CANADA COAL INC.

CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED JUNE 30, 2013 AND 2012
(EXPRESSED IN CANADIAN DOLLARS)

(UNAUDITED - PREPARED BY MANAGEMENT)
These financial statements have not been reviewed by the Company's auditor.

NOTICE OF NO AUDITOR REVIEW OF CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

The accompanying unaudited condensed consolidated interim financial statements of Canada Coal Inc. for the nine month period ended June 30, 2013 have been prepared by the management of the Company and approved by the Company's Audit Committee and the Company's Board of Directors. Under National Instrument 51-102, Part 4, subsection 4.3 (3) (a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that an auditor has not reviewed the financial statements.

The accompanying unaudited condensed consolidated interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these condensed consolidated interim financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of the interim financial statements by an entity's auditor.

See accompanying notes to the consolidated financial statements.

1. NATURE AND CONTINUANCE OF OPERATIONS

Canada Coal Inc. (hereafter the "Company" or "Canada Coal") was incorporated on August 26, 2010 under the Business Corporation Act (Ontario) under the name Pacific Coal Corp. On April 12, 2011, the Company changed its name to Canada Coal Inc. The Company's principal business is the acquisition and exploration of coal properties in Nunavut, Canada. The Company is at the early stages of development on its projects and as such, to date, has not generated significant revenues from its operations.

The Company's head office is located at 181 Bay Street, Suite 1800, Toronto, Ontario, M5J 2T9. The Company's shares are listed on the TSX Venture Exchange under the symbol CCK.

These unaudited condensed consolidated interim financial statements were approved by the Board of Directors on August 28, 2013.

The Company is in the process of exploring its properties and has not yet determined whether the properties contain reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation expenditures is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves, the achievement of profitable production, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values of exploration and evaluation expenditures.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, currency exchange fluctuations and restrictions, and political uncertainty.

On February 23, 2012, the Company completed an amalgamation with Mercury Capital Limited ("Mercury Capital"). Canada Coal Inc. was the resulting issuer from the amalgamation and upon completion of the amalgamation, was considered a Tier I mining issuer. The Company began trading on the TSX Venture Exchange on February 29, 2012.

These condensed consolidated interim financial statements have been prepared with the assumption that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. As at June 30, 2013, the Company had working capital of $2,094,540 and an accumulated deficit of $3,913,156 compared with working capital of $3,020,828 and an accumulated deficit of $3,666,752 at September 30, 2012. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. Management believes it will be successful in raising the necessary funding to continue operations in the normal course of operations. These condensed consolidated interim financial statements do not include the adjustments that would be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

2. STATEMENT OF COMPLIANCE

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, *Interim Financial Reporting* ("IAS 34"), as issued by the International Accounting Standards Board ("IASB"), and its interpretations. Accordingly, these condensed consolidated interim financial statements do not include all of the information and footnotes required by International Financial Reporting Standards ("IFRS") for complete financial statements for year-end reporting purposes.

Continued...

3. BASIS OF PRESENTATION

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for financial instruments classified as held-for-trading, which are stated at their fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

4. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these condensed consolidated interim financial statements.

Principles of consolidation
These condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned subsidiaries, Canadian Sovereign Coal Corp., a company incorporated under the laws of British Columbia, and 5200 Nunavut Ltd., a company incorporated under the laws of Nunavut. Significant inter-company balances and transactions have been eliminated upon consolidation. All references to the Company or Canada Coal should be treated as references to Canada Coal Inc. and its subsidiaries.

Subsidiaries are entities over which the Company has control, where control is defined as the power to govern financial and operating policies of an entity so as to obtain benefit from its activities. Generally, the Company has a shareholding of more than one half of the voting rights in its subsidiaries. The effects of potential voting rights that are currently exercisable are considered when assessing whether control exists. Subsidiaries are fully consolidated from the date control is transferred to the Company, and are de-consolidated from the date control ceases.

Cash and cash equivalents
Cash and cash equivalents include balances with banks and short-term money market investments with original maturities of 90 days or less which are readily convertible into a known amount of cash. The Company's cash and cash equivalents are invested with major financial institutions in business accounts and are available on demand by the Company.

