NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3 (3) (a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that an auditor has not reviewed the financial statements.

The accompanying unaudited interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's auditor.

SHAMROCK ENTERPRISES INC. CONDENSED INTERIM STATEMENTS OF FINANCIAL POSITION (Unaudited – Prepared by Management)

1. NATURE OF OPERATIONS

Shamrock Enterprises Inc. (the "Company") was incorporated pursuant to the provisions of the Business Corporations Act (British Columbia) on April 17, 2008. The Company is in the process of exploring its mineral property and has not yet determined whether the properties contain reserves that are economically recoverable. The recoverability of amounts shown for mineral property is dependent upon the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying mineral property in accordance with industry practice, the ability of the Company to obtain necessary financing to complete the development, and upon future profitable production. The Company's registered corporate address is 484 Beachview Drive, North Vancouver, BC V7G 1P7, Canada.

The Company's financial statements have been prepared on a going concern basis, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they become due. The Company's ability to continue as a going concern is however dependent upon its ability to obtain additional funding from loans or equity financings, option agreements or through other arrangements. There is no assurance that these activities will be successful. These financial statements do not contain any adjustments to the amounts and classifications of assets and liabilities, which might be necessary should the Company be unable to continue in business. At February 29, 2012, the Company had cash and liquid cash investments of \$449,654 (2011: \$240,797) and working capital of \$482,105 (2011: \$280,651).

The BC Securities Commission issued a receipt for the Company's final IPO prospectus on September 15, 2010. On November 10, 2010, the Company completed its Initial Public Offering of securities and commenced trading on the Canadian National Stock Exchange ("CNSX") under stock symbol SRS.

2. BASIS OF PRESENTATION

Statement of compliance

These condensed interim financial statements, including comparative figures, have been prepared using accounting policies in compliance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). The disclosures concerning the transition from Canadian Generally Accepted Accounting Principles ("GAAP") to IFRS are included in Note 13.

These condensed interim financial statements have been prepared in accordance with IFRS applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting ("IAS 34") and IFRS 1, First-Time Adoption of International Financial Reporting Standards ("IFRS 1"). Subject to certain transition elections disclosed in Note 13, the Company has consistently applied the same accounting policies in our opening IFRS balance sheet as at June 1, 2010 and throughout all periods presented, as if these policies had always been in effect.

The policies applied in these condensed interim financial statements are presented in Notes 2 and 3 and are based on IFRS issued and outstanding as of the date the Board of Directors approved the financial statements. Any subsequent changes to IFRS that are given effect in our annual financial statements for the year ending May 31, 2011 could result in restatement of these interim financial statements, including the transition adjustments recognized on change-over to IFRS. The condensed interim financial statements for the year ended May 31, 2011. The condensed interim financial statements were authorized for issue by the Board of Directors on April 25, 2012.

Use of estimates and judgments

The preparation of these condensed interim financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, and revenue and expenses.

The use of estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods. Accounts which require management to make material estimates and significant assumptions in determining amounts recorded include: impairment of exploration and evaluation assets, and share-based payments.

i) Impairment

The Company assesses its exploration and evaluation assets annually to determine whether any indication of impairment exists. Where an indicator of impairment exists, a formal estimate of the recoverable amount is made, which is considered to be the higher of the fair value less costs to sell and value in use. These assessments may require the use of estimates and assumptions such as long-term commodity prices, discount rates, future capital requirements, and exploration potential.

ii) Share-based payments

The Company follows accounting guidelines in determining the fair value of share-based compensation. The computed amount is not based on historical cost, but is derived based on subjective assumptions input into an option pricing model. The model requires that management make forecasts as to future events, including estimates of: the expected life of options; future volatility of the Company's share price in the expected hold period (using historical volatility as a reference); and the appropriate risk-free rate of interest. Share based payments incorporates an expected forfeiture rate. The resulting value calculated is not necessarily the value that the holder of the option could receive in an arm's length transaction, given that there is no market for the options and they are not transferable. It is management's view that the value derived is highly subjective and dependent entirely upon the input assumptions made.

