NOTICE TO READER

Management has prepared the condensed interim statements of the financial position of KR Investment Ltd. as at February 28, 2021 and 2020, and the condensed interim statements of comprehensive income, change in equity and cash flows for the six months period then ended. In accordance with National Instruments 51-102 released by the Canadian Securities Administrator, the Company discloses that they have not been audited or reviewed. Readers are cautioned that these statements may not be appropriate for their purposes.

Vancouver, B.C.
April 28, 2021

The accompanying notes are an integral part of these financial statements.

The accompanying notes are an integral part of these financial statements.

1. NATURE OF OPERATIONS AND GOING CONCERN

On August 3, 2010, KR Investment Ltd. (the "Company") was incorporated under the *Business Corporations Act* (British Columbia) as a Capital Pool Company ("CPC") as defined in TSX Venture Exchange ("TSX-V") Policy 2.4. The Company completed its initial public offering on March 24, 2011 and its common shares commenced trading on the TSX-V on March 29, 2011. On February 2, 2018, the Company was transferred to the NEX board of the TSX-V due to the Company no longer satisfying the Exchange's tier maintenance requirements for Tier 2 issuers.

The head office, principal address and records office of the Company are located at 363 West 6th Avenue, Vancouver, British Columbia, V5Y 1L1. The Company's registered address is at the same address.

On March 27, 2013, the Company acquired an undivided 20% working interest in certain Provost petroleum and natural gas rights, and related tangible assets located in Provost, Alberta. The transaction constituted the Qualifying Transaction of the Company under TSX-V Policy 2.4 Capital Pool Companies, and was approved by the TSX-V on March 28, 2013. Effective April 1, 2013, the Company became a Tier 2 oil and gas issuer.

The operating license for the Company's 20% working interest was previously held by Canadian Oil & Gas International Inc., a company which filed for receivership on October 26, 2015. As a consequence, the Alberta Energy Regulator ("AER") suspended the license on February 18, 2016 resulting in the Company not receiving any revenues since November 30, 2017. During the year ending August 31, 2019, third parties acquired the 80% working interest from Canadian Oil & Gas International Inc. and partially reactivated the Provost operations license. As of November 18, 2019, AER reversed its suspension, however, the Company's continuation of its operations was further dependant on the third party's full acquisition of all necessary oil and gas leases. As of August 31, 2020, the Company entered into an agreement with one of the third parties co-owners of the 80% working interest, who purchased the Company's 20% working interest for its carried value of \$1 and assumed all its current and future reclamation and decommissioning liabilities associated with the working interest.

Management of the Company continues to investigate and pursue other opportunities of merit to enhance shareholder value of the Company.

These condensed interim financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. During the six months period ended February 28, 2021, the Company had a net loss of \$179,678 and had an accumulated deficit of \$3,902,832 since inception. These factors raise significant doubt about the Company's ability to continue as a going concern. The continuance of the Company's operations is dependent on obtaining and maintaining sufficient debt or equity financing in order to realize the recoverability of the Company's investments. Management is of the opinion that sufficient working capital will need to be obtained from financing and operations to meet the Company's liabilities and commitments as they become due, although there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These financial statements do not reflect any adjustments that may be necessary should the Company be unable to continue as a going concern.

**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE SIX MONTHS PERIOD ENDED FEBRUARY 28, 2021 AND 2020**

(Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN (continued)

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or ability to raise funds.

2. BASIS OF PRESENTATION

(a) Statement of Compliance

The condensed interim financial statements, including comparative figures, have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). These condensed interim financial statements have been prepared in accordance with IFRS applicable to the preparation of interim financial statements, including International Accounting Standard ("IAS") 34 Interim Financial Reporting.

(b) Basis of Measurement

The condensed interim financial statements have been prepared on a historical cost basis except for financial instruments described in Note 3(f), which are measured at fair value.

In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The accounting policies set out below have been applied consistently to all years presented in these financial statements as if the policies have always been in effect.

