

Management's Discussion and Analysis For the quarter ended 31 March 2023

The following Management's Discussion and Analysis, prepared as of 15 May 2023, should be read together with the consolidated financial statements (unaudited) of Minera IRL Limited (the "Company") for the quarter ended 31 March 2023 and related notes thereto, which were prepared in accordance with International Financial Reporting Standards ("IFRS"). Additional information about Minera IRL Limited, including the Company's most recently filed Annual Information Form and the risks and uncertainties discussed therein may be found at the Company's website at www.minera-irl.com and within the Company's SEDAR profile at www.sedar.com.

All figures are expressed in United States dollars ("\$\$") unless otherwise noted. References to "C\$" are to Canadian dollars.

NOTICE TO READER

The accompanying report has been prepared by and is the responsibility of the management.

In addition, the Company's independent auditor has not yet provided an opinion on the Company's consolidated financial statements for the year ended December 31, 2022, and the information used for comparative purposes in the accompanying report might contain adjustments that could impact the current interim period. Investors are therefore cautioned that they cannot rely on the information disclosed in this report.

Background and Business of the Company

Minera IRL Limited (“Minera IRL” or the “Company”) is a Jersey registered company which, together with its subsidiaries, engages in mining of precious metals. Currently, the Company trades its ordinary shares on the Canadian Securities Exchange and on the Bolsa de Valores de Lima.

In Peru, the Company operates the Corihuarmi Gold Mine and has been advancing its flagship project, the Ollachea Gold Project (the “Ollachea Project”), towards production. At Ollachea, the Company has completed an NI 43-101 compliant Preliminary Economic Assessment and has received the approval of its an Environmental and Social Impact Assessment (“ESIA”) and construction permit from the Peruvian authorities.

Current Situation

In Q1 2023, the Company has continued to address the significant production cost increases that impacted its performance since the beginning of 2022, which also affected other large and medium operators and producers worldwide.

Positive efficiencies have been achieved to date at the Corihuarmi Gold Mine (“Corihuarmi”), with mine operating costs in Q1 2023 reducing by 17% as compared to Q4 2022 (US\$ 7.2 million) and by 5% as compared Q1 2022 (US\$ 6.3 million). A comparison is provided in the table below:

	Q1 2023 (\$’000s)	Q4 2022 (\$’000s)	Q1 2022 (\$’000s)
Mine operating costs	6,009	7,262	6,348

We shipped a total of 3,962 ounces of gold in Q1 2023 resulting from lower-than-budgeted production. This is attributed to unusually high rainfalls associated to the climate phenomenon known as El Niño, as well as the Cyclone Yaku which brought unprecedented rains and associated flooding throughout Peru and supply chain disruptions affecting all industries.

The low production during the first quarter is part of a seasonal business cycle, and this is usually offset by the increase that we see in the subsequent quarters. We acknowledge that production in Q1 2023 has been lower compared to previous years, and we are executing different initiatives and in-house studies to drive a production increase.

Part of the initiatives include the execution of a two-phase long-hole (“LH”) drilling campaign started in November 2022, which encouraging preliminary results were announced through a press release dated April 12, 2023, and include the following highlights:

- LHS23-36, 20.00 m of oxides from 5.00 m depth assaying 0.65 grams Au per tonne (“g/t Au”).
- LHS23-35, 14.00 m of oxides from 6.00 m depth assaying 0.45 g/t Au.
- LHSS23-53, zero to 4.00 m depth of oxides assaying 0.41 g/t Au.
- LHAD23-24, 11.00 m of oxides from 24.00 m depth assaying 0.39 g/t Au.

This LH drilling campaign is aimed to:

- Generate an additional database to supplement current drilling data as part of the planned update to the Mineral Resource Estimate.
- Optimize the blending process at the leach pads in an effort to improve gold recoveries.
- Update the mine plan and design ensuring low strip ratios and reduced haul distances.

During the 2022, the average grade in Corihuarmi was 0.21 g/t Au, and March 2023 has seen an increase of up to 0.238 g/t Au. This provides a good indication of the ore grades that are expected to be mined and placed on the leach pads in the following months.