Basis of measurement

These unaudited condensed interim financial statements have been prepared on a historical cost basis except for financial instruments that have been measured at fair value. In addition, these unaudited condensed interim financial statements have been prepared, except for cash flow information, using the accrual basis of accounting.

3. SIGNIFICANT ACCOUNTING POLICIES

Summarized below are those policies considered significant to the Company. All accounting policies have been applied consistently to all periods presented in these financial statements and in preparing the opening IFRS statement of financial position at June 1, 2010 for the purposes of the transition to IFRS, unless otherwise indicated.

Cash and cash equivalents

Cash and cash equivalents, which include cash and highly liquid investments with original maturities of three months or less at the date of acquisition, are recorded at cost, which approximates fair value.

Exploration and evaluation assets

i) Exploration and evaluation expenditures

The Company may hold interests in mineral properties in various forms, including prospecting licenses, exploration and exploitation concessions, mineral leases and surface rights, and property options. The Company capitalizes payments made in the process of acquiring legal title to these properties. Mineral property interest acquisition costs are recorded at historical cost. Exploration and evaluation expenditures incurred on properties prior to the obtaining legal rights to explore the specific area are charged to operations as incurred.

ii) Impairment

The carrying values of exploration and evaluation assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. The carrying value of equipment is reviewed for indications of impairment at each reporting date. When impairment indicators exist, the asset's recoverable amount is estimated. If it is determined that the estimated recoverable amount is less than the carrying value of an asset, then a writedown is made with a charge to operations.

iii) Reversal of impairment

An impairment loss is reversed if there is indication that there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of amortization, if no impairment loss had been recognized.

Income taxes

Current income and mining tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. Current tax assets and current tax liabilities are only offset if a legally enforceable right exists to set off the amounts, and the Company intends to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred taxation is provided on all qualifying temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax assets are only recognized to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future and future taxable profit will be available against which the temporary difference can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Provision for environmental rehabilitation

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration, development or ongoing production of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided and capitalized at the start of each project to the carrying amount of the asset, as soon as the obligation to incur such costs arises. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the unit-of-production or straight line method. The related liability is adjusted for each period for the unwinding of the discount rate and for changes to the current market-based discount rate, amount or timing of the underlying cash flows needed to settle the obligation. Costs for restoration of subsequent site damage which is created on an ongoing basis during production are provided for at their net present values and charged against profits as extraction progresses.

Provisions

Provisions are recognized when present legal or constructive obligations exist as a result of a past event where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the statement of financial position date, taking into account the risks and uncertainties surrounding the obligation.

Share-based payments

The Company grants stock options to buy common shares of the Company through its stock option plan as described in Note 8. The Company accounts for share-based payments using the fair value method. Under this method, compensation expense is measured at fair value on the date of grant using the Black-Scholes option pricing model, and is recognized as an expense, with a corresponding increase in equity.

Warrants

Proceeds from issuances by the Company of units consisting of shares and warrants are allocated based on the residual method, whereby the carrying amount of the warrants is determined based on any difference between gross proceeds and the estimated fair market value of the shares. If the proceeds from the offering are less than or equal to the estimated fair market value of shares issued, a nil carrying amount is assigned to the warrants.

Financial instruments

Financial instruments are defined as any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. The Company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument.

Financial assets are classified into the following categories at their initial recognition:

- fair value through profit or loss ("FVTPL");
- held-to-maturity investments;
- loans and receivables;
- or available-for-sale investments.

Financial liabilities are classified into the following categories at their initial recognition:

- Financial liabilities at fair value through profit or loss;
- or financial liabilities measured at amortized cost.

Financial assets and liabilities are initially measured at fair value, plus, in the case of a financial asset or liability not at fair value through profit or loss, transactions costs directly attributable to the acquisition or issuance of the financial asset or liability. In a purchase or sale of financial assets recognition and derecognition occurs using trade date accounting.