Financial instruments
Financial assets and financial liabilities that are purchased and incurred with the intention of generating profits in the near term are classified as held-for-trading. These instruments are measured at fair value with subsequent changes in fair value recognized in net loss. Currently, the Company's cash equivalents are classified as held-for-trading.

Financial assets that have a fixed maturity date and fixed or determinable payments, where the Company intends and has the ability to hold the financial asset to maturity are classified as held-to-maturity and are measured at amortized cost using the effective interest rate method. Any gains and losses arising from the sale of held to maturity financial assets are recognized in net loss. Currently, the Company has no held-to-maturity financial assets.

Items classified as loans and receivables are measured at amortized cost using the effective interest method. Any gains or losses on the realization of loans and receivables are recognized in net loss. The Company’s cash and receivables are classified as loans and receivables. The estimated fair values of these financial instruments approximate their carrying values because of the limited terms of these instruments.

Available-for-sale assets are those financial assets that are not classified as held-for-trading, held-to-maturity or loans or receivables, and are carried at fair value. Any gains or losses arising from the change in fair value are recorded as other comprehensive income. Available-for-sale investments are written down to fair value through operations whenever it is necessary to reflect other than temporary impairment. Cumulative gains and losses arising upon the sale of the instrument are included in net loss. Regular way purchases and sales of financial assets are accounted for at the trade date. Currently, the Company has no available-for-sale assets.

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Financial instruments (Continued)

Financial liabilities that are not classified as held-to-maturity are classified as other financial liabilities, and are carried at amortized cost using the effective interest method. Any gains or losses arising from the realization of other financial liabilities are recognized in net loss. The Company has classified accounts payable and accrued liabilities as other financial liabilities, which are carried at amortized cost. Due to their short-term natures, the fair values of these financial instruments approximate their carrying values, and are not subject to significant credit or interest rate risk.

The Company classifies its fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels: (a) quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1); (b) inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices) (Level 2); and (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3). At June 30, 2013 and September 30, 2012, the Company's financial instruments that were carried at fair value, consisted of cash equivalents which have been classified as Level 2 within the fair value hierarchy.

Impairment of financial assets

Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are impaired when there is objective evidence that the estimated future cash flows of the assets have been negatively impacted. The amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced by the amount of the impairment and the loss is recognized in net loss. If in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed to the extent that the carrying value of the asset does not exceed what the amortized cost would have been had the impairment not been recognized. Any subsequent reversal of an impairment loss is recognized in net loss.

If an available-for-sale asset is impaired, an amount comprising the difference between its cost and its current fair value, less any impairment previously recognized in profit or loss, is transferred from equity to profit or loss. Reversals in respect of equity instruments classified as available-for-sale are not recognized in net loss.

Impairment of non financial assets

At each date of the statement of financial position, the Company reviews the carrying amounts of its non-financial assets to determine whether there is an indication that those assets have suffered an impairment loss. If such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. The recoverable amount is the higher of the fair value less costs to sell and the value in use. If the recoverable amount is less than the carrying amount of the asset, the carrying amount is reduced to the recoverable amount and the impairment loss is recognized in net loss.

Investments

Investments in associates are accounted for using the equity method based on the Company's ability to exercise significant influence over the operating and financial policies of the investee. Investments of this nature are recorded at original cost and adjusted periodically to recognize the Company's proportionate share of the associate's net income or losses after the date of investment, additional contributions made and dividends received. Investments are written down when there has been a significant or prolonged decline in fair value.

Continued…

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Equipment
Equipment is stated at cost less accumulated amortization and accumulated impairment losses. The cost of an item of equipment consists of the purchase price, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use and an initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

The Company's amortization is recorded as an addition to exploration and evaluation expenditures and amortizes cost less estimated residual values on a straight line method over the estimated useful life of the asset. The estimated useful life of assets is as follows:

Equipment	5 years
Vehicles	2 years

An item of equipment is derecognized upon disposal, when held for sale or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in net loss.