Our expectation is to maintain low operational costs and to target further areas where mining operations can be streamlined. As we continue to work towards increasing our gold production, we anticipate that the current upward trend in gold prices will remain, driving an improvement in our financial position during the first half of 2023.

Corihuarmi Gold Mine, Peru

The Company's 100% owned Corihuarmi gold mine is located approximately 160 kilometres southeast of Lima, Peru, in the Central Andes at an altitude of almost 5,000 metres. The Company acquired the Corihuarmi leases in 2002 and the mine was brought into production in March 2008. Below is a summary of the key operating statistics for Corihuarmi for the quarters ended 31 March 2023 and 2022:

Operating Parameters	Quarter ended 31 March	
	2023	2022
Waste (tonnes)	330,140	725,733
Ore mined & stacked on heaps (tonnes)	915,075	880,674
Ore grade, mined and stacked (g/t)	0.20	0.18
Gold produced (ounces)	3,985	4,736
Gold sold (ounces)	3,962	5,067
Realized gold price (\$ per ounce sold)	\$1,889	\$1,860
Total cash costs (\$ per ounce produced) ¹	\$1,771	\$1,609

¹. Refer to Non-IFRS Measures at the end of this MD&A.

Ore mined and stacked during the first quarter of 2023 was 915,075 tons, an increase of 4% compared to the 880,674 tons mined and stacked during the first quarter of 2022.

Gold production during the first quarter of 2023 was 16% lower than gold production for the same quarter of 2022, Mining and processing operations were mainly impacted by severe weather conditions attributed to the climate phenomenon known as El Niño, as well as the Cyclone Yaku and the associated and unprecedented high rainfalls and flooding that affected all industries in Peru.

Gold sold during the first quarter of 2023 was 3,962 ounces, a 22% decrease compared to the 5,067 ounces sold during the first quarter of 2022.

The average realized gold price during the first quarter of 2023 was \$1,889, a 1% increase compared to the \$1,860 average gold price realized during the first quarter of 2022.

Total cash costs per ounce of gold produced during the first quarter of 2023 were 1,771, 10% higher than total cash costs of \$1,609 per ounce of gold produced during the first quarter of 2022. The increase was due to the combined effect of a decrease of 7% cash costs, mainly site operating costs (\$340,000) and community and environmental costs (\$115,000) and a higher decrease of 16% in gold ounces produced.

Ollachea Project, Peru

Expenditures capitalized during the first quarter of 2023 were \$0.2 million (\$0.4 million during the first quarter of 2022). These expenditures were related mainly to community development and environmental costs.

No exploration activities were carried out during the first quarter of 2023. No exploration activities are planned for 2023.

The Company continues to maintain and generate new dialogue with potential parties that have expressed an interest in participating in the construction of Ollachea. Due diligence is currently underway, considering both traditional and alternative financing options or a strategic alliance that creates value for stakeholders.

Summary of Quarterly Results

(tabular data in thousands of US dollars, except per share amounts)

	Q2 Jun. '21	Q3 Sep. '21	Q4 Dec. '21	Q1 Mar. '22	Q2 Jun. '22	Q3 Sep. '22	Q4 Dec. '22	Q1 Mar. '23
Total revenue (\$'000)	10,776	11,110	12,170	9,425	9,675	8,501	9,392	7,484
(Loss) Profit after-tax (\$'000)	1,770	(2,286)	1,313	(1,082)	(3,044)	(6,762)	(5,111)	(4,198)
Total comprehensive (Loss) Income (\$'000)	1,770	(2,286)	1,313	(1,082)	(3,044)	(6,762)	(5,111)	(4,198)
Net (Loss) Earnings per share (US cents)	0.8	(1.0)	0.6	(0.5)	(1.3)	(2.9)	(2.2)	(1.8)

The business of the Company is not generally subject to seasonal influences. The variation in revenue, net profit and loss are due to a number of factors, including the market price of gold, the tonnes of ore and the associated grade of these tonnes of ore extracted from the mine and therefore the cost of production, the level of expenses incurred and the impairment of exploration, development and mining assets.

