SHAMROCK INCREASES STELLAR PROJECT MINERAL CLAIMS IN CENTRAL BRITISH COLUMBIA

Shamrock Enterprises Inc. ("Shamrock" or the "Company") (CSE: SRS) announces that it has expanded its Stellar Project by acquiring the Stellar 5 mineral claim, which covers a prospective aeromagnetic anomaly that was only partially covered by Shamrock's claims lying immediately to the south. The Company's holdings lie north of and partially surround ML Gold's new Stars porphyry copper-gold-silver-molybdenum discovery, and now encompass the northern part of aeromagnetic high that hosts the Stars porphyry. The new staking adds 830.9 hectares (ha) to Shamrock's land position in the area, which now totals 18,546 ha (>18.5 km²).

The Stellar property and Stars discovery lie along the northwestern margin of the Nechako Plateau, where it borders the east side of the Coast Mountains in west-central B.C., approximately 25 km southwest of the town of Houston. The Stars discovery represents an important early-stage porphyry discovery and the Stellar property now covers a large area nearby with excellent exploration potential and access and infrastructure to match. The mineral tenures can be accessed via Highway #16 and an extensive network of Forest Service Roads, many of which are open year-round. Shamrock's claims now cover a prominent north-northeast trending group of regional aeromagnetic highs including a large part of the high coincident with the Stars discovery and its host intrusive rocks (Figure 1) <https://www.shamrockresources.com/index.php/projects/stellar-claims>.

About Shamrock: Shamrock Enterprises Inc. is a Canadian-based junior mining exploration company focused on the procurement, exploration and development of precious and base metal properties in North America. The Company's common shares are listed and posted for trading on the Canadian Securities Exchange ("CSE") under the symbol "SRS".