Financial assets are subsequently measured after initial recognition at fair value, except for financial assets classified as held-to-maturity investments or loans and receivables, which are subsequently measured at amortized cost using the effective interest method.

Financial liabilities at fair value through profit or loss are subsequently measured after recognition at fair value. All other financial liabilities are subsequently measured at amortized cost using the effective interest method.

Financial assets are derecognized when:

- the contractual rights to the cash flows from the financial asset expire;
- the contractual rights to the cash flows from the financial asset are retained, but a contractual obligation to pay the cash flows to another party without material delay is assumed by the Company;
- or when the Company transfers substantially all the risks and rewards of ownership of the financial asset.

Financial liabilities are derecognized when the obligations are discharged, cancelled or expire.

Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial assets, the estimated future cash flows of the investments have been negatively impacted. Evidence of impairment could include: significant financial difficulty of the issuer or counterparty; or default or delinquency in interest or principal payments; or likelihood that the borrower will enter bankruptcy or financial reorganization.

The carrying amount of financial assets is reduced by impairment loss directly for all financial assets with the exception of financial assets classified as loans and receivables, where the carrying amount is reduced through the use of an allowance account. When these assets are considered uncollectible, they are written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment loss been recognized.

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels: Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities; Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

At the end of each reporting period, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. Where such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. The recoverable amount is the higher of an asset's fair value less cost to sell and its value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognized immediately in the statement of loss and comprehensive loss.

The Company has made the following classifications:

- Cash and short-term investments are classified as financial assets measured at fair value through P&L
- HST recoverable is classified as loans and receivables
- Accounts payable, accrued liabilities and due to related parties are classified as financial liabilities measured at amortized cost

Earnings per share

Basic earnings per share is calculated by dividing the net earnings available to common shareholders divided by the weighted average number of common shares outstanding during the year. The diluted earnings per share are calculated based on the weighted average number of common shares outstanding during the year, plus the effects of the dilutive common share equivalents. This method requires that the dilutive effect of outstanding options and warrants issued be calculated using the treasury stock method. This method assumes that all common share equivalents have been exercised at the beginning of the year (or at the time of issuance, if later), and that the funds obtained thereby were used to purchase common shares of the Company at the average trading price of common shares during the year.

Comprehensive loss

Comprehensive loss is the change in the Company's net assets that results from transactions, events and circumstances from sources other than the Company's shareholders and includes items that are not included in net profit such as unrealized gains or losses on available-for-sale investments and gains or losses on certain derivative instruments. The Company's comprehensive loss, components of other comprehensive income, and cumulative translation adjustments are presented, net of tax, in the statements of comprehensive income loss and the statements of changes in equity.

Future Accounting Policy Changes

The International Accounting Standard Board (IASB) issued the following standards which have not yet been effective adopted by the Company: IFRS 9, Financial Instruments, IFRS 10, Consolidated Financial Statements, IFRS 11 – Joint Arrangement, IFRS 12 – Disclosure of Interest in Other Entities, IFRS 13 – Fair Value Measurement, Amended IAS 27 – Separate Financial Statements and Amended IAS 28 – Investments in Associates and Joint Ventures.

The following is a brief summary of the new standards:

Financial Instruments IFRS 9, "Financial Instruments" ("IFRS 9") was issued by the IASB on November 12, 2009 and will replace IAS 39. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple classification options in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2013. The Company is currently evaluating the impact of IFRS 9 on its financial instruments.

IFRS 10 – Consolidated financial statements ("IFRS 10") was issued by the IASB in May 2011. IFRS 10 is a new standard which identifies the concept of control as the determining factor in assessing whether an entity should be included in the consolidated financial statements of the parent company. Control is comprised of three elements: power over an investee; exposure to variable returns from an investee; and the ability to use power to affect the reporting entity's returns. IFRS 10 is effective for annual period beginning on or after January 1, 2013. Earlier adoption is permitted.