Overview of Financial Results

Note – All of the results presented are prepared under IFRS and are in United States dollars, which is the Company's functional currency as well.

	Quarter ended 31 March	
	2023	2022
Revenue (\$'000)	7,484	9,425
Gold sold (ounces)	3,962	5,067
Realized gold price (\$ per ounce)	1,889	1,860
Gross (loss) profit (\$'000)	(66)	1,293
After-tax (loss) (\$'000)	(4,198)	(1,082)
Loss per share (cents)	(1.8)	(0.5)

Results of Operations

During the first quarter of 2023, the Company reported sales revenue of \$7,484,000 compared with sales revenue of \$9,425,000 during the first quarter of 2022, a decrease of \$1,941,000. This 21% decrease was due to the combined effect of a 1% increase in the average price of gold sold and a sharp decrease of 22% in the number of gold ounces sold.

During the first quarter of 2023 the Company reported an after tax loss of \$4,198,000 compared with a loss of \$1,082,000 during the first quarter of 2022. The \$3,116,000 higher loss was mainly the result of a decrease of \$1,359,000 in gross profit plus increases of \$1,239,000 and \$583,000 in finance expenses and administration expenses, respectively.

Cost of sales during first quarter of 2023 was \$7,550,000, compared with cost of sales of \$8,132,000 during the first quarter of 2022, a decrease of \$582,000. The most significant changes between the two periods were decreases of \$339,000 and \$115,000 in site operating costs and community and environmental costs, respectively. A period-over-period comparison for the cost of sales is provided in the table below.

Breakdown of Cost of Sales

	Quarter ended 31 March	
	2023 (\$'000s)	2022 (\$'000s)
Mine operating costs	6,009	6,348
Depreciation and amortization	493	512
Community and environmental costs	615	730
Other Costs (royalties and taxes, selling expense, other)	433	542
Total	7,550	8,132

Net administration expenses during the first quarter of 2023 were \$1,362,000, compared with administration expenses of \$779,000 during the first quarter of 2022, an increase of \$583,000. The most significant changes between the two periods were decreases of \$489,000 in foreign exchange gains and increases of \$197,000 and investor relations expenses. A period-over-period comparison for the administration expenses is provided in the table below.

Breakdown of Administration Expenses

	Quarter ended	
	31 March	
	2023 (\$'000s)	2022 (\$'000s)
Depreciation	10	10
Director fees	27	34
Foreign exchange (gain) loss	(48)	(537)
Investor relations	250	53
Stock exchange fees	100	60
Office rent and administration	88	63
Professional and consulting fees	206	320
Salaries and wages	632	693
Telecommunication	8	6
Travel	64	68
Other	25	9
Total	1,362	779

Finance expenses during the first quarter of 2023 were \$2,700,000 compared to \$1,461,000 during the first quarter of 2022, an increase of \$1,239,000. The most significant changes between the two periods were increases of \$784,000 and \$234,000 in interest related to the COFIDE Loan and interest related to other loans.

Breakdown of finance expenses

	Quarter ended	
	31 March	
	2023 (\$'000s)	2022 (\$'000s)
COFIDE Loan interest	1,919	1,135
Other loans interest	234	-
Other finance expenses	547	326
Total	2,700	1,461

Cash Flow

Cash balance decreased \$1,367,000 during the first quarter of 2023, from \$2,861,000 to \$1,494,000. Operating activities during this quarter generated \$531,000 whereas investment activities and financing activities used \$618,000 and \$1,280,000, respectively.

Investing activities during the first quarter of 2023 used \$618,000, compared with \$870,000 used during the first quarter of 2022, a decrease of \$252,000. The change was mainly due to decreases of \$112,000 and \$48,000 in acquisitions of property, plant and equipment, and deferred development expenditures, respectively. A period-over-period comparison for the investing activities is provided in the table below.