(c) Functional and Presentation Currency

The condensed interim financial statements are presented in Canadian dollars, which is the Company's functional currency.

(d) Use of Estimates and Judgments

The preparation of condensed interim financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts within the condensed interim financial statements. Judgments, estimates and underlying assumptions are reviewed on a continuous basis and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In preparing the condensed interim financial statements, management makes judgments regarding the application of IFRS for the Company's accounting policies. Significant judgments relate to the determination of the recovery of due from related parties, deferred income tax assets and liabilities, and assumptions used in valuing options in share-based payments calculations. The condensed interim financial statement areas that require significant estimates and judgments are set out in the following paragraphs:

2. BASIS OF PRESENTATION (continued)

(d) Use of Estimates and Judgments (continued)

Cash Generating Unit (CGU)

The Company's assets are aggregated into cash-generating units ("CGU"), based on the CGU's ability to generate independent cash inflows. The determination of the Company's CGUs is based on management's judgments in regards to shared infrastructure, geographical proximity, resource type and materiality.

Share-Based Payments

Management uses judgment when applying the Black-Scholes option pricing model to determine the fair value of the options granted during the year and forfeiture rates. Volatility is calculated using historical trading data of the Company. The zero coupon bond yield per the Bank of Canada is used as the risk-free rate.

Income Taxes

Judgments are made by management at the end of the reporting period to determine the likelihood that deferred income tax assets will be realized from future taxable earnings. Assessing the recoverability of deferred income tax assets requires the Company to make judgments related to the expectations of future cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that assumptions regarding future profitability change, there can be an increase or decrease in the amounts recognized in profit or loss in the period in which the change occurs.

3. SIGNIFICANT ACCOUNTING POLICIES**(a) Cash and Cash Equivalents**

Cash and cash equivalents include cash in bank accounts and, when applicable, cashable securities that on acquisition have a term to maturity of three months or less, or may be redeemed during this period. Cash and cash equivalents are highly liquid marketable securities and deposits, which are designated as fair value through profit or loss and are recorded at their fair values with changes recognized in net loss. Fair values are determined by reference to quoted market prices at the statement of condensed interim financial position date. The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance to be cash equivalents. The Company did not have any cash equivalents as at February 28, 2021 and August 31, 2020.

(b) Impairment of Long-Lived Assets

At each reporting date, the Company reviews the carrying amounts of its tangible assets to determine whether there are any indications of impairment. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any.

When the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the CGU to which the asset belongs. The recoverable amount is determined as the higher of fair value less direct costs to sell and the asset's value in use. In assessing value in use, the estimated future cash flows are discounted to their present value. Estimated future cash flows are calculated using estimated recoverable reserves, estimated future commodity prices and the expected future operating and capital costs. The pre-tax discount rate applied to estimated future cash flows reflects current market assessments of the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted. If the carrying amount of an asset or CGU exceeds its recoverable amount, the carrying amount of the asset or CGU is reduced to its recoverable amount through an impairment charge to the statement of loss and comprehensive loss.

Assets that have been impaired are tested for possible reversal of the impairment at each reporting date for any indications that the impairment loss may have reversed. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. When an impairment subsequently reverses, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but only so that the increased carrying amount does not exceed the carrying amount that would have been determined (net of depreciation, depletion and amortization) had no impairment loss been recognized for the asset or CGU in prior periods. A reversal of impairment is recognized as a gain in the statement of loss and comprehensive loss.

