1. NATURE AND CONTINUANCE OF OPERATIONS

Pacific Therapeutics Ltd. (the "Company" or "PTL") was incorporated under the laws of the Province of British Columbia, Canada on September 12, 2005. The Company is a development stage company focused on developing proprietary drugs to treat certain types of lung disease including fibrosis. On October 14, 2011, the Company became a reporting company in British Columbia and was approved by the Canadian Securities Exchange ("CSE") and opened for trading on November 16, 2011.

PTL has financed its cash requirements primarily from share issuances and payments from research collaborators. The Company's ability to realize the carrying value of its assets is dependent on successfully bringing its technologies to market and achieving future profitable operations, the outcome of which cannot be predicted at this time. It will be necessary for the Company to raise additional funds for the continuing development of its technologies.

The Company's interim financial statements as at June 30, 2015 have been prepared on a going concern basis, which contemplates the realization of assets and settlement of liabilities and commitments in the normal course of business. The Company had a net loss of \$214,211 for the six months ended June 30, 2015 (June 30, 2014 – \$323,817) and had a working capital deficiency of \$1,068,653 at June 30, 2015 (December 31, 2014 – \$940,251).

The Company is subject to risks and uncertainties common to drug discovery companies, including technological change, potential infringement on intellectual property of and by third parties, new product development, regulatory approval and market acceptance of its products, activities of competitors and its limited operating history. Management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

2. STATEMENT OF COMPLIANCE AND BASIS OF PRESENTATION

(a) Statement of Compliance

These condensed interim financial statements have been prepared in accordance with Accounting Standard ("IAS") 34, "Interim Financial Reporting". These condensed interim financial statements follow the same accounting policies and methods of applications our most recent annual financial statements. Accordingly, the condensed interim financial statements should be read in conjunction with the annual financial statements for the year ended December 31, 2014, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

(b) Basis of Presentation

These condensed interim financial statements were prepared on a historical cost basis and are presented in Canadian dollars which is the Company's functional currency. All financial information has been rounded to the nearest dollar.

(c) Use of Estimates

The preparation of condensed interim financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the condensed interim financial statements and the reported amounts of revenues and expenditures during the reporting periods. Although these estimates are based on management's best knowledge of current events and actions, actual results ultimately may differ from those estimates.

3. INTANGIBLE ASSETS - PATENTS

Six Months Ended June 30, 2015 and 2014

Due to a finite life of patents which begins from the date of application; the Company amortizes all patent costs over the expected life of the patent.

4. CONVERTIBLE NOTES AND DERIVATIVE LIABILITY

On September 11, 2014 the Company issued a convertible note for \$50,000 due on September 11, 2015 with an interest rate of 1% per month payable quarterly. The note is unsecured but convertible at the option of the holder into common shares of the Company at a price based on the weighted average closing price of the Company's shares on the Canadian Stock Exchange for the ten (10) trading days immediately preceding the conversion date, less fifteen per cent (15%). The convertible note has both debt and derivative liability characteristics. The Company initially valued the note by calculating the derivative liability component then applying the residual value to the debt component. The derivative liability component of the loan was calculated using the Black-Scholes Pricing Model and was estimated to be \$36,188. The initial fair value of the derivative liability component is amortized over the remaining life of the convertible note. The debt components at June 30, 2015 and December 31, 2014 were valued as follows:

	30-Jun-15		31	-Dec-14
Loan proceeds	\$	50,000	\$	50,000
Derivative component		(36,188)		(36,188)
Accretion		28,950		11,005
Accrued interest	4,800			1,825
	\$	47,562	\$	26,642

Notes to Condensed Interim Financial Statements Six Months Ended June 30, 2015 and 2014

The fair value of the derivative liability component of the loan of \$30,300 (December 31, 2014 - \$36,188) was calculated at June 30, 2015 using the Black-Scholes Pricing Model using the following assumptions:

Dividend yield	0.00%
Expected volatility	282.36%
Risk free interest rate	1.14%
Expected life in years	0.20

On September 24, 2012 the Company issued a convertible note (the "Note") with a face value of \$30,000, issued 200,000 warrants ("Bonus Warrants") and received \$30,000 in cash. The Bonus Warrants expired in 2 years and had an exercise price of \$0.22. The Note had a term of one year and was repayable by the Company at any time. The note was repaid in October 2014. The holder of the Note could convert the whole Note or any portion into units at any time. Each unit would consist of 1 common share (the "Share Option") and 1 warrant (the "Warrant Option"), with each Warrant Option exercisable to acquire an additional common share for a period of 2 years from the date the Warrant Option was issued The conversion option expired upon repayment of the Note. The Note accrued interest at the rate of 1% per month, payable in quarterly installments. The fair value of the Bonus Warrants, Share Options and Warrant options of \$43,070 were determined using the Black-Scholes Pricing Model and the Geske Pricing Model.

