

ALLOWANCE BY EUROPEAN PATENT OFFICE, OF PATENT FOR PTL-202, A TREATMENT FOR IDIOPATHIC PULMONARY FIBROSIS, A \$1.1 BILLION OPPORTUNITY

VANCOUVER, BC, Canada – March 12, 2014 – Pacific Therapeutics Ltd. (CSE: PT) (Frankfurt: 1P3) (the “Company”) Worldwide, there are over 5,000,000 people living with Idiopathic Pulmonary Fibrosis (IPF), (IPF Coalition). IPF therapy sales across the US, France, Germany, Italy, Spain, and the UK to rise to over \$1.1 billion by 2017, at a Compound Annual Growth Rate (CAGR) of 86.6% (RnR Market Research, 2013). IPF kills more patients per year than either prostate or breast cancer.

Pacific Therapeutics Ltd. lead drug candidate for fibrosis (progressive scarring of the organ), PTL-202 is a combination of Pentoxifylline an FDA approved drug and N-Acetyl-Cysteine (NAC) an amino acid and an extremely potent and important antioxidant.

The Company is pleased to announce that the European Patent Office has issued an official letter stating that it intends to allow the application for the Company's patent COMPOSITIONS AND METHODS FOR TREATING FIBROPROLIFERATIVE DISORDERS. This patent covers the composition and use of the combination of drugs used in the Company's lead product for treatment of IPF and includes claims for the use of the combination to treat liver fibrosis, kidney fibrosis, uterine fibrosis and peripheral arterial disease.

“It's estimated that 45 % of all deaths are related to fibrotic changes” World Health Organization Feb, 2008.

In addition to the \$1.1 billion IPF market opportunity, PTL-202 may be effective as a treatment for Liver Cirrhosis a \$1.56 billion global market opportunity in 2010, that is expected to grow to \$2.03 billion by 2017 (Global Data, Feb, 2011). “This growth is primarily attributed to the increasing prevalence of Liver Cirrhosis due to increase in alcoholic liver disease, nonalcoholic steatohepatitis (NASH) and the large group of patients who were originally infected with hepatitis virus, who will be entering their third decade of chronic liver infection” (Global Data, Feb, 2011).

ABOUT PACIFIC THERAPEUTICS LTD.

The Company's lead programs focus on erectile dysfunction and diseases of excessive scarring (fibrosis). The Company's strategy includes reformulating approved drugs to increase efficacy and patient compliance, while reducing side effects, as well as completing the further clinical testing, manufacturing and other regulatory requirements sufficient to seek marketing authorizations. This strategy may reduce the risk, time and cost of developing therapies by avoiding the risks associated with basic research and using compounds with unknown safety and toxicity profiles.

In 2011 the total market for drugs to treat erectile dysfunction (“ED”) exceeded \$5 billion. Pacific Therapeutics Ltd. has finalized a license to an oral dissolving technology (“sublingual formulation”) of an approved drug to treat erectile dysfunction (ED).

Sales of the market leader alone exceeded \$1.9 billion in 2011. The sublingual formulation improves on existing drugs for erectile dysfunction potentially acting faster and with fewer side effects. As large pharmaceutical companies lose their patents on these drugs the opportunity has developed for innovative formulations of drugs for ED. This is a very exciting development for Pacific Therapeutics Ltd. as it shortens the time to market for the Company’s first product and may add significantly to future revenues.

The Company plans to build on the already significant development of the sublingual treatment with the initiation of a pivotal Bioequivalence trial. The trial design calls for the enrolment of 24 individuals and is planned to take only 4 months for completion. With successful results from this trial the Company will begin the application for marketing approval.