(c) Share Issuance Costs

Professional, consulting and regulatory fees as well as other costs directly attributable to financing transactions are reported as deferred financing costs, if completion of the transaction is considered to be more likely than not. Share issuance costs are charged to share capital when the related shares are issued. Costs relating to financing transactions that are not completed, or for which successful completion is considered unlikely, are charged to operations.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Basic and Diluted Earnings (Loss) per Share

Basic and diluted earnings (loss) per share is computed by dividing the net earnings (loss) for the years available to common shareholders (numerator) by the weighted average number of common shares outstanding during the year (denominator). The Company applies the treasury stock method in calculating diluted earnings (loss) per share. Diluted earnings (loss) per share excludes all dilutive potential common shares if their effect is anti-dilutive. For the six months period ended February 28, 2021 and 2020, the existence of stock options causes the calculation of diluted loss per share to be anti-dilutive. Accordingly, diluted loss per share is equal to basic loss per share.

(e) Income Taxes

Tax provisions are recognized when it is probable that there will be a future outflow of funds to a taxing authority. In such cases, a provision is made for the amount that is expected to be settled, where this can be reasonably estimated. This requires the application of judgment as to the ultimate outcome, which can change over time depending on facts and circumstances. A change in estimate of the likelihood of a future outflow and/or in the expected amount to be settled would be recognized in income in the year in which the change occurs.

Tax provisions are based on enacted or substantively enacted tax laws. Changes in those laws could affect amounts recognized in income in the year of change, which would include any impact on cumulative provisions, or in future periods.

Deferred tax assets or liabilities arising from temporary differences between the tax and accounting values of assets and liabilities are recorded based on tax rates expected to be enacted when these differences are reversed. Deferred tax assets are recognized only to the extent it is considered probable that those assets will be recovered. This involves an assessment of when those deferred tax assets are likely to be realized and judgment as to whether or not there will be sufficient taxable profits available to offset the tax assets when they do reverse. This requires assumptions regarding future profitability and is therefore inherently uncertain. To the extent assumptions regarding future profitability change, there can be an increase or decrease in the amounts recognized in respect of deferred tax assets or liabilities, as well as in the amounts recognized in income in the period in which the change occurs.

(f) Financial Instruments

Financial assets

The Company classified its financial assets in the following categories: at fair value through profit and loss ("FVTPL"), at fair value through other comprehensive income (FVTOCI), or at amortized cost. The determination of the classification of financial assets is made at initial recognition. Equity instruments that are held for trading (including all equity derivative instruments) are classified as FVTPL; for other equity instruments, on the day of acquisition the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate them as at FVTOCI.

**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE SIX MONTHS PERIOD ENDED FEBRUARY 28, 2021 AND 2020**

(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Financial Instruments (continued)

The Company's accounting policy for each of the categories is as follows:

Financial assets at FVTPL: Financial assets carried at FVTPL are initially recorded at fair value and transaction costs are expensed in the statement of (loss) income. Realized and unrealized gains and losses arising from changes in the fair value of financial assets held at FVTPL are included in the statement of (loss) income in the year. Financial instruments included under this classification include cash.

Financial assets at FVTOCI: Financial instruments designated at FVTOCI are initially recognized at fair value, net of directly attributable transaction costs, and are subsequently measured at fair value with changes in fair value recognized in other comprehensive income, net of tax.

Financial assets at amortized cost: A financial asset is measured at amortized cost if the objective of the business model is to hold the financial asset for the collection of contractual cash flows, and the asset's contractual cash flows are comprised solely of payments of principal and interest. They are classified as current assets or non-current assets based on their maturity date, and are initially recognized at fair value and subsequently carried at amortized cost less any impairment.

Impairment of financial assets

An entity is required to recognize expected credit losses when financial instruments are initially recognized and to update the amount of expected credit losses recognized at each reporting date to reflect changes in the credit risk of the financial instruments.

Impairment losses on financial assets carried at amortized cost are reversed in subsequent periods, if the amount of the loss decreases and the decrease can be objectively related to an event occurring after the impairment was recognized.

The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost.