5. RELATED PARTY TRANSACTIONS AND BALANCES

The fair value of share based awards is determined using the Black-Scholes Option Pricing model. The model utilizes certain subjective assumptions including the expected life of the option and expected future stock price volatility. Changes in these assumptions can materially affect the estimated fair value of the Company's stock options. The Company used the Black-Scholes Option Pricing Model for multiple stock option grants occurring in 2015 and 2014. The Company issued 400,000 options during the six months ended June 30, 2015: 250,000 3 year options with a strike price of \$0.25 and 150,000 5 year options to a director Wendi Rodrigueza with a strike price of \$0.10. The assumptions used in the Black-Scholes Option Pricing Model for employees, directors and consultants were:

	June 30, 2015	December 31, 2014
Expected volatility	299% - 308%	299% - 308%
Risk free interest rate	0.78% - 1.63%	0.78% - 1.63%

7. CONTINGENT LIABILITY

On May 12, 2015 the Company signed a binding letter of intent (LOI) with Pilotage South Corp. of Wyoming (Pilotage) to sell the Company's technology assets for the development of therapies for fibrosis (PTL-202) and erectile dysfunction (ED) (PTL-2015). In return for the assets Pilotage or its assignee will issue to the Company a note for 15,000,000 common shares of Pilotage or its assignee. In addition on the sale of the Company's therapeutic assets to a third party, the Company will receive 6% of the value of that transaction. Between the closing of the asset sale to Pilotage and the issuance of the 15,000,000 common shares, Pilotage will pay to the Company an annual maintenance fee of \$50,000. Pilotage or assignee will also assume up to \$500,000 of debt owed to officers and directors of the company clearing these liabilities from the Company's balance sheet.

The note has a 5 year term. If the shares are not issued to the Company within 3 years then the Company may trigger the exchange of the shares for the note. If at the end of the term the shares have not been issued then Pilotage must return the assets to the Company.

Six Months Ended June 30, 2015 and 2014

In the event that the Company's shareholders do not approve this transaction at a special general meeting then Pilotage will be eligible for a break fee of \$100,000 payable in cash or shares of the Company.

8. FINANCIAL INSTRUMENTS AND RISK

As at June 30, 2015, the Company's financial instruments consist of cash and cash equivalents, trade payables, due to related parties, a convertible note and a derivative liability.

The carrying value of cash and cash equivalents, trade payables, and due to related parties approximate their fair values because of the short term nature of these instruments. The fair value of the convertible note is its face value of \$50,000 while the derivative liability is carried at fair value determined using level 3 measurement techniques (see below).

Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents. To minimize the credit risk the Company places these instruments with a high credit quality financial institution.

Liquidity Risk

Of the Company's financial liabilities, \$49,457 are current trade payables, \$50,000 is due on September 11, 2015 (Note 4), \$12,500 is due on February 6, 2016 (Note 5) and \$909,763 is due on demand. The Company manages liquidly risk through management of its capital resources discussed above.

Foreign Exchange Risk

The Company is not exposed to foreign exchange risk on its financial instruments.

Interest Rate Risk

At June 30, 2015, the Company is not exposed to significant interest rate risk as its interest bearing debt is short term at fixed rates.

Fair Value

The Company provides information about financial instruments that are measured at fair value, grouped into Level 1 to 3 based on the degree to which the inputs used to determine the fair value are observable.

- Level 1 fair value measurements are those derived from quoted prices in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1, that are observable either directly or indirectly.
- Level 3 fair value measurements are those derived from valuation techniques that include inputs that are not based on observable market data.

Cash and cash equivalents are measured using level 1 fair value inputs. The derivative component of the convertible note is measured using level 3 fair value inputs.

Pacific Therapeutics Ltd. (A Development Stage Company) Notes to Condensed Interim Financial Statements Six Months Ended June 30, 2015 and 2014

9. SUPPLEMENTIAL CASH FLOW INFORMATION

During the six months ended June 30, 2015, the Company had the following non-cash transactions:

- The issuance of 1,180,000 units to retire \$59,000 in debt to related parties (Note 5 and 6).
- Recognition of an decrease to the derivative liability of \$6,900 (Note 4).

The Company did not have any non-cash transactions during six months ended June 30, 2015.

10. SUBSEQUENT EVENTS

On July 24, 2015 the Company announced that it had signed a definitive agreement with Forge Therapeutics Inc.

Further to the Company's announcement of May 18, 2015 it has signed a definitive agreement ("Agreement") with Forge Therapeutics Inc. of Wyoming ("Forge") to sell the Company's technology assets in the area of the development of therapies for fibrosis and ED. Only assets related to the fibrosis and ED drug development programs are being sold. Subject to the terms of the Agreement, in return for the assets Forge is to issue to the Company 15,000,000 common shares of Forge, and; in the event of a sale to a third party of the assets purchased by Forge under the Agreement, the Company will receive 6% of the value of that transaction, subject to certain conditions. Subject to certain conditions, between the closing of the asset sale to Forge and the issuance of the 15,000,000 common shares, Forge will pay to the Company an annual maintenance fee of \$50,000. Forge will also assume or otherwise cause to be extinguished up to \$500,000 of debt owed to officers and directors of the company's balance sheet.

Subject to the terms of the Agreement, if the 15,000,000 shares are not issued to the Company within 3 years, then the Company may trigger the issuance of the shares, and if at the end of 5 years the shares have not been issued then Forge must return the assets to the Company.

In the event that the Company's shareholders do not approve this transaction at a special general meeting to be held August 25, 2015, then Forge will be eligible for a break fee of \$100,000 payable in cash or shares of the Company.

This transaction is consistent with the Company's strategy of adding value to drugs by conducting further research and other development activities and then out licensing the therapeutics candidate to a partner for further development and commercialization.