IFRS 11 – Joint arrangements ("IFRS 11") was issued by the IASB in May 2011. IFRS 11 is a new standard which focuses on classifying joint arrangements by their rights and obligations rather than their legal form. Entities are classified into two groups: parties having rights to the assets and obligations for the liabilities of an arrangement, and rights to the net assets of an arrangement. Entities in the former case account for assets, liabilities, revenues and expenses in accordance with the arrangement, whereas entities in the later case account for the arrangement using the equity method. IFRS 11 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

IFRS 12 – Disclosure of interests in other entities ("IFRS 12") was issued by the IASB in May 2011. IFRS 12 is a new standard which provides disclosure requirements for entities reporting interest in other entities, including joint arrangements, special purpose vehicles, and off balance sheet vehicles. IFRS 12 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

IFRS 13 – Fair value measurement ("IFRS 13") was issued by the IASB in May 2011. IFRS 13 defines fair value, summarizes the methods of determining fair value and outlines the required fair value disclosures. IFRS 13 is utilized when another IFRS standard requires or allows fair value measurements or disclosures about fair value measurements. IFRS 13 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

Amended IAS 27 – Separate financial statements ("IAS 27") was issued by the IASB in May 2011. IAS 27 outlines the accounting principles to be applied with regards to investments in subsidiaries, joint ventures and associates when an entity elects or is required by local regulations to present separate, non-consolidated financial statements. The previous standard was titled IAS 27 – Consolidated and separate financial statements. IAS 27 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

Amended IAS 28 – Investments in associates and joint ventures ("IAS 28") was issued by the IASB in May 2011. IAS 28 outlines the accounting treatment and corresponding application of the equity method of accounting in investments in associates and joint ventures. The previous standard was titled IAS 28 – Investments in associates. IAS 28 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

4. FINANCIAL INSTRUMENTS

		February 29,	May 31,	June 1,
		2012	2011	2010
		\$	\$	\$
FVTPL financial assets	а	449,654	240,797	127,437
Other receivables	b	55,335	50,470	-
Other financial liabilities	с	22,883	10,616	53,336

a. Comprises cash and short-term investments.

b. Comprises receivables consisting of refundable sales tax credits paid for purchases.

c. Comprises accounts payable, accrued liabilities and due to related parties.

The Company has determined the estimated fair values of its financial instruments based on appropriate valuation methodologies; however, considerable judgment is required to develop these estimates. Cash and short-term investments are carried at fair value using a level 1 fair value measurement. The fair values of HST recoverable, accounts payable, accrued liabilities and due to related parties are carried at level 3 fair value measurements, approximate their carrying values due to the short-term nature of these instruments.

Management of Industry and Financial Risk

The Company is engaged primarily in mineral exploration and manages related industry risk issues directly. The Company may be at risk for environmental issues and fluctuations in commodity pricing. Management is not aware of and does not anticipate any significant environmental remediation costs or liabilities in respect of its current operations.

The Company's financial instruments are exposed to certain financial risks, which include the following:

Credit risk

Credit risk is the risk of loss due to the counterparty's inability to meet its obligations. The Company's exposure to credit risk is on its cash and HST recoverable. Risk associated with cash is managed through the use of major Canadian bank. The Company's HST recoverable is due from the Government of Canada; therefore, the credit risk exposure is low.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulties in meeting obligations when they become due. The Company ensures that there is sufficient capital in order to meet short-term operating requirements, after taking into account the Company's cash. The Company's cash is held in corporate bank accounts available on demand.

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and price risk.

Currency Risk

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars; therefore, currency risk is minimal.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to significant interest rate risk.