Financial liabilities

The Company classifies its financial liabilities into one of two categories, depending on the purpose for which the liability was incurred. The Company's accounting policy for each category is as follows:

Fair value through profit or loss – This category comprises liabilities acquired or incurred principally for the purpose of selling or repurchasing in the near term. They are carried in the statement of

**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE SIX MONTHS PERIOD ENDED FEBRUARY 28, 2021 AND 2020**

(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Financial Instruments (continued)

financial position at fair value with changes in fair value recognized in the statement of loss and comprehensive loss.

Amortized cost - This category includes accounts payable and accrued liabilities, and due to related parties, which are recognized at amortized cost using the effective interest method.

Transaction costs in respect of financial instruments at fair value through profit or loss are recognized in the statement of loss and comprehensive loss immediately, while transaction costs associated with all amortized costs are included in the initial measurement of the financial instrument.

(g) Share-Based Payments

The Company grants share-based awards to employees, directors, officers and non-employees under its stock option plan. Share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments on the grant date. The fair value of share-based payments is determined using the Black-Scholes option pricing model, and each tranche is recognized on a graded-vesting basis over the period in which options vest. The amount recognized as a share-based payment expense during a reporting period is adjusted to reflect the number of awards expected to vest. The offset to this recorded cost is to contributed surplus. No expense is recognized for awards that do not ultimately vest. Share-based payment arrangements with non-employees in which the Company receives goods or services are measured based on the estimated fair value of the goods or services received, unless the fair value cannot be estimated reliably, in which case the Company will measure their value by reference to the fair value of the equity instruments granted.

When stock options are exercised, the proceeds received, together with any related amount in contributed surplus, are credited to share capital.

(h) Provisions

Legal matters

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the statement of financial position date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows at a pre-tax rate. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount receivable can be measured reliably.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(i) Property and Equipment

Property and equipment includes crude oil and natural gas development and production assets, including costs incurred in developing oil and natural gas reserves and maintaining or enhancing production from such reserves and directly attributable general and administrative costs. Property and equipment is measured at cost, less accumulated depletion and depreciation and accumulated impairment losses.

Gains and losses on disposal of an item of property and equipment, including crude oil and natural gas interests, are determined by comparing the proceeds from disposal with the net carrying amount of property and equipment and are recognized within "gain or loss on sale of assets" in income (loss).

Subsequent measurement

Costs incurred subsequent to the determination of technical feasibility and commercial viability and the costs of replacing parts of property and equipment are recognized as oil and natural gas interests only when they increase the future economic benefits embodied in the specific asset to which they relate. All other expenditures are recognized in earnings as incurred. Capitalized oil and natural gas interests generally represent costs incurred in developing proved and/or probable reserves and bringing on or enhancing production from such reserves, and are accumulated on a field or geotechnical area basis. The carrying amount of any replaced or sold component is derecognized at the time of replacement or sale. The costs of the day-to-day servicing of property and equipment are recognized in earnings as incurred.

Depletion and depreciation

The net carrying value of development or production assets is depleted on a field-by-field basis using the unit-of-production method by reference to the ratio of production in the year to the related proven reserves. Production and reserves of natural gas are converted to equivalent barrels of crude oil on the basis of six thousand cubic feet of gas to one barrel of oil. Changes in reserve estimates used in prior periods, such as proved reserves that affect the unit-of-production calculations do not give rise to prior year adjustments and are dealt with on a prospective basis.

**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE SIX MONTHS PERIOD ENDED FEBRUARY 28, 2021 AND 2020**

(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(j) Revenue recognition

Revenue from sales of petroleum and natural gas is recognized when title and risks and rewards of ownership pass to an external party, the amount of revenue and costs incurred or to be incurred in respect of the transaction can be measured reliably and it is probable that the economic benefits associated with the transaction will flow to the Company. Revenue is measured net of discounts, customs duties and royalties.

