

PACIFIC THERAPEUTICS ANNOUNCES NON-BROKERED FINANCING

VANCOUVER, BC, Canada –February 16, 2015– Pacific Therapeutics Ltd. (CSE: PT) (OTC Markets: PCFTF) (Frankfurt: 1P3) (the “Company”) is a clinical stage specialty pharmaceutical company focused on the repurposing and reformulation of existing FDA approved drugs for large markets. The Company’s lead programs focus on diseases of excessive scarring (fibrosis) and erectile dysfunction (ED) which are \$1 billion plus market opportunities.

Mr. Doug Unwin, President and CEO of Pacific Therapeutics Ltd. (the “Company”) is pleased to announce a non-brokered Offering of the Company’s capital. The Company will offer up to 2,000,000 Units at a price of \$0.05 per Unit for aggregate proceeds of CAD \$100,000 (the “Offering”). Each Unit (a “Unit”) will consist of one common share and one warrant to purchase a common share. One warrant may be exercised to purchase a common share for \$0.15 for up to one year. The Company may pay finders a fee consisting of cash and warrants from the proceeds of the proposed Offering. All of the Units issued will be subject to a four-month hold period. As well as accredited investors, the company will make the offer to subscribe for new capital available to existing shareholders, who can avail themselves of the offer under a new prospectus exemption process as set out in BC Instrument 45-534. The information required in terms of BC Instrument 45-534 is set out later in this release.

If the maximum offering of \$100,000 is fully subscribed, the Company would use \$100,000 for general & administration expenses and finder's fees. If the offering is not fully subscribed the company intends to pay finder's fees and general and administration expenses of up to \$100,000. While it is intended that the Company will spend the funds available to it as stated, there may be circumstances where, for sound business reasons, a reallocation of funds may be necessary.

Working from the most conservative projections the British Journal of Urology expects the number of men with erectile dysfunction (ED) to more than double from 152 million in 1995 to 322 million by 2025. In 2012 the total market for drugs to treat erectile dysfunction (“ED”) exceeded \$4.3 billion (Oct 2013, Transparency Market Research). Pacific Therapeutics Oral Disintegrating Tablet (ODT) formulation to treat ED, is a premium product for consumers that is fast-acting, with the potential to reduce common side effects. Our ODT product for Erectile Dysfunction will meet consumer demand and fill a niche not serviced by big pharma and generics, as 70% of patients prefer drugs in an ODT form.

The Company plans to build on the already significant development of the sublingual treatment with the initiation of a pivotal Bioequivalence trial. With successful results from this trial the Company will begin the application for marketing approval in Europe.

BC Instrument 45-534 Information

The offer to purchase shares in the non-brokered financing will also be made to all shareholders, who as of the share register record date of February 2, 2015 held common shares in the Company (shareholders resident in Ontario, Newfoundland and Labrador, and countries other Canada, will need to meet local jurisdiction requirements to participate).

The subscribing shareholder, in purchasing the ordinary shares on offer as principal, will need to represent in writing that they were, on or before the record date a shareholder of the Company (and still are).

The aggregate acquisition cost to a subscribing shareholder over the past 12 months cannot exceed \$15,000 **unless** that shareholder has obtained advice regarding the suitability of the investment from a registered investment dealer in the residential jurisdiction.

The minimum subscription amount per subscriber to the financing is \$5,000

The maximum aggregate gross proceeds are \$100,000 (representing the maximum number of Units to be issued of 2,000,000). There is no minimum of gross proceeds on this offering. Once the maximum subscription amount of \$100,000 is reached no additional subscriptions will be received.

In completing the financing, the Company may utilize other available regulatory exemptions in addition to the new existing shareholder exemption.

This offer is available to all security holders who held common shares of the Company on or before February 2, 2015. This offer will be open until March 2, 2015 or until the Maximum offering amount is reached whichever is earlier. If you are a security holder who is interested in participating in this offering or for further information on Pacific Therapeutics Ltd., please see contact information below.

ABOUT PACIFIC THERAPEUTICS LTD.

The Company's strategy includes reformulating approved drugs to increase efficacy and patient compliance, while reducing side effects, as well as completing the further clinical testing, manufacturing and other regulatory requirements sufficient to seek marketing authorizations. This strategy may reduce the risk, time and cost of developing therapies by avoiding the risks associated with basic research and using compounds with unknown safety and toxicity profiles.

Pacific Therapeutics Ltd. lead drug candidate for fibrosis (progressive scarring of the organ), PTL-202 is a combination of Pentoxifylline an FDA approved drug and N-Acetyl-Cysteine (NAC) an amino acid and an extremely potent and important antioxidant. The Company has completed an initial clinical trial of the combination with positive results.

"It's estimated that 45 % of all deaths are related to fibrotic changes" World Health Organization Feb, 2008.

Worldwide, there are over 5,000,000 people living with Idiopathic Pulmonary Fibrosis (IPF), (IPF Coalition). IPF therapy sales across the US, France, Germany, Italy, Spain, and the UK are