Breakdown of Investment activities

	Quarter ended	
	31 March	
	2023 (\$'000s)	2022 (\$'000s)
Acquisition of property, plant and equipment	315	427
Deferred exploration and development expenditures	303	451
Disposal of property, plant and equipment	-	(8)
Total	618	870

Financing activities during the first quarter of 2023 used \$1,280,000, compared with \$2,114,000 used during the first quarter of 2022, a decrease of \$834,000. The change was mainly due to a decrease of \$794,000 in payment of lease liabilities. A period over period comparison for the financing activities is provided in the table below:

Breakdown of Financing activities

	Quarter ended	
	31 March	
	2023 (\$'000s)	2022 (\$'000s)
Repayment of loans	(250)	-
Payment of lease liabilities	1,270	2,064
Payment of finance expenses	260	50
Total	1,280	2,114

Legal Actions Involving Company

Please refer to section “Background and Business of the Company” on page 4.

The Company is not currently involved in any other legal proceedings nor was it involved in any other legal proceedings during the quarter ended 31 March 2022 and nor, to the knowledge of management, are there any legal proceedings currently contemplated which may materially affect the business and affairs of the Company or that would likely be considered important to a reasonable investor in making an investment decision.

Outlook

At 31 March 2023, the Company had a working capital deficit of \$104,090,000 (defined as current assets less current liabilities).

In 2023, the Company forecasts gold production of 23,000 ounces from the Corihuarmi mine. The capital budget of Corihuarmi for 2023 is \$0.3 million to complete heap leach pad 5E, \$0.8m to build heap leach pad 5F and \$0.8 million for other capital expenditures. The Company expects that the following quarters will see a gold production increase resulting from its efforts to streamline mining operations and improve gold recoveries.

Ollachea and the COFIDE Bridge Loan

Please refer to section “Background and Business of the Company” on page 2.

Capital Management

The Company’s objectives when managing capital are to safeguard the Company’s ability to continue as a going concern in order to pursue the exploration, development and operation of its mining assets. In the management of capital, the Company includes its cash and cash equivalent balances, interest bearing loans and components of shareholders’ equity.

The Company manages the capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

The Company is not currently subject to externally imposed capital requirements.

Liquidity and Capital Resources

As at 31 March 2023, the Company had cash of \$1,494,000, compared with \$2,861,000 as at 31 December 2022.

As at 31 March 2023, the Company had a working capital deficit of \$104,090,000. Working capital is defined as current assets less current liabilities.

The above conditions indicate the existence of a material uncertainty which may cast doubt on the Company's ability to continue as a going concern.

Going Concern Basis

This report has been prepared on a going concern basis. The Company's future plans and expectations are based on the assumption that the Company will be able to continue in operation for the foreseeable future and will realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. There can be no assurance that the Company will be able to generate sufficient cash from operations or obtain adequate financing in the future or, if available, that such financing will be on acceptable terms. Despite the settlement agreement signed with COFIDE in November 2020, the Company does not currently have the capital required to repay in full the balance owed to COFIDE. If the Company cannot repay in full the balance owed to COFIDE by November 2023 it could lose the Ollachea Project. Also, the Company may be required to delay, scale back or eliminate various programs and may be unable to continue in operation. The Company may seek additional financing through debt or equity offerings. Any equity offering will result in dilution to the ownership interests of the Company's shareholders and may result in dilution to the value of such interests.

Commitments and Contingent Liabilities

The Company is subject to various laws and regulations governing its mining activities. These laws and regulations are continually changing and generally becoming more restrictive. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

On 12 November 2020 the Company announced it had settled its dispute with COFIDE. As per the terms of this settlement the Company owed COFIDE US\$31.9 million of accrued interest at that date. However, COFIDE has yet to provide the invoices to support the tax deductibility of these interest expenses. As a consequence, in case of a tax audit, the tax authority might object the tax deductibility of these interests. Also, as per the terms of this agreement certain penalties are applicable while the balance of the debt owed to COFIDE is not fully repaid. These penalties are based on percentages applicable over the amount of the Arbitration Award according the following timetable:

- \$2,053,000 (6% on the Arbitration Award amount) if the balance of the debt is not repaid before 15 November 2021. This amount was accrued in the third quarter of 2021.
- An additional penalty of \$1,368,000 (4% on the Arbitration Award amount) if the balance of the debt is not repaid before 15 November 2022. These penalties shall be added to the amount owed to COFIDE and will be paid within the 36 months term established for the full payment of any outstanding debt with COFIDE.