The Company conducts an assessment of the residual balances, useful lives and amortization methods being used for equipment at each reporting date and any changes arising from the assessment are applied by the Company prospectively.

Foreign currency translation
The Canadian dollar is the functional and reporting currency of the Company and its subsidiaries. All monetary assets and liabilities are translated at the rate of exchange at the financial reporting date and non-monetary assets and liabilities are translated at historical exchange rates, unless such items are carried at market, in which case they are translated at the exchange rates in effect on the statement of financial position date. Income and expenses are translated at the rates approximating those at the transaction dates. Gains and losses arising from translation of foreign currency monetary assets and liabilities are recognized in net loss.

Exploration and evaluation expenditures
All of the Company's property interests are in the exploration and evaluation phase. The Company records its interests in properties and areas of geological interest at cost. Expenditures incurred prior to obtaining the legal right to explore are expensed. All direct and indirect costs relating to the acquisition and exploration of these interests are capitalized on the basis of specific claim blocks or areas of geological interest until the properties to which they relate are placed into production, sold or management has determined there to be impairment. These costs will be amortized on the basis of units produced in relation to the proven reserves available on the related property following commencement of production. The Company classifies the costs between intangibles and property, plant and equipment based on the nature of the costs incurred.

The cost of property interests includes any cash consideration paid and the fair market value of shares issued, if any, on the acquisition of property interests. Acquisition costs of properties acquired under option agreements, whereby payments are made at the sole discretion of the Company, are recorded in the accounts when the payments are made. The recorded amounts of property claim acquisition costs and their related exploration and evaluation costs represent actual expenditures incurred and are not intended to reflect present or future values.

The Company reviews capitalized costs on its properties on a periodic basis and when events or changes in circumstances indicate that its carrying amount may not be recoverable. The Company will recognize an impairment in value based upon current exploration results and upon management's assessment of the future probability of revenues from the property or from the sale of the property.

Continued…

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Restoration, rehabilitation and environmental obligations
A legal or constructive obligation to incur restoration, rehabilitation and environmental costs may arise when environmental disturbance is caused by the exploration, development or ongoing production of a property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized to the carrying amount of the asset, as soon as the obligation to incur such costs arises. Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using the unit-of-production method. Changes to the current market based discount rate, amount or timing of the underlying cash flows needed to settle the obligation impact the carrying value of the asset and liability. The related liability is adjusted each period for the unwinding of the discount rate. The Company had no significant restoration, rehabilitation and environmental obligations as at June 30, 2013 and September 30, 2012.

Provisions
Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the statement of financial position date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

A provision for onerous contacts is recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract.

The Company had no material provisions at June 30, 2013 and September 30, 2012.

Share-based payment transactions
In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at fair value of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

The fair value of stock options granted to employees is recognized as an expense over the vesting period with a corresponding increase in the equity settled share-based payments reserve account. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee, including directors of the Company.

The fair value is measured at the grant date and recognized over the period during which the options vest. The fair value of the options granted is measured using the Black-Scholes option-pricing model, taking into account the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the actual number of stock options that are expected to vest.

Where the terms of an equity-settled award are modified, the minimum expense recognized is the expense as if the terms had not been modified. An additional expense is recognized for any modification which increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the employee as measured at the date of modification.

Unexercised expired stock options are transferred to deficit.

Continued…

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Warrants

Warrants are recognized at fair value on the date of grant and are measured using the Black-Scholes option pricing model. Incremental costs directly attributable to the issue of new warrants are shown in equity as a deduction, net of tax, from the proceeds. Unexercised expired warrants are transferred to deficit.

Flow-through shares

The Company has financed a portion of its exploration activities through the issue of flow-through shares, which offer a tax incentive to Canadian investors by transferring the tax deductibility of exploration expenditures from the Company to the investor.