(k) Recent Accounting Pronouncements

Certain new accounting standards, amendments to standards and interpretations have been issued, effective for annual years beginning on or after January 1, 2019:

(a) *IFRS 16 – Leases*

IFRS 16 is a new standard that sets out the principles for recognition, measurement, presentation, and disclosure of leases including guidance for both parties to a contract: the lessee and the lessor. IFRS 16 eliminates the classification of leases as either operating or finance leases, as is currently required by *IAS 17 – Leases*, and instead introduces a single lessee accounting model. This standard is effective for years beginning on or after January 1, 2019 and did not have a significant impact on the Company's condensed interim financial statement presentation.

There are no other IFRSs or IFRIC Interpretations that are not yet effective that would be expected to have a material impact on the Company.

KR INVESTMENT LTD.**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS****FOR THE SIX MONTHS PERIOD ENDED FEBRUARY 28, 2021 AND 2020**

(Expressed in Canadian Dollars)

4. SHARE CAPITAL

- (a) Authorized Share Capital: Unlimited number of common shares without par value.

There were no share issuances during the six months period ended February 28, 2021 and 2020. Subsequent to February 28, 2021, the Company closed a portion of its non-brokered private placement (see Note 10).

On November 27, 2020, the Company received shareholder approval for its share consolidation in a ratio of twenty (20) pre-consolidation common shares for one (1) post-consolidation common share in order to increase its flexibility with respect to potential business transactions.

The consolidation was approved by the TSX-V and effective on February 16, 2021, resulting in 1,135,625 post-consolidation issued and outstanding common shares.

- (b) Stock Options

The Company has established an incentive stock option plan for granting options to directors, employees and consultants. The Stock Option Plan is a rolling plan allowing the Company to issue 10% of the outstanding shares for a maximum term of ten years from the day of the grant of stock options.

No stock options were granted during the period ended February 28, 2021 and 2020.

Directors' and Officers' Options

The following table summarizes the continuity of the Company's stock options outstanding:

	Number of Options	Weighted Average Exercise Price
Outstanding, February 28, 2021, August 31, 2020 and 2019	13,125	\$0.88

As at February 28, 2020, the following incentive stock options are outstanding and exercisable:

	Number of Options	Weighted Average Exercise Price	Expiry Date
Directors' and Officers' options	625	\$0.80	March 29, 2021
Directors' and Officers' options	12,500	\$0.88	June 3, 2023
	13,625	\$0.88	

As at February 28, 2021, the weighted average remaining life of the outstanding options was 2.16 years.

Subsequent to February 28, 2021, the Company mutually terminated 3,750 stock options and granted 120,000 stock options at an exercise price of \$0.10 per common share (see Note 10).

**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE SIX MONTHS PERIOD ENDED FEBRUARY 28, 2021 AND 2020**

(Expressed in Canadian Dollars)

5. RELATED PARTY TRANSACTIONS AND BALANCES

The Company has identified its directors and certain senior officers as its key management personnel. The compensation costs for key management personnel and companies related to them were recorded as follows:

- a. During the six months period ended February 28, 2021, the Company was charged a total of \$15,750 (2020 - \$18,900) to operations in consulting fees provided by a company controlled by a director and officer of the Company.
- b. During the six months period ended February 28, 2021, the Company charged a total of \$6,000 (2019 - \$12,000) to operations in pre-paid consulting fees provided by a director and officer of the Company.
During November 2020, \$31,000 in pre-paid consulting expenses to a director and officer of the Company have been written-off upon the resignation of such director and officer.
- c. During the six months period ended February 28, 2021, the Company was charged a total of \$12,600 (2020 - \$8,400) to operations for office premises provided by a company controlled by a director of the Company.

(Expressed in Canadian Dollars)

7. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can ultimately provide returns for shareholders and benefits for other stakeholders. The board of directors does not establish quantitative return on capital criteria for management due to the nature of the Company's business. The Company does not pay dividends and is not subject to any externally imposed capital requirements.

As at February 28, 2021, the Company considers capital to consist of shareholders' equity (deficiency). The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue common shares or long-term debt.