During 2019, the Company was issued a tax reassessment by the Peruvian Tax Authority for the year ended 31 December 2017 related to the deductibility of expenses and interest relative to the COFIDE Bridge Loan and the write off of certain leach pads. If the Company is unsuccessful in this appeal, an aggregate amount of \$5,800,000 would be payable, including tax, penalties and interest calculated as at 3 May 2023.

During 2021, the Company was issued a tax reassessment by the Peruvian Tax Authority for the year ended 31 December 2015 related to the deductibility of expenses and interest relative to the COFIDE Bridge Loan and the write off of intangible assets. If the Company is unsuccessful in this appeal, an aggregate amount of \$5,400,000 would be payable, including tax, penalties and interest calculated as at 3 May 2023.

During 2023, the Company was issued a tax reassessment by the Peruvian Tax Authority for the year ended 31 December 2016 related to the deductibility of expenses and interest relative to the COFIDE Bridge Loan. If the Company is unsuccessful in this appeal, an aggregate amount of \$4,500,000 would be payable, including tax, penalties and interest calculated as at 3 May 2023.

The Company entered into a contract with Empresa de Generacion Electrica San Gaban S.A. for the supply of power during the construction and operation stages of the Ollachea Project. This contract included certain minimum power usages for each of the construction and operation stages. In March 2017 the Company entered into an amended power contract extending the term to start the construction stage for sixty months from 1 March 2017. If the contract is terminated due to the construction stage not commencing within the sixty months term, the Company would have to pay a penalty for an amount equivalent to approximately \$2,400,000. Otherwise, the Company agreed to pay a fixed monthly compensation for an amount equivalent to approximately \$11,000 for a period of nine and a half years starting on the seventh month after Ollachea commencing the operation stage. The Company is currently renegotiating this contract.

In June 2015, the Company secured a \$70,000,000 Bridge Loan from COFIDE. The financial structuring costs related to the Bridge Loan included a 0.9% net smelter return royalty on gold production from the Ollachea Project granted to Sherpa. The Company has the right to buyback and cancel this royalty from Sherpa by paying a buy-back fee of \$5,566,000.

In August 2013, the Macquarie Finance Facility was amended to increase the amount available by \$10,000,000. As a condition of drawing down these funds the Company awarded a 1% royalty on gross revenue minus refining costs on gold sales from the Company's Ollachea Project. The Company has the right to buyback and cancel this royalty from Macquarie Bank by paying a buyback fee of \$5,000,000.

Financial Instruments

The Company's principal financial assets comprise of cash and cash equivalents, and other receivables. The Company's financial assets are classified as loans and receivables and are measured at amortised cost. The Company's financial liabilities include trade and other payables, interest bearing loans and other long term liabilities. They are all classified as financial liabilities and measured at amortised cost.

Risks

The Company operates in the resource industry, which is highly speculative, and has certain inherent exploration, development and operating risks which could have a negative effect on the Company's operations.

Significant risk factors for the Company include operating, land title, environmental regulations and compliance, litigation, surface rights, health and safety, the ability to obtain additional financing, metal prices, Mineral Reserves and Resources estimates, insurance coverage, infrastructure, key management and staff, legal climate considerations, changes in government policy, geopolitical climate, government, currency, economic, local community, geological, competition, and general business risk, as well as the risks associated with public health crises, including COVID-19.

Additionally, there are risks specifically related to the COFIDE Bridge Loan. For further information, please refer to paragraph "Background and Business of the Company" on page 4 and section 5 Risk Factors on the Company's 2021 Annual Information Form filed on SEDAR at www.sedar.com.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. Prudent management of liquidity risk implies maintaining sufficient cash and cash equivalents as well as an adequate amount of committed credit facilities. Management of the Company safeguards its cash resources and makes regular forecasts of the requirements to use those resources. If necessary, management adapts its plans to suit the resources available.