The Company has adopted a policy whereby flow-through proceeds are allocated between the offering of the common shares and the sale of tax benefits when the common shares are offered. The allocation is made based on the difference between the quoted price of the common shares and the amount the investor pays for the flow-through shares. A liability is recognized for the premium paid by the investors. Upon renunciation of the flow through expenditures for Canadian income tax purposes, the liability component is derecognized and a deferred income tax liability is recognized for the taxable temporary difference created at the Company's applicable tax rate which is expected to apply in the year the deferred income tax liability will be settled. Any difference between the amount of the liability component derecognized and deferred income tax liability recognized is recorded in profit and loss.

Resource expenditure deductions for income tax purposes related to exploration and evaluation activities funded by flow-through share arrangements are renounced to investors in accordance with income tax legislation.

Income taxes

Income tax on the profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is provided using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the financial position reporting date. A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax assets are reviewed at each reporting date and to the extent that the Company does not consider it probable that a future tax asset will be recovered, it is not recognized.

Loss per share

The basic loss per share is computed by dividing the net loss by the weighted average number of common shares outstanding during the period. The diluted loss per share reflects the potential dilution of common share equivalents, such as outstanding stock options and share purchase warrants, in the weighted average number of common shares outstanding during the period, if dilutive. The diluted loss per share calculated assumes proceeds upon the exercise of the options and warrants that are used to purchase common shares at the average market price during the period. During the three and nine months ended June 30, 2013 and 2012, all the outstanding stock options and warrants were anti-dilutive.

Continued…

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Comprehensive loss

Other comprehensive loss represents the change in net equity for the period that arises from unrealized gains and losses on available-for-sale financial instruments. Amounts included in other comprehensive loss are shown net of tax. Cumulative changes in other comprehensive loss are presented separately in the consolidated statement of changes in equity. The Company has no financial assets classified as available for sale, and accordingly, net loss is equivalent to comprehensive loss.

Use of estimates

The preparation of these condensed consolidated interim financial statements requires management to make estimates and assumptions that affect the reported amount of the assets and liabilities and the disclosure of contingent assets and liabilities at the date of the condensed consolidated interim financial statements and the reported amount of revenues and expenses during the year. The impact of these estimates are pervasive throughout the financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. Estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Significant estimates made by the Company include factors affecting the recoverability of exploration and evaluation expenditures, valuation of restoration, rehabilitation and environmental obligations, inputs used for share-based payment transactions, inputs used for valuation of warrants and valuation of deferred tax assets and liabilities. Actual results could differ from those estimates.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

Assets' carrying values and impairment charges

In the determination of carrying values and impairment charges, management looks at the higher of recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

Capitalization of exploration and evaluation costs

Management has determined that exploration and evaluation costs incurred during the year have future economic benefits and are economically recoverable. In making this judgment, management has assessed various sources of information including but not limited to the geologic and metallurgic information, proximity of operating facilities, operating management expertise and existing permits.

Impairment of exploration and evaluation assets

While assessing whether any indications of impairment exist for exploration and evaluation assets, consideration is given to both external and internal sources of information. Information the Company considers includes changes in the market, economic and legal environment in which the Company operates that are not within its control that could affect the recoverable amount of exploration and evaluation assets. Internal sources of information include the manner in which exploration and evaluation assets are being used or are expected to be used and indications of expected economic performance of the assets. Estimates include but are not limited to estimates of the discounted future after-tax cash flows expected to be derived from the Company's mining properties, costs to sell the properties and the appropriate discount rate. Reductions in metal price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the Company's exploration and evaluation assets.

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Use of estimates (Continued)
Estimation of decommissioning and restoration costs and the timing of expenditure
Cost estimates are updated annually to reflect known developments, (e.g. revisions to cost estimates and to the estimated lives of operations), and are subject to review at regular intervals. Decommissioning, restoration and similar liabilities are estimated based on the Company's interpretation of current regulatory requirements constructive obligations and are measured at fair value. Fair value is determined based on the net present value of estimated future cash expenditures for the settlement of decommissioning, restoration or similar liabilities that may occur upon decommissioning of the mine. Such estimates are subject to change based on changes in laws and regulations and negotiations with regulatory authorities.