Price Risk

The Company is exposed to price risk with respect to equity prices. Price risk as it relates to the Company is defined as the potential adverse impact on the Company's ability to finance due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

5. CAPITAL MANAGEMENT

The Company's primary source of funds comes from the issuance of share capital. The Company defines its capital as all components of shareholders equity. Capital requirements are driven by the Company's planned exploration and evaluation activities and general and administrative expenses. To effectively manage the Company's capital requirements, the Company has a planning and budgeting process in place to ensure that adequate funds are available to meet its strategic goals. The Company monitors actual exploration activities. Although the Company has been successful at raising funds in the past through the issuance of share capital, there can be no assurance that it will continue to be able to do so in the future. There were no changes in the Company's approach to capital management during the period ended February 28, 2011. The Company is not subject to externally imposed capital requirements.

6. SHORT-TERM INVESTMENTS

As at February 29, 2012, the Company has invested \$30,000 into Guaranteed Investment Certificates ("GICs") with a Canadian financial institution. These GICs yield interest at prime minus 2.05% and have original maturity date of 12 months. All short-term investments have been classified as financial assets measured at fair value through profit or loss. Their fair values approximate their carrying values due to their short-term nature.

7. EXPLORATION AND EVALUATION ASSETS

Title to mineral properties involves certain inherent risks due to difficulties of determining the validity of certain claims as well as potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to mineral properties optioned or otherwise, and to the best of its knowledge, the vendor's title to all of its properties are in good standing.

	Fireweed
	\$
Balance, June 1, 2010	52,300
Acquisition costs incurred	151,000
Exploration costs incurred	374,081
Balance, May 31, 2011	577,381
Exploration costs incurred	431,451
Balance, February 29, 2012	1,008,832

Summary of exploration and evaluation expenditures:

Fireweed Property, British Columbia

On February 17, 2010 ("Effective Date"), the Company entered into an option agreement with a third party to acquire an initial 50% interest, with an option to earn up to 70% in 8 mineral property claims located in the Omineca Mining Division in British Columbia, Canada, by making the following work expenditures, cash payments and share issuances:

Year Ended On	Annual Work Expenditure	Cumulative Total
	\$	\$
1 st Anniversary of Effective Date (completed)	200,000	200,000
2 nd Anniversary of Effective Date (completed)	450,000	650,000

8. EQUITY AND RESERVES

Share Capital

The Company is authorized to issue an unlimited number of commons shares without par value.

For the period ended February 29, 2012

The Company completed a non-brokered private placement of 2,716,000 units at \$0.35 per unit for gross proceeds of \$950,600. Each unit was comprised of one common share and one share purchase warrant. Each warrant is exercisable to acquire an additional share at \$0.45 per share for a two year period. The Company paid an aggregate of \$66,542 cash finder's fees as well as the issuance of 190,120 agents warrants carrying the same terms and conditions as the warrants are comprising the units. The fair value of these agents' warrants was determined at \$36,220 using the Black-Scholes option pricing model.

For the year ended May 31, 2011

On November 10, 2010, the Company completed its Initial Public Offering ("IPO") of 4,000,000 common shares at a price of \$0.25 per share for gross proceeds of \$1,000,000. In connection with the IPO, the Company paid Northern Securities Inc. (the "Agent") \$80,000 commission (8% of the gross proceeds raised), an administration fee of \$10,500 (includes applicable taxes), and expenses and legal fees of \$15,079. The Company also granted the agent warrants to purchase 400,000 common shares (10% of all common shares issued under the offering) at a price of \$0.25 per share, which may be exercised until November 10, 2012 (24 months from the date the common shares of the Company are listed on the

Exchange). The fair value of these agents warrants was determined at \$43,874 using the Black-Scholes option pricing model.

During the year ended May 31, 2011, the Company issued 300,000 common shares valued at \$101,000 in connection with the option agreement of Fireweed Property.

Stock Options

Stock-Option Plan

The Company has a stock option plan in place. Under the stock option plan the Company can issue up to 10% of the issued and outstanding Shares as incentive stock options to directors, officers, insiders, employees and other service providers to the Company. The stock option plan limits the number of incentive stock options which may be granted to any one individual to not more than 5% of the total issued Shares of the Company in any 12 month period. The number of incentive stock options granted to any one consultant or a person employed to provide investor relations activities in any 12 month period must not exceed 2% of the total issued Shares of the Company. The options granted under the Stock Option Plan are subject to the vesting schedule of the Stock Option Plan wherein 25% of the options will vest every 3 months thereafter for a period of 12 months after the day of grant.

