of the shares on the date of the qualifying transaction. Furthermore, the Company intends to settle any remaining unrelated payables into shares once the listing transaction is completed and, to the extent that such conversion is not possible, they will be settled in cash.

The financial statements have been prepared using International Financial Reporting Standards (“IFRS”) applicable to going concern, which assumes continuity of operation and realization of assets and settlement of liabilities in the normal course of business. As at March 31, 2018, the Company reported a cumulative deficit of \$7,161,220 and a negative working capital of \$72,231. The Company’s ability to continue as a going concern is dependent upon its ability to close a qualifying transaction and raise additional financing which will allow for settlement of debt as detailed above and to have future operations. Even if the Company has been successful in the past in doing so, there is no assurance that it will manage to obtain additional financing or settle its liabilities as intended above.

These factors indicate the existence of a material uncertainty regarding the Company to continue as a going concern/ These financial statements do not include any adjustments to the classification of liabilities that might be necessary, should the Company be unable to continue as a going concern.

**2. Basis of presentation**

*Statement of compliance*

These financial statements have been prepared in accordance to IFRS as issued by the International Accounting Standards Board (“IASB”) and in the interpretations of the International Financial Reporting Interpretation Committee (“IFRIC”) in effect at the closing date of March 31, 2018.

The financial statements were authorized by the Board of Directors for issue on July 18, 2018.

*Basis of measurement*

The financial statements have been prepared under the historical cost method, except as otherwise noted below.

*Financial and presentation currency*

These financial statements are presented in Canadian Dollars, which is also the Company’s functional currency.

**3. Summary of significant accounting policies**

These accounting policies have been used throughout all years presented in the financial statements:

**a) Share Capital**

Share capital represents the amount received on the issue of shares, less issuance costs. Proceeds from unit placements are allocated between shares and warrants issued by: estimating the value of the warrants using the Black-Scholes options model; the fair value is allocated to warrants from the net proceeds and the balance is allocated to the shares. Contributed surplus includes charges related to share options and warrants until such equity instruments are exercised. Deficit includes all current and prior period year profits or losses.

**b) Equity-settled share-based payment transactions**

The Company operates equity-settled share-based remuneration plans (share option plans) for its eligible directors, officers and consultants. None of the Company's plans feature any options for a cash settlement. All goods and services received in exchange for the grant of any share-based payments are measured at their fair values. This fair value is appraised at the grant date. All equity-settled share-based payments are ultimately recognized as an expense in net loss depending on the nature of the payment with a corresponding credit to contributed surplus. If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options expected to vest. Non-market vesting conditions are included in assumptions about number of options that are expected to become exercisable. Estimates are subsequently revised if there is any indication that the number of share options expected to vest differs from previous estimates. Any cumulative adjustment prior to vesting is recognized in the current period. No adjustment is made to any expense recognized in prior period if share options have already vested. Upon exercise of share options, the proceeds received net of any directly attributable transaction costs are recorded as share capital. The accumulated charges related to the shares options recorded in contributed surplus are then transferred to capital.

**c) Loss per share**

Basic loss per share ("LPS") is calculated by dividing the net loss for the period attributable to equity owners of the Company by the weighted average number of common shares outstanding during the period. Diluted LPS is calculated by adjusting the profit or loss attributable to common shareholders and the weighted average number of common shares outstanding for dilutive instruments. The Company's potentially dilutive instruments are comprised of stock options granted and warrants issued.

**d) Financial instruments**

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of the ownership.

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

At initial recognition, the Company classifies these financial instruments in the following categories depending on the purpose for which the instruments were acquired.

**3. Summary of significant accounting policies (continued)**

Financial assets

- i. Fair value through profit or loss**
- ii. Held-to-maturity**
- iii. Loans and receivables**

The Company has no financial assets at March 31, 2018.

Financial liabilities

- i. Fair value through profit or loss**
- ii. Other financial liabilities**

All the Company's liabilities are classified as other financial liabilities. They are measured at amortized cost using the effective interest method. Any gains or losses in the realization of other financial liabilities are in profit or loss.

**e) Borrowing costs and discounts on issuance of new debt**

Borrowing costs that are directly related to the issuance of new debt are recorded net of the associated debt and recognized into income using the effective interest method over the life of the debt. Discounts where proceeds received are less than par value of the debt, are recorded at a reduction to long-term debt and are amortized using the effective interest method and included in borrowing cost.

**f) Significant accounting judgments and estimates**

The preparation of the financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect reported amounts and presentation of assets, liabilities, revenues, expenses and disclosures of contingencies and commitments. Such estimates primarily relate to unsettled transactions and events at the statement of financial date which are based on information available to management at each statement date. Actual results could differ from those estimated.

Judgments, estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

**Judgments**

Going concern

The Company's ability to execute its strategy by seeking financing and funding of future working capital requirements requires judgment. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, such as expectations of future events that are believed to be reasonable under the circumstances (Note 1).

**Petro Viking Energy Inc.**

	\$	\$
Accounts payable and accrued liabilities for management and consulting fees, and debenture interest.	72,231	312,328
Debenture – Principal outstanding.	945,709	520,000

**11. Financial instruments and financial risk management**

The Company's risk management policies are established by the Board of Directors to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's policy.

The Company's financial instruments include accounts payable and accrued liabilities, promissory notes and debentures. The carrying values of accounts payable and accrued liabilities approximate their fair values due to their relatively short periods to maturity. The carrying value of promissory notes and debentures approximate their fair market value as the interest rates are based on market rates.

**11. Financial instruments and financial risk management (continued)**

The Company has exposure to liquidity risk and market risk as a result of financial instruments.

**a. Fair values**

The Company is required to classify fair value measurements using a hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy is as follows:

- Level 1 – quoted prices in active markets for identical assets of liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3 – inputs for the asset or liability that are not based on observable market data.

The fair value of accounts payable and accrued liabilities, promissory notes and debentures approximate their amortized cost.

**b. Liquidity risk**

Liquidity risk is the risk that the Company will incur difficulties meeting its financial obligations as they are due. Accounts payable and accrued liabilities have expected maturity of less than one year resulting in their current classification on the statement of financial position. The Company currently has no assets and is unable to discharge its liabilities until financing is obtained (Note 1).

**c. Market risk**

Market risk is the risk that changes market factors, such as foreign exchange rates, commodity prices, and interest rates will affect the Company's cash flows, net loss and comprehensive loss, liquidity or the value of financial instruments. The objective of market risk management is to mitigate market risk exposure where considered appropriate and maximize returns.

**d. Interest risk**

Interest risk is the risk that future cash will fluctuate as a result of changes in the market interest rates. The Company is exposed to interest rate risk on its promissory notes and debentures as they bear a fixed interest rate.

**13. Capital Management**

The Company's objective when managing capital is to maintain a flexible capital structure which will allow it to execute its current strategy to get the Company listed again.

The Company considers its capital structure to include share capital, contributed surplus and debentures.

In order to maintain or adjust the capital structure, from time to time the Company may issue common shares, debt or other securities, sell assets or adjust capital spending to manage current and projected debt levels.

At March 31, 2018, the Company's capital structure was not subject to external restrictions.

The Company anticipates it will continue operations in the foreseeable future and it will have adequate liquidity to fund its financial liabilities through its future cash flows.