Income taxes and recoverability of potential deferred tax assets
In assessing the probability of realizing income tax assets recognized, management makes estimates related to expectations of future taxable income, applicable tax planning opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. Where applicable tax laws and regulations are either unclear or subject to ongoing varying interpretations, it is reasonably possible that changes in these estimates can occur that materially affect the amounts of income tax assets recognized. Also, future changes in tax laws could limit the Company from realizing the tax benefits from the deferred tax assets. The Company reassesses unrecognized income tax assets at each reporting period.

Share-based payments
Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviors and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.

Future accounting changes
Certain new standards, interpretations and amendments to existing standards have been issued by the IASB or IFRIC that are mandatory for accounting periods beginning on or after September 1, 2012 or later periods.

IFRS 9 Financial Instruments: Classification and Measurement ("IFRS 9"), effective for annual periods beginning on or after January 1, 2015, with early adoption permitted, introduces new requirements for the classification and measurement of financial instruments. Management anticipates that this standard will be adopted in the Company's financial statements for the period beginning October 1, 2015, and has not yet considered the potential impact of the adoption of IFRS 9.

IFRS 10 Consolidated Financial Statements ("IFRS 10") provides a single model to be applied in the control analysis for all investees, including entities that currently are special purpose entities in the scope of SIC 12. In addition, the consolidation procedures are carried forward substantially unmodified from IAS 27 Consolidated and Separate Financial Statements. The Company intends to adopt IFRS 10 in its financial statements for the annual period beginning on October 1, 2013. The Company has not yet determined the impact of the amendments to IFRS 10 on its financial statements.

Continued…

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Future accounting changes (Continued)
IFRS 11 Joint Arrangements ("IFRS 11") replaces the guidance in IAS 31 *Interests in Joint Ventures*. Under IFRS 11, joint arrangements are classified as either joint operations or joint ventures. IFRS 11 essentially carves out of previous jointly controlled entities, those arrangements which although structured through a separate vehicle, such separation is ineffective and the parties to the arrangement have rights to the assets and obligations for the liabilities and are accounted for as joint operations in a fashion consistent with jointly controlled assets/operations under IAS 31. In addition, under IFRS 11 joint ventures are stripped of the free choice of equity accounting or proportionate consolidation; these entities must now use the equity method.

Upon application of IFRS 11, entities which had previously accounted for joint ventures using proportionate consolidation shall collapse the proportionately consolidated net asset value (including any allocation of goodwill) into a single investment balance at the beginning of the earliest period presented. The investment's opening balance is tested for impairment in accordance with IAS 28 *Investments in Associates* and IAS 36 *Impairment of Assets*. Any impairment losses are recognized as an adjustment to opening retained earnings at the beginning of the earliest period presented. The Company intends to adopt IFRS 11 in its financial statements for the annual period beginning on October 1, 2013. The Company has not yet determined the impact of the amendments to IFRS 11 on its financial statements.

IFRS 13 Fair Value Measurement ("IFRS 13") converges IFRS and US GAAP on how to measure fair value and the related fair value disclosures. The new standard creates a single source of guidance for fair value measurements, where fair value is required or permitted under IFRS, by not changing how fair value is used but how it is measured. The focus will be on an exit price. IFRS 13 is effective for annual periods beginning on or after January 1, 2013, with early adoption permitted. The Company has not yet determined the impact of the amendments to IFRS 13 on its financial statements.

5. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. Management considers the Company's capital structure to primarily consist of the components of shareholder's equity.

The properties in which the Company currently has an interest are in the exploration and evaluation stage; as such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Continued…

5. CAPITAL MANAGEMENT (Continued)

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the three months ended June 30, 2013. Neither the Company nor its subsidiaries are subject to externally imposed capital requirements.

6. FINANCIAL RISK FACTORS

There have been no changes in the risks, objectives, policies and procedures from the previous period. The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk
The Company's credit risk is primarily attributable to receivables. The receivables primarily relate to sales tax due from the Federal Government of Canada. The Company has no significant concentration of credit risk arising from operations. Management believes that the credit risk concentration with respect to its receivables is remote.

Liquidity risk
The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms. The Company has sufficient cash to cover its operating costs however it will require further cash to fund its 2014 planned work program.