8. FINANCIAL INSTRUMENTS AND RISKS**Financial instruments and fair value measurements**

The Company's financial instruments include cash, accounts payable and accrued liabilities, and due to related parties. The Company classifies its cash as FVTPL. The Company classifies its accounts payable and accrued liabilities, and due to related parties at amortized cost. The fair values of these financial instruments approximate their carrying values because of their current or on demand nature.

	February 28, 2021	August 31, 2020
FVTPL	\$22,059	\$185,266
Amortized cost	\$10,242	\$30,771

Fair values of financial instruments are classified in a fair value hierarchy based on the inputs used to determine fair values.

Certain financial assets and liabilities are measured at fair value on a recurring basis and classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Certain non-financial assets and liabilities may also be measured at fair value on a non-recurring basis. There are three levels of the fair value hierarchy that prioritize the inputs to valuation techniques used to measure fair value, with Level 1 inputs having the highest priority. The levels and the valuation techniques used to value the Company's financial assets and liabilities are described below:

**NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
FOR THE SIX MONTHS PERIOD ENDED FEBRUARY 28, 2021 AND 2020**(Expressed in Canadian Dollars)

8. FINANCIAL INSTRUMENTS AND RISKS (continued)**Financial instruments and fair value measurements (continued)**

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data and require inputs that are both significant to the fair value measurement and unobservable.

The Company's financial assets and liabilities measured at fair value on a recurring basis as of February 28, 2021 are as follows:

	Balance at February 28, 2021	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	\$	\$	\$	\$
Financial Assets:				
Cash	\$ 22,059	\$ 22,059	\$ –	\$ –

Financial Risks

The Company examines the various financial instrument risks to which it is exposed, and assesses the impact and likelihood of those risks. Where material, these risks are reviewed and monitored by management. There have not been any significant changes from the previous year as to how these risks are reviewed and monitored by management. The types of financial instrument risk exposures and the objectives and policies for managing these risk exposures is described below.

Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company is exposed to credit risk through its cash which is held with large Canadian financial institutions, the Company's maximum risk exposure to credit risk is the carrying value of cash of \$22,059.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to short-term interest rates through the interest earned on cash balances; however, management does not believe this exposure is significant.

(Expressed in Canadian Dollars)

8. FINANCIAL INSTRUMENTS AND RISKS (continued)**Liquidity Risk**

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. The Company's accounts payable and accrued liabilities, and amounts due to related parties are all current.

The Company ensures that it has sufficient capital to meet short-term financial obligations after taking into account its administrative obligations. Contractual undiscounted cash flow requirements for financial liabilities as at February 28, 2021 are as follows:

	Less Than 1 Month	1 – 3 Months	4 Months to Less Than 1 Year	Years 1 – 3	Total
Accounts payable and accrued Liabilities	\$ 10,242	\$ -	\$ -	\$ -	\$ 10,242
	\$ 10,242	\$ -	\$ -	\$ -	\$ 10,242

Foreign Exchange Risk

Foreign exchange risk is the risk related to the fluctuation of foreign exchange rates. The Company is not exposed to significant foreign exchange risk.

Commodity Price Risk

The Company's revenues and ability to raise capital to fund operating activities are subject to risks associated with fluctuations in the market price of its commodities. The Company closely monitors commodity prices to determine the appropriate course of action to be taken.

The Company does not use derivative instruments or hedges to manage risks because the Company's exposure to credit risk, interest rate risk and currency risk is small.

9. CIVIL CLAIM

On July 29, 2020, the Company has been named as co-defendant in a civil claim filed at the Provincial Court of Alberta in Calgary, AB. The plaintiff claims against all defendants a total estimated sum of \$20,000 debt of surface lease payments in reference to the Provost oil wells. The Company's financial risk is limited by its former 20% working interest which resulted in the Company to accrue an amount of \$4,000 as of February 28, 2021 (August 31, 2020 - \$4,000). The Company's legal counsel remains in joint negotiations with the plaintiff. A settlement is expected in three to six months.