Despite the settlement agreement signed with COFIDE in November 2020, the Company does not currently have the capital required to repay in full the balance owed to COFIDE. If the Company cannot repay in full the balance owed to COFIDE by November 2023 it could lose the Ollachea Project.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company is exposed to credit risk in so far as it deposits cash with its banks. However, the banks used are reputable international institutions. In addition the Company is exposed to sovereign risk in so far as it is owed recoverable sales tax by the government of Peru.

Currency risk

Foreign currency risk is the risk that the fair value of assets and future cash flows will fluctuate as a result of changes in foreign currency exchange rates. The Company operates in Peru and is therefore exposed to foreign exchange risk arising from transactions denominated in foreign currencies. The operating results and the financial position of the Company are reported in United States dollars. Fluctuations of local currencies in relation to the US dollar will have an impact upon the reported results of the Company and may also affect the value of the Company's assets and liabilities. The Company has not entered into any agreements or purchased any instruments to hedge any currency exposures.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Debt obligations are exposed to interest rate variations.

Commodity price risk

Commodity price risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in gold prices. The price for gold is impacted by world economic events that dictate the levels of supply and demand. The ability of the Company to mine, develop and explore its mineral properties and the future profitability of the Company are directly related to the market price of precious metals, specifically gold. The Company monitors gold prices to determine appropriate actions to be undertaken. The Company has not entered into any agreements or purchased any instruments to hedge possible gold price risk. The Company is also exposed to the risk that the cost of mining, development or construction activities for its planned activities might increase and cause some elements to be uneconomic.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Transactions with Related Parties

During the quarter ended 31 March 2023, the Company entered into transactions with directors and key management as disclosed on Note 4 of the consolidated financial statements (unaudited) for the quarter ended 31 March 2023. As at 31 March 2023, the Company owed \$210,000 to directors and key management. Also, during the quarter ended 31 March 2023, certain related parties of directors and key management received \$48,000 as salary and professional fees on normal commercial terms.

Significant Accounting Policies

The Company follows the accounting policies described in the audited consolidated financial statements for the year ended 31 December 2021 which have been filed on SEDAR www.sedar.com.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Based on historical experience, current market conditions and expert advice, management makes assumptions that are believed to be reasonable under the circumstances. These estimates and assumptions form the basis for judgments about the carrying value of assets and liabilities and reported amounts for revenues and expenses.

Critical Accounting Estimates

The preparation of consolidated financial statements requires the Company to select from possible alternative accounting principles, and to make estimates and assumptions that determine the reported amounts of assets and liabilities at the balance sheet date and reported costs and expenditures during the reporting period. Estimates and assumptions may be revised as new information is obtained, and are subject to change. The Company's accounting policies and estimates used in the preparation of the consolidated financial statements are considered appropriate in the circumstances, but are subject to judgments and uncertainties inherent in the financial reporting process.

Intangible Assets

Property acquisition costs and related direct exploration costs may be deferred until the properties are placed into production, sold, abandoned, or impaired, where appropriate. The Company's accounting policy is to capitalize exploration costs, which is consistent with IFRS, and the policy is consistent with other resource companies which are similar to the Company. An alternative policy would be to expense these costs until a feasible mineral resource has been objectively established. Management is of the view that its current policy is appropriate for the Company at this time. Based on annual impairment reviews made by management, or earlier if circumstances warrant, in the event that the long-term expectation is that the net carrying amount of these capitalized exploration costs will not be recovered, then the carrying amount is written down accordingly and the write-down is charged to operations. A write-down may be warranted in situations where a property is to be sold or abandoned; or exploration activity ceases on a property due to unsatisfactory results or insufficient available funding.