For the period ended February 29, 2012

The Company incurred stock-based compensation expenses of \$32,031 (nine months ended February 28, 2011: \$80,095) which were charged to the statement of comprehensive loss and credited to contributed surplus. There were no options granted during this period.

For the year ended May 31, 2011

Upon the completion of the Offering and the listing of the Company's common shares on the Exchange, the Company granted incentive stock options to purchase 750,000 shares at \$0.25 per share to officers and directors of the Company for a five year term commencing on November 10, 2010. The fair value of the stock options granted were estimated during the Black-Scholes option pricing mode with the following assumptions: risk-free rate of 2.48%, expected stock price volatility of 114.88%, and expected life of 5 years. During the year ended May 31, 2011, the fair value of options vested was \$93,920.

On November 15, 2010, the Company granted 150,000 incentive stock options to consultants for a one year term exercisable at \$0.25 per share. The fair value of the stock options granted were estimated during the Black-Scholes option pricing mode with the following assumptions: risk-free rate of 1.70%, expected stock price volatility of 56.41%, and expected life of 1 year. During the year ended May 31, 2011, the fair value of options vested was \$24,899.

On April 4, 2011, the Company granted 150,000 incentive stock options to a consultant for a three year term exercisable at \$0.30 per share. The fair value of the stock options granted were estimated during the Black-Scholes option pricing mode with the following assumptions: risk-free rate of 2.20%, expected stock price volatility of 105.50%, and expected life of 3 years. During the period ended May 31, 2011, the fair value of options vested was \$25,167.

Summary of stock option activity:

	Number of Options	Weighted Average Exercise Price	Weighted Average Life Remaining (Years)
		\$	
Balance, June 1, 2010	-	-	-

Summary of stock options outstanding:

Options	Exercise Price	Expiry Date
	\$	
750,000	0.25	November 10, 2015
150,000	0.30	April 4, 2014
900,000		

Warrants

For the period ended February 29, 2012

As part of the 2,716,000 units placed, the Company issued 2,716,000 warrants to placees for a two year term exercisable at \$0.45 per share. The fair values of the shares were equal to the proceeds; therefore, \$Nil carrying amount was assigned to the warrants based on the residual value method.

As part of the 2,716,000 units placed, the Company issued 190,120 warrants to agents for a two year term exercisable at \$0.45 per share. The fair value of the warrants issued was estimated using the Black-Scholes option pricing mode with the following assumptions: risk-free rates from 0.83% to 1.40%, expected stock price volatility of 125.92% to 137.56%, and expected life of 2 years. The fair value of these warrants is estimated to be \$36,220 and is included as a reduction of share capital.

For the year ended May 31, 2011

On November 10, 2010, the Company issued 400,000 share purchase warrants to the Agent for a two year term exercisable at \$0.25 per share. Each warrant has an estimated fair value of \$0.13; accordingly, \$43,874 has been recorded as a reduction in share capital. This value was estimated using the Black-Scholes option pricing model assuming an average expected remaining life of 2 years, a risk-free interest rate of 1.74%, a nil dividend yield and an expected volatility of 115.97%.

Summary of warrant activity:

	Number of Warrants	Weighted Average Exercise Price	Weighted Average Life Remaining (Years)
		\$	
Balance, June 1, 2010	-	-	-
Granted	400,000	0.25	1.45
Exercised	(2,500)	0.25	-
Balance, May 31, 2011	397,500	0.25	1.45
Granted	2,906,120	0.45	-
Balance, November 30, 2011	3,303,620	0.43	1.62

Summary of warrants outstanding at February 29, 2012:

Expiry Date	Exercise Price	Warrants
	\$	
November 10, 2012	\$0.25	397,500
July 29, 2013	\$0.45	318,860
August 8, 2013	\$0.45	588,500
August 23, 2013	\$0.45	1,998,760
		3,303,620

9. COMMITMENTS

The Company is committed to certain contractual obligations described in Note 10.