Market risk
(a) Interest rate risk
The Company has cash and cash equivalents balances that earn interest at nominal rates and no interest-bearing debt therefore, interest rate risk is minimal.

(b) Foreign currency risk
All of the Company’s administrative expenditures are transacted in Canadian dollars. The Company funds certain expenses in the United States on a cash call basis using US dollar currency converted from its Canadian dollar bank accounts held in Canada. Management does not hedge its foreign exchange risk. A 1% change in foreign exchange rates between the Canadian and US dollar at June 30, 2013 would not have a significant impact on the Company’s condensed consolidated interim financial statements.

(c) Price risk
The Company is exposed to price risk with respect to commodity prices. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

(d) Sensitivity analysis
Based on management's knowledge and experience of the financial markets, the Company does not expect material movements in the underlying market risk variables over the next three months.

7. CASH AND CASH EQUIVALENTS

The Company's cash equivalents consist of short term money market instruments that accrue interest between 1.25% to 1.35% per annum during the period and are redeemable at any time without penalty.

Balance, June 30, 2013	3,237	6,396	9,633
Carrying Value			
At September 30, 2012	$ 13,949	$ 15,728	$ 29,677
At June 30, 2013	$ 11,708	$ 11,300	$ 23,008

11. INVESTMENT

In October 2012, the Company acquired a 25% interest in Nord Iron Mines ("Nord Iron"), a private company. The Company exercises significant influence over Nord Iron and accordingly accounts for its investment on an equity method basis. Nord Iron acquired mineral interests in certain claims however title ownership is currently being litigated. At June 30, 2013, the Company has recorded an equity loss of $7,500 with respect to its investment in Nord Iron.

(EXPRESSED IN CANADIAN DOLLARS)

12. EXPLORATION AND EVALUATION EXPENDITURES

On September 15, 2010, the Company entered into an agreement with Weststar Resources Corp. ("Weststar") to purchase the outstanding capital of Weststar's wholly-owned subsidiary, Canadian Sovereign Coal Corp. ("CSCC"). CSCC's only assets were an 80% interest in nine coal exploration licenses and eight coal exploration license applications located in Ellesmere Island, Nunavut. Weststar's 80% interest in the claims was acquired pursuant to a Letter of Intent dated March 18, 2009 between Hunter Exploration Group ("Hunter") and Weststar.

On September 20, 2010, the Company, Weststar and Hunter entered into an agreement whereby Weststar was released from any obligations or commitments under the original Letter of Intent dated March 18, 2009 and a 100% interest in the coal licenses and license applications was transferred to CSCC. As consideration for the September 15, 2010 and September 20, 2010 agreements, in December 2010, the Company issued 500,000 common shares valued at $50 to Weststar and 1,000,000 common shares valued at $100 to Hunter. In addition, commencing on December 1, 2013, the Company is obligated to pay $50,000 representing annual advance royalty payments in connection with the licences. Hunter retained a 2% royalty on the licenses of which 1% can be purchased by the Company for $1,000,000.

On April 12, 2011, the Company entered into an agreement to purchase all of the issued and outstanding capital of 5200 Nunavut Ltd. ("5200") from arm's length third party vendors. The only assets held by 5200 were interests in seven coal exploration licences located in Nunavut. As consideration for the acquisition, the Company paid $15,700 and issued 1,000,000 shares valued at $140,000.

During fiscal 2011, the Company also applied for 51 coal exploration licences which have been granted. In August 2012, the Company applied for an additional 11 coal exploration licences. The licences for these applications were granted in April 2013. In May 2013, the Company applied for two coal exploration licenses near Pond Inlet on Baffin Island.

In June 2013, seven of the licence blocks held by the Company expired. The Company has submitted applications to reacquire the area covered by the expired licences.