Impairment

In undertaking an impairment review for the operating mine or advanced exploration projects an economic model is prepared which includes full details of the mining and processing schedule, head grade, strip ratios of waste to ore, operating costs and capital costs. From this information the amount of gold production is calculated and revenues estimated. Operating costs, including royalties and refining charges, and capital costs are entered and a cash flow model is produced, which is used to calculate the net present value of the pre-tax cash flow from the operation or project. This net present value is then compared to the carrying value of the operation or project on the balance sheet and an assessment is made regarding impairment.

Should any key parameters differ from the assumptions contained within the technical economic model, such as tonnes of ore mined, grade of ore mined, recovery profile or gold price, the net present value will be affected either positively or negatively. If the impact is negative, an impairment charge may be required that has not been recognized in these financial statements.

Asset Retirement Provisions

Restoration costs will be incurred by the Company at the end of the operating life of the Company's facilities and properties. The ultimate restoration liability is uncertain and can vary in response to many factors including changes to relevant legal requirements, the emergence of new restoration techniques, experience at other production sites, or changes in the risk-free discount rate. The expected timing and amount of expenditure can also change in response to changes in reserves or changes in laws and regulations or their interpretation. As a result, there could be significant adjustments to the provisions established which would affect future financial results.

Depreciation Rate

Mining properties are depreciated on a straight line basis over the expected life of the mine. The calculation of mine life and depreciation could be impacted to the extent that actual production in the future is different from current forecast production based on proven plus probable reserves. This would generally result from significant changes in any of the factors or assumptions used in estimating reserves.

Share Based Payments

The Company uses the Black-Scholes Option Pricing Model for valuation of share-based compensation. Option pricing models require the input of subjective assumptions including expected price volatility, interest rate, and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's earnings and equity reserves.

Management's Responsibility for Financial Statements

The information provided in this report, including the consolidated financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying condensed interim consolidated financial statements.

Disclosure Controls and Internal Control over Financial Reporting

Management of the Company is responsible for the design and implementation of disclosure controls and procedures and for internal controls over financial reporting (“ICFR”) as required by National Instrument 52-109 – Certification of Disclosure in Issuers’ Annual and Interim Filings.

The Company’s disclosure controls and procedures are designed to provide reasonable assurance that all relevant information is communicated to senior management to allow timely decisions regarding the required disclosure. Management has evaluated the effectiveness of the Company’s disclosure controls and procedures. Based upon the results of that evaluation, the Company has concluded that, the Company’s disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed by the Company is recorded, processed, summarized and reported, within the appropriate time periods and is accumulated and communicated to management.

The Company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS as issued by the IASB. The Company’s internal control over financial reporting includes policies and procedures that:

- Require maintaining records that accurately and fairly reflect, in reasonable detail, the transactions and dispositions of assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary for preparation of financial statements in accordance with IFRS;
- Provide reasonable assurance that the Company’s receipts and expenditures are made only in accordance with authorizations of management and the Company’s Directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company’s assets that could have a material effect on the Company’s consolidated financial statements.

The Company’s internal control over financial reporting may not prevent or detect all misstatements, whether due to error or fraud, because of inherent limitations. A control system, no matter how well designed or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Additionally, projections of any evaluation of effectiveness for future periods are subject to the risk that controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with the Company’s policies and procedures.

There has been no change in the Company’s internal control over financial reporting during the quarter ended 31 March 2022 that has materially affected, or is reasonably likely to materially affect, the Company’s internal control over financial reporting.

Outstanding Share Data

The Company has an authorized share capital of an unlimited number of no par Ordinary Shares, of which 231,135,028 are issued as at the date of this report. Each share entitles the holder to one vote. All shares of the Company rank equally as to dividends, voting powers and participation in assets upon a dissolution or winding up of the Company.

As at the date of this report, the Company had no options issued or outstanding for the benefit of directors, employees and consultants of the Company under a Company's Share Option Plan. However, 11,556,751 options with an exercise price of C\$0.20 were to be issued as part of the fees payable to Sherpa in regards to the COFIDE Bridge Loan financing. These options have not yet been granted however the entitlement remains.