10. RELATED PARTY TRANSACTIONS

The value of transactions and outstanding balances relating to key officers and directors and entities over which they have control or significant influence were as follows:

The Company incurred \$58,500 (nine months ended February 28, 2011 - \$50,250) of management fees from Gordon Osinchuk, the President and CEO of the Company, for services performed. In addition, the Company incurred \$10,500 (nine months ended February 28, 2011 - \$9,000) for office rent and storage costs from Mr. Osinchuk. As at February 29, 2012, \$5,000 owing to Mr. Osinchuk was included in accounts payable and accrued liabilities (May 31, 2011 - \$Nil).

The Company incurred \$22,500 (nine months ended February 28, 2011– \$22,500) of professional fees from Midland Chartered Accountants Ltd., a company controlled by an officer for CFO services performed. As at February 29, 2012, \$Nil remains unpaid (May 31, 2011 - \$Nil) for these services.

The Company incurred \$22,500 (nine months ended February 28, 2011 – \$17,500) of professional fees from PubliCo Services Ltd., a company controlled by an officer for corporate secretarial services performed. As at February 29, 2012 \$Nil remains unpaid (May 31, 2011 - \$Nil) for these services.

The Company incurred \$48,000 in director fees for the period ended February 29, 2012 (nine months ended February 28, 2011 - \$Nil).

Amounts due to related parties are unsecured, non-interest bearing and without specified repayment terms. All related party transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

11. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

The following significant non-cash transactions have been excluded from the statements of cash flows:

For the period ended February 29, 2012

In connection with the private placement of 2,716,000 units at a price of \$0.35 per unit for gross proceeds of \$950,600 during the period, the Company granted agents' warrants to purchase 190,120 common shares with a fair value of \$36,220 (Note 8).

For the period ended February 29, 2011

The Company issued 100,000 shares with a fair value of \$35,000 in accordance with the Fireweed Property option agreement (Note 7 and 8).

In conjunction with the IPO of 4,000,000 common shares at a price of \$0.25 per share for gross proceeds of \$1,000,000 during the period, the Company granted the agent warrants to purchase 400,000 common shares with a fair value of \$43,874 (Note 8).

12. **RECLASSIFICATION**

The comparative financial statements have been reclassified to conform to the presentation of the current period financial statements.

13. IFRS TRANSITION FROM PREVIOUS GAAP

The Company's financial statements for the year ending May 31, 2012 will be the first annual financial statements that comply with IFRS. The Company has prepared its opening IFRS balance sheet by applying existing IFRS standards in effect at the release of these condensed interim financial statements. However, the opening IFRS balance sheet and the May 31, 2011 comparative balance sheet presented in financial statements for the year ending May 31, 2012 may differ from those presented at this time if there are changes to IFRS standards that require retroactive adjustment.

As stated in Note 2, these are the Company's first financial statements prepared in accordance with IFRS. The accounting policies in Note 3 have been applied in preparing the condensed interim financial statements for the period ended November 30, 2011, the comparative information presented in these financial statements for the year ended May 31, 2011 and in preparation of an opening IFRS statement of financial position at June 1, 2010.

In preparing its opening IFRS statement of financial position, the Company has reclassified certain amounts reported previously in financial statements prepared in accordance with previous Canadian

generally accepted accounting principles ("CDN GAAP"). An explanation of how the transition from previous CDN GAAP to IFRS, if any, has affected the Company's financial position, financial performance, and cash flows is set out below.