At June 30, 2013 and September 30, 2012, expenditures incurred were as follows:

	June 30, 2013	September 30, 2012
Acquisition costs:		
Balance, beginning of the period	$ 280,022	$ 265,829
Additions during the period	10,877	14,193
Acquisitions, end of period	290,899	280,022
Deferred exploration costs:		
Balance, beginning of the period	4,061,657	528,907
Geologists and consultants	326,361	1,087,822

13. RELATED PARTY TRANSACTIONS

Related parties include members of the Board of Directors, Executive Officers and any companies owned or controlled by them or any companies where they are also a director or officer.

Trading Transactions
The Company entered into the following transactions with related parties

	Nature of transactions	Notes	Nine months ended June 30, 2013	Nine months ended June 30, 2012
West Oak Capital	Management fees	a	$ 72,000	$ 84,000
Abraham Jonker	Management fees	b	$ 72,000	$ 138,000
Olga Nikitovic	Management fees	c	$ 45,000	$ 54,000
Aird & Berlis	Legal fees	d	$ 8,905	$ 175,758
Evolving Gold	Rent	e	$ 13,500	$ 7,500

a) West Oak Capital Partners Inc. ("West Oak") is owned by R. B. Duncan, the Company's Executive Chairman of the Board. The fees paid to West Oak are included in management fees.

b) Abraham Jonker is the Company's CEO. The fees are included in management fees.

c) Olga Nikitovic is the CFO of the Company. The fees paid relate to financial management and accounting services and are classified as management fees.

d) Tom Fenton, Director and Corporate Secretary for the Company is a Partner with Aird & Berlis LLP. Fees relate to legal services. General corporate legal fees of $8,905 (2012: $135,925) are reflected as professional fees and fees related to the private placements of $Nil (2012: $39,833) are reflected as share issue costs. Legal fees included in accounts payable at June 30, 2013 are $7,521 (2012: $2,935).

e) The Company shares office space with Evolving Gold Corp. ("Evolving Gold") and accordingly pays rent of $1,500 per month to Evolving Gold. The Company and Evolving Gold share one common officer and two common directors. The costs are included in office, rent and miscellaneous expense.

During the period the Company made an investment in Nord Iron Mines Inc., a company related by virtue of one common officer and director.

Compensation of key management personnel

	Notes	Nine months ended June 30, 2013	Nine months ended June 30, 2012
Salaries	a	$ 189,000	$ 276,000
Share-based payments	b	$ -	$ 746,779

a) The Company does not pay any directors' fees nor does the Company pay any health or post employment benefits. The salaries include the fees for the Executive Chairman, CEO and CFO included in trading transactions above.

b) Share-based payments are the fair value of options granted to key management and directors.

(EXPRESSED IN CANADIAN DOLLARS)

14. CAPITAL STOCK, STOCK OPTIONS AND WARRANTS

Capital Stock

The Company has authorized an unlimited number of common shares without par value. As at June 30, 2013 and September 30, 2012, the Company had 43,449,750 common shares outstanding.

Share purchase warrants

At June 30, 2013, warrants were outstanding enabling holders to acquire shares as follows:

		Outstanding and Exercisable	
Expiry Date	Exercise Price $	Number of Shares	Remaining contractual life (years)
March 1, 2014	0.30	21,500,000	0.67
November 4, 2014	0.80	4,902,000	1.34
		26,402,000	0.79

During April and May 2013, 1,625,000 options exercisable at $0.20 per share expired.

The following is a summary of the warrant transactions for the nine months ended June 30, 2013 and the year ended September 30, 2012.

	Nine months ended June 30, 2013		Year ended September 30, 2012	
	Number Of Warrants	Weighted Average Exercise Price $	Number Of Warrants	Weighted Average Exercise Price $
Balance, beginning of the period	28,027,000	0.38	23,100,000	0.29
Warrants issued pursuant to private placements	-	-	4,300,000	0.80
Warrants issued to brokers pursuant to private placements	-	-	602,000	0.80
Warrants issued pursuant to acquisition of Mercury	-	-	25,000	0.20
Warrants expired	1,625,000	0.20	-	-
Balance, end of period	26,402,000	0.39	28,027,000	0.38

(EXPRESSED IN CANADIAN DOLLARS)

14. CAPITAL STOCK, STOCK OPTIONS AND WARRANTS (Continued)

The following weighted average assumptions were used for the Black-Scholes valuation of warrants issued for the nine months ended June 30, 2013 and the year ended September 30, 2012.

	Nine months ended June 30, 2013	Year ended September 30, 2012
Risk-free interest rate	-	1.10%
Expected life of warrants	-	2.92 years
Expected annualized volatility	-	92.5%
Expected dividend rate	-	0.00%

Stock options

The Company may grant stock options pursuant to a stock option plan (the "Plan") which was established in accordance with the policies of the TSX Venture Exchange. The Board of Directors administers the Plan, pursuant to which the Board may grant from time to time incentive stock options up to an aggregate maximum of 10% of the issued and outstanding shares of the Company to directors, officers, employees, consultants or advisors. The options can be granted for a maximum of 10 years.

As at June 30, 2013, the following incentive stock options were outstanding:

		Options Outstanding and Exercisable	
Expiry Date	Exercise Price $	Number of Options Outstanding	Weighted average remaining contractual life (years)
February 21, 2016	0.20	1,000,000	2.65
June 21, 2016	0.20	100,000	2.98
August 1, 2016	0.20	500,000	3.08
November 1, 2016	0.50	200,000	3.33
November 4, 2016	0.50	1,600,000	3.34
January 28, 2021	0.20	259,975	7.58
		3,659,975	3.41

(EXPRESSED IN CANADIAN DOLLARS)

14. CAPITAL STOCK, STOCK OPTIONS AND WARRANTS (Continued)

Stock options (Continued)

The following is a summary of the stock option transactions for the nine months ended June 30, 2013 and the year ended September 30, 2012.

	Nine months ended June 30, 2013		Year ended September 30, 2012	
	Number Of Options	Weighted Average Exercise Price	Number Of Options	Weighted Average Exercise Price
Balance, beginning of the period	3,819,950	0.34	1,600,000	0.20
Options granted	-	-	2,100,000	0.50
Options issued pursuant to acquisition of Mercury Capital	-	-	419,950	0.20
Options expired	(159,975)	0.20	(300,000)	0.20
Balance, end of period	3,659,975	0.35	3,819,950	0.34

The following weighted average assumptions were used for the Black-Scholes valuation of options granted for the nine months ended June 30, 2013 and the year ended September 30, 2012.

	Nine months ended June 30, 2013	Year ended September 30, 2012
Risk-free interest rate	-	1.45%
Expected life of options	-	5.2 years
Expected annualized volatility	-	131.8%
Expected dividend rate	-	0.00%

Stock based compensation

The Company granted no options for the nine months ended June 30, 2013 (2012: 2,100,000). The options vest immediately upon grant. Total share-based compensation for the nine months ended June 30, 2013 was $Nil (2012: $746,779) and has been expensed with a corresponding amount being recorded in the equity settled share-based payments reserve.

15. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

Significant non-cash financing and investing transactions for the nine months ended June 30, 2013 consisted of:

a) Decrease in accrued exploration and evaluation expenditures of $163,962.

Significant non-cash financing and investing transactions for the nine months ended June 30, 2012 consisted of:

a) The issuance of warrants for services at $110,570.
b) Decrease in accrued exploration and evaluation expenditures of $1,080,214.
c) Decrease in accrued prepaid transaction costs of $11,672.
d) Issued 3,349,750 shares valued at $1,373,398, 419,950 options valued at $138,769 and 25,000 warrants valued at $6,048 to Mercury for the acquisition of net assets of Mercury.

16. SEGMENTED INFORMATION

The Company primarily operates in one reportable operating segment, being the acquisition and exploration of mineral properties in Canada. As the operations comprise in a single reporting segment, amounts disclosed in the condensed consolidated interim financial statements also represent segment amounts.

17. COMMITMENTS AND CONTINGENCIES

The Company's exploration and evaluation activities are subject to various federal and provincial laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

18. SUBSEQUENT EVENTS

In July 2013, the Company granted 200,000 options exercisable at $0.20 per share for a period of five years to a director.

On July 26, 2013, twenty coal licences located in Axel Heiberg expired.