Changes in Accounting Policies

The Company did not adopt any new accounting policies during the quarter ended 31 March 2023.

Subsequent Events

There have been no subsequent events between the end of the period and the date of filing of this report.

Management and Board Changes

There were no Management and Board Changes during the quarter ended 31 March 2023.

Additional Information

Additional information regarding Minera IRL, including Minera IRL's Annual Information Form for the year ended 31 December 2021 is available on the Company's website at www.minera-irl.com or on SEDAR at www.sedar.com.

Cautionary Statement on Forward-Looking Information

Certain information in this MD&A, including information about the Company's financial or operating performance and other statements expressing management's expectations or estimates of future events, performance and exploration and development programs or plans constitute "forward-looking statements". Forward-looking statements often, but not always, are identified by words such as "seek", "believe", "expect", "do not expect", "will", "will not", "intend", "estimate", "anticipate", "plan", "schedule" and similar expressions of a conditional or future oriented nature identify forward-looking statements. Forward-looking statements are, necessarily, based upon a number of estimates and assumptions. While considered, by management, to be reasonable in the context in which they are made forward-looking statements are inherently subject to political, legal, regulatory, business and economic risks and competitive uncertainties and contingencies. The Company cautions readers that forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause Minera IRL's actual financial results, future performance and results of exploration and development programs and plans to be materially different than those expected or estimated future results, performance or achievements and that forward-looking statements are not guarantees of future performance, results or achievements. Forward-looking statements are made as of the date of this MD&A and Minera IRL assumes no obligation, except as may be required by law, to update or revise them to reflect new events or circumstances. Risks, uncertainties and contingencies and other factors that might cause actual performance to differ from forward-looking statements include, but are not limited to, the Company's ability to refinance the COFIDE Bridge Loan and replace the Senior Project Debt Facility, changes in the price of precious metals and commodities, changes in the relative exchange rates of the US dollar against the Peruvian nuevo sol, interest rates, legislative, political, social or economic developments both within the countries in which the Company operates and in general, contests over title to property, the speculative nature of mineral exploration and development, operating or technical difficulties in connection with the Company's development or exploration programs, increasing costs as a result of inflation or scarcity of human resources and input materials or equipment. Known and unknown risks inherent in the mining business include potential uncertainties related to the title of mineral claims, the accuracy of mineral reserve and resource estimates, metallurgical recoveries, capital and operating costs and the future demand for minerals. Please see **Risks**, elsewhere herein.

Qualified Person

Pursuant to National Instrument 43-101, Mr. Martin Mount FGS CGeol – Fellow No.16658 of the Geological Society of London, and FIMMM CEng – Fellow No.47566 of the Institute of Materials, Minerals and Mining, is the Qualified Person ("QP") responsible for the technical disclosure in this MD&A.

Non-IFRS Measures

“Cash costs” includes include costs such as mining, processing and administration (excluding depreciation and amortization) plus applicable royalties, workers’ profit participation cost, and other non-site costs like transport and refining of metals, community and environmental costs. These costs are then divided by the ounces sold to arrive at “cash costs per ounce produced”.

This measure is a non-GAAP or non-IFRS measure that do not have a standardized meaning prescribed by GAAP or IFRS and may not be comparable to other similarly titled measures of other gold mining companies. It may vary from one period to another due to changes to operating efficiencies, waste-to-ore ratios, grade of ore processed and gold recovery rates in the period.

Management believes this information is useful to investors because this measure is considered to be a key indicator of a company’s ability to generate operating earnings and cash flow from its mining operations. This data is furnished to provide additional information and is not a substitute for measures of performance prepared in accordance with IFRS. The following table reconciles cash costs to the consolidated financial statements.

	Quarter ended 31 March	
	2023	2022
Cost of sales	\$7,550	\$8,132
Less:		
Depreciation	493	512
Cash costs	\$7,057	\$7,620
<i>Ounces of gold produced</i>	3,985	4,736
Cash costs per ounce produced	\$1,771/oz	\$1,609/oz

¹. Excluding expenses related to the negotiations with COFIDE.