First-time adoption of IFRS – Exemptions applied

IFRS 1 *First-time Adoption of International Financial Reporting Standards* sets forth guidance for the initial adoption of IFRS. Under IFRS 1, the standards are applied retrospectively at the transitional statement of financial position date with all adjustments to assets and liabilities charged or credited to retained earnings unless certain exemptions are applied. The Company has applied the following exemptions to its opening statement of financial position dated June 1, 2010:

(a) Estimates

In accordance with IFRS 1, an entity's estimates under IFRS at the date of transition to IFRS must be consistent with estimates made for the same date under the previous CDN GAAP applied, unless there is objective evidence that those estimates were in error. The Company's IFRS estimates as of June 1, 2010 are consistent with its CDN GAAP estimates for the same date.

(b) Share-based payment transactions

IFRS 1 encourages, but does not require, first time adopters to apply IFRS 2 – Share-Based Payment to equity instruments that were granted on or before November 7, 2002, or equity instruments that were granted subsequent to November 7, 2002 and vested before the transition date. The Company has not elected to apply IFRS 2 to awards that vested prior to June 1, 2010.

Reconciliation from Canadian GAAP to IFRS

(c) Mineral property

IFRS 6 requires that an entity classify each asset in the exploration for and evaluation of mineral resources as tangible or intangible according to the nature of the assets acquired and to apply the classification consistently. As a result, the Company has reclassified certain assets previously classified as its mineral property to exploration and evaluation assets.

IFRS employs a conceptual framework that is similar to CDN GAAP. However, significant differences exist in certain matters of recognition, measurement and disclosure. While the adoption of IFRS has not changed the Company's actual cash flows and comprehensive losses, it has resulted in certain line item reclassifications in the Company's Statements of Financial Position with the resulting difference explained.

(d) Reclassifications within the equity section

IFRS - IFRS requires an entity to present for each component of equity, reconciliation between the carrying amount at the beginning and end of the period, separately disclosing each change. The Company reviewed its contributed surplus account and applied the following changes: The contributed surplus account was renamed reserves account, and the presentation of the reserves in the statement of changes in equity has been further separated into reserves relating to equity settled benefits and reserves relating to warrants.

As at June 1, 2010, the reserves account totalled \$Nil. As at May 31, 2011, the reserves account totalled \$187,860, which comprises \$143,986 related to reserves for equity settled benefits, and \$43,874 relates to reserves for warrants. As at February 29, 2011, the reserves account totalled \$52,528.

CDN GAAP – The Company records issuances of stock options and warrants as an increase in contributed surplus and a corresponding increase in accumulated loss, or share capital. There is no requirement to present activity related to warrant grants separately from stock option grants.

(e) Share-based payments

IFRS - Each tranche of a share-based award with different vesting dates is considered a separate grant for the calculation of fair value, and the resulting fair value is amortized over the vesting period of the respective tranches. Forfeiture estimates are recognized in the period they are estimated and are revised for actual forfeitures in subsequent periods.

CDN GAAP - The fair value of share-based awards with graded vesting are calculated as one grant and the resulting fair value is recognized on a straight-line basis over the vesting period. Forfeitures of awards are recognized as they occur. During the year end May 31, 2011, the Company valued stock options granted to employees on a graded vesting basis with the assumptions that the expected life was the maximum life of expiry and the forfeiture rate was zero. Upon transition, there were no changes in values and reconciling differences for the financial statements as at May 31, 2011.

(f) Impairment

IFRS - If indication of impairment is identified, the asset's carrying value is compared to the asset's discounted cash flows. If the discounted cash flows are less than the carrying value, the asset is impaired by an amount equal to the difference between the discounted cash flows and the carrying value.

CDN GAAP - If indication of impairment is identified, the asset's carrying value is compared to the asset's undiscounted cash flows. If the undiscounted cash flows are less than the carrying value, the asset is impaired by an amount equal to the difference between the discounted cash flows and the carrying value.

The Company completed an impairment review of its assets at June 1, 2010, May 31, 2011 and February 28, 2011, and concluded that the assets were not impaired in accordance with IFRS.

The June 1, 2010 Canadian GAAP statement of financial position has been reconciled to IFRS as follows:
